we were talking last week about subversive symbolism and we have been talking about this for several weeks and we will continue to do so I don't want people to get the idea that this is just a show about symbolism who are just tuning in this is part of a long tapestry of mind-control methodologies that are employed against the general population symbolism is a hidden language it is a language that is basically reserved for the initiative a specific tradition and those initiates are form the core that understands the language that's being spoken even though it is a wordless language it is a language that is rooted in form an archetype and color and vibration etc okay symbols speak to us at a subconscious level and therefore it becomes all the more important to understand that language because if we do not things are being said to us and they're going directly there bypassing the conscious mind going directly to the subconscious mind and we're not understanding any part of that that information that is actually being put into the deeper recesses of the human psyche without our knowledge once we do become literate of these symbols we can understand what their intent is what the intended message that is being planted is and we can choose whether to take that into us or to reject it at a conscious level but until we become conscious of what these symbols actually do mean and they do have meanings and they are used in very specific ways to elicit those meanings and to then bring about the desired mode of behavior until we do understand that language we're basically powerless to protect ourselves against it to those who may wish to use it as a mechanism of suggestion and control mind control for that matter so last week we were talking about goddess symbolism and how this is used in the modern culture we saw it in symbols of freedom we saw it in symbols of knowledge namely the illuminated torch and then we saw its dark aspect the symbolism of the owl representing the dark elements of the goddess and the goddess tradition or dark terror a the goddess generally represents care it generally represents the ability to recognize truth from falsehood it reckon it generally represents human emotions and the owl is the destruction of all of those things it is basically destroying knowledge for the general public so that a covert group of people can amass all the knowledge and wield it as a weapon it is the destruction of care as we saw in the usage of the owl in the Bohemian groves symbolism last week which is a dark occult group that basically consists of power brokers from all over the world that meet in Northern California nearly usually in July to realize and set forward their intentions for the continuance of their control and oligarchy over the next the course of the next year so the Bohemian Grove symbol is the owl who saw how the owl is used in their major ritual called the cremation of care because it is a ritual that is an absolution ritual designed to forgive them of all of their sins and wrongdoings they're acting as God they'll decide that their sins are forgiven they'll decide that all other wrongdoing can be expunged so that they can go out and do it all over again basically what they're openly doing is cremating care just like the name of the ritual says they're actually destroying the Sacred Feminine within the consciousness so that the people who are affiliated with them and basically do their bidding through the course of the year can just absolve themselves of all cares and concerns for what the negative impacts of whatever they're doing does to anyone else so this is what the ritual is ultimately all about all the cream of care that happens at Bohemian Grove this is an ancient uh analog to rituals that were conducted at Carthage and in in the land of Phoenicia Cana thousands of years ago so this goes back a long way this dark occult tradition and it predates even even those traditions but we also saw how the owl is used on on money in the dollar bill we saw how is used on some corporate logos we saw how it was used in building architecture in bank buildings most notably because of course the Alito cultists controlled the banking industry so these are always we saw it used last week we wrapped up with the owl symbolism last week in one of the ways that is used in our nation's capital which of course is Washington DC we'll be getting into that a little bit more tonight and I want to go back and refer people up to the website to go back to the set of images that we were looking at last week because I want to pick up with image number 14 in the section of the symbolism of the owl so go up to my website at what on earth is happening dot-com if you're not already there click on the radio listen page which is the button at the top left-hand side with the radio microphone and then you're going to on that page see images for tonight's show under the player under the the radio player you'll see images for tonight's show okay and that will say March 8 2011 and you'll see three sets of images the first one will be the symbolism of the owl the second the symbolism of the Dove and the third will say the sacrifice of the goddess so we're looking at the images for the owl symbolism and we're going to pick up with image number 14 in that section okay so image number 14 in the owl section shows an overhead view this is taken right from Google Earth if you have the program Google Earth you can verify that none of the is made up you can just type in Washington DC find the Capitol building and just direct the directional arm a compass east toward the east so that East is pointing upward and you will see this image this is still there anyone can go and do it themselves just by downloading the program Google Earth and finding the Capitol building the Capitol building is a Sacred Feminine dome okay o or what is a breast symbol okay we will look at that in the next section when we talk about null symbolism because what this ultimately represents is the dove inside of the owl or having been consumed by the owl the owl being the dark aspect of goddess symbolism or dark hair having eaten or consumed the positive aspect of the goddess symbolism the nurturing and intuitive and caring truly caring elements which is what Congress is supposed to represent Congress is another name for sexual Union or the coming together of male and female forces masculine and feminine forces and that is the path to true enlightenment is the balance between the masculine aspects of the left brain and the feminine aspects of the right brain or in other words uniting our emotions which is the sacred feminine side of our of our true self with our actions which is the sacred masculine side what we do with what we know that's a process of Congress of Union they call it in different occult traditions the chemical wedding often it is referred to as okay because it is a marriage of solar and lunar forces in this image you can see seated atop what looks like a pure middle type structure which we will go into more in coming weeks I'll look at the extensively the symbolism that is laid out in the street plan of Washington D see we won't be doing that expensively tonight but we will on a future program and you can see that the owl is actually seated atop this pyramidal structure and it is completely surrounding the Capitol building okay it has a symbolic tale represented symbolic feet are representing symbolic ears and wings now in image number 15 if this is difficult for people to see in image number 14 I would suggest that they go to image number 15 which shows an outline of the Owls body and tail okay I've outlined that this is traditionally how this has actually been depicted when other researchers will attempt to outline this and show the symbolism of the owl surrounding the Capitol building um one of the things that I have noticed is that it also has symbolic wings that are outstretched basically to show that um the owl is victorious okay or it has basically uh swooped down and consumed its prey mainly the Capitol building and all of the minds and hearts of the people who make decisions in that building and this is again perfectly expresses the aspects of the dark occult that have infiltrated just about every area of our society in the modern world these occultists put their symbols in a hidden way in a covert way around anything that they have there that they have laid their touch upon you will find one of their marks they never do this in an extraordinarily blatant way they do it in a subtle way in a way that whoever is looking at it would have to have some prerequisite knowledge of mystery tradition symbolism in order to understand the message that is being spoken so to someone who just happened to see this and knows no context they have no context framework for which to understand the symbolism this symbolism is meaningless but for people who are studied in the occult for people without experience in the occult for people who know this language this esoteric language that is reserved for occultists they understand exactly what's being said here and there what is being said here is we own you we own you not only do we own you we've eaten you we've consumed you you're not only owned you're eaten you've been eaten is the message here ok because in the belly of the owl sits the Capitol building itself and they're telling even the people who are puppets at this level of government they're telling the occultists that own those people are telling them you've been devoured because you're serving our agenda whether you know it or not and it speaks volumes to me it this isn't a whisper to me this is a huge shout through a bullhorn right at two inches from your ear but that's because I understand this symbolism and most people do not and therefore they'll readily dismiss it from a left-brain perspective having absolutely no knowledge of what it really means so you know my suggestion to people like that is believe whatever you want enjoy what you have it's the best that's ever going to get and you're never going to see anything in your life improve as long as you remain in that level of pure ignorance but you want to continue to believe that you go right ahead symbols are meaningless they say nothing they don't affect you you're not affected by any of this enjoy what you have that's my only suggestion to people like that because they're stuck in a pure left-brain perspective of the world and they think they have it all figured out and there's nothing that they can learn or understand that that they don't already know good luck with that and enjoy it so that's what I wanted to wrap up in this first section which you know I just really wanted to emphasize what the message is here okay and hopefully people can clearly see that and then you know verify it for themselves we'll be looking more at DC symbolism specifically from overhead images of the street plan in a future week when we talk about how this symbolism is used in different forms of architecture Street plans etc we'll have probably have two shows on that as well again I'm going to spend a lot of time on symbolism because if you don't understand this language you can't understand the mentality of the dark occult and if you don't understand the dark occult you can't counter it you need to know the psychology of the enemy in order to basically counterbalance what they're doing and and and to understand what it is they're doing so tonight we're going to shift gears a little we're going to look at the positive aspects of the goddess symbolism and then unfortunately we need to go to an even darker place and we've already gone and look at how the positive aspect of the goddess symbolism is then ritualistically murdered ritualistically destroyed okay through symbolic world events that are basically human sacrifice rituals done in the light of day for all to see but nonetheless they are they are directed by a covert hidden hand that is basically pulling the strings calling the shots and this is done symbolically okay not only for the fear that it invokes but it is done to symbolically destroy the positive aspects or symbols of the goddess over and over again you can see this and we're coming up to a time when it is particularly important to watch for events as we're going to talk about tonight because we're entering a time period that is very critical for the dark occultists that they revere they hold in high regard it's called the season of sacrifice and it stretches from March 19 to May first and we'll talk more about that as we unfold more of this symbolism I'll probably need to speak on that a little bit next week before we actually enter that season because let's see two weeks from today it will and we will already be in it so I'll probably discuss that in in the first or second part of the show next week but it's a critical time period to understand I'll probably have a couple of slides along with the the show next week to help people to understand that a little bit better this is the time of the year the timeframe of the year known as the season of sacrifice what it is and why so many events that are extremely disturbing and and inspire so much fear in the population occurred during this time period so that will be coming up as well let's start to look at the positive symbol of the goddess the Dove okay so in image number one there I just put the basic symbol a dove a white dove its its wings outstretched and you know illuminated by light this is traditionally been this been a symbol of the goddess okay or the sacred feminine aspects of consciousness from time immemorial this symbol has been used for thousands of years to represent the Sacred Feminine and we can see how many ways that it is employed in religious symbolism in the modern world so what the Dove represents is the human spirit it represents our emotional aspects it represents nurturing care creativity truth um getting in touch with the repercussions of what your actions do to other people knowing that and owning it and taking responsibility for it that's what the Dove ultimately represents this is the positive aspects of the goddess tradition the positive aspects of the whole goddess concept all right now if we look at MA other religious traditions we will see the Dove come up over and over again as well but most notably it comes up in Christianity Christianity has the Dove as one of its primary symbols of its Trinity the Father the Son and the Holy Spirit all right we've already talked about this Trinity many times in past shows and understood how it is but a symbolic analog of thought emotion and action the three manifestations of human consciousness in the world okay the only three ways we can really ultimately manifest or express our consciousness yes we have speech but speech is a manifestation of our thoughts okay so thought and speech and emotions and actions all right these three aspects thought emotion and action are the esoteric meaning of the Trinity in different religious traditions and have been throughout time but the physical personification of these three modalities of consciousness is the exoteric version of the Trinity it's always put outside of the self to represent something that lies outside of you okay to get you to stay focused on the outward instead of turning the attention inward understand what you're made of and to look at your thoughts your emotions your actions and understand standard these are the expressions of consciousness these are the expressions of the divine these are the greatest gifts of the Creator and how we use them is what the whole mystery of life is all about but they always want you to put a take you know remove responsibility from yourself and look outward look to the outside it's only about belief believe in something okay don't don't worry about how you think how you feel and how you act just accept something outside of yourself as something that's going to save you you know from yourself and then you know as long as you believe in that you'll be fine and this is nonsense obviously and this is something that religions want to get people to accept because then they never really live a life of any kind of self-examination they never really lead a life that is truly in pursuit of knowledge that is truly in pursuit of changing one's ways of thinking or or a feeling so that we learn how to really do good works in the world and religion wants to de-emphasize many religious traditions one of the emphasized good works and just say oh it's just about belief or it's just about acceptance or it's just about you know this or that but it's not about actually getting out there and engaging and changing the world through changing your own thoughts and emotions and then applying them through an act of will that's what they don't want you to think about that's what they don't want you to know that's what they don't want you to understand and most of all that's what they don't want you to live because that would truly change the world for the positive that more people did it so in order to a target most effectively the most important component of this they need to remove the Sacred Feminine figure to the extent that they can okay so there's no divine mother in this Trinity right everything happened through male-only aspects okay the Dove isn't considered a woman per se in the Christian tradition oh it's a symbol of a spirit or something that is dead okay not necessarily dead me not imbued with life but a spirit is like a ghost it's something that is not in the physical world it's not present that's what I mean by dead okay the sacred feminine aspect or the Divine Mother of the Trinity has been removed or symbolically killed and is represented only by a spirit the holy spirit depicted as a dumb because in older traditions which is where we talked about Christianity being derived from when we looked at Astro theology in older traditions having this Trinity the Sacred Feminine aspect or the divine mother was often symbolically depicted as a dumb because since it was the lunar aspect of consciousness the moon in its crescent form which we're going to see repeated we're going to see symbolism of the moon and we're going to see crescent moon symbolism coming up okay the moon was was symbolically portrayed as a white dog with its wings outstretched traversing the sky okay the the dark aspects of consciousness meaning those that are internalized not me that they're dark as far as evil see the light aspects are those which we show to others our actions therefore they're solar they're there they're available to see during the day you know for all to see our actions the darker or internalized aspects are our emotions nobody can really immediately you know tell what your internal emotional makeup is upon first meeting it's something that is veiled initially then through your actions they could probably tell what your emotional makeup it is all about but initially it's something that is dark or reserved or veiled therefore it is lunar is something that is analogous to the qualities that represent night or darkness so since it is the symbol of the moon and the Divine Mother all right and we see how the Dove represents the crescent moon okay as it traverses the night sky we saw all of those symbols connected with the goddess in previous sections specifically the section where we talked about Astro theology in the Christian Trinity of Father Son and spirit this has been delegated to a symbol only the divine mother is not depicted so Mary in the Christian tradition is not considered one of the divine elements of the Trinity whereas she has been considered one of the aspects of consciousness and one of the aspects of divinity in every other tradition which uses this anthropomorphized Trinity okay um instead they symbolically replace her with a dub and this is the Holy Spirit again because she is the spirit of the threefold aspect of consciousness our thoughts being the creator aspect okay or the Father God all right that would be mind mental aspects right then the Sacred Feminine or our emotions is the spirit aspect in this mind body spirit connection and of course our actions with her male their masculine in nature we we do them outwardly not inwardly like emotions it is the feminine aspect right the actions are considered a byproduct of thought and emotion which are the father and mother okay and therefore a son a male child is born into the world which is our actions and therefore you have the Son of God and the goddess or the Holy Spirit see so the Holy Spirit is the goddess in the Christian tradition represented by a dove but it is simply Mary in this tradition although the church doesn't officially recognize that because they are masculinizing the Trinity and removing the Sacred Feminine which is the most important aspect of consciousness and if we really want to get to truth or to true care we need to UM hone our emotions we need to actually get in touch with our emotions at a deeper fundamental level because this is what creates true conscience and true understanding of natural law principles if we basically cut this quality out of ourselves who knows what our actions are going to be like they're about not going to be in harmony with truth they're not going to be in harmony with justice or true wisdom they're going to just wander all over the place and basically sometimes they'll be in harmony with natural law and sometimes they won't and it'll be accidental when they're in in harmony with natural law this is what the whole checkerboard floor of the house and Freemason represents until you really advance your consciousness to a higher level you're a wander between light and darkness in your actions never knowing really which is which it means people who cut this part of their themselves out or don't really develop it never really truly know fully whether their actions are in harmony with natural law principles or not whether they are actually acting within their rights or not they don't really know what their rights are and what they are not we talked about that before in our discussions on natural law so understand that the Dove in this context in image number two here is the goddess of the Divine Trinity which ultimately represents our emotions in the thought emotion and action or mind spirit body connection that's what it represents in the esoteric sense okay now in image number three we're going to really understand how this applies and really see how it relates to the human brain physiology which we talked about extensively on the show in the past this is the Christian depiction of Mary the Blessed Mother or the Sacred Feminine aspect of the Trinity okay and this is she is the Holy Spirit in this Trinity but the church would never acknowledge that or or speak of her in such a way because again they want to keep segregated with feminine aspect because this is a male dominator solar cult religion and it's there as a mechanism for control for the continuation of control controlled by the dark cultists that own and control the Vatican and the entire church and continue a pedophile Network which watch the movie uh sex crimes in the Vatican to understand the nefariousness which was with which priests have been shuffled around by high-level people in the Vatican namely the Pope right now the current Pope Benedict okay when he was in a position of Cardinal this guy acted to cover up these sex crimes and basically shuffle the priests around so that they can continue to do the same thing I neglected to post this video in the last uh podcast but I'll put it up on the website this week I'll definitely endeavor to remember to do that so people can watch this one maybe I'll send it out as my file nailing this week I have a file mailing if you get on my mailing list I send it out bimonthly I'm late with it this month because um they usually send it out in the first week but I'm a little late with it because I had a speaking engagement over the over the weekend so um I'll probably send out this documentary I'll put it up on the link to it on the site and send it out in my file nailing for this week let's look at how this goddess symbolism is used in Christianity but what it's saying see if for those who are looking at it from the exoteric point of view this will just be Mary a symbol of Christianity you know of Jesus's mother but they will not really deeply understand the esoteric nature of the symbolism and how powerful it is in what it is actually saying to us so here we see in the left hand image let's focus on the left hand image first okay in image number three on Dougs symbolism alright we see um the depiction of the Father God okay the Creator God God the Father in the heavens okay at the very top of the image bathed in light the clouds are parted he's in another dimension of being angels are around him etc now below that you have the traditional depiction of the Holy Spirit which is the the white dog with its wings outstretched okay and then right underneath that is Mary herself okay now in Mary's heart in this image is the Sun and it says i HS are these are the first three letters of the name of jesus in greek okay Greek in Greek the name Jesus is spelled da de I'm sorry iota a de a Sigma Epsilon Sigma or I us yeah so there's no J per se in Greek as there is no J in classical AK okay so e ASIS or Jesus right ah ei de I'm sorry again now iota ADA Sigma Epsilon Sigma and the first three letters of this are always depicted as the symbolic name for Jesus in Christianity you will see this on banners in Christianity you will see on prayer missiles on hymnals you'll see on a robes of priests you'll see on funerary uh uh cloths that are laid on top of a caskets you'll see on crosses sometimes but most frequently if you notice if you take the time to notice when you receive a host or a piece of Communion it is actually stamped on the communion wafer yhs okay so in most of the time it is some of them have different stylizations on them but you will see this depicted on some of communion wafers so here we see it these three letters on Mary's chest right at her heart level because she is the bearer of the sacred child the sacred masculine child of a right moral action in the world depicted by symbolically representing Jesus were the son she is the night sky the lunar goddess the goddess of the night sky here you see around her ahead is depicted the halo of illumination with stars because she represents as Isis did as Semiramis did okay all names that we talked about in older goddess traditions she represents the night sky okay the heavenly cloak of night and all of the stars within it she is the mother of the stars just like our Sun is a star in this solar system okay she is the mother of it and she is the Bearer because she is the emotional qualities that if they are honed if they are worked with if they are developed give birth to true positive moral action in the world which represents the light or the Sun okay now since she is the Sacred Feminine part of the of the consciousness and specifically she is also physiologically the midbrain of the brain complexes we look when we looked at the brain we saw that the brain stem and cerebellum forms something called the arc complex or the reptilian brain this is the lower consciousness part of the brain that is always reactive is always based in instinct and survival modality only okay never really takes into consideration any higher thought it just reacts okay it doesn't care it just reacts it's fight or flight no doubt it okay if a predator or something dangerous is coming at you you have to make a decision the fight or you run so this is the reactive mode of the brain they are complex above that seats is seated the limbic system the limbic brain this is the million brain were the part of the brain that helps us experience emotion because of the chemicals that it can generate all right so this is the emotional part of the brain and the positive and negative elements of emotion are contained made possible through this part of the brain the limbic system the hippocampus the hypo-thala thalamus and hypothalamus the pituitary gland and pineal gland these are in the midbrain okay so it's all of the sick chrétien parts of the brain all of the parts of the brain that seem secrete any kind of peptides or note or neuro chemicals that basically make up our emotional uh that comprise our emotional makeup so this is what meri represents she is the limbic brain but she is the positive elements of those emotions she isn't the fear element ok then connects down with the r-complex she's the part that connects us with the love emotion the positive side of the emotional polarities which is love and fear ok that's what she represents love all right she represents true care not dark care like the owl represents which devours the goddess in the previous example that we saw Mary represents the pure purity of the dove ok of true care and love and this is what the holy spirit is supposed to represent all right it's the only thing that actually gives birth to through a connection with the creator ok the symbolic representation of the creator okay it's the only thing that gives birth to true right moral action in the world which is symbolically depicted by the Jesus figure okay and has been traditionally represented by the Sun so all of Astro theology is in here is depicted here we have the lunar cult we have the the cult of the stars and planets or the creeks that the cult of the Creator God okay which is the Jehovah aspect here Yahweh slash Jehovah slash creator in general which is depicted up at the top there then the lunar cult depicted by the Dove and then the solar cult depicted by the Sun there in Mary's chest because it's connected with the heart and the emotions now notice that Mary is almost always in different statues that depict her she is standing with a foot upon a serpent crushing the head of a snake okay and in both of these examples we'll move on to the second image momentarily but in both of these examples she is keeping a serpent or a snake or a reptile at bay okay and in doing so she is providing protection specifically in the second example all right we'll move on to that in a minute let's just focus on image number one first on the left hand side I should say you can see that there is a moon symbolically depicted by the way Mary is holding the rosary beads this is a the prayers that are offered to the goddess in Christianity the Hail Mary prayer okay so that's what these rosary beads basically represent Assyria cane of prayers or invocations to the goddess okay they're often used to in the sacrament called penance or reconciliation it's a confession of sins and then you're given to say many of these Hail Marys these prayers invoking the goddess which is your emotions to endeavor not to get you to do the same thing that you did again not to get to get you to stop doing the same thing that you previously did all over again okay and this is the punishment for different sins and as the sins are more severe you get more Hail Marys in the Sacrament of Penance by the priests but anyway that's what this rosary B represents for those may not be familiar with the Christian religious tradition and yes you see the symbol of the cross there at the bottom right next to the snake head that's the bottom of the rosary beads so that's what these beads basically represent is prayers or invocations to the goddess and it's an appeal to the emotional aspects of self to get you to recognize your wrongdoings and not repeat them but it's also they're in the shape of a moon a half moon here okay or maybe slightly less than a half moon if you take the slight dip into consideration there by the top portion of the bead okay so this is a moon um in its approximate of half phase aspect okay she is standing on the serpent the serpent represents the r-complex or the reptile brain clearly okay and as the positive aspects of the limbic system or the mammalian brain getting in touch with the emotions is what will keep the serpent in its proper place in its place as that simply part of the brain that should regulate movement digestion breathing etc and things we need four basic base survival okay and when there is a need to physically um react quickly but to stay in this part of the brain all the time leads to extreme psychopathic thinking and behaviors okay if it's chronic we saw what chronically living in the arc complex of the brain does to the neocortex of the brain we saw actual brain scans on informal podcasts where the the brain is literally devastated the neocortical synaptic firing patterns of the brain are literally shut down and we cannot really engage in higher modalities of thought or in any of the types of thinking that really truly make us human including moral thinking artistic creativity um true intuition or nurturing true scientific thought you know true reason none of this stuff is is possible if the r-complex is ruling the entire brain and what they're what is symbolically being taught here although not out in the open to the to the esoteric initiates it is understood that in unless we really develop the true aspects of the emotional qualities that exist within us we're going to be ruled by the serpent we're going to be ruled by the reptilian consciousness and that's going to lead to basically disorder and ultimately disaster and we're well on our way to that ladies and gentlemen well on our way unless we turn it around by getting out of these juvenile depictions of what these images and symbols really represent thinking that they're actual literal things that these are telling us some kind of mineral story and understand them symbolically for what they really represent and then we would get out of the mind control called religion and out of the mind control called government because we would recognize the reptilian consciousness people that are really ruling us not in any way acting as any kind of servants but rather as serpents okay and we will put that other form of mind control to an end and then maybe we would really begin to think for ourselves because we would understand self instead of being moved by the lower qualities of it namely the r-complex of the brain and reptilian modes of thinking that go along with it reactive thinking so we we see an image number two here or I should say the right hand side of this image and I'll try to wrap this up before the top of the hour we'll connect in the revolution broadcasting in several minutes um we see again Mary depicted as the crowned queen of heaven illuminated she wears in this example the cloak of the stars because she is also the night sky this one is great I mean this one really puts it all together okay she's crowned by the Angels as the Queen of Heaven there put it getting where you put the crown on her head then cloak of the night stars the dark cloak with the pinpoints of light in it okay because she is the night she gives birth to the sacred male child who she's holding it holding in her arms and also is coming out from underneath her cloak at the bottom okay she's holding up a male child and then symbolically burying the male child down at the bottom who represents Jesus or Horus who is coming out from under her cloak or in other words out from the night sky as the son does during the dawn of the big of the new day there's a crescent moon that she is standing upon because she is the moon goddess and she is holding the serpent at bay in the name of protection of the small children which is innocence or care and that's why they want this goddess murdered this goddess needs to be the focal point of true esoteric Christianity instead of being removed from the Trinity this is the worst thing that could have ever happened to this mode of thought which originally was Gnostic thinking in early Christian times which then got taken over by Constantine during a Council of Nicaea and turned into the Sun cult of Sol Invictus but just you know they gave it a different name that's all that's all that happened that's all that the religion the modern religion of Christianity is it's a continuation of pagan solar cult mythology and Constantine is to thank for that through the Council of Nicaea just researching okay that he needed to crush the uprising that was happening because true esoteric Christianity or the gnostic tradition which is about truly knowing oneself understanding one's connection to the divine and getting in touch with all the aspects of consciousness to become a truly awakened person we're starting to catch on and Roman leaders couldn't have that because they would not be able to rule people like that they won't be able to control them so we had to basically denigrate that religion down to the stage of Astra theological nonsense uh again but there you know if you can see through that level and very few can or will acknowledge it because they want their little box they want their box of consciousness to remain safe in if they you know if they can acknowledge that they can see a whole new depth of knowledge and a whole new depth of wisdom unfold right before their eyes through the symbols of their own so-called religion but 99.99 9% of Christians have never even considered any of this in this light at all at all and probably never will because it would they would need to admit that there's something deeper than these that these symbols actually mean it would they would need to admit that they were lied to by the church as it as it operates in today's world and they would need to really acknowledge that ultimately what this tradition is ultimately about in its origins is about the self and changing the self and that's the last thing most people want to deal with or even look at again as I've said before on this show they would rather run a thousand miles an hour in the opposite direction and and meet their death rather than take that true responsibility unto themselves so we have about a couple of minutes before I connect into a revolution broad I'm sorry slip of the tongue there before we connect into Oracle broadcasting I have a caller on the line here we go caller on the talk-show network non-member you're on what on earth is happening what do you have for us hello mark it's Bob from Cincinnati how's it going great Bob great to hear from you all great to talk to you boy you know I'm like Chris who's out there towards you and philia we're all just taking all this in it's it's overwhelming the the amount of depth to these symbols that have been in our eyes for so long but we had no clue of what they've truly meant so thank you again for explaining these symbols to us mark absolutely Bob it's a progression you know it's it's something that really people need to see the tapestry of and it crosses over in so many other disciplines so it takes a wide berth of knowledge in order to put it in its proper perspective but I hope that I've done that in a way that is a somewhat acceptable over the last 50 weeks and we'll continue to do it and break down more and more and hopefully get people to a higher level of understanding about how all of this fits together in the world that they see unfolding around them so Bob I thank you for that and I appreciate you calling in and calling back anytime always love to hear from you okay thanks mark maybe I'll catch you in the next hour I've got a question a deeper question okay no problem just if you want to hold on the line and I'll go back to you when we have some more time I will basically make the transition over to Oracle now and then when we come back from that break I could I could run into some more symbolism and then I can bring you back on a little bit later I will be patient he's not a bob thank you bye-bye all right all right so we're approaching the top of the hour folks bear with me I'm going to connect into Oracle broadcasting right now and you'll be hearing their commercials and announcements until Bob and I'm Shepard put me put me through to the network so here we go is on symbolism and the next many shows will be on symbolism because this is part of an ongoing series and a tapestry of information that we've been discussing for many weeks on this program and the images are critically important they're there you have to really see them to understand what's being discussed here so go up to the website what on earth is happening calm on the left-hand side you'll see a radio listen button okay click that it'll say listen live you click that you're going to be taken to the radio listen page there's a player there if you're listening on Oracle no problem you don't need to use that but underneath that player then will it'll say images for tonight's show and there are three sections owl dove and sacrifice of the goddess okay we're talking about goddess symbolism tonight how it's used the types of things that it's used to elicit what it really represents deep its deep meaning its esoteric meaning okay and we're going to see lots of examples of goddess symbolism and how those two work on the human subconscious mind and what it's really used to represent so we were we covered the owl symbolism last week and at the beginning of this week's show in the earlier hour tonight we're looking at the positive aspects of goddess symbolism than we've been looking at the dumb which represents the goddess in many different occult traditions and we saw how it is used in the Trinity of Christianity to represent the holy spirit we were looking at image number three on the dolphin where we left off and we were looking at how the the symbol of the dog represents the holy spirit in this tradition but it is the removal of the Sacred Feminine that it actually represents because the Sacred Feminine or the mother of the Christian Trinity is the the Mary figure or the Mary character in the stories of Christianity and the birth of Jesus this is because the mum figure represents human emotion okay it is the Sacred Feminine internal quality of consciousness the three qualities of consciousness being thought emotion and action thought being the creator aspect emotion being the sacred feminine aspect or spirit and action being the sacred male aspect or the the things that we actually do with what we know and how we feel what we their into the world through our the combination with a merit of our thought and emotion so we have the Creator figure and then the the sacred mother figure okay giving birth to okay through their union the sacred masculine child of right moral action in the world this is the esoteric or the underlying meaning of these seemingly external symbols that religion gives to us because religion always wants us focused on the external never really turning inward and understanding the internal qualities of ourselves our psyche our consciousness and the ways that we truly work so these are symbolic analogs to qualities of consciousness and moreover they are symbolic analogs to the physiology of the brain we were looking at the second hand side of the right hand side of this image image number three which depicts two representations of Mary or the Blessed Mother in Christian tradition and we see that in each she is holding a serpent at bay or a reptile a snake okay in the left hand image she has her foot upon the head of a snake and the right hand image she is holding a serpent in the sea at bay from reaching these of innocent children okay we saw that the dog is another representation symbolically of the moon and here we see the crescent moon aspect of the goddess because she was in ancient traditions depicted as the moon the delve is a symbolic representation the moon in its crescent aspect at night a white crescent okay depicting the dog with its wings outstretched traversing the night sky here Mary wears the cloak of heaven the dark cloak with the Stars embedded in it she gives birth to the male child depicted underneath their because which is symbolically Jesus it depicts that the night sky bares the Sun into existence at dawn at the break of day okay this is ash crow theology this is basic Astro theological concepts which we have covered in depth on this radio show if you go to the podcast section of my website you will see in them a 50 of the 49 previous podcasts that you can download and listen to to catch up on this tapestry of information will continue with goddess symbolism right after this break [Music] okay we're back on what on earth is happening before the break we were looking at image number three in the dove symbolism section on my website at what on earth is happening calm we find that by clicking the radio listen page and looking at images for tonight's show mark March 8 2011 listed there under the player in image number three to the right hand side we saw Mary as the goddess of night holding a child and symbolically bearing the Sun which is Jesus there under her cloak at the bottom of the crescent moon there and she's being crowned because the goddess is traditionally referred to as the queen of the heavens okay but moreover we want to look at the deep esoteric side of the symbolism from a perspective of what it represents about our consciousness and physiology as well the human brain as I've shown multiple times in the past on this show is broken into three basic complexes the are complex or the reptilian brain which is the lower base instinctual fight-or-flight mechanism of the brain the reactive part and then we have the limbic system which helps us to experience human emotions through the chemicals that it can generate basically it helps us to feel the repercussions of our actions toward other people and then we have the neocortex or the human brain which is controls higher brain functions and truly makes us human because it lets us engage in scientific thought logic reason also the Sacred Feminine or right hemispherical side of it helps us to develop intuition nurturing compassion creativity etc all the things that truly make us human beings so in this image what you're really seeing here is the qualities the emotional qualities of self it's it's about true care okay it's about the nurturing or or intuitive qualities the intuitive qualities of the self and it is about the midbrain or the human limbic brain the positive emotions that we generate through the limbic system which is the part of the brain that really has to be used in conjunction with the neocortical brain okay there needs to be a good two-way communication going okay and that only happens between these two complexes in the brain when we have a balance between the left and right brain hemispheres as we've talked about uh ten fun item on this show in past shows okay so when we do that the limbic brain is operating in its proper capacity to keep the lower base instincts of the reptile complex the r-complex of the brain in its proper place it keeps it at bay so that we don't always chronically live in that flight or fight or flight mode ality and that's what you were seeing here the goddess okay the emotional qualities the limbic system or the million brain the midbrain okay is acting in its capacity to basically generate true err which is the protective quality that keeps us from the extreme negative consequences of the r-complex of the brain which is shown there at the very bottom in both of these examples the are complex ok and you have in in both of the examples the arm the Sacred Feminine is giving birth to the child of right moral actions symbolically depicted by Jesus in this image in on the right hand side and symbolically depicted by the symbol for Jesus on the left hand image which is the Sun within three first three letters of the name of Jesus IHS or in greek that is that is a yota ADA Sigma which is the first three letters of Jesus's name in the Greek language there on the Sun or in Mary's chest the location directly at the heart because again she's the emotional qualities she's the midbrain and she is true care that's ultimately what this represents symbolically and that is a connection to our child like qualities of innocence okay innocence is really what this is ultimately about and if we have those will be protected from the extraordinary negative aspects of the reptilian modality of consciousness which is what we want to alais which is what we want to keep at bay to the extent which is it is within our capability we want it in its proper place to be used when it is truly needed and not to rule us not to rule over the other aspects of our self and personality now let's move on to image number four where we see an image of Christopher Columbus and the Capitol building in Washington DC now what I'm getting at here this is goddess symbolism because we have to look at the names of the of this person in the name of the place which is ostensibly named after him okay we call the the Capitol the seat of government in the United States of the federal government we call it Washington DC Washington of course named after the first president George Washington and DC standing for District of Columbia now ostensibly okay this is named after the founder of the entire land of America Christopher Columbus okay and this is not really why it is named Washington DC as a matter of fact Columbus uh was not actually named Christopher Columbus this is an americanized of variant of this name his actual name was crystal ball crystal ball cologne okay and they took that name and morphed it to make it more akin to the name that they really wanted to name uh the the capital of this country after which was named after the Dove Kalume okay Kalume in the French language means dove and this is the variant for dove in many different languages okay it's basically the Romance language roots of the word for dung in English okay so you can look at it in Spanish and it'll be similar to Kalume in French it is Kalume okay this is the symbol the symbolic name of the goddess because the the goddess who they are naming the District of Columbia after is Columbia and she is named from the Doug Christopher Columbus is named after the Doug Kalume okay it's not named after Columbus in effect they were giving him the goddesses name and then naming the capital after the goddess and atop the Capitol dome which is a feminine breast analog okay it is a sacred feminine symbol of nurturing okay atop of course that is not what is going on in this building I'm just saying that's what it's supposed to be putting the idea into your mind this is the mother okay and Congress as we said before uh previously in the first hour is a a union between male and female it's supposed to be where higher quality minds meet who are balanced to do have the the Sacred Feminine emotion that is balancing their action that is actually guiding their their moral action in the world of course we've fallen horribly from this path the kind of people who are in there are that they have no valence and they are completely selfishly motivated and are just just acting as a pillagers and rapists of this land okay and ultimately they are raping what was originally supposed to be almost like a temple erected to the goddess atop this temple which is the Capitol building there is a depiction of the goddess Columbia they call it the goddess freedom and this is what the original symbolism of the goddess okay the Dove illuminated torch okay the goddess herself depicted as the Divine Mother it is supposed to represent truth and freedom this is what she actually represents in many ancient mystical traditions going back to Egypt going back to Sumer and even predating that she is truth and justice she is the goddess of love and that's what sits atop Capitol building we'll be back right after well that dog will be back on the Intel hub radio show alright folks were back and before the break we were talking about dove symbolism and we were addressing the name that is traditionally ascribed to the goddess which is Columbia it's named after the dog in Romance languages the root of the word dove is Kalume okay so the District of Columbia is actually named for this goddess and this is the positive aspect of the goddess that is the intent here it has become surrounded by the negative aspects of the goddess and used as a mechanism for control in last week's show how the owl which is the dark element of care is surrounds the Capitol building and is actually symbolically of the roads that surround the capital is actually symbolically putting the positive aspects of the goddess or this goddess of freedom inside of the belly of the beast the owl which is used to represent the dark occult okay we saw that last week and at the beginning of this week's show um moving forward to image number five let's look at how main Columbia comes up and this goddess symbolism comes up in modern culture so we're looking at the image for Columbia Pictures a major of motion picture studio okay that puts four tons of of movies in Hollywood all right and we see here the goddess depicted atop a pyramidal shaped staircase okay a platform right she's in the same colored robes as Mary is traditionally depicted because this is the same goddess throughout many different traditions um she is holding the illuminated torch which we saw last week was goddess symbolism and his symbolic of the light or the bearing of the child okay the Sun the light of the Sun and it is also the the wayshower to knowledge okay to understanding what proper moral action in the world really is to understanding one's rights to understanding what one does not have the right to do to knowing what is the action that is required of us in the world okay and understanding has to be built before we can really take any major action in the world but once we have that understanding we need to put it into practice and and not just sit on it not just say okay I know and that's enough that the the final goal which truly brings light to the world is to really uh it has to do with what we do with what we know right action and that's true wisdom that as I've said before on the show I've quoted the Chinese philosopher Yang Ming and he said that to know and not to do is not to know and I would suggest that those are words of wisdom indeed so that's what ultimately that illuminated torch represents its will that is born of the emotional qualities that the true care that has to be born in the heart which Reppert is represented by the goddess okay so again Columbia there you may find that in some a local allegorical movies front put out by Columbia Pictures but they're they're playing on this deep esoteric symbolism to sell their movies make no mistake about it they know the people who chose that symbol as their the symbol of their movie house know what it represents and that's why they're choosing the two basically get you to watch buy and go to their to see their movies we see goddess symbolism in the next image in Starbucks logo which we talked about when we had to talk about the symbology of symbolism of Astro theology on a couple of weeks back so here again you can see the crescent moon just look at the via point of where the the image basically hits the circle where the image of what would be her her tail okay if you're looking at this as some sort of a mermaid again she the goddess is the goddess of the waters in ancient symbolism as well but you can see that there is in uh in the inner circle there a crescent moon shape right around her head okay where the fins and then the crown and star sit and again the moon symbolism is connected with the goddess and the Dove okay if we look at image number seven Columbia Records we see that it is connected with the name Columbia of course Kalume the root of the word dumb okay and this has a symbolic representation this logo of the all I depicted below and we can even see that it has the same lines below that are attributed to the I of course which we looked at as symbolic of the all-seeing eye when we look at the eye symbolism a couple of weeks back so this is a symbolic representation of the Sun that the goddess bears okay we saw that the eye of horus is always depicted as a left eye because it is connected with the right brain okay the right brain hemisphere controls the left side of the body a true eye of horus is always the left eye of horse that never the right eye does the right eye is connecting with the left brain hemisphere and the nurturing intuitive creative qualities which ultimately their proper moral action or conscience into existence into the world through us happens through the left eye which because it symbolically it is not symbolically physiologically it is connected to the right hemisphere of the brain but symbolically that's why the left eye is used to depict the eye of horus the mother of oasis in the Egyptian tradition who are our symbolic analogues in the Christian tradition the the the Sun is of course Jesus and the mother is Mary in image number 8 we see the shield of Columbia University Columbia University ok with three crowns being depicted ok as another representation of the Trinity the Masonic Square the color blue which represents receiving ok or basically right brain qualities in other words receive this it's connected with the Trinity ok it's on the square as a term is used in Freemasonry to basically represent upright action ok uh I would suggest that the square definitely means other things than simply that a specific when it is used in its inverted configuration not in the configuration that you see it there which is pointed upward okay but basically again they're using symbolism of the Trinity and colors and frequencies combined okay to represent something that is supposed to get you to upright action which is your education I would suggest that this aspect of the goddess has also been raped or perverted because of modern university so-called education is basically outcome based education it is not teaching the true Trinity of a true classical education like the Trivium of grammar logic and rhetoric okay which is what those three crowns ultimately represent and it is basically an indoctrination system so if this is another symbolic way that the goddesses is denigrated okay in image number nine Columbia Sportswear here we see the name Columbia used again in conjunction with something that we should wrap ourselves in ok namely clothing it's connected with the Sun symbol here on the left hand side again you'll often see Moon and Sun symbolism used in conjunction with with this name because it's supposed to represent the goddess and the goddess is always connected with both the moon and the Sun she is the moon herself and then she connect she connects with the Sun because that is what she brings into existence again the moon gives way in the night sky to give birth to the Sun at dawn so we see a swastika here a symbolic swastika as part of Columbia Sportswear logo of the swastika is an ancient symbol representing the Sun and its movement throughout the course of the year again the cross okay and then the directional the directional aspects represented by the arms of the cross it symbolically depicts the Sun and its movement on the cross of the zodiac in image number 10 I'm moving a little bit quicker because I want to get to the sacrifice aspect of this before time runs out um this is a great image that's very composite it shows multiple aspects of goddess symbolism tag-teamed on this image of a Visa credit card and what this is symbolically designed to basically elicit through the subconscious mind um this Visa credit card is showing a white house a moon on the horizon and a dove in a hologram there and you'll also see the North Shore credit credit union North Shore Federal Credit Union's logo involved depicting the waters the lighthouse and the square all combined we'll get back to the breakdown of the symbolism in a moment here's another break coming up I'll be right back folks all right folks we're back on what on earth is happening on the Oracle Broadcasting Network part of the Intel hub radio show I'm your host mark passing on my website what on earth is happening comm we are discussing goddess symbolism and we are on image number 10 in the section called of symbolism on my web site we were looking at a Visa credit card and all of the different depictions of goddess symbolism that are basically throughout this this image we see the illuminated torch which is goddess symbolism symbolically depicted as the lighthouse which is basically a huge torch okay we see the moon okay in its full aspect on the horizon okay and the moon is goddess symbolism it is that the goddess is the moon and then we see the Dove on the right-hand side in the hologram in the color blue blue again associated with the right brain of the frequency that says accept this or take this okay see it as something that is good all right that's what blue does we have this hologram there some representing a dove and we see North Shore credit Federal Credit Union and we see above that the depictions of the goddess the goddess of the waters okay the lighthouse light acting as a guide this is all symbolic of knowledge which the goddess represents truth which she represents and the emotional qualities of self represented by the moon there and the Dove okay and of course visa isn't providing any of these things they're just putting the sacred symbolism on something that they want you to take and using symbol using color or frequency okay to basically put the idea in your mind that this is associated with all of those ideas because deep in our ancestral memory deep in the subconscious we understand already what this symbolism represents it's just we need to bring it up to a conscious level so that we understand how it's being used symbolism in and of itself is never positive or negative it's how it's used okay and in this example it's used very subversively against the human consciousness it's selling a product the basic traditional sacred art type of forms okay and that's a form of mind control any way you want to look at it that's what it is in the next image image number 11 the last image in this section before we talk about how the goddess is always symbolically destroyed we see in royalty in specifically British royalty they use the Dove on top of their sectors or wands of power okay and they're basically saying you know we represent the truth we represent the light we represent knowledge we represent wisdom okay we have the divine right to rule they're putting this on top of their sceptre knowing that this is a powerful subconscious archetype so that people will associate all of the positive qualities of the goddess through the dog with them another extraordinary example of how symbolism is used subversively when it comes to people who have no good intention for Humanity but want people to think that they're good okay so we also see the equal armed cross as symbol is on the top different scepters used by the British royal family and we saw this symbolism when we looked at Ashgrove theological symbolism a few weeks ago again those are in the archives section the podcast archive on my website I do specifically want people to go up there make use of that because it's an extraordinary a fountain of information there over the last 50 weeks which I've put together on this show delving into all areas of arcane and esoteric knowledge that I hope people will avail themselves of it's all for free you can download any of them and put them on your whatever mp3 playing device that you have at your disposal so uh please make use of that resource at one on earth is happening calm in the next section what we're going to talk about is how dark occultists who are ultimately running the show always attempt to destroy immolate burn or murder this goddess in some form or another and these are done as sacrifice rituals often in the light of day ok we're going to look at a few examples of this the first image there I depicted I found an example just simply of the the white dove being burned and they burnt this dove to symbolically represent the burning away of peace ok the Dove resents peace because it represents getting in touch with the positive aspects of emotions which is really the only way to lead to peace and this was offered up as a burnt sacrifice or a burnt offering and this was often done to basically bring forward the emotional qualities that were needed to to foster conditions that were necessary for warfare ok they're burning the dove of peace or they're removing it or they're murdering it ok we're going to see examples of this over and over and you have to keep an open mind because this is often something that is deeply mystically connected this is something that the universe may be telling us about in addition that some of these darker cultists okay so we have to understand this could be examples of syncro mysticism and it has been called alright in image number two we talked about this in the first hour the dove being the symbol of the Trinity but it is the removal of the Sacred Feminine divine mother aspect of the Trinity of father mother and child the mother has been removed and told not it is not to be worshiped in the Christian tradition you know it's it's blasphemy if you worship Mary she's just a vehicle for bringing physically bringing Jesus into the world okay and this is a denigration of the Divine Mother okay they're they're making it into a ghost the Holy Ghost they used to call it before they called it the Holy Spirit and the ghost is something that remains only after something is physically gone from the world which they're telling you symbolically the care is physically gone from the world okay they're very specific why the symbolism is used and what it's saying to us if we only know how to read it now the sacrifice element dark occult is ultimately want to destroy care they do this at Bohemian Grove the cremation of care they take a child put it on the water burn it before the owl okay they put the goddess freedom inside the owl at the Capitol dome okay in the owl surrounds it completely freedom is in the belly of the beast the symbol of the dark occult okay then they put the goddess on war memorials you always see a depiction of the goddess often depicted with wings like an angel on a war memorial and different researchers have suggested that they are symbolically sacrificing because war is a human sacrifice ritual let's be honest about it we no longer basically need to force people up pyramids to cut their heart out with obsidian blades like they did in the Aztec empire or they thought that the Sun and shine if they didn't do it they didn't continuously offer blood to the earth but the solar cult that is ultimately ruling things here still does have that belief in general believe it or not as crazy as that may sound they believe that the only way life is allowed to continue is through the offering of blood because they believe that the blood the life force is in the blood as we talked about when talk about life force symbolism represented by blood drops in symbolism and they believe that blood must continuously be offered to the earth in order for life on the earth to continue that is actually one of the other energy vampires mark that's exactly the case that's exactly right so that is just our blood it's our life force that's right and that's what they're stealing and that's what they're sacrificing to their got dark goddess now that the goddess here is not what they are sacrificing - that's what they are sacrificing they are symbolically destroying the goddess of care by taking out all of these physical individuals - the ritualistic act of warfare because that's what it is it's a battlefield as a ritual altar that's what it is sharing these false flag attacks like 9/11 which you've talked about many times and the symbolism at your website what on earth is happening folks that about does it for another edition of the Intel have radio show mark thanks so much for another great what on earth is happening I'm always a pleasure and it's an honor to be part of the in Tahoe radio show here on Oracle broadcasting I hope people will go to my website check out the podcast archives and follow the show in the tapestry that it attempts to provide for a deeper understanding check out my website at what on earth is happening calm and thanks for having me as always Bob sure not a problem really is a wealth of information he has many podcast and you got to follow it all it all connects it's a puzzle if you will and you got to collect those pieces and see when they said when they don't fit so be it but when they do it certainly do fit coming up next lee rogers with live free or die into the Oracle Broadcasting Network I'm Bob tuscan and this has been the Intel hub radio show

What On Earth Is Happening Show #052

Topics: *Occult Season of Sacrifice, Introduction To Freemasonry*

all right at the end of the show last week we were discussing what is known as the occult season of sacrifice and this is a 40 day period which begins at the spring equinox and proceeds to the midpoint of spring which is known as ball purchase not st. vol purchases night this is the fertility rites of spring it's celebrated on the midnight between April thirtieth and May first generally it is known as May Day all right this is the highest Sabbat of the year for ocultist in general but specifically for d'arco cultists if you go to the what on earth is happening website I have put up on the radio listen page if you aren't already there listening in through there as I do for shows that require imagery to be followed along with so that the concepts can be better conveyed if you go up to the radio listen page so go to what on earth is happening click the radio listen page and there you will see images for tonight's show March 22nd 2011 there will be two sections there first section is the occult season of sacrifice consisting of three images and then after that I believe there are 13 images relating to Freemasonry which we'll be getting into shortly we left off covering image number two and we had almost completed that last week but if you look at image number one again shows you the zodiacal wheel and the breakdown of the year according to the houses of the zodiac um you see there before occult Sabbath's depicted by the four great cross signs of the zodiac these are the ruling houses of each season so Taurus Leo Scorpio and Aquarius many people will recognize these as the biblical the biblical lion man bull and eagle and eagle is associated with Scorpio because the Aquila constellation lies within or just near the house of Scorpio in the sky so the lion being Leo the man being Aquarius the bull being Taurus and the evil being Scorpio these each correspond the midpoints of each of these houses of the zodiac correspond to a different go cult Sabbath being midpoint of the respective season in spring the Sabbat is ball purchase not as I've already said in season the ruling sign Leo the midpoint of which is Lamas August 1st or midsummer in autumn the midpoint of Scorpio is the Sabbath known as Solon or hallow masks and that is October 31st and the season of in the season of winter winter the midpoint of Aquarius is February 2nd which is Candlemas also known as Imbolc so these are the four major Sabbath's or holidays if you will of the occult year in image number two which is where we left off last week I was explaining the general movement of the Sun as it passes through the equinoxes point specifically at the spring equinox when it is coming out of the southern hemisphere with relation to the earth to the equator of the earth and into the northern hemisphere so it is moving in its in its apparent trajectory and it's apparent angle with relationship to the earth it is moving upward from its low point of the winter solstice which is December 21st 22nd when it is at 23.5 degrees south latitude that's the angle that it makes with respect to the earth's equator at that date it is at the Tropic of Capricorn that is the low point of the Sun during the course of the year does not it does not get any farther south than that then it precedes northward as the earth moves in its orbit and its yearly orbit around the Sun the apparent angle of the Sun progresses northward until it reaches the equator which is 0 0 degree angle with respect to the Earth's plane of orbit around the Sun at that point it is called an equinox that's the time of year that we call the equinox the spring equinox or the fall equinox when it's moving northward that's the spring equinox ok because it's rising in power the Sun is rising in strength in the northern hemisphere so it is at 0 degrees meaning that the Sun makes a 0 degree angle with respect to the Earth's plane of orbit therefore there are equal amounts of day and night during this time the word equinox comes from Latin equi means equal and NOx means night so it's equal night equal day and night the spring equinox is celebrated on March 19th and this is the biggest day on the occult calendar basically I know I said that it's of all purchased not which is the midpoint of spring but this is even in specifically dark occult traditions viewed as an even higher holiday ok it's the beginning of what is known as the season of sacrifice which ends at the midpoint of spring and this year we saw indeed on March 19th a human sacrifice ritual begun we began bombing the country of Libya long backstory to that obviously you could do the research yourself it's under false pretences and not to say that the dictator of that country isn't an evil human being but you know we're there not for the ostensible motives of course we're there for natural resources which we view is ours too the United States views that them as ours to take wherever and whenever we choose to do so but that being aside the political motivations aside I told you to watch for an event during the season of sacrifice between March 19th and May 1st and you know just like in Iraq we went into Iraq on march 19th now we are going into Libya on March 19 starting yet a third war where we have were waging we're waging Wars of imperialism and aggression unconstitutionally absolutely unconstitutionally in three regions of the world now and we have bases all over the world but were specifically waging undeclared wars in Afghanistan Iraq and now in Libya um this campaign was begun on March 19th the occultists love this date okay and I was basically initiated into the dark occult on this date as well and maybe in the future I'll actually scan some of the documentation that I still have which is some of the very few documents I still do own from those days it's a long backstory to that I went through a basically a spiritual purging at some point and not knowing that I was going to be speaking in this capacity or doing shows like this or presentations like I do because I was basically still somewhat under the mind-control of dark occultism I basically got rid of the vast majority of trappings and document documents that I once had but I still do have a few of them and one of them is an appointment that I received as an initiate into the Church of Satan and it was done on March 19th so I'll probably maybe scan that in and put that up on the website in the future or maybe even with this podcast to show you just how much they love that date they confer rights and degrees and perform rituals on that date and initiate human sacrifice rituals like war because as we covered in the previous weeks war is indeed a human sacrifice ritual and the people who marched off to war basically are completely ignorant of what they're being used for and they are ignorant beings and people don't want to hear this they get all kinds of offended about it calling soul buyers ignorant people but that's what they are they're ignorant they're unread they're ill educated whether they've actually received a Western education through the outcome based education school system or not I don't care what degrees you've gotten in the you know Soviet education system that we have here in the Nazi mastery learning education system of the West that's a piece of paper that's oddly meaningless when it comes to holistic intelligence and as far as holistic intelligence goes these people are dumb and there it is said out in the open and get as offended about it as you like okay they don't understand what war is they don't understand the occult but they did understand the occult they wouldn't be allowing themselves to be used in such capacities and they would understand that the way to end war is not to fight them to refuse to fight them the refused military service of any kind and you know people can go into that cliche rote argument of people fought and died for my freedom my freedom is inherent and the only thing I need to do to secure it is to actually remain conscious of who and what I am I don't need anybody fighting for my freedom I am inherently free I certainly don't need dumb people fighting for my freedom when in fact all they're really doing is fighting for elitists who are using them as pawns and a sick twisted game of ritual sacrifice and you know believe that that's not what war is and enjoy your belief system because these are cultists are literally peeing in their pants laughing at the people who go off to war and they're all too happy to tell you that their pawns in their game like Henry Kissinger says military men are dumb stupid animals that we use in a game of foreign policy as pawns in our game of foreign policy telling you that they're chess pawns that are dispensable that are disposable right to write to their faces and still these soldiers do their bidding they call them sold dyers to their face in the word soldier sold dire and people don't think that this is some sort of a cult green language word pun because it's too simple or oh you know you're reading into things in the sound of words yeah because that's how words are used and constructed by the people who invented languages it goes back tens of thousands of years and yes that is what it means a soldier a Saltire just like we'll look at in the future what the word police means that's another form of occult mockery which requires an understanding of Freemasonry to understand what it actually means which is what we're going to cover later on tonight and we're going to catch a bit of this right now when we look at this second image here because understanding some Masonic symbolism will help us to understand a little bit about what the season of sacrifice actually is now today is March 22nd is the third day okay um technically spring alright occultists also love this day dark ocultist specifically this is a Luciferian holiday and it's connected with an order known as the order of death and the order of death is about as high as you get in dark occultism as far as being pawns in this whole system of occult networks because no matter how high you really get it's all pawns they're all pawns ultimately of the ruling bloodline families that are controlling the whole game here on earth and then you can look into I generally don't do this when we when talking about things on this radio show or in my presentation but there's much research that is done into the nonhuman aspects of what is going on meaning noncorporeal entities okay demons if you will or principalities some people also look into the extra-terrestrial interventions that have taken place on this planet in the past and in the present I generally don't get into that I do have a presentation that talks about human origins that I've given in the past but I basically talk about things that I deeply know about on this show and I leave that for people to go into and explore on their own but if you believe that this agenda that's really taking place all around us is purely a human one I think you have to jump through a lot of mental gymnastics to get there because ultimately it's about the destruction of human life as we know it and it's ultimately about the destruction of human life period of any form of human life that is worth living and that's what the order of death as we're going to get into in a moment is actually about and this is connected with the Skull and Bones order it is often referred to as the order of death and we'll talk about the symbolism of the Skull and Bones in a moment but on this second slide here I list the date March 22nd as being symbolic of the sun's position in relation to the equator that it has fully emerged from the southern hemisphere they the solar disk is not actually right on the equatorial line that imaginary equatorial line at the center of the Earth's plane okay of rotation it has actually broken past that point which is the zero degree angle and it has moved fully into the northern hemisphere so ocultist would say that on the third day and this is obviously a symbolic analog to the Sun Savior Astro theology myth that we talked about extensively as being the basis for Christianity hey this is the story of Jesus the Son of God Horus in the in tradition tom was in the Babylonian tradition on and on and on Dionysos Addis you name it tons and tons of God's basically the same story we've covered that in the sections on Astro theology on the third day after the spring equinox the Sun has fully broken the equatorial line and has emerged from its tomb which is what the southern hemisphere is referred to as the six months that the Sun is dwelling in the southern hemisphere or below the equatorial line of the earth okay that's considered the season of death and then the other six months are considered the season of life or regeneration and growth because that's when you can plant and grow food in the fall and winter season you cannot so you have to store things in the northern hemisphere store supplies to get through the winter so again the order of death or the dark occult in general worships the dark side of the Sun okay they are a dark soul or cult in other words they worship darkness they worship death they worship evil so they they basically give homage to the Sun during the dark season okay and this season of sacrifice is when the Sun begins to emerge out of that dark season okay so the point that it fully does this is March 22nd which is today all right so today is a significant day in the occult so I wrote here on this second slide that what this symbolically represents is the light bringer Lucifer Lucifer means light bringer looks fair a light and bring a light bringer in Latin all right so we're basically looking at the high and low points of light or of the Sun this is all ultimately about the Sun and I was I left off last week looking at the first degree Masonic tracing board which we're going to look at extensively tonight if we can get to it in the second hour and I'm gonna be breaking this down in a couple of different orientations now this is kind of a jump ahead and we'll go back to this but on this second slide here I basically put the tracing board in its sideways orientation and this is a depiction again of the Sun during the course of a year okay it's another way of looking at this so the checkerboard floor that you see on the left of the image right and the direction is west okay those represent in this configuration in this sideways configuration the latitude and longitude lines of the earth okay the latitude and longitude lines of the earth and west is away from the light or away from the gods quote-unquote that you see there in the eastern portion of the image on the right hand side where you see the letter e those are the gods of the ancient world as we talked about in the Astro theology section the desert sky gods the Sun the moon and the stars and planets depicted by the all-seeing eye okay the three desert sky God religions given to each one of these astro theological cults of the ancient world the Sun given to Christianity the Moon to Islam and the stars and planets to Judaism the three major world religions monotheistic religions at back okay now we see North and South showing us the direction when it went in relationship to the earth because North is toward the North hemisphere and South is toward the southern hemisphere and that pillar in the middle okay with the latter on it which is known as Jacob's Ladder in Freemasonry labeled with a W for wisdom represents the equator in this image okay the zero Degree point that the Sun has now fully broken past as of today and the bottom pillar the dark pillar the pillar of BOE eyes labeled with a be for beauty and moon okay represents the winter solstice this is the low point of light okay the low point of the Sun December 21st 22nd the winter solstice when the Sun makes it 23 and a half degree angle with respect to the equator south of the equator this is the Tropic of Capricorn on the earth and then the high point of light is when the Sun reaches the summer solstice June 20th 21st that's when it makes a 23.5 degrees northerly angle with respect to the earth's equator or it is seen to be at the Tropic of Capricorn 23.5 degrees north latitude of the earth so this is the pillar of Jah keen or strength labeled there with an S this is the sun's path during the course of a year and it moves upward and slowly until it crosses the midpoint of the Equator and then it moves up to its high point okay we are now what symbolically where that green initiate that the second initiate on the latter would be we have just broken northward into the into the northern hemisphere just broken the equator okay on the right hand side of this image we see the cryptic tracing board of two volcano now this is associated with the Royal Arch degree of Freemasonry and higher when you start to go toward the illuminated degrees which are basically unspoken degrees there what some would consider clandestine degrees in illuminated masonry now that's more advanced we'll get to that but this tracing board I put it on this image just to show you how this is symbolically depicting these two seasons see the the ancients really only viewed two seasons the time that the Sun was in the northern hemisphere and the time that was in the southern hemisphere that's it it really distinguish between spring spring and summer or between fall and winter a spring and summer the Sun was in the north where most people live where the vast majority of the population of the earth lives okay so that's the favored season the season of death is the southern hemisphere and here depicted on this tracing board you can see this dichotomy but you can also understand symbolically what it spiritually represents okay and that's the key there is there is an exoteric explanation and then there's an esoteric one to get to the true meaning the veiled allegory that lies underneath the symbolism and that's the key to Freemasonry you can only do that if you get out of the purely logical left brain and make a connection to the intuitive and creative and nurturing right brain that's not to say throw out logic and reason that's to say to integrate the Sacred Feminine which is ultimately what true Freemasonry is about and while I am doing this breakdown of this cryptic tracing board briefly I want to say before we even go into and I'll reiterate this Freemasonry is not well understood by most people okay and I'll be the first to tell you that the lodge system is degenerated and corrupt but we have to be mature about our understanding of the real tradition versus what it has become okay there is a true mystical esoteric tradition that underlies genuine Freemasonry then there is what it has come down to us in the modern day ads and that is altogether different from what I am attempting and endeavoring to explain to people as the genuine tradition of Freemasonry so you could say there's a genuine Christian tradition as we've looked at the true esoteric Christian tradition that emerged now 2,000 years ago and then there is what Christianity has come down to us as in the modern age which is altogether different than that original tradition well it's the same with Freemasonry and we need to make that distinction clear and understand it well so that we don't you know fall into this trap of oh all Freemasonry is bad or evil you know it's it's it's as ridiculous as saying everything that you read in the Bible is bad or evil because you don't agree with the Catholic Church or Christianity and in general as a religion maybe do in the modern world okay that's like you know throwing out some of the tenets of Islam or Judaism because you don't particularly like the way that the leaders of those religions or even the radicals of those religions are taking that you know those those philosophies that are supposed to be ultimately the same core truths as all other mystical traditions and religions it's just become corrupted over time okay so yes do I attack religion as a form of mind control of course I do and I explained all the Astra theological underpinnings of it how people are basically being fooled into worshipping the gods of the sky not understanding it however I've said before there are deep allegorical underpinnings which are really mystical and esoteric truths that underlie all of these traditions and that's what I'm endeavoring to get people to reach an understanding of through further study and again the other thing I'd like to make very clear is if you expect a 100% totality of this from me you're gonna be holding your breath one person could not possibly give you all you need know about this you need to make an extensive study of it on your own okay you need to go to a lot of different sources and be eclectic about the material that you're taking in meaning take it in from a vast variety of sources okay that's the best way to gauge any tradition or any form of information so I can only give you a basic breakdown of this symbolism and and these traditions I couldn't possibly give in a 100% exhaustive study of it again as I said that's a lifelong journey basically I'm still learning things about Freemasonry all right so this tracing board here of tubal-cain on image number two in the bottom right hand corner of the image is showing these two seasons of the year the light season or the favored season in the north being the top portion of the image and also depicted by the arch at the top okay symbolized by the arch and then the the squared portion at the bottom of this sent half rectangular half ovoid image okay is the death season okay the season of darkness when the Sun is in the southern hemisphere and there is a form of a sarcophagus there there you see the checkerboard floor of the house and you see light coming in above now this represents soul death this represents being in a state of base consciousness and the spirit is buried and it's in darkness okay and that's what ultimately Freemasonry is attempting to do to shine light upon the state of darkness that not only the world is in but that each individual who is under a form of mind control we're being hoodwinked is in there in a deplorable state of darkness of not understanding natural law they which is the light of the Creator okay and you see that still streaming in from above the idea is to dig your way out of that grave to resurrect one's self by acquiring an understanding of natural law or receiving the light as we said it's the

Freemasonry is connected with Kabbalah it means to receive Kabbalah okay so and what you're ultimately receiving is the light or the knowledge of natural law which the Creator put there okay so in the image in the top portion of this image once you do make your way out of that you see the condition of the world and it's in ruins okay they're there they're showing you that enlightenment does not cast light upon something that is actually pretty okay yes it's a wonderful thing but it's showing you what our work really is to improve a world that is gone completely awry and is in the state of disrepair and ruins basically and this tracing board is emblematic of that it's it's an allegory in symbol so I mean we're going getting increasingly in the more complex symbolism as we go into a study of Freemasonry and other traditions okay so really this is pre there's a lot of prerequisite understanding for a lot of this okay so if you haven't listened to the previous podcast do so and get caught up to this because you know again there's you can't build the top of a building before you build the foundation and that's what we've done over the last year here this is the 52nd shuttle actually so next week is the one-year anniversary of the one on earth is happening radio show pretty cool so that's all basically say on the cryptic tracing board there in image number two let's move on to image number three for those who are following on the website this is image number three in the occult season of sacrifice okay on the radio listen page so again March 22nd is about the rising of the light or the Sun breaking into the Northern Hemisphere now there is again this occult order known as the order of death and I label it here as I show that the emblem of it which is the skull and crossbones and let and the numbers 322 okay and 322 again is for sure for March 22nd okay because that's this this first day in earnest of the season of sacrifice the forty days between March 22nd and May first alright so I label it here as the clandestine free masonic the clandestine Masonic Lodge I shouldn't even use the word Freemasonry in relation to this now it is a Masonic Lodge of sorts a clandestine one known as the order of the skull and bones it operates out of Yale Yale University and of course they have their headquarters is known as the tomb okay because this is a reference to the southern hemisphere they are the worshipers of death and darkness there the order of death and they pay homage to the Sun in its dark aspect a dark solar cult son when it is in its six months of its southern hemisphere dwelling that that the lower six months of the zodiac in that configuration are often referred to as the tomb of the Sun because it is ret is becoming resurrected or resurrecting to give new life for the earth during the season of spring the season of resurrection of rejuvenation so when it was in the southern hemisphere that's considered the tomb of the Sun and this order the order of death or order of Skull and Bones refers to its headquarters its main meeting place as the tomb which is a symbolic analogue to the Sun in the southern hemisphere or the dark Sun Freemasonry has put this emblem on the third greet racing board okay so to understand the skull and bones and I've alluded to this before this is the emblem of the sorcerer okay it's it's a very slightly complex symbol it only really involves two other symbols okay it's the skull and the crossbones the crossbones okay the skull is where thought takes place and the bones are what we do our actions with okay we use our arms our hands okay this is symbolic of thought and action right so intelligence and willpower is what this symbol represents and indeed the members of the order of death are intelligent and they have a lot of willpower what's missing in this emblem is the heart or the spirits care true care it's not there the emblem of the sorcerer being equated with the skull and crossbones represents thought or intelligence being combined with willpower or the will to act without care being present and indeed that's what a sorcerer is that's what a psychopath is that's what a dark ocultist is a being that definitely has brought their thoughts and actions into unison but really has killed the spirit they have killed care they have cremated care as we saw in their ritual at Bohemian Grove this is depicted in the third degree tracing board which you see there to the left of Freemasonry and we'll get to a breakdown of this in later shows probably not tonight but I want to show you at least the depiction of the Skull and Bones on it and this is a warning all right the the the third degree tracing board is about resurrection of the Spirit and it's showing you that if care is killed that the allegorical savior in Freemasonry who is connected with the son Hiram Abiff okay the widow's son it's another allegory about the son which we'll get into tonight if you kill care really you are spiritually dead you are in this coffin okay and no good can ultimately come to the world until you come out of that tomb until the light rises out of that tomb you can see there's a positive connotation to light bearer or Lucifer and of course Lucifer is connected with this tradition the angel of light or the bearer of light bringing the understanding of natural law to humanity and then there's a dark aspect of Lucifer the dark side of the Sun meaning intelligence and will while Kerr is still buried which leads to psychopathy and ultimately to ruin to chaos not to order and that's ultimately what the dark occult is thrusting this world toward total chaos and the unconscious idiots of this world continue to go along with their agenda because they're dumb unread people who are still in this coffin because they don't care and they don't want to change their actions they don't want to use their intelligence or will in any way that is directed by true care they would rather just continue to be pawns and referred to as the dead by these people and basically uh you know mocked occult eclis and you know tagged with all kinds of occult symbolism and sent off to an altar of sacrifice and it's just just being completely ridiculed and mocked by people who know a million times more about them than they know about themselves and they could just be made advanced like puppets on strings enjoy it is what I say to the dumb people who are doing these occultists bidding and that means the military and the police because you are owned by the dark occult the end I don't care how much you want to deny that it's the truth you are owned by these people owned they own you period and because you know nothing about the human psyche you know nothing of consciousness you know nothing of the occult and you remain horribly unread and ignorant you're going to continue to do their evil bidding never understanding what you're being used for like a dog being led around on a leash so the third-degree tracing board is a warning it shows the skullenbones on the coffin of Hiram Abiff with the three tools that basically were used to kill Hiram Abiff the spirit pay and their symbolic of the destruction of intelligence the destruction of care and the destruction of will or courage so these three tools refer to when they're used in conjunction with murderers of Hiram Abiff known as Jubal a Jew below and Juba lumen will get to all of this okay in the breakdown the Freemasonry they refer to ignorant which kills intelligence apathy which kills care and cowardice which kills cowardice and laziness is more accurate which kills respectively courage and will okay and I put there the warning is that we have to always be on guard against these destroyers of spiritual awareness these are what destroy consciousness ignorant apathy and cowardice / laziness one is a destroyer of thought the others a destroyer of emotion and the other is a destroyer of action and that's it and we fall prey to bees we end up in the grave and when the spirit dies were ruled by dark occultists dark occultists the skullenbones the order of death so to wrap up the season place it is the 40 day period between March 22nd and May 1st while purchase not it is a throwback to ancient solar cults all right son worshipping traditions they often offered animal and human sacrifices during this season because they believe that blood needed to be given which was the life force the life is in the blood needs to be given to the earth and the Sun God in order to ensure a bountiful harvest during the planting seed during the the reaping season ok the harvest season but you made the sacrifice during the planting season which is early spring that's what this is ultimately about that's why they give in the modern day blood to the earth in all different forms during this year we showed examples of that last week ok they start wars during this season Manchurian Candidate situations come up over and over again during the season Martin Luther King was killed during the season Columbine High School massacre happened during this season Virginia Tech school shooting happened during this season on and on and on so there you see it visually depicted the spring equinox March 19th 20th which is the beginning of Aries and then at the midpoint of Taurus that's the end of the season of sacrifice at the Sabbat midpoint May first ball purchase not and I put up at the top on the right-hand side of this image that be particularly vigilant for false flag events and potential human sacrifice rituals during this time period I also put in the middle of the image there that the season in Christianity known as Lent which is a season to make a sacrifice to give up something okay because Jesus symbolically gave his life life up they in the Christian exoteric Christian tradition they believed in this as a literal story that Jesus gave his life up as the Son of God to redeem the sins of the people of the earth but it's about the son okay giving up his life to continuously rejuvenate the earth that's ultimately what it is about the son continuously gives off us of its energy its light its warmth the teeth etc it's it's the ability to have any life on the planet to grow anything okay and Lent in the in the Christian tradition and the exoteric Christian tradition is known as a time to make a sacrifice and as I wrote here this is simply a proxy okay meaning that it is something that is really veiled overtop of the real season of sacrifice which is about this sacrifice of pagan Sun cults to give blood to the earth and the Sun so that's what the real season of sacrifice is about and it's still ongoing ladies and gentlemen these are cultists who are directing world event because they control the monetary system and can basically make the idiots of this world that believe in something that's fake called money do whatever they want them to do as a result of promising them any amounts of money okay can basically orchestrate world events because they own the monetary system they invented it and therefore they can make people dance like puppets to any tune they want them to dance to because they're still so unconscious these people these puppets but they don't understand money is fake they don't understand that they're ruled by darpa cultists but believe what you want and enjoy what you have is what I say to people who are reluctant to accept this who are reluctant to believe that this is what the world is I say go back to believing whatever you want to believe and go back to sleep and enjoy what you have that's it you don't want to look into it further shut the show off now go watch some television and eat an ice poison Laden meal while you're doing it and enjoy being a kept pet okay because that's what 90% of the people of this world are or better a kept pet I for one I'm tired of that condition I'm not in that condition no one owns me I'm not a kept pet I certainly am NOT going to do any body's bidding for a paycheck because somebody tells me that they think that this is what's the right thing to do I'm gonna find out based on my personal study drive and will to know what is true and what is real what the right thing to do really is and that's why I'm doing what I'm doing and will continue to do what I'm doing but because unconscious ignorant people are easy to manipulate it's real easy to sell somebody on going off to war or becoming a cop or doing any number of other things that are completely antithetical to natural law and believing that they're doing the right thing so continue to believe that if you want and enjoy what you have and enjoy being kept pet but that's the season of sacrifice and I will continue to tell people watch these 40 days watch for events during these 40 days and specifically they they love the very beginning of spring March 19th 20th they love those dates I'm gonna tell you another date they love April 20th they love April 20th these darker cultists are reptilian in their patterns they do the same thing over and over they stay with what they know okay and once you understand their patterns it's easy to see where they're going with these things but you have to be conscious enough to recognize the pattern they love April 20th because it's Hitler Hitler's birthday April 20th Hitler's birthday they did the Gulf oil disaster during that time drilled so deep into the earth that cracked some sort of a fissure and who knows what that material was some people say it was a mud volcano I don't think it was entirely crude oil but they basically attempted to devastate the entire Gulf region last year on that date and this year you're seeing the bombing of Libya and the Japan tsunami and subsequent uh nuclear disaster happening right around this time period again as I said last week a bit early that was on 311 but 11 is another ritual date that they love because it's the number of chaos and opposition eleven so that's where I'll wrap off the occult season of sacrifice I think we've covered it there's images there to look at and you can look into it further in your own studies in the second hour I'm going to be connecting into Oracle broadcasting in a few moments and we will be looking into the tradition of Freemasonry during the second hour now just as a prelude to the second hour of the show than me I just want to lead in with saying once again that I'll be covering Freemasonry for many weeks to come I'll probably be looking at this tradition like we did with Kabbalah and Tarot over multiple weeks so do an hour of it tonight and at least two more whole shows maybe three okay after tonight the first thing I want to let people know is that one on this show you will not be getting a 100% comprehensive view as I said before this is a lifelong study if you're going to study Kabbalah or Tarot or Freemasonry or any other occult tradition it's basically something that you need to make a personal investigation of over a long period of time because enlightenment is not an instantaneous process which is all what all all of these traditions are ultimately about and it's a stepwise process requiring time you think you're going to immediately reach some form of deep level of understanding overnight good luck it doesn't work that way it requires time effort study dedication willpower okay all of these things it requires opening your mind the right brain aspect it requires associative thinking as we talked about over the past weeks when we are looking deeply into different forms of symbolism okay all of these things are required they're prerequisites for studying any of these occult traditions and understanding the real meaning of them not fear-based propaganda that is put out there by people who know very little of them all right the second thing I want to make people very clear about is that as with Kabbalah and any other occult tradition it is not one thing there is a dark side to it as well I will be teaching the positive light side of it but of course the mystery traditions have been perverted over time and turned into something that they were not originally intended to be all right so therefore we have to be aware there is of course a dark side to this that's why I'm not involved in the official Lodge system of Freemasonry in the modern day it has been taken over and the tradition is watered down and it has become something that it was not a intended to be which is basically a club for influential people who then can do things clandestinely or under the cloak of darkness and that's not what Freemasonry was originally about so we'll be looking at this tradition looking at some of its origins and its symbols and its allegories in the next hour so that's alum number 1 I'm going to get ready now to connect into Oracle broadcasting and we'll listen to the tail end of some of what they're doing and then Bob Tusken from the Intel hub radio show will be introducing me for the second hour so here we go I'm wanting more information please visit the website at www.yourmathgal.com all right so again in the last hour we wrapped up talking about the season of sacrifice now we're going to begin and this will be ongoing over many weeks into looking into the tradition of Freemasonry and what it really true is because there's a lot of confusion about what Freemasonry is and a lot of people continue to make the mistake of thinking that it is about only one thing and not understanding that there is a dual side to Freemasonry that there is a positive aspect of this tradition and then there is a corruption or a perversion of it as dark occultists always do and in fact that's all they can ever do Darko cultists as I've been trying to hammer into people to get them to understand do not create okay they do not invent new things they take things that are already there and use them to their benefit to their selfish ego at the benefit so they don't create anything all right the mystery traditions were already in existence before the dark occult came and took them over all right the dark occult perverts it perverts it uses something that's already there - it's selfish aims and ends that's all it does so in its original unadulterated form okay what Freemasonry is ultimately about and this is my basic definition for it okay is a tradition in which natural law which we've talked about extensively on this show and which I've done a whole presentation on and I believe that was show number 36 if people want to go back and look into my breakdown of natural law Freemasonry is a tradition in which natural law and morality is taught through a system of symbols allegories and rituals that is what Freemasonry is in its unadulterated form okay now in the modern day is it effectively doing that I would say it is not has it fallen okay largely maybe not entirely but has it fallen from its original intent absolutely has it become something that is essentially something completely other than what it was originally intended to be and do I believe that it has and that's a deplorable state it's a deplorable condition but that happens to be what is okay so well I'm going to endeavor to teach here over the next several weeks is what this tradition really is about and then illustrate this through the symbolism of Freemasonry or what is known as the craft okay so I want to direct people up to my website for the imagery that goes along with the concepts that I'll be breaking down you go to what on earth is happening dot-com what on earth is happening comm click on the radio listen page which is the button on the upper the image on the upper left hand side of the website it says listen live okay you click that it'll take you to the player page and underneath the player plug-in we'll see listed their images for tonight's show March 22nd and there will be two sections season of sacrifice and Freemasonry will be beginning in this segment with the Freemasonry imagery okay so before we do that I want to make another definition very clear to people and that is what Freemasonry ultimately is is a system that teaches through something known as allegory okay this is basic associative thinking all right what an allegory is is a story or a picture that can be interpreted to reveal a hidden meaning okay there's that word hidden occult means hidden this is indeed an occult tradition it is veiling its teachings and it's veiling them for a number of reasons we talked about why ocultism veils what it you know conceals its teachings in the past does it for two reasons in this dark form of occultism it veils it because it's trying to keep that knowledge from people that it wants to wield influence over and use that knowledge as a weapon and it's positive influence occultism may have veiled its teachings because it is too dangerous physically dangerous for it to teach these teachings in the open and may also and I believe erroneously worried that these that this knowledge will be taken by people in a very egoic state and used as a weapon so therefore it veils it and attempts to keep it from the hands of what it considers profane people now I think that both of these are in error both of these stances are in error and I've said multiple times on this show and will continue to repeat the phrase that humanity will never be free until the occult is no longer the occult meaning until this knowledge is taken out of its veiled form put out into the light of day and it becomes common sense human beings are going to be too tenuously enslaved because this is knowledge that people need to know about themselves and it's a it's a procedure of studying the self that's ultimately what it's about and ultimately it's a science for understanding how suffering is created through going against natural law principles and it's a science for getting back into harmony with those natural law principles by understanding the self and then changing one's behavior in accordance with that truth okay so an allegory which is what Freemasonry ultimately is is a story or a picture that can be interpreted to reveal a hidden or occulted meaning typically a moral or a political one that's what an allegory actually is and I believe that's the break music so we'll pick up on that [Music] [Music] ok ladies and gentlemen were back on the what on earth is happening segment of the Intel hub radio show I'm your host Mark patio on my website what on earth is happening calm on the radio listen page in the section of images entitled Freemasonry we're going to begin with image number one there and that is a large image showing the basic structure of Freemasonry now this shows two different rights of Freemasonry the Scottish Rite and New York right okay the Scottish Rite has thirty thirty-two degrees or steps they're depicted symbolically on this pyramidal structure that you see here in this image okay they're known as degrees that are conferred to the initiative this credit tradition and it ends in the honorary 33rd degree on the right hand side of the image we see the York right okay which has ten degrees ending in the Knights Templar degree which is at that same level as the 33rd degree of the Scottish Rite now you'll see that this entire structure here is built upon these first three steps at the bottom the three degrees which are the first second and third initiatory degrees of Freemasonry the first degree is known as the entered apprentice the second degree as the fellow craft and the third degree as the master mason these first three initiative in ish Ettore degrees comprise what is known as the Blue Lodge the degrees from degrees four to thirty-two in the Scottish Rite comprised what is known as the Red Lodge and then degrees thirty three and on comprised what is referred to as the White Lodge and I would add that those illuminated degrees or higher level degrees above the 32nd degree of the Red Lodge would not only be the White Lodge the but also the Black Lodge degrees okay so at that level you have positive higher level initiates or illuminated masons and also negative or dark Masons and I would say that that is reflected throughout this entire structure okay one of the things I want to point out is the similarity of this hierarchical system with this the hierarchical structure of control that we've talked about previously on this radio show any control based institution no matter which one you look at it could be the military the police government the education system the media you name it okay any any corporation in general is structured in two basic ways the first is hierarchy this means it contains a system or a chain of command okay a system of degrees of some sort as does Freemasonry at least in the official lodge form of Freemasonry now the official Lodge form of Freemasonry is essentially not what I'm going to really be initiating people into as part of this show I am going to be taking them into the original core teachings of what this tradition was about and this dates back far beyond where the Lodge system came into existence okay the Freemasonry is an ancient tradition it is one of the mystery traditions of consciousness that dates right back into the ancient world okay this goes back thousands of years not just hundreds okay and one of the principal places that it originates is Egypt and Egypt then was not known as Egypt it was called tenet KMT okay and this means black with a black land okay it's a place of mysteries it's the place where people were initiated into the mysteries the mystery traditions of consciousness and Freemasonry is one of these traditions now it was likely not called Freemasonry there but it was associated with building and in Freemasonry is of course associated with building and here you see this pyramid structure which I'm referring to just like the pyramids of Egypt are built in this configuration okay with a broad base containing you know a whole lot of substance and material until you get up to the apex which tapers off okay so you have a lot of low-level initiatives and then as you know you go higher up into the knowledge there's less and less people holding it so this is hierarchy okay the second factor of any system of control or any system that is based in this pyramid structure is compartmentalization and talked about that being how in this system of hierarchy the people who do know the agenda at the top will often be very will often keep the total knowledge of that agenda from the lower level emissions and indeed this is what is happening in the lodge system up today because Freemasonry has been speared in quite a different direction from its original roots and intense and it is being used as a system of control for me to deny that would be lying I mean you know let's be honest about it however it becomes all too easy because we do recognize that to think that the entire tradition should be thrown out you know the idea of throwing out the baby with the bathwater okay we need to understand what the original teachings of this should our Bell so that we understand it is simply something that has become perverted over time just like every other religion has we talked about what the esoteric core teachings of religions are versus what they have come down to us as in the modern world which are essentially systems of mind control is Freemasonry any different not really okay so to get to the original traditions we have to understand it's older than we're being told it does date to the ancient mystery traditions and that goes back to Egypt or commit okay the black land okay this is the root of the word alchemy okay the Tahitians the Egyptian people who study the mystery traditions not all of them but the initiate into these traditions and and keepers of this knowledge they considered themselves shining beacons of light teachers who are keeping a tradition from time and memorial of how natural law worked and how important truly understanding natural law and living in harmony with it as a moral being as a moral being was to maintaining order in the world okay so they looked at themselves as as beacons of light who were sway showers okay in a world essentially that needed to receive these teachings and needed to receive the light that was basically falling from its understanding of natural law and falling deeper and deeper into ego and worldly identification as we've talked about extensively on the show okay the barriers to true self realization a worldly identification $0.05 identification an ego identification all right things that prevent us from really understanding who and what when truly are and what were what what this is all about what we're here to actually do so the the the teachings of CEM okay were really these mystery traditions were encoded into a system of symbols and allegorical lessons all right stories parables etc that convey a lesson about what's really going on in the world around us this is the most done in a modern day through movies movies teach through allegory there's many allegorical movies as a matter of fact most movies are allegorical that are basically teaching some sort of a lesson and aren't just entered for entertainment value and this can also be done for the negative it can be you know predictive programming and a form of mind control and you know basically steering one's perceptions in a certain direction through through movies as well but allegorical movies are basically movies about the real world but they're told in a fictional story to get people to relate the story to what's really going on around them you know things like Star Wars Lord of the Rings The Matrix they live I mean you can name a million of them go on and on these are allegorical movies okay Freemasonry is an allegory as well it's done largely through its symbols and its rituals these are what the allegories and Freemasonry are about to understand allegory however requires the right brain to be activated because it's about associative thinking it is not just pure logical left brain thinking here's the break music we'll be right back okay ladies and gentlemen we're back with what on earth is happening this is the last segment for tonight I'm your host mark Cassio my website what on earth is happening calm we're talking about Freemasonry Before we jump back into bad topic I want to give me calling number there's anyone listening out there that wants to call in to take us out basically eight six six eight four one one zero six five calling number eight six six eight four one one zero six five that's toll-free so in this last segment I want to attempt to break down one of the main symbols of Freemasonry uh and if anybody calls in we'll get to them but that is the the compasses and square with the G in the middle of them I'm sure just about everyone has seen this at some point or another and I'd like to basically explain what this symbol represents and break down all of the components of it so in the configuration with its point at the bottom this is now image number two if you're following along on the website the compass isn't square with the G and there's a couple of stylized interpretations of an image number image number um two and three shows this symbol okay the square in this configuration represents base consciousness okay it represents essentially a low state of awareness or a low state of understanding not being able to see large scale patterns because one is in a state of imbalance okay you could not possibly balance and square like that it is also rigid it is unyielding it is difficult to teach okay or to become supple or bending okay to receive new information a 90-degree angle like that is not essentially found in nature so it has gone away from its true nature okay the square as a shape traditionally is used to represent earth-bound awareness earth by the earthly eye identification meaning materialism okay meaning ego based thinking okay selfishness not care for others alright worldly identification and awareness in other words being trapped in the base part of the consciousness and brain we talked about how the brain has so much to do with our level of consciousness and what our behavior eventually manifests like okay we talked about the components of the brain well this part of this symbol would be analogous to the r-complex of the brain okay in this configuration and this miss whether it's a point down like that okay it's it's representing the state where you are ruled by base consciousness you don't have rulership over yourself essentially alright you are so stuck in material worldview and base consciousness that essentially you are ruled by your instinct and ruled by the passions okay that's what the square in general represents and since it traces this in perfected shape okay that in traditional symbolism has been used to represent the lower world okay or the Material Plane only divorced from spirit essentially that's what the square at the bottom okay the low point of this symbol represents the compasses on the other hand which you'll see depicted as being placed over the square okay represent coming upward in consciousness to a place of balance all right to a place of higher understanding moving off of the square as a shape symbolically now the compasses trace a circle the circle traditionally in symbolism is used to represent the divine or the higher world it's used to represent cosmic consciousness it's used to represent the break with the identification of the material and the incorporation of spirit of spiritual understanding okay so the compas astrays what is considered the divine shape circle the perfected shape the circle has no beginning and no end it has no rough edges it is the perfect shape it is based on a number that cannot be essentially defined with accuracy pi okay it's a it's a divine proportion okay the circle is the shape used essentially to represent perfection and the divine and higher consciousness the compasses are a symbolic analog to those concepts okay and the word there's wordplay involved here as well compasses form the basis of the word compassion okay these are flexible okay they Bend okay they're not rigid this implies teachability this implies going along with the flow of creation as opposed to attempting to buck that flow okay as opposed to going against that natural law all right the compasses represent having attained higher spiritual awareness through G in the middle okay which is the all-important part of this symbolism now the G has stood for many things okay but it's the way that we need to go through to get out of that base material identification represented by the square and to a place of higher spiritual awareness and compassion okay so the G people will say it stands for geometry and that is one of the things that it stands for okay these are shapes these are geometers tools these are drawing tools okay however it means so much more than that and I'm gonna give a quick list and we'll probably end there tonight some of the things that the G does represent and I want to get to the main thing that it represents hopefully if not we'll do that next week okay the G has stood for geometry the the brand or Great Architect of the universe Gao tu which is essentially another way of saying God but essentially in Freemasonry God is looked at as an architect a creator one who has put the divine plan into manifestation and has created the physical world okay so it represents God it also represents God s because again this G in the middle is actually the emotional qualities of the self okay we have to essentially incorporate our emotional makeup to make our emotional and makeup much more mature than what it is when we're young to become emotional adults to go through that transition from ego based identification to true compassionate awareness and that's done through the goddess aspect of ourselves so that's also what that G represents the Sacred Feminine it also represents gnosis the way of getting out of suffering is knowledge experientially derived or gnosis okay the Greek word for knowledge it represents good okay or in other words harmony with the natural law it can be used to represent the word green because that is the frequency of life and love energy as we've seen in the past middle the balance point of the visible spectrum of light it can also represent Gate a gateway is a transitional point to go through a gate means to make a transition from one point to another and ultimately it represents the generative principle now the generative principle is the main key thing to understand about that G in the middle of the compass is in square but unfortunately that's all we really have time for this evening so I'm going to turn it back over to Bob I'll be here next Tuesday night are continuing our analysis of freemasonry you want to catch the first hour of the show check out my website at 8 p.m. and I'll be going into Freemasonry in more depth then but that's offering and ok and as always he has this podcast and you can catch anything that you missed at the Intel hub radio.com we'll see you tomorrow night we have a program lined up for you that you're not going to want to miss the valedictorian speech that shook up education as we know it and so much more that's the Intel hub tomorrow night so stay tuned me Rogers coming up next on Oracle broadcasting tonight folks

What On Earth Is Happening Show #053

Topics: *Freemasonry, Light Freemasonry vs. Dark Masonry, The Compasses & Square, The "G," The Legend Of Hiram Abiff*

here we go last week we left off talking about Freemasonry as a tradition in which natural law and morality is taught through a system of symbols allegories and rituals and we highlighted that what an allegory really is is a story poem or picture that can be interpreted to reveal hidden meanings typically moral or political meanings so Freemasonry is a veiled tradition that through its symbols and its allegories attempts to get the person being taught to understand the deeper symbolic significance --is of these symbols and these allegorical tales in order to learn about themselves and in order to learn about natural law now again I thought I made this abundantly clear almost to the point of boredom last week that what I was attempting to explain here is not what necessarily may be going on in the lodge system of Freemasonry but instead that I would be explaining the esoteric underlying tradition of this tradition okay the esoteric underlying teachings of this tradition I still get people emailing or you know telling me that they think Freemasonry is all one thing and I thought I explained that to a degree of almost you know wearing it out that there is a unadulterated version of Freemasonry and then there is one that has been perverted and watered down over time and that largely is what is being taught and received in the lodge system in the current day this has been warned about ad infinitum it has been warned about by different Masonic authors okay notably I could think of two that warned of this watering down of this tradition and this would have to be watched for manly P Hall certainly did and also Albert Church Ward who really delved into this watering down and perversion of the Masonic tradition in his book origins of Freemasonry now that brings me to my next point for people that really want to go deeper into this because again I can't possibly cover every aspect of something as big as the free Masonic tradition I'd refer you to my website where you'll get a good jumping-off point okay you'll get a good introductory basis to Freemasonry through some of the books that I posted in the podcast for last week so I want to refer you to the site for two reasons the first is to show you on the podcast page last week's show show number 52 on that podcast I posted along with the mp3 file a great number of Masonic books for people who want to do further research you can read these books online now if you join up to scribed and upload you know you could download them and keep them or print them do whatever you want with them and there's a really good small library right there of the Masonic tradition written by initiates of this tradition and has it has a wealth of knowledge in those in those book books so I asked people to avail themselves of that information and again there will be so many references and those works alone it's a lifetime of study in the all the interconnections that would go along with even looking into one of those books so I think I posted something like thirteen or fourteen books up there at least so check them out and make good use of them the second reason I want you to go to the site what on earth is happening calm is to look at the images for tonight's show those are on the radio listen page when you click the listen live button on the left inside of the site if you're not already there underneath the player you'll see images for tonight's show for March 29th 2011 and there are 13 images there now last week we left off with images 1 & 2 at the beginning last week of the second hour I was explaining the structure of Freemasonry the general structure and how this is based in hierarchy and compartmentalization as is almost every other institution on the earth and this is one of the dangers of the lodge system of Freemasonry again not the deep esoteric underlying meaning or purpose of the symbol and allegory that is contained in this tradition but the organization of it the official organizing bodies of Freemasonry okay this is the same thing that we talked about we talked about religion that the deep esoteric mystery tradition that underlies religion is all teaching the same basic concepts and it's teaching understanding of self and generally the golden rule that as you wish to be treated you should treat others period okay underlying all of those religions is are those deep esoteric truths however in the formulation of official religions you get structures you get hierarchies you get compartmentalized units and denominations etc and so forth and in doing that it creates political aspects to this and therefore you have power please go on you have the watering down of the tradition you have the hoarding and keeping of knowledge and the you know misinterpretations and misdirection that go along with all of those things that is the religious aspect you know misinterpretations and misdirection that go along with all of those things that is the religious aspect of religion and this relates to the structures that are existing within Freemasonry and the Masonic tradition again I don't want to get bogged down in that for what I'm attempting to get the listener to comprehend I'm attempting to teach what is generally known as light Freemasonry okay true Freemasonry all right just like I was explaining the esoteric traditions of Kabbalah and Tarot that's what this is about this isn't telling anybody to go and join the Masonic Lodge all right I wouldn't advocate that as a matter of fact because I believe that it has largely become some sort of just a network of people to come together and you know try to figure out you know ways of scratching the other person's back so that when there's back needs scratching someone else will do it and that again ties into all kinds of political motivations and all kinds of motivations in business money and really all of those things do not belong in the lodge system at all it's supposed to be about learning natural law and morality ultimately and it has become something quite other than that and as a matter of fact you know when you get enough psychopathic people together in a large system through the secrecy that is inherent to the large system itself you can get completely dark Masonic lodges that are really doing things that you know they're not chartered to do they have no business doing and are completely against other people's natural rights and I don't doubt that that goes on it certainly does in certain places however again what I am attempting to explain and I don't know how I can make this any clearer for people that don't get what I'm saying just turn off the show now and believe what you want okay because I can't possibly you know hammer this any more than I already have without you know belaboring this to it to an unbearable point I am NOT attempting to teach the compartmentalize / hierarchical structure of Freemasonry as it is in the lodge system I am teaching the underlying esoteric meanings of the allegories and symbols that is what I hope to convey and that's all I can say I can't say anything more than that to try to get you to understand what I'm trying to do by explaining this so if you think it's all bad and evil turn the show off and believe what you want okay period so with that having been said let's go into our continued exploration of some of the symbols meanings and allegories that are contained within the free Masonic tradition now this just generally conveys what needs to be done to try to counter one-dimensional thinking and this has been talked about by many people many researchers in different areas of what's going on people generally think along one-dimensional terms and think that the first thing they ever hear or see about something is all there is to it and that's not the case there there are two sides to the coin when it comes to understanding what the free Masonic tradition is about and how it has been used okay so we can you know believe all of the hype that's out there about what it actually is versus understanding that what it is is different than how it has been used okay and that's what I'm trying to get people to understand is what it originally was intended to be versus what it has become all right so what we're looking at here is what it is originally intended to be and attempting to get people to understand the unadulterated teachings within this tradition and I I will not say any more about this because again the point has been be labored if you don't understand that I can't help you so that having been said here we go we looked at the structure we started looking at one of its symbols and this is the most well-known symbol of the tradition the compasses and the square with the G in the middle of it I put a couple of stylized renderings of this up on the site this is image number two and three if you were in at the image section for tonight's show and you see the the square at the bottom on it's point and that's important in that configuration what that represents versus in the inverted form which we'll get to okay the squares we talked about last week represents lower consciousness it represents base consciousness instinct it would be the equivalent of the r-complex of the brain okay in physiological terms okay because ultimately what Freemasonry is all ultimately about is how to build a better brain it's how to build a better person through building a better brain and heart within the person okay that's ultimately what the craft is constructing that's why it's called a craft okay it's making something and the concept or the principle of making is contained deeply within this tradition as we're going to see tonight so the lower aspects of the self need to be ruled by the higher aspects of the self the lower aspects our physical world worldly identification they they need to be overcome that the base passions of the person need to be ruled over if the person is going to obtain self mastery that's what this tradition is ultimately about self mastery becoming a being that exists in unity consciousness as you think so you feel so you act and therefore the number three comes up over and over again in this tradition because it is about these three aspects of consciousness thought emotion and action okay so if we are going to square our actions meaning put them into harmony with natural law okay basically rule our actions that they're not going to be controlled by other people okay we're going to make them up right we're going to make them into in harmony with morality which we talked about in the natural law presentation if you want to listen to that go back to podcast number 36 I think people would get a lot from that I eventually want to record that as a video and get it out there which by the way as a quick aside I got the video for The Wizard of Oz presentation that I did at one of the free your mind fundraisers at German books up on the website as well that's in the news section so check that out as well but the the square representing the basin's thinks needs to be made into something that is more perfected okay it needs to be made into harmony with natural law and the divine aspects of the self which are embodied in the shape of the circle the square being the imperfect shape okay and the circle being the divine shape okay so we need to circle the square in other words the the the shape that draws the circle is the compasses the tool I should say all right this is about geometers tools all right and we talked about the G in the middle representing geometry last week that's kind of where we left off what does this G mean that's where we want to pick up tonight all right so the compasses represent flexibility not rigidness right they represent ruling the passions okay the base instincts they represent compassion coming together in feeling okay understanding we are one understanding that there is we all have the same fundamental needs desires hopes dreams etc and we're all in this situation together and that compassion needs to rule over the base instincts of the Bing okay so it it draws the circle or the divine shape and you see it depicted over the square not just above it vertically but actually on it if you look at it as laying these things down like let's say on a table or something that the compasses are on top of the square that's important they're not under it it squares not on top of the compasses it's the other way around the compasses lay atop the square okay because they are saying it's symbolically saying this aspect is superior to and needs to basically be put first over the basin's things otherwise we're going to have chaos which is what we have now okay the way to get from the compasses from the square I should say to the compasses is through the G through the centre through the middle the middle way the middle path as we talked about in the Kabbalistic tradition and we're going to see repeated in the Masonic tradition there's this concept of the middle path in in Kabbalah we saw it as the middle pillar okay the the pillar of or the path the middle path of mildness which is the middle of the Kabbalistic Tree of Life the sefirot ik tree which we broke down in Freemasonry it's the middle pillar also called Jacob's Ladder or the pillar of wisdom okay so we'll look at that when we break down the first degree tracing board hopefully later tonight so these two stylized renderings that I put here with the G in the middle you can then see repeated with the compasses and the square on image number 4 what having the Sun in the middle of it ok because this G represents the light as well okay light is a big symbol in Freemasonry as is the Sun okay this Sun again is higher consciousness it is the Christ consciousness it is the solar mind as it has been called okay it is higher level awareness of self understanding of the true self awakening enlightenment all of these things okay concepts we've explored at length on this show all right now the G itself I gave a general list last week and let's take them one at a time again the G in the middle of the compasses in square represents this third aspect of consciousness which is ultimately our emotions okay if we're going to square up our actions into harmony with higher consciousness which is represented by the compasses this is higher thought the higher mind okay the compasses are compassion right unity consciousness the left and right brain coming together at the fulcrum point the place of balance okay it's flexibility and it's harmony all right drawing the circle around the square the base instincts all right the G is the way to that state of higher consciousness and it's the emotional aspects of self the inner aspects either it's inside the G is inside it's not only outside of the shape it's inside of it looking within self exploration understanding the true nature of oneself knowing oneself gnosis the G is the first letter of the word gnosis in Greek in in Greek it's gamma right gamma nu Omega Sigma Iota Sigma is how you spell gnosis in Greek in English that transliterate stew G n OS is gnosis knowledge obtained from direct experience from going within okay it's another thing this Chi represents it represents geometry the allegory of geometric tools geometers tools being used to create this is what we create with our thoughts our emotions in our action the three aspects of consciousness okay it also stands for the Great Architect of the universe Gao tu which you'll see it written is sometimes okay this is God or the goddess okay the creator doesn't make a difference what you view it as alright the creative aspects of everything that underlies everything that we see that underlies the unity of all all right gnosis knowledge goodness everything that we want to create that ultimately serves us is done through getting in touch with that emotional center all right the G right I've said this or can also represent Gaia the spirit of the earth plane alright the spirit of this school that we are all ultimately in okay in this place for experience and creation it can also represent green green is the balance color in the middle again that G is in the middle in the middle of the visible spectrum we find the frequency green it's that the color that represents balance nature getting into harmony with nature green is found abundantly in nature the most abundant color in nature it's the love energy color is the color ascribed to the heart chakra okay the honor it can also represent green green is the balance color in the middle again that G is in the middle in the middle of the visible spectrum we find the frequency green it's the the color that represents balanced nature getting into harmony with nature green is found abundantly in nature the most abundant color in nature it's the love energy color is the color ascribed to the heart chakra okay be on a hot - chakra as we looked at when we looked at Kabbalah and the chakra system so green is another word that that could the G could represent the gift of life the gift of compassion the gift of intelligence the gift of emotions okay the capacities that we can experience these things in while being human are gifts it's the gift of the human brain to three aspects of the human brain correspond to these three symbols in conjunction with each other okay the square right the r-complex the G the midbrain the million aspect of the brain the emotional brain okay and then the compasses left and right brain hemisphere the neocortex the telencephalon of the brain okay this is this three fold pattern is repeated because it's all about consciousness in the self that's what this is all about people who want to continue to think all these traditions are about something external external external go right ahead believe what you want and keep being deceived these are all about the self and the the tradition of understanding that we are all one that we are all in the same situation together and that we are all aspects of the divine and to recognize that divinity and all others period but you know people will insist that's not what it's about just because sick twisted psychopathic people have perverted these teachings over time so there is no original teachings it's all one thing and you know that's what I believe and I'm sticking to my guns no matter what the evidence to the contrary points to good luck with that for those of us who really want to understand something deeper let's continue more of about the G ok so I also stated it could represent the gate to higher consciousness ok higher consciousness is all often depicted symbolically as a gateway or portal a Stargate ok the gate to the gods the gate to heaven the gate to higher consciousness all right so gate could be another interpretation all right what I said at the end of last week's show we're going to explore for a little while tonight is what this G the highest meaning of it in all of my studies at least that I've come to learn about what this G represents is known as the generative principle now the generative principle is essentially everything I've been trying to teach since the beginning of want coming forward into the public everything I've tried to teach through my video series my presentations my podcasts all of it under the understanding of the generative principle is really the only thing that can save humanity if we don't understand how we create what we get good night and you could tack that on to what the G represents ok joking of course but my point here is the generative principle is about causality ok the causal relationships regarding what we experience in what we call life in this 3 dimensional space-time continuum the underlying causal factors which I said on day one of doing this show which by the year that excuse me by the way this is the one-year anniversary of what on earth is happening tonight I've been doing this for exactly a year and it started on March 30th 2010 today's the 29th this is the one-year anniversary show so the generative principle what we get is a result of causal factors that get set into motion and if we don't understand those causal factors or in other words how we indeed created the manifestation called what we got we don't understand how we did that we're going to continue to create things unconsciously that we don't want the goal here is to learn what creates certain things what creates other things and then the choose wisely between those creative forces and as we said before and looked at in in depth ultimately the only two things that really create or generate is love and fear these are the underlying creative forces that go to work into making the experience that we all collectively share called reality or the truth okay so we need to understand how those two polarities work and how our choices between those two basic polarities ultimately affect everything that comes into manifestation in this reality that is the generative principle and it is the underlying hermetic principle that underlies all of the other hermetic principles that we looked at we looked at those in the presentation about natural law okay the seven hermetic principles the generative principle is the one overarching unifying principle that underlies and unites all of those other seven principles and if we look at the number eight it is an infinity symbol which meaning which means ultimately this is how it always has been is now and always will be it's infinite it's eternal it's forever the generative principle is forever it always has existed exists now always will exist and everything in creation is bound by it the end and get over it okay yet this is the thing that dark occultists do not want people to understand more than anything else above all else they do not want you to understand how we are the creators of what we are experiencing they want you to think you're powerless over it and they have most people fished in hook line and sinker to believe that just that that they are powerless over what is created in the world and this is not so that's the that's one of the biggest lies there is probably second only to the biggest lie that there is no such thing as truth the generative principle is what Freemasonry is ultimately trying to teach people and what dark ocultism and dark forms of free masonry I don't even want to use the word Freemasonry in connection with dark masonry because it is not what

Freemasonry is about it is a perversion and I make the delineation between true Freemasonry or what I call light Freemasonry and dark masonry okay because they're using utilizing two completely different kind of building materials light Freemasonry is building with light the light of higher consciousness and love dark masonry builds with walls that are erect seeing everything is separate okay and it builds through mind control you're trying to get people to accept the as truth instead of truth as authority all right so this G ultimately represents the generative principle and what that generative principle ultimately is is care and again that connects back with the emotional aspect of the self-care well we care about ultimately to focus our attention upon and then to put our actions toward is what we're gonna get the end that's it that's how it works if you we don't care we're gonna continue to get results we don't want and again this is one popular for saying things like this but I've said this before on the show will continue to reiterate it and I'm going to at the free your mind conference this is why dark occultists are kicking our rear ends this is why they're getting what they want and they're continuing to rule this reality and why we seem to be running around like chickens with our heads cut off wandering around blindly still not understanding why we're not getting what we want which is true freedom and why we suffer so much collectively here it's because dark occultists the people who have perverted this very tradition do have a form of care they do have unity consciousness they have sick twisted demented psychopathic thoughts they do care about what they want to achieve and put into manifestation and then they have the willpower to direct their actions into harmony with those two principles therefore they're unified amongst themselves which is the most important thing to be unified with in conjunction with the truth but the universe will reward unity in favor of this unity every time and that's an unpopular thing to say because what basically I'm saying is because they're unified in evil they're going to continue to win and it's true there are thoughts their emotions and their actions are unified in the act as one essentially our thoughts emotions and actions are not unified we don't there's one and therefore we don't get what we want and even if there's a few people that do align themselves with truth and are trying to explain these principles and concepts to people unselfishly put knowledge out into the world they still won't necessarily get what they want unless enough people do it put it into practice put it into manifestation knowing it is not enough doing it is what ultimately matters and that's what they the dark occultists ultimately do they have all three of these principles in line in harmony and crying your milk over it folks cry in your milk over it get as upset about it as you want that happens to be the case and the point is not sitting there upset about it because that's letting your emotions rule you instead of the other way around the point is understand how it works and then do something to correct it by first correcting yourself and how you're out of alignment with the generative principle come into alignment by bringing your thoughts emotions and actions into unison with each other and care truly about understanding truth putting it out there for other people and then live in harmony with it that's putting the generative principle into effect with with your thoughts your emotions and above all your actions because as we've said before you can know this stuff you can think and feel all you want unless you bring your actions into harmony with those two other aspects of consciousness it does no good no ultimate good is going to be manifested in the world because the people who do bring their actions even if it's for a dark purpose into harmony with their thoughts and emotions or lack of emotions I should say okay they're going to be rewarded for it the universe is going to grant them what they ultimately desire so the people that want to think oh you know there's some benevolent force that will never allow that to happen or deluding themselves there is a benevolent force out there and it wants us to have what we want but it's always going to reward unity consciousness / oppositional consciousness and like I said get as a offended or upset about that as you want that's how it works ladies and gentlemen that's how it works so I'm explaining to you this is why the dark occult rule this planet this is why people who truly want freedom don't have it this is the reason because the bulk of humanity exists in this oppositional form of consciousness where their thoughts their emotions and their actions symbolized in this tradition called Freemasonry and another tradition occult traditions which we looked at okay are not in unity a unison are not in unity with each other that's it and that is the generative principle or the generator okay or Genesis meaning creation all words that start with G the generator okay we're in other words the force that moves everything and of energy okay the generative principle true care that's what this G ultimately represents the Genesis principle the Genesis principle how we create what we get and so few of us understand that that's the reason that the world is in the sorry condition that it's in okay so that's the generative principle or the creation principle or the care principle okay so let's move on to an allegory of Freemasonry right so we looked at the compasses and square and the light and the G alright we'll go back to the the Sun as a symbol of Freemasonry this is this is depicted in image four and five as I said that's what the higher aspects of consciousness are symbolized by the Sun okay the light shedding light on knowledge I want to talk briefly about the word Mason all right so let's look at image number six which has a whole lot to it all right image number six there's so much symbolism in it it's it's a very complex image okay to break down in its fullness but let's start with that the word Mason okay means builder and that's all it means it means builder if you're a Mason you're a builder and what I've said in my work is that everyone is a Mason whether they you know identify with the occultic or esoteric aspects of Freemasonry or not it matters not everyone on this planet is a builder of our collective experience through what they think what they feel and what they do the three aspects of consciousness that are used to create what we get here therefore everyone is a Mason everyone is a builder and that will be unpopular you know saying that everyone is a Mason I didn't say everyone is a lodge freemason I said everyone is a builder of their experience understand the difference therefore we are all ultimately Mason's or builders of what we get okay that's what this word ultimately means now here above this in this image you see two all free and accepted okay this is the distinguishment between two general types of freemasons okay there's something called operative masonry operative masonry it stems from the Builder guilds of the ancient world okay and going back into the Middle Ages in the building of the cathedrals and we can get into all of those origins okay and you know perhaps we will but essentially some of the lodge aspects of Freemasonry come down to us in the modern world from some of these building guilds from the ancient past and it goes right back into the times of you know the building of all of the ancient sites like the pyramids and that the ancient temples the all of the wonders of the world and ancient stone building techniques that have been lost to modern history okay they go right into the dawn of antiquity and the dawn of mankind alright but more in the modern world the lodge system takes some of its rituals and some of its symbols from the builders guilds around the time of the first century AD into and upward into including the Middle Ages and the times of the buildings of the great Gothic cathedrals these builders guilds contained Mason's or very skillful stone workers that had the teachings held the teachings of how some of these construction techniques were used to build these incredible monuments okay and they often would unite with each other because their craft their art form was very valuable to people kings and emperors and the church would very much seek out these building techniques when they wanted a huge structure completed or built okay and therefore it was a lucrative business and you had side benefits even though there were despotic rulers in areas all over the world that would control through violence the movement of their people what they were allowed to have what they were allowed to do what they were allowed to say what they were allowed to read or even think okay these masons are builders were granted a modicum of freedom okay a level of freedom that wasn't afforded to other people so that they could move around on on the earth in ways that other people couldn't they were allowed to travel to certain places without their movement being restricted they were allowed to have certain educational materials that were off access to other people because of these psychopathic rulers okay so not only that but again since their skills were in such demand they were well-paid so they became knowledgeable they gained knowledge of other cultures and areas of the world and they became wealthy and this is the origins of the lodge system again which I don't want to focus on very much but just to give a brief background of and you can read that extensively through any you know Google search or checking out some books on Freemasonry itself so the this form that represents free okay is operative Freemasonry or a true Mason a true builder or what could be said is an esoteric Mason okay somebody that truly has the keys of the craft or of this esoteric tradition in their hands in their minds and in their hearts that's a true Freemason an accepted mason is known as a speculative mason okay and this term was used for people outside of the craft that were taken in to its knowledge that were showing that they indeed wanted the knowledge that was held by the original esoteric teachings of Freemasonry and again as I said this goes back to ancient Egypt and even before all right so much of the Masonic tradition has Egyptian symbolism within it all right because the the land known as Kem which is where the Commission mysteries came out of this was an initiatory mystery tradition that came out of this region of the world and eventually became Freemasonry in its one of its forms Kabbalah is another one of its forms and again it's basically the same teachings all right and we'll see it has shares some of its same symbolism so accepted masonry is also known as speculative masonry okay people from who are originally outside of this tradition of teachings that are accepted into them all right and this is kind of where the lodge system you know in its knowledge I believe begins to become degraded not that you don't want to share these teachings but when they did this in the lodge system at least it really began to open up air into the the knowledge of Freemasonry in to people who may not have had other people's best interests at heart people who may not really have taken these teachings as anything that are truly fundamental to human freedom because they don't really care about human freedom okay and began to pervert them for their own selfish aims because they could see the potential that a system based in hierarchy compartmentalization and a certain degree of secrecy would afford them okay and these are the dangers of that structure i'ma I'm certainly a proponent that modern-day Freemasonry needs to be restructured and many people have said this in the past I mean you know I believe it was the Duke of Kent back in the 1700s who said Freemasonry has already been so infiltrated by dark solar cult worshippers you know dark occultists in other words that he felt it should have been just disbanded altogether the lodge system and indeed it has been infiltrated and I you know I I think I'm making this abundantly clear to people that the modern system is infiltrated by these darker elements I'm not picking up for the modern large system I am I'm telling you it's infiltrated and it's watered down this is why I'm trying to teach the original essence of this tradition to the best of my capability and again I can't teach every aspect of it I could put a lot of things out there for people to look into it I'm going to I'm going to spend a lot of time on this okay however the only real teacher is your own desire to do your own research that's the real teacher I'm not the real teacher okay I could be a somewhat of a wayshower for people to open the door and say here you want to walk through this door well there it is and and connect some dots and you know bring some information together for people and that's all I do that's it you need to integrate this into yourself through your own desire to do so in the sphere of truth that's it and I think I've said that to a point of almost boredom in the past but you know people need to hear things a lot of times apparently because I still get people that listen a little clip of one show or something and then you know suddenly you know as Bob tuscan is fond of saying everybody's an operative you know then then i become somebody that you're trying to pick up for for people who are doing evil in the world or you know saying that i guess being an apologist i guess and that's not what i'm doing here i'm trying to paint the bigger picture of what has gone on with this tradition and then encourage people to look into it for themselves to see what teachings they can pull out of it alright so continuing so you have operative and speculative forms of masonry the speculative form however ultimately deals with the allegorical aspects and the symbolic aspect so we're not to say that this is a lesser form of free masonry it's just the words free and accepted free alludes to the original operative masons who basically became rich powerful etc okay in the in the in the past created the modern logic system and then took other people into it from outside of it or accepted masons but speculative masonry is ultimately what we're teaching here okay the word operative means you have to put it into operation in the world it has to become integrated with your behavior with your actions okay so both of these forms of free masonry are important I'm just trying to get you to understand what these words refer to on this image so that's two all free and accepted Mason Masons okay we see the compasses in square with the G we've already looked at that okay and then we have the two pillars okay with the third symbolic form of the pillar being represented by this gentleman in the middle riding on a goat okay who will get to in a moment actually will probably get to that in the second hour of the show and we hook up with Oracle broadcasting but we have these two pillars okay one is called the terrestrial pillar and one is called the celestial pillar okay so we have these depicted and we have the symbols of the Sun and the moon above them and the all-seeing eye and we saw that previously when we looked into the religious traditions into the solar cult the lunar cult and then the cult of the stars and planets represented by the all-seeing eye we're gonna see this again when we look at the first degree tracing board okay so again these pillars represent different aspects of consciousness the actions and the emotions the solar pillar is the action as the lunar pillar is the emotional qualities they need to be brought into synthesis with each other or unity such that we are doing that which we think and feel is right and those things are not in opposition with each other the middle pillar is represented by this gentleman in the middle they're blindfolded dressed in what in white riding on a goat his name Hiram Abiff h AI r am a biff a bi FF Hiram Abiff is allegorically okay the prototypical freemason okay he is the builder of the temple of Solomon one of the three builders I should say okay well as we saw before briefly the Temple of Solomon represents the self it represents the three aspects of consciousness it represents thought emotion and action and it represents the body mind spirit connection it also represents the brain okay the lower aspects of the brain represented by the checkerboard floor the r-complex base consciousness okay which we see here in this image as well then we have the emotional aspects of the brain okay again care the G the generative principle true care and then the higher aspects represented by the gods above higher level thought higher consciousness non earthbound awareness or non physical matter identified awareness Hiram Abiff okay is another it's a wordplay it's a symbol and a wordplay we're not talking about an actual person this is an allegory and I'm gonna read a little bit about the allegory of Hiram Abiff coming up in the second hour Hiram Abiff it's a wordplay for high ram above okay the RAM the symbol of Aries the beginning of the zodiac okay the RAM has symbolic meanings in occultism we saw it used symbolically very often okay rammed of course being a male sheep okay it's a symbol of courage alright it's actually taking action in the world right it's a symbol of force or power alright a symbol of divinity and we'll get into that soon Hiram Abiff is a symbolic representation of truth the three builders of solomon's temple of Hiram king of Tyre representing the r-complex of the brain Hiram Abiff representing the midbrain who was ultimately building the temple for Solomon the higher mind the coming together of the neocortex Sun and Moon soul and mon-sol and Moon okay Hiram Abiff is the Sacred Feminine aspects of the consciousness the emotions alignment with truth the Holy Spirit the Divine Mother so to speak okay even though he's a male figure that's what he symbolically represents in this tradition okay I'm gonna read a little bit about the the story of Hiram Abiff coming up in the next hour and showing you how this spirit is symbolically murdered okay and because that's what he ultimately represents is the spirit of men and truth and natural law so just like Mott was the spirit of truth and justice in the Egyptian tradition in the Masonic tradition Hiram Abiff represents these concepts he represents morality truth natural law of justice balance that's why he sits in the middle between the two pillars okay he rides a goat because he is controlling the base instincts or base passions represented by the goat a traditional symbol in different pagan cultures and other dark forms of occultism of lower consciousness and you know just the the instinctual nature of man itself as we saw when we saw the the Baphomet symbol that's used by the Church of Satan that's why they choose the goat as their main symbol yes it's a fertility symbol but it's also a symbol of the the darker aspects or the hidden aspects of consciousness that are often wielded as weapons okay so Hiram Abiff represents truth balance harmony natural law he's he rides the goat because he is basically controlling and sitting above the base instincts okay so he has achieved mastery he is blindfolded this means he is blind to the worldly aspects of self he has a chain achieved inner spiritual vision all right we saw this in the movie The Matrix the main character neo becomes blinded to the world and then he is blindfolded okay and then he it needs to develop his spiritual vision in order to be able to see the matrix for what it is this is you know where this is borrowed from actually okay so that's where I'll stop for now I'm going to connect in with Oracle broadcasting like to direct everyone's attention to my website now which is what on earth is happening dot-com because at the stage of what I've been doing over many weeks is explaining different rituals and occult I'm sorry symbolism and different occult traditions to people from a neck from an esoteric point of view from an esoteric perspective meaning the deeper underlying mystery tradition perspective of these different traditions to help people to get a better understanding of what they really are and what their original intent was before they became perverted and used as weapons against the consciousness and against free humanity okay so we have to become more mature in our understanding that and we're talking about something like free masonry or Kabbalah or Tarot or any other occult tradition we're not talking about one thing we are talking about an original deep mystery tradition that is about the self and about human consciousness and then there is a dark form which has been watered down perverted over time okay to basically be used as a mechanism for control against those that know nothing of the deeper teachings that these traditions hold that are all about the self and the aspects of consciousness that are within us all okay so this is all about self-knowledge ultimately and I am NOT attempting to teach what is called Lodge masonry this is the esoteric underlying teachings of traditional Freemasonry okay so I don't know how I can make that any more clear I want all kind of like a rant about that the first hour but that is what I am attempting to convey here so understand the distinction between those two things understanding that Freemasonry is not one thing as I said I believe last week it is all about our choices of building material because that's what the word mason means builders okay a builder everybody is a builder of our own collective experience in the world of reality that we all create through our thoughts our emotions and our actions and builder basically is about the choice of building material that we use to create our reality do we use light and truth and harmony with natural law to build what we see around us or instead do we use divisive nacinda vision and seeing each other as separate do we erect walls okay so I in the way I explain a light Mason or a true freemason is one that tears barriers down he tears bricks down blocks to higher consciousness okay he tears down divisions between people all right a dark Freemason or what I just call it dark Mason I don't even use the word Freemasonry in connection with the darker tradition a dark builder essentially is one who wants to erect walls and keep people separate and keep people in the dark okay he wants to build barriers within people's consciousness not to unify their consciousness but to keep it separated not only from other people but most importantly from oneself okay so that we don't understand what we're all about and our deep underlying motivations and our the aspects of the psyche that we need to work with and understand at a deep fundamental level in order to create a better reality true Freemasonry is about creating that better reality because it is a tradition in which natural law and morality is taught to its members through a system of symbols allegories and rituals and I hear the break music coming up so we'll take a break right there folks be back I'd like to direct your attention to my website what on earth is happening dot-com if you click on the radio listen link at the top left-hand corner where it says listen live you will be taken to the page that contains the player for the show on Tuesday evening underneath the player under the player there will be a list of images for tonight's show we have been looking at these images and we were on image number 6 which is a image of the allegorical archetypal original Freemason known as Hiram Abiff he is there depicted in the center of the image with the Masonic compasses and square behind him and he is between two pillars which is a common theme in Freemasonry with Hiram Abiff himself acting as this middle Oh mediator okay between these two pillars a symbolic third pillar if you will and this idea of three pillars or two ways that diverge to the left and right and then one that is a synthesis between them that is basically acting as a balance point it comes up over and over again in different occult traditions and we already saw it previously looking at the tradition of Kabbalah the Kabbalistic Tree of Life with its three paths okay the path of severity on the left the path of mercy on the right and the unifying or synthesis path which is the path of mildness in the middle again this theme is repeated here in this imagery that basically symbolically depicts some of the symbols of Freemasonry the ideas of Freemasonry I should say the two pillars are the left and right aspects of the brain they are the masculine and feminine principles within us all okay they are our emotions the sacred feminine aspect in our actions the sacred male aspect masculine okay and we need to bring those into alignment with each other okay based on our knowledge of natural law and our knowledge of how we create what we get we need to become knowledgeable about the generative principle which is what we talked about largely in the first hour and the generative principle is care and it's basically the knowledge of how natural law works and caring enough to bring our emotions and our actions into harmony with that natural law such that we create goodness and order in the world not through our ignorant of natural law creating chaos which is basically the situation that we have now Hiram Abiff this allegorical master Mason basically represents the knowledge of natural law he represents truth goodness and order because he is the synthesis or the marriage between the masculine and feminine aspects of consciousness or the unifying aspect or bringer together of emotion and action okay so he is depicted here clothed in white representing purity and goodness and he is blindfolded meaning that his sight is not of this world it is a spiritual or inner sight and we left off in the last hour saying that this was picked up in the allegory the matrix a great movie trilogy allegory okay which is about spiritual awakening and the hero neo who ultimately represents the higher part of the brain the neocortex okay who needs to understand himself as the one meaning to bridge the left and right or the masculine and feminine sides of himself so that he can come into harmony with with his true path with what he knows he needs to do becomes blinded later on in that series to the to the physical world or the matrix world and he develops true spiritual vision he can see the matrix for what it is truly for what it really looks like so that's what this is symbolically saying here is Hiram Abiff is the true spiritual vision he is truth he is higher consciousness he is the spirit of things the unifying aspect of everything is spirit okay so he could be identified or kind of liken to he is analogous to the Holy Spirit in the Christian tradition okay again this was the Sacred Feminine Divine Mother in other traditions that predate Christianity but again the Sacred Feminine is downplayed because that's all about the emotional qualities and modern religion is a male Dominator at a male-dominated game okay so the Sacred Feminine had to be removed and as we saw replaced by a dove a symbol of the Dove representing the Holy Spirit in the Christian tradition the religious Christian tradition I should say Hiram Abiff okay there is a legend there is an allegory to him and before I get into that allegory I would like to read some a brief description of the symbolic meaning of the the RAM okay because that's what Hiram Abiff represents it's a wordplay wordplay is often found in different occult teachings and it is also found in Freemasonry Hiram Abiff is high ram above okay this is though he is the RAM that exists with the gods he's not really here on the earth man this is a symbol okay it's an allegory it's not a real person he was one of them and biblically he's one of the builders of the temple of Solomon okay because he is the middle or unifying aspect between the base consciousness were the lower physical aspects of consciousness which are represented by Hiram king of Tyre in that in the Masonic allegory of the building of of Solomon's Temple Hiram Abiff is the Sacred Feminine midbrain which is where our emotions derive from okay the ability of us to feel the repercussions of our actions toward other people and then Solomon is the left and right brain or the neocortex the telencephalon of the brain okay he is the Sun and the moon come together Solomon okay this is an allegory about the building of the brain and the building of the human heart in harmony with natural law and morality okay we have to understand this from a more mature symbolic perspective rather than thinking of these as literal things okay so Hiram Abiff is identified with the beginning of Aries the beginning of the zodiac when the Sun rises in resurrection at the spring equinox that's when that happens in Aries so he is the bringer of the light okay into a world of darkness understanding of natural law and truth all right so let's look at some of the symbolic meanings of the RAM traditionally okay the animal symbolism of the RAM is traditionally used to represent power force drive energy virility vitality protection and fearlessness these are the qualities that the RAM traditionally is used to represent in in all forms of occultism basically okay a look into mythology will reveal the ramp has associated with many gods over time and I'll read you a short list of those gods and you can understand that this is a basic retelling in Freemasonry of different hero myth traditions in which Hiram Abiff represents all of these gods in the Masonic tradition ok a God if a God amongst the people ok wouldn't you agree that these are admirable qualities so in other words Hiram Abiff represents the godlike qualities that we can embody as human beings and I hear the intro music and we'll be right back alright ladies and gentlemen we're back on what on earth is happening before the break I was discussing Hiram Abiff and how that is a wordplay for high ram above the scent the zodiacal sign of aries as being the bringer the returner of the light or the Sun into the northern hemisphere to begin spring in the season of rejuvenation and how that is a symbol of spiritual awakening ok so I was reading an excerpt about the symbolic meanings of the RAM and we saw that it is a symbol of power drive virility protection fearlessness courage in other words okay so these are admirable qualities and these are qualities to be cultivated to become more in harmony with divinity and natural law so there are some gods that had symbolic connections to the RAM in the ancient world among them was the Celtic God karna knows and he was often shown with a ram some depictions of him show him seated with a ram headed snake by his side and this was a symbolic gesture of renewal and power in ancient Egypt the god Ra took on the persona of Canoe the Creator God who was always depicted with a Rams head okay in Scandinavia in the Norse tradition Thor was often connected closely with Iran and he was able to use Rams that pull his chariot okay Thor other gods that were connected in the ancient world with the strong will okay because this is about the will Hiram Abiff is ultimately about higher will will with a capital W will to come into harmony with natural law and the ultimate drive behind creation which is ultimately to live in harmony with the laws of nature and the laws of higher morality that's what it's ultimately all about achieving self mastery mastery over self and only through which can we obtain any level of mastery of nature it's not even mastery it would just be really living in harmony with it so that we don't use it as a destructive power which we're currently doing okay so other gods connected to the strong will of the RAM or Zeus Apollo an Apollo place very prominently in Freemasonry Agni from India Indra also an indian god Hermes Roman okay and Grecian a uh a God of the Middle East and bel another Middle Eastern or Phoenician God it is noteworthy that the RAM is the first sign of the zodiac as Aries hence it is the symbolic form of impetus fervour renewal virility and fiery force all connected with the coming of the Sun or of the light okay this sign embraces the return of the warmth of the Sun as the March equinox approaches okay so symbolically that is what we are seeing here when we're seeing the symbol of Hiram Abiff and that is what the story of the building of the of Solomon's Temple biblically is ultimately about is building with light becoming a builder with the light with the spirit which Hiram Abiff as the main architect of the Temple of Solomon okay represents this is a representative symbolic allegory okay so let's continue to look at the legend of Hiram Abiff in the Masonic tradition okay so I'll read a brief excerpt about this tradition this legend and then we'll we'll analyze it Hiram Abiff a widow's son from tyre now we'll get to what the widow's son symbolically means okay skilful in the working of all kinds of metals right there that is symbolic working in metals so he's an alchemist this is not physical this is not literal metals okay he's supposed to be the builder of the temple of Solomon and builds with metals that was his forte but this is a an alchemical allegory it's symbolic okay he was employed to help build King Solomon's Temple the legend tells us that one day while worshiping the grand architect of the universe which we saw that that G in the middle of the compasses and square symbolically represents okay within the Holy of Holies Hiram was attacked mark hey Bob you know what on earth is happening Bob are we on I'm going to assume that we're going through so here we go so the the allegory of Hiram Abiff is what we were delving into and we were at the point where I was reading things about the legend of Hiram Abiff okay so he is accosted by three ruffians as the legend goes and this is done at three areas of the temple of Solomon while it is being built the first is the east gate the second the south gate and the third the West Gate where Hiram is finally slain and I'll look into this symbolically okay the east gate is where the Sun rises the south is the direction that the Sun takes its trek through the sky during the day it does not go into the northern part of the sky but the southern part of the sky is where it makes its arc in the northern hemisphere okay and then it sets in the west or the Sun dies for the day and then he resurrects to new life the next day to repeat the cycle all over again so the three ruffians yeah mark pass you know what on earth is happening you're live let's see if the connection is any better now how are you marked Bob can you hear me yes and I think the connections much better now great fantastic okay so we were looking at all right well let's not waste any more time I'll jump right into it thanks Bob we were looking at the legend of Hiram Abiff and we were looking at how he was attacked by three ruffians called Jubal a Jew below and Juba loom at the Temple of Solomon okay they attacked him at the the east gate of the temple then the south gate and then the west gate so the first the first ruffian Juba la attacks him at the east gate then Jubal Oh at the South Gate and then Jubal um at the West Gate this is symbolic of the sun's path through the sky and it's rising and setting each day okay so the east gate is where he rises the eastern horizon the Sun comes up light which Hiram Abiff represents the Southgate represents its zenith because the Sun and its zenith from the perspective of those living in the Northern Hemisphere always makes a trek through the southern Lee portion of the sky not the North okay this is also why there three candles in Freemasonry Psalter one at the east one at the South one at the West but not one in the north okay so the West then is the death place of the Sun the setting place of the Sun each day and symbolically that's where Hiram is slain and then he you know resurrects the next day like the Sun resurrects to new life at the beginning of each day and repeats the cycle all over again okay so these three ruffians Jubilees Joe Blow and Jubal um attack Hiram okay so they are demanding the lost word okay the master were them the Master Masons word and it's supposed to be the secret name of God Hiram Abiff refuses to divulge this deeply held secret of the the builders and therefore he is attacked by these three ruffians the first ruffian named Jubal ah strikes Hiram across the throat with a 24 inch gauge which is another Masonic tool symbolically okay and well there's the outro music for this break and we'll be right back after these messages folks [Music] ok ladies and gentlemen were back on Walker's happen on your host Warren pass delving into the legend of the fireman so he looked at the ruffians attacking Hiram Abiff and this is representative of the sun's trek through the sky and its subsequent death in the West okay the first rock ruffian named Jubal awestruck Hiram across the across the throat with a 24 inch gauge this represents stopping speaking the truth were not speaking the truth at all he hits him in the throat chakra okay so I've often said that the universe is spoken into existence other people have said that the that the other people have said that history will reward those with the loudest voice you've make may have heard it said that way but essentially we we need to put the truth out there in order for people to understand it grasp it and then live in harmony with it so it needs to be spoken so that's what that's symbolic of the second ruffian name Jubal Oh struck Hiram's breast over the heart with a square okay so this represents not feeling or caring okay and he hits it with the square which is what represents the lower base instincts where the base passions the lower consciousness and this symbolically represents apathy is a way to kill the light okay within us the third ruffian named Jubal um struck Hiram upon the forehead with a gavel okay or a setting Maul in some tellings of the story okay where Hiram fell dead all right so this he is struck in the head which is the police place of thoughts so this is about knowing the truth this is ignorant in other words okay so the three ways that the light is put to death is through apathy through ignorance and then through laziness not then putting it out into the world okay or the courage to speak not having the courage to speak which is cowardice all right these are the murderers of the the light these are the murderers of righteousness and and morality and goodness basically all right so Hyrum having been killed was carried out the east gate of the temple and buried outside Jerusalem early the following morning King Solomon visited the temple found the workmen and confusion because no plans had been made for the day's work since Hiram was the chief architect okay fearing the evil had befallen Hiram King Solomon sent out 12 fellow craft Masons to look for Hiram again the number 12 right symbolic of the 12 signs of the zodiac Hiram Abiff representing the light or the Sun okay he's the widow's son all right he is the Masonic Christ in other words okay it is just another retelling of the same story that we looked at when we in-depth covered Astro theology and religion as Astro theology okay so what I'm attempting to get people to explain to understand by explaining this is the same thing that I was when I was explaining Astro theology get past that to the deep underlying tradition about consciousness that it is attempting to teach okay so fearing evil had be following him he sends out 12 fellow craft Masons to look for Hiram that's symbolic because the fellow craft is all about care you have to care enough to seek out the the light or the truth in order to ever find it okay King Solomon himself accompanying the three Mason's who journeyed toward the east so he sent out three in each direction this is symbolic of the seasons and he goes toward the east which is symbolic of the Rising Sun okay and it's also symbolic of going toward the east which is the symbol of aries high ram above Hiram Abiff okay and it's symbolic of the resurrection of the light or of truth okay so having finally located the green grave of Hiram Abiff Solomon and his fellow Masons exhumed the body a search was made for the Masters word but all that was found was the letter G which we talked about extensively in the first hour of the show okay the generative principle or true care meaning that that was still present to some degree finding the lost word a layman 2000 help for the widow's son and we'll understand what this cry of distress means in a moment okay they first took hold of Hiram's body with a bow as grip of the first degree this failed to achieve its purpose this means the motion alone will not ultimately achieve the purpose that you are seeking okay you need to combine it right then they reposition their hold upon hirez body using the jaw keen grip of the second degree this also failed to achieve its purpose now this represents having developed will to act alone okay the Jay King pillar represents the male principle okay that also fails to accomplish its purpose Salomon finally raises Hyrum from the dead using the third degree grip of the Master Mason okay now this represents putting all of them together our thoughts our emotions and our actions in unity with each other okay the place of higher knowledge ultimately the grip that finally raises him is Solomon's grip which represents symbolically true knowledge of oneself this represents deeper esoteric spiritual knowledge okay represented by the coming together of the left and right brain or the awakening of the all-seeing eye okay the coming together of the masculine and feminine forces within the self all right and this is also symbolically rep by the five points of fellowship which is a Masonic greeting which represents the coming together of earth air water fire and ether or spirits okay basically the most important of which is the spiritual aspects okay the five points of fellowship is what he raised him with as well and by uttering in Hiram's ear the phrase maha bond which is often used in conjunction with the five points of fellowship grip and stance in order to identify oneself as a Mason a freemason so in in thus doing so Solomon had raised Hiram Abiff from the dead this represents the symbolic raising of the light and of truth from the dead the spirit is what is being raised okay we'll look at this extensively through the symbols of Freemasonry over the coming weeks so what I want to essentially look at here was that Hiram is killed by the failure to use our thoughts okay intelligence he is also killed by the fail or failure to care which is apathy and he is also killed by the failure to speak an act which is which is uh cowardice okay not having the courage to actually speak an act and then failure to do so is the lack of will okay not having a will it seems to me mark that you're describing the same elite pigs that we talked about all the time that's ultimately the dark occult and the people who live under their mind-control they are the members of the light of this world and we have to someone next week this is what I don't have in my from a symbolic one Bob thank you so much and hopefully we won't have any more technical difficulties next week check out what on earth is happening calm and free your mind conference calm thank you everyone for listening mark thank you very much and I look forward to always having you on and that will work out all the technical glitches and I hope everybody could get past that you missed any of this show go back to what on earth is happening calm or the Intel hub radio calm which is our website tomorrow we'll be doing a full report on the nuclear situation as well as a report on the Middle East and we've been covering these these two topics it seems like the last couple weeks almost now and I'm getting tired of it I don't know if you are as well so it was nice to hear marca with a refreshing you know talk on some of the deeper aspects of the occult and I am looking forward to joining mark in Philadelphia at the free remind conference for my conference calm is the website for that and that's April 9th and 10th join us if you can and so much more to come this week on the Intel hub radio show and you're not going to want to miss any of it coming up next on Oracle broadcasting Lee Rodgers live free or die and I always look forward to hearing least take on the Daily News and is a website wrote government well as blacklisted news the Intel hub comm and so much more all friends of the show I get the Intel hub comm is obviously a friend of the show anyways we'll see you in tomorrow night same time same place you

What On Earth Is Happening Show #054

Topics: *Freemasonry, Hiram Abiff, The "Lost Word," The Entered Apprentice, The First Degree Tracing Board*

last week we left off discussing Freemasonry as an allegorical tradition as a tradition in which ultimately what is attempting to be conveyed to the initiative this tradition is an understanding of morality and an understanding of natural law principles and this understanding is taught in an indirect way in Freemasonry it is taught through a system of symbols allegories and rituals that is what Freemasonry is at its essence ok and we made the distinguishment between true esoteric Freemasonry and Lodge masonry as it is practiced today how that has been kind of watered down and degraded over the years it's not in a good State it's in kind of a state of disarray if you ask me and we're making the distinction between two kinds of masonry ultimately Freemasonry is ultimately trying to build a world of freedom that is in harmony with the natural law dark masonry which is what a lot of Freemasonry so-called Freemasonry has turned into is attempting to build barriers between people erect barriers in their mind toward coming online to true psychological freedom getting out of mind control in other words ok they're putting barriers in place to that continuing to teach the idea of the authority vested in man of which there is no such thing that's that's one of the biggest lies that can never be taught bought or sold and basically continue toward an author authoritarian path which is leading us into the system of slavery which we talk about on this show that is dark masonry I don't even call that free masonry it is a perversion of the original esoteric teachings of true free masonry do not doubt that that is actively going on and a lot of launch systems are set up for that very purpose so we have to be mature in the understanding that we're not talking about one thing here when we talk about the tradition of masonry okay we're talking about a pure unadulterated tradition and then one that has become adulterated and infiltrated by dark oak cultists and what we are attempting endeavoring to teach here is the true unadulterated teachings and the true meaning behind the symbols and allegories of the original unn adulterated tradition of Freemasonry so we were looking at the general structure of the degrees we looked at a couple of weeks ago into one of the main symbols of Freemasonry the compasses and the square with the G in the middle of it and we looked at the concept of light and the role that light and the Sun plays in this tradition and last week we delved into the allegorical legend of Hiram Abiff the original master Mason and we saw that this legend is essentially about death and resurrection and it has very deep connotative analogies to Astro theology as we saw last week Hiram Abiff is a master builder who King Solomon basically recruits to build his temple and he's the main architect and charge of the project he's skilled in the working of metals this is very symbolic because alchemy is about the working with metals and it's about changing base metals into higher-quality metals like gold and this is really ultimately an allegorical symbol for changing base consciousness into higher-level conscious so he's an alchemist Hiram Abiff okay he's not just a builder of a physical building okay this is just the symbol he's a builder of a better form of consciousness and a better brain and ultimately a better human being okay because the tradition of Freemasonry is ultimately about the brain and the heart and those two very very powerful centers of consciousness actually being built to higher States and to ultimately work together and not in opposition but in unity consciousness again such that we are we become beings that as we think so we feel and so we act and we do that in a moral way and in a way that is keeping with natural law as we've discussed so much on this show so Hiram Abiff is also emblematic of the Sun we see that in this legend he is in the allegorical story of Hiram Abiff he is accosted by three base consciousness individuals they call them the ruffians Jubilate below to balloon okay these three individuals basically confront him at three gates of the temple the symbolic Temple of Solomon okay and they asked him for the secret word of masonry which he refuses to grant them because there's a reason for this when we get to the idea of what the lost word actually is and what that concept represents and why really even if he wanted to give him the word he could not really give it to them because again it's a symbol it's symbolic and no one can actually give you that and you'll understand what I mean when we get to what that lost word is so he he refuses to give up this this deep secret of masonry the lost word to these ruffians these base consciousness men and they they accost him so they strike him with a 24-inch gauge with a square and with a setting Maul okay so he's well I admit perhaps it's a level on I can't quite remember but he is um he is struck with these three tools okay and the final blow comes in the form of this hammer to the third eye okay so he struck in the chest he stuffed in the throat and he struck in the middle of the forehead or the third eye chakra okay now these three blows that he receives ultimately kill him he is his first accosted in the east then in the south and then in the west where he is slain and what this represents is the path of the Sun okay so again Hiram Abiff is likened to the Sun in in the allegory of the legend of Hiram Abiff and this connects with Astro theology which we've looked at extensively particularly the Christian form of it so he is like the Masonic Christ figure or hero Savior that is slain and dies and then needs to be resurrected and again this all ultimately is about the killing of the truth the killing of the human spirit and how those qualities need to be resurrected within us that's the deeper meaning behind the allegory we can't get caught up in the physical story okay thinking that it's literally true then we can't get caught up even in the the exoteric Astro Theological underpinnings which are really just a relationship to the light and the Sun and its path in the sky okay it's telling a story about the light and that's what higher on the Beth represents the light needs to be resurrected the truth needs to be resurrected living in harmony with natural law needs to be resurrected okay so this is a death and rebirth story okay a story of being slain or basically being put into a state of dition consciousness or unconsciousness as the case may they would be better to say condition of total unconsciousness or basically being dead to what's really going on in the world and within yourself okay and then needing to go within and find that the courage the desire and the knowledge to resurrect yourself out of that sorry condition of consciousness that's what ultimately this story is about so that's what the story of Hiram Abiff is telling and Solomon representing you know the higher force of consciousness the coming together of the Sun and the moon who the temple is ultimately being built for and we're going to look at this symbolic Temple of Solomon tonight he sends out 12 helpers to go and look for Hiram Abiff and resurrect him from the dead and this is of course the story of the Sun and the 12 thousands of the zodiac and the Sun making its trek throughout the year okay between the northern and southern hemispheres it rises in the northern hemisphere then it sets in the in the fall season to the the southern hemisphere where it goes to its lowest point of power at the winter solstice and then it resurrects again at the spring equinox to repeat the cycle all over again okay so that's what we're seeing here again in this tradition very similar to what we see in the Christian tradition okay it's it the the parallels are striking okay because it's ultimately attempting to teach the same message as the esoteric form of Christianity that's what true Freemasonry is attempting to teach the Golden Rule treat others as you would be treated period live in harmony with natural law respect others others natural law rights there is no authority the Creator is the authority man is not the end that's it okay ultimately that's what lies at the end of this initiatory process if someone really is open to it and transforms through study through you know the desire to open up their mind get out of their conditioned level of consciousness and improve themselves okay ultimately that has to be done by the person themselves the larger system can only be a helper or an assistant to that process okay like anyone with vast amounts of knowledge cannot actually change someone's consciousness for them the being must do that themselves that is their own work all a person who has a lot of information and a higher level of consciousness can do it show somebody the way they can show them the door but they have to walk through it they can show them the path but they have to walk down it okay so to go back to this story of the murder of Hiram Abiff we'll look at in when we look at the third degree we'll look at that process of resurrection because that's what the third degree tracing board is all about the first degree tracing board which we're going to look at tonight in a little while is about the building of the Temple of Solomon and what that Temple of Solomon symbolically represents we've already seen this image before on the show but I'm going to expensively attempt to break it down this evening so uh the first degree of Freemasonry is known as and this is the initiatory degree initiation means beginning okay so I said before on the show that dark oak cultists okay actually have a name for people people in the world who basically have no idea what's going on in the world they have no idea what's going on within themselves they don't know about consciousness they don't know about the forces that shape consciousness they know nothing of the brain they know nothing of the human heart and the mechanisms of the soul the deep underpinnings of the human psyche and how that works they basically are people who know very little about anything of any major significance dark occult us in the world who try to keep people in this manipulated and conditioned state our whole lives and let them die in that condition um call people the dead that is what they actually refer to people as the dead okay as sick and twisted as that is that is their name for the average human being on planet Earth okay I have said before on the show they also will sometimes refer to them as the unbe gun those who have not begun to even begin the process of deciphering reality and searching for truth they have not even started they are not even a little bit of knowledge at the place where they have a little bit of knowledge or understanding of natural law or how anything works basically and that means they are uninitiated they do not have initiation okay they do not have initiatory drive that drive the desire that is necessary to begin the process of awakening toward enlightenment and what this first degree is ultimately about is initiation it is about beginning at the bottom level to climb the long ladder to enlightenment okay and as Hiram Abiff represents the light okay and he will not give this lost word to these ruffians who attack him because he knows ultimately again even if the desire was there to suddenly enlighten them they must do that work for themselves again the idea here is that enlightenment is a stepwise process it doesn't just magically happen it requires time when you are in a state of conditioned consciousness you're not going to just suddenly and majestically magically all at once break that conditioning and I've said okay there is this concept in Eastern traditions known as the Satori awakening SAT Ori this sudden awakening may be it comes in the form of some sort of a mystical experience or a Kundalini explosion of energy wonderful that happens you know it may happen to one in a million people if that people who have any experiences like that like a Southern Satori awakening that they're they're completely conditioned and in a state of general unconsciousness and then they suddenly awakened one day and they really know what's going on in the world they should thank their lucky stars they should count their blessings wonderful if that happens I'm not gonna frown upon that but you know what that happens so rarely that it's almost not worth talking about if it happens wonderful go with the flow and enjoy but for most people down here on the ground enlightenment requires work and it's a stepwise process of pulling yourself up one rung at a time one level at a time and that takes time to accomplish it doesn't just happen all at once so that's what this idea is and yes this is a Western mystery tradition concept it isn't much in keeping with the Eastern forms that enlightenment can suddenly suddenly occur okay and again I've said I don't dismiss that idea however it's so rare that what we are basically talking about and focusing on is how it happens for most people the process of enlightenment it is a stepwise process requiring time effort and desire okay to continue on no matter what the obstacles look like so I'm gonna take a break right there and we have a caller on the line so let's take this call guest number four you're on what on earth is happening what do you have for us good day mark I go by the name of deeper okay how are you doing tonight fantastic thank you mark I've been going through your archives and listening to your shows I'm trying to go all the way through from the from the show one and and it's been very enlightening very well enlightening that's the thing you know once you see the pattern or the trap and you have the chance of avoiding your changing events in the situation and you're pointing things out and you're helping me to see things and I appreciate that a lot I appreciate the kind words of encouragement there and again that's all I'm here to do is connect dots paint a few pictures that help people to see a wider you know array of things and how they interlock together and hopefully I'm doing a fairly decent job of that and you know my suggestion is to just keep going you know keep seeking truth and you know that that's what it's all about it's it's it's about that journey so I appreciate that yeah do you have anything else well that's that's one of the things here you know the one of the things you say is to just go ahead and research things just go ahead and find things and and I have been doing this process on my own for some time as many of us have but the problem I run across is that there's a lot of disinformation oh yeah and be the very occulting of the of this concept makes it very very very difficult to find the real deal yes how do you determine which things are the truth and which things we should focus on the things he said the right this is not nothing it's rubbish yes let's talk about that so there is a lot of disinformation out there and the reason for that is very simple particularly with the dawn of the internet okay when information availability is widespread and it's basically at people's fingertips okay you really can't hold back the floodgates of information anymore okay so information is out there it simply is out there all right what those who really want to stop people from reaching certain information are doing now as opposed to attempting to withhold certain pieces of information which they know they cannot because anybody can be a publisher now you can scan something and put it online you can record something it digitally and put it online and when it hits the internet it basically becomes immortal practically unless this planet goes away okay that's how powerful the internet is soon as something hits the net people are downloading it especially if you on some kind of a distributed information system like BitTorrent or something like Usenet which goes out to tens of thousands of servers worldwide when it hits the web in a form like that it's basically preserved and it's going to be in circulation of knowledge in the world until this planet is no longer here okay so they know they can't stop the flow of information what they need to do is add noise to the signal so that while that signal is being broadcast it becomes hazy err and fuzzier and more disjointed and and and you know like a radio signal that isn't coming in clear okay so I think that's what you're referring to here now my suggestion to that is go to sources that basically are talking about the main underlying concepts and don't get too bogged down in details okay now of course we delve into details here on the show it's important to do if the person is speaking from the point of view of true freedom individual sovereignty the understanding that there is ultimately no authority and men I that's a person that I would pay attention to if they're promoting something that is self empowering and not fear-based but also not from an egoic perspective from a perspective of truly wanting to help people that's the kind of person that I would pay attention to and listen to I think it takes an intuitive quality that we have to develop on our own but by being eclectic about information intake what that means is taking information from a wide variety of sources and that will put you in a better position to gauge whether this person not intuitively whether their information feels right and you can get a sense for their heart when you do that and I I mean I don't have any more specific techniques that I can tell you to do what that what I do is try to be as eclectic about the information gathering as possible and if you saw how much information was in in this house right here like I said I look at it sometimes and I almost want to pass out like I've gathered a lot of data and sift through that and then you will begin as you take in more and more to develop an intuitive understanding of whether the person that you're you're receiving that information from basically has the core underlying concepts down correct and hey everybody is human everybody will make mistakes I will make mistakes they're not every single little last detail that I've ever said is a hundred percent accurate you need to take things and delve into them on your own refine things people will do that with lots of people's information they'll say okay well they got this 98% right I'm going to refine it down to 99.9% correct and that's what it is it's about a distillation of information and again the main themes is what to focus on in other words don't don't let it become something where you don't see the forest for the trees by focusing on minutiae get the general overarching concepts and when you do that you'll really be able to you'll be able to see and hear the heart of that person versus getting bogged down and oh he said this one day that was wrong and now he's a disinfo agent it doesn't work that way you know it's about getting the gist of their ultimate underlying message and that's the essence of that person's heart exactly and you need to follow your and user intuition you can feel when the you're hearing the truths are not the truth but an actual technique that is useful in finding out in distilling the information house is the Trivium absence i really suggest that everybody look into this trivia method yawn irving does an excellent job of conveying this message but it's a very powerful classic technique it's no longer taught in school since about the 40s it was dropped off the school curriculum for very good reason because it allows you to see through this information there lies by breaking down the actual language and understanding the core concept that what's being said to you now you can point out the little fallacies or the actual correct logic in anything whether it's a spoken word heard on the radio seen on television any source you can break it down and I want to I want to let everyone know yon will be speaking at the freer mind conference on the Trivium he will be breaking the Trivium down explaining to people what it is explaining the people how it was used in in you know previous times and also to discuss why it is not being taught in school in our modern Soviet derived and Nazi derived outcome based education system which we covered on this show these tools in hand you know grammar logic and rhetoric and then into the quadrivium which is mathematics geometry music and astronomy John Irvin does an excellent job discussing these you want to check out his webs I at Trivium education.com and yawns main site is um gnostic mediacom and i just did two interviews with him over the past month a month or a month and a half something like that and they're still up on his site they're actually posted to the new section of my site you cannot also get them at yawns main podcast page which is a gnostic mediacom yah yah nervin is a tremendous resource and i definitely encourage people to check out his work well mark I don't want to take up much more of your time because I want you to get back into higher and abyss and these excellent allegories here which is very mind of eye-opening and mind opening at the same time I really appreciate this insight into free masonic yes and one of the most important questions that I have here is what are the natural laws I have understanding through your messages that you need to be in alignment with the natural laws in a unified trivia of the minds of the feelings and the action in alignment with the natural laws and Baxley the the guarantors principle here yes I talked about now yeah I don't know record well order I'm sorry I talked about natural law pretty extensively on past podcasts I would I would guess that you're probably not up to those podcasts if you began at the beginning so um the the main one is podcast number 36 in which I do a presentation on natural law so the whole concept of natural law what it is how it functions is broken down in podcast number 36 and there is an accompanying slideshow presentation which I posted in the form of a high-quality PDF document with that podcast it is podcast number 36 on the podcast page well I would encourage you to check that podcast out for those for that answer excellent and I just wanted to leave with one more here that we all we were all in the process of being the mason of the moment that's absolutely right we are the builders of our collective experience I thank you for the call I really appreciate the kind words and you take care thank you Mark I'll be with her figure great call there okay so I'm the best callers anywhere on talked on internet talk radio period I mean that's just the truth you know uh never disappointed with the callings to this show ever so here we go we were talking about the process of initiation and how the original mystery schools initiated people would was they would give them a bit of of the secrets or the mysteries I guess you could call them about consciousness and they would basically attempt to determine whether this person really had the desire to go further you know it was the idea that you want to give people uh someone who is thirsty 1/2 a cup of water and if they want more after that instead of flooding them with a whole lot you know I tend to do that sometimes you had people with so much information that they can't take it all in and then some people you know you'll go up to them and you'll you know tell them a little bit and they'll they're like a sponge ready to soak it all up and they want more and more and they could take it almost as fast as you can they could give it you could give it out so that's that was the idea here this was a again a sense as a step wise procedure they are through this process of initiation attempting to determine who the really thirsty people were I guess you could liken it to and who people who really didn't want any any part of it were because you know the the fall into ego based consciousness is thousands and thousands of years old into the antiquity of the human species so these mystery schools have been around for thousands of years and this is how this process worked back then I I say now in the modern day we don't really have we can't afford to do it that way anymore you know I think we need to really distribute knowledge as much as possible freely and openly and people out will go out there and take it on their own now that we have the distribution system for it but again it is very important to be able to distinguish dis information from the real deal so in the first degree tradition of all of the mystery schools the the person was basically called an or an apprentice okay now in the tradition of Freemasonry the first degree initiate is called the entered apprentice the entered apprentice this means that he has entered the system of initiation he had entered the launch system okay but he is not yet totally privy to the light or the truth he needs to slowly take in that information so that he can slowly begin to better himself now I want to direct everyone's attention to image number seven this is where we're going to start talking about the first degree initiate the entered apprentice in Freemasonry okay actually before I do that I wanted to get back just momentarily to the concept of evenness lost word okay because we're going to see what that means when we break down image number nine tonight the first degree tracing board the entered apprentice degree tracing board the concept of the lost word which Hiram Abiff was murdered for okay is actually the word equilibrium equilibrium is the lost word okay but it's not a word it's a state of consciousness it means the balance that one must arrive at in order to come up to a higher level of consciousness okay it's the balance between the left and the right brain hemispheres and it's the balance between thought emotion and action working in harmony with each other okay the three modalities of consciousness that is what the concept that is ultimately salt in Freemasonry is and this is considered a lost modality the lost word because most people aren't in that state of balance or equilibrium it's something that has been lost from the world it is represented by the concept of the all-seeing eye the stone the builders rejected which is the tap stone of a pyramid or the pure Midian the all-seeing eye on top of the the the pyramid which you see on the back of the one dollar bill again this concept is related to the third eye which is the balancing of the left and right brain hemisphere and we're going to see that tonight again when we break down the first degree board so I just wanted to mention that Hiram Abiff could not have given them that he you know basically honored his tradition by not giving out its quote secrets and again there was really no secrets in truth Freemasonry in Freemasonry oh there there's dark seek their secrets in dark masonry but in truth Freemasonry there are no secrets and anyone who has really taken the the true understanding of the esoteric a form of Freemasonry into their minds and hearts will will teach it on unwaveringly will teach it unselfishly to anyone who has any desire to learn about these concepts and ideas they will never hold information back to from anyone you know anybody who will tell you that I can't tell you about Freemasonry you know who claims to be a true Mason it doesn't understand what Freemasonry really is no one who was asked for knowledge about consciousness that really truly had a desire to learn and whoever had that that knowledge would never deny it to that individual okay so that's one way that I will distinguish between a true freemason and one who really doesn't understand the tradition even if their heart may be in the right place so to speak as far as you know they're trying to better themselves they have not really truly come online and don't really deeply understand the tradition or if they did they would share that knowledge with anyone who wanted to partake with it who had the desire to do that you know they might learn a little bit about that person first to try to gain if their intentions are in the right place and then then disseminate it but they would definitely not just say oh I don't I don't talk about what I know okay that would be the hallmark of a dark occultist and that's not the right footsteps to follow and I think that's really what has led us to this sorry condition that humanity is in in the modern day is not disseminating information about consciousness in a widespread and distributed way so let's look at image number seven this is what the first degree initiate is led into the lodge system for the first time this is what he wears you can see that the clothes are completely disheveled okay and this represents the state of not being in equilibrium it represents the state of being in a state of imbalance in consciousness okay there is the pant leg is rolled up on one side and down on another the shirt arm is rolled up on one side and down on another the person is generally just disheveled in general their shirt is you know sticking out of their pants most times you'll see that in in an image number number eight which is an actual photo so image number seven here for those who are following the images on the website are it is a rendering is a drawing of what the entered apprentice initiate looks like image number eight is an actual older photo from inside of a lodge you could see the initiate their wearing the blindfold in image eight and standing between the two pillars and you see the seals of the Solomon on the archway behind him again the chalice and blade United this is not simply it's it's used in Judaism and in Israel in particular but that's not the origin of that sign okay of that symbol this is the unification of the blade which is an upward pointing triangle representing the male masculine aspects of consciousness the left brain and then the inverted triangle

Reverend symbolically has a cup okay this is the representation of the Sacred Feminine aspect of consciousness the right brain hemisphere okay and it's also the unification of the male principle of action okay with the feminine principle of emotion we have to bring our actions into alignment with our emotions so you see in between the two pillars we're going to discuss pillars in depth tonight symbolically what they represent okay and you see him there in between the two pillars okay but he's in a state of imbalance he's at the beginning of the journey he has to go through those pillars they come into the main part of the lodge which is really ultimately a symbolic representation of the self the being has to go within and within and work to correct the imbalances within himself to make himself into a better human being and get out of that disheveled imbalanced condition so that he can come to the place of equilibrium the balance between the left and right brain hemisphere and the unification of the heart with the mind okay that's ultimately what this is all about and he wears what is called the cable tow around his neck and you see it there it looks like form of a noose okay and what this represents is that a person in a state of extreme psychological imbalance who has no equilibrium certainly okay they are in a state of mental psychological emotional and spiritual decay okay they often need to be dragged kicking and screaming to the light to the truth they need a push so to speak or a poll as the case may be okay in order to be shown the truth and in their imbalance state the truth may not always be pleasurable as a matter of fact many times it's very disturbing okay as we see with people who are in the state of cognitive dissonance about events like 9/11 or just you know the state of freedom in general you know they're in denial about it well the the initiate is shown here it and you know this is a subtle form of mockery it is a subtle form of basically having the initiate dress like this they will think about hopefully they will think about what is being told to me and what is being said here especially if they're not really in a state of any kind of decent consciousness to begin with again true Freemasonry seeks to find people that are in somewhat of a state of consciousness that is ready to receive the truth okay and what's being done here in the first degree the entire first degree I would have to concede is sort of a subtle form of occult mockery okay and it's done to spur the person on to show them you have a lot of work to do okay you know not to be not to beat them over the head with things but to basically say you can be much much better than you are now and you know the first degree tracing board as we're going to see really there is no way that the entered apprentice just coming to these symbols and allegories for the very first time could possibly decode them certainly not all at once let me tell you something folks it took me years years to understand truly all the symbolism in the first degree board alone okay years and I'm going to attempt to basically can information in one show which you know good luck to me to try to do that but I'm gonna give it a shot the this is the symbols of this tradition need to be meditated upon they need to be contemplated upon and they need to be concentrated upon all three modes of thought need to be employed I'd say really contemplate these symbols particularly the first degree board there's so much in it it's unbelievable and I still discover things in it from time to time they're new to me so it's an ongoing process and essentially what they're doing is giving somebody really the whole answer to the mystery traditions and to life in general in one image because that that the first degree tracing were which we're going to look at an image number nine is a book it's not one image that's a book that you're being handed okay it's more than a book it's it's a volume of encyclopedias alright and it's more than that it's a complete archive of knowledge all within that one image believe it or not okay it breaks down so much that it's unbelievable and essentially like I said what they're doing is they're basically saying oh here here it always there there's one image there it's all there and they know that that person can't possibly decipher it that person doesn't even know what they're holding when they're given that tracing board they have no idea what they're holding so these are the subtle form of you know a just absolutely it's a subtle form of a mocking jest that they're basically you know ribbing the person saying you know we have at this point more knowledge than you and you really need to work on yourself to get to a higher level you know you're you're a mess it's basically what's being said in so many words okay so that's the main concept here the entered apprentice is a play on words and again we will see over and over again going forward looking into the occult how wordplay is very favored in occult traditions it's extremely favored in dark occult traditions but it's also used in the more positive traditions okay they like wordplay this is called green language okay it's a take on words of phonetic sounds how they combine with a different variants of them are okay and they're saying something in code the entered apprentice is actually the entered intern apprentice the buried apprentice the one who is actually seeking to come out of the grave to be resurrected from their state of Darkness okay they are interred they are buried their spirit is buried their mind is buried okay their morality is buried their ability to live in harmony with natural law is buried it's covered up the dirt needs to be taken away it needs to be removed so that they can come up out of that grave okay which we're going to see later is symbolically very much represented by a coffin in Freemasonry okay and you can actually see that in image 13 there's a coffin at the very beginning or bottom of the stairway leading to the two pillars of initiation okay we'll look at that later but the point I'm trying to get at here is the the entered apprentice degree is actually a play on words it it means the interred apprentice the one who is actually spiritually buried there in a state of Darkness and this solution what they really need to receive is light which is knowledge about oneself and knowledge about how natural law works that's what Freemasonry refers to symbolically as truth they call it light and because the idea is that the Creator placed the light into the world it is the creator's light that nourishes us that sustains us that gives us life and strength and energy etc okay just like the Sun gives light to the earth and gives energy to the earth and sustains the earth and the processes of life here well the creator of the universe ultimately bears the light into the world okay it is it is without that there is nothing all right and that concept is called light this goes back to the very first words of Genesis in the Bible okay because the Freemasonry both borrow a lot from biblical allegories and biblical traditions in Genesis the words attributed to the creation of the universe is let there be light and in Latin that is C opt looks Fiat in Latin means so let it be or let it be done and looks lu x means light in latin so fiat looks is a phrase you will often see in a Masonic Lodge often toward the east where the the the main altar usually faces with the three candles on it okay basically you'll sometimes see in the main area where the rituals are conducted facing so this will be them often the most ornate or elaborate place in the lodge you will see the phrase

Fiat looks and you will sometimes see it accompanying accompanied by the all-seeing eye and sometimes with rays of light streaming from the all-seeing eye okay so with that in mind that phrase Fiat looks let's move on to image number nine and I'll begin and hopefully be able to do this within the next hour again you know wish me luck to break down the symbols of the first degree tracing board so let's move the image number nine and here uh and by the way in a few moments I'll be connecting into Oracle broadcast and I'll try to do that around 5:00 after and we'll be joined the into Havre do show for the second hour so image number nine shows what is called the first degree tracing board of the entered apprentice degree of Freemasonry okay and what this what this tracing board represents is the being him or herself okay that's the best way I can put it this is you this is not only you this is the universe as well it's both okay because the microcosm is the reflection of the macrocosm the concept of as above so below all right the concept that the universe is self-similar across scales all right it is the earth it is the universe it is you ultimately what you're looking at is the synthesis of all of those scales in the universe all together in one image and this is symbolically represented by these three pillars with the checkerboard floor the ladder the tools the gods in the heavens represented by the Sun the moon and the all-seeing eye okay and this is known symbolically as the Temple of Solomon in Freemasonry okay now this concept is biblical of course we read about the construction of the Temple of Solomon in the Bible and people say that this is there is a physical location for this building and it exists in Jerusalem in Israel okay and even if there was a temple there that you know was an important place of worship and ceremonies and rituals wonderful the actual Temple of Solomon is symbolic it exists within us that is fact this idea that this temple needs to be rebuilt and it's a physical building is believing in the OOH the actual literal telling of this allegorical story the temple that needs to be rebuilt is the temple in mand okay it is the temple that exists within us that needs to be rebuilt because the state of consciousness represented by this temple is in a state of disarray on earth it's in a state of complete degradation it's basically in ruins the Temple of Solomon is in ruins metaphorically symbolically hey not literally not a building okay I want to make that point very clear this is all symbolic okay what we need to do what our work is as we've talked about extensively on this show is to bring balance or equilibrium to ourselves through unifying our thoughts our emotions and our actions and through the process of healing the schism that exists within us between the left and right brain hemispheres and we're going to see in the next hour how this temple represents all those concepts okay and we're going to see how it represents the human brain and how it represents the three aspects of consciousness all right and how it represents the spiritual journey itself from earthbound existence to higher level consciousness from ego identification to cosmic awareness all right from darkness to light and how that's a stepwise process that requires time and effort it's not something that we're just handed whether somebody else can just give us as the ruffians tried to take it from the master builder Hiram Abiff doesn't work like that I can't enlighten you all I can do is show you some of the things that I've learned and say okay enlighten yourself you know you are gone doing that process I'm not the one doing it you know no one else enlightened me I enlightened me did people helped me along that path you better believe you absolutely many people I consider much greater teachers than I okay you know I wish I had some of the verbal skills and communication skills and some of the people that I learned from but and some of their drives you know I I consider I have a pretty good Drive and you know we'll but you know I look at some works other people have done and you know what I'm doing pales in comparison to it but that that being aside we need to understand this is all a symbolic allegory okay and we need to understand this is all about us it's all about you that's what this important is about it's not about something that's external to you too many people get trapped in that literal interpretation of things or even in the symbolic interpretation where they don't really bring it down back to the base level that ultimately what this is about is you and your state of consciousness and what you can do to improve it so I'm going to connect into Oracle broadcasting right now and Bob Tuscan will then introduce me after the break and we'll come back in the second hour and we will extensively break down the first degree tracing board of Freemasonry so here we go what on earth is happening as part of the second hour of the Intel hub radio show here on Oracle broadcasting I'm your host mark passio my website what on earth is happening dot-com I'd like to direct your attention to that site for the images that we're going to discuss on the show tonight and basically they'll really be one image that I'm really going to be focused in on if you go to what on earth is happening calm and you click on the listen live page the radio listen button that is up on the upper left-hand corner of the site you can then be taken to the player page and right underneath the player there is something called images for tonight's show and there's 13 images listed there on the topic of Freemasonry which I've been discussing over the last few weeks I am going to be breaking down image number 9 on that list here in the second hour tonight because in the first hour of the show my show normally begins at 8 o'clock p.m. Eastern Time and then the second hour is picked up on Oracle broadcasting we were discussing Freemasonry and we were breaking down some concepts of this allegorical tradition and tonight I'm going to be breaking down the tracing board of the first degree of Freemasonry the degree known as the entered apprentice degree so we'll be looking at that I know Bob has made mention of it I'm going to briefly let you know about the free your mind conference coming up in Philadelphia it's going to be an incredible event this weekend in Philadelphia if you're in the area please come out and join us there will be so much information and it's just going to be a great time but 16 phenomenal speakers from all over the country this Sunday April 9th and 10th that rubra hall 414 Green Street in Philadelphia doors open at 9:00 a.m. speakers begin at 10 a.m. on both days admission is $30 per day at the door and the featured speakers are Erin McCollum alfred weber Andrew basiago Bob Tuscan foyer dozous Freeman fly Yan Irvin Jay Parker John Nicholson Joseph Mara Larkin Rose Laura Eisenhower Mark motika Mark passio Michael Kelly and Suzanne Taylor it is going to be one hell of a weekend in Philadelphia coming up in only a few days for more information visit the conference website at free your mind conference calm that's free your mind conference calm all right so we are going to look at image number 9 on that image list and we're going to break that down extensively so image number 9 shows the first degree tracing Board of freemasonry the degree the first degree is known as the entered apprentice and what I was explaining earlier was that the entered apprentice is really a play on words it stands for the interred apprentice this means buried okay interment is burial this is a person who is basically in a state of imbalance in consciousness they have been conditioned into a non natural state they are in darkness okay their spirit is buried theirs Sol is essentially deadened okay and it needs to be resurrected from this sorry pitiful state that most people dwell in on the earth and sadly very sadly most people die in that condition without being raised truly okay so what this first degree is about is initiation into knowledge and it is ultimately about changing one's thoughts it is about the process of transformation and ascension in consciousness so this first degree out of the first three degrees corresponds to thought okay in the Trinity of thought emotion and action and it proceeds in that process the first degree is about thought the second degree is about emotion the third degree is about action okay the first degree is about the the disheveled state that an apprentice or an initiate enters into this allegorical tradition and again we're not talking about logs Freemasonry here okay we're talking about esoteric Freemasonry true free masonry from a an allegorical perspective okay breaking down the symbols and understanding what these symbols and allegories truly mean under the surface okay getting down to the core of what these symbols are about and very powerful vistas of awareness can open up to us if we deeply understand what they represent so let's look at this board in image number nine okay and I suggested at the end of last hour that people truly contemplate and meditate upon this board don't just cursorily examine it really look at it think upon it set it down and then come back to it again later okay this will actually do wonders to open up your understanding of some of these symbols that are contained in this very complex image that I likened to a book or even a volume of encyclopedia there's so much knowledge contained within this one image and that's how the mystery traditions did it in the ancient past they would encode knowledge so that it would not be lost through verbal tradition retelling okay as you can you know see that you know you have a line of people you start a story and one end of the line and tell people to just repeat the story from from mouth to ear as it goes down to the other end of the line it generally becomes something that barely resembles what it started as okay not so with symbolism because it carries deep connotative meanings that are connected in with art types in the subconscious mind therefore it preserves the original teachings much better I hear the intro music for this break you're listening to what on earth is happening I'll be right back okay ladies and gentlemen we're back on what on earth is happening I'm your host mark passio my website what on earth is happening dot-com we are discussing the first degree tracing board of the entered apprentice degree of Freemasonry it is image number nine that we are looking at on my website on the radio listen page image number nine and let's begin breaking this very complex series of symbols that is found in this board down of one element at a time okay so you will see that we are looking into an image here and there's a border around the outside that is blue and then there's a trestle okay and we have directional markers north south east and west okay with East arranged at the top of the image and then we are looking at a scene with three pillars okay there is a light pillar on the left hand side a darker pillar on the right hand side and then there is a pillar in the middle with a ladder on it okay leaned up against it basically and there is a checkered floor at the bottom of this scenario okay uh you see two stones or what are referred to in masonry as ash

Lars okay in the background there you see some building tools a raid by the pillars and then there is a ladder with three people on this ladder at three different positions and then above in the sky there is the Sun on the left the moon on the right and an eye with light radiating out of it in the centre of the image okay that's basically what is described that's what we're seeing here in this complex imagery so this tracing board is a representation a symbolic representation of what is known as the Temple of Solomon the Temple of Solomon now the Temple of Solomon exists biblically okay it's a it's this is found in the Bible and Solomon who was a king commissioned builders to build him a majestic temple in which he would basically worship God and and lead his people he commissioned the master builder Hiram Abiff to build this temple and again as I said in the first hour this is symbolic this is not about a physical building called the temple of Solomon that exists in Jerusalem okay this is about you you are this symbolic temple of Solomon okay it is about the earth as well and its relationship to the universe and this is about the universe it's about the concept that the universe is self-similar across scales that this is the principle of correspondence that's what it's known as in the tradition of Hermeticism okay people will be familiar with the phrase that which is above is like to that which is below okay we're simply as above so below it means that as is the microcon so goes the macrocosm as consciousness becomes imbalanced in many individuals individually you will see chaotic results in the shared collective experience that we call daily life it just logically makes sense okay so the concept of the correspondence between all things and the self similarity of elements within creation is expressed through this image the thing I want you to ultimately understand about this is this is about you it is not about anything external to you that's the first concept to keep in mind okay so let's look at the individual elements and what these symbolically represent okay not literally but symbolically represent in the image okay as symbols because an allegorical story unfurls as we decode each individual element of symbology within this complex piece of of imagery okay the checkerboard floors where I'd like to start what the checkerboard floor represents is low consciousness or simply unconsciousness okay it represents not being aware that's what the checkerboard floor represents okay it means that you can be on the within the light or within the darkness and you don't really know which is which okay you don't really have a deep understanding of natural law or morality you don't really have an understanding of the human psyche how it works how it may be manipulated through knowledge of how it works if one is not in possession of that same knowledge okay and therefore we see that this is the same symbolism that is on a chessboard so therefore it can be likened to the game of chess well the chest remove the pieces on the board okay so if you're on the board if you're on that checkerboard floor of the house as it is referred to as the temple of the floor of the temple okay you are but a piece that can be moved in position that will through conditioning they through mind control in other words by the Masters of the game and the masters of the game are these Oh cultists that I have referred to in the past that basically do have deep knowledge of the psyche of humanity of how the brain works and how the motivations and desires and instincts of people work and the knowledge is extensive and deep and it hasn't been amassed for thousands of years so they have an extreme head start they have an extreme advantage because they're working with deep intimate knowledge of how the game works how natural law works and how people work and most people in the world have no idea about any of these things they're completely in the dark and sadly many of them don't even want to know because they consider that things are so bad it's too much work it's too hard to do it requires too much effort and I don't want to be involved in trying to figure out what's really going on or improve myself I'd rather just remain in nuran you know and continue to get what I'm getting and that is exactly how how it works and that's what will continue to happen if people make that decision but if they want to improve themselves they can begin that stepwise process that requires effort and dedication and time of climbing that ladder off of the floor off of the gameboard floor where one is no longer just a pawn or a piece to be positioned in this grand game of chess that's being played by chess masters okay and they can become initiated into knowledge of self that's ultimately what this is about knowledge of self which is the only true knowledge really worth having is the understanding of of ourselves and how we work this is why we're being conquered as a people because we don't have an understanding of ourselves to any level of depth and most people will want to run away from that understanding instead of confronting sadly okay so what we need to do is work to toward the process of ascending that ladder that ladder is very important symbol which we'll get to okay well what we see before we even get to that ladder are these two pillars which are dualistic in their nature okay there is one there on the left that leads to the Sun one on the right that leads to the moon okay and let's leave it right there I hear the intro music for the next break so we will pick up on the concept of the two pillars and the duality that is inherent and that simple isn't and we come back after the break I'm Mark Hasse oh you're listening to what on earth assassin [Music] okay well back on what on earth is happening on your host mark past year before the break we were beginning to look into the two pillars that are in the forefront of this image that we're breaking down which is the first degree tracing board of Freemasonry and this left-hand pillar they're marked with an S at the base that s stands for strength this pillar is known as the pillar of jaw King or sometimes pronounced yakeen that's J a CH I N and it leads to the Sun overtop of that pillar and it is a Doric pillar and dork is a masculine quality building type okay it is the light pillar sometimes referred to as or simply the pillar of strength this would correspond in the Kabbalistic tradition to the pillar of mercy okay or the right hand path now in Freemasonry it is on the left okay because this is representative of the male solar qualities of the left brain all right that's what this represents the left brain hemisphere which is a logical mathematical scientific linear etc okay all of the the masculine qualities of consciousness and the right hand pillar pillar of bolas marked there with a bee [Music] I'm hearing some music on the liner without coming that coming from the network and I don't think we're special for another great carpet not sure okay faded off not sure really what that was but going right back into it the pillar of the lies on the right-hand side of the image that's boa Zi it's marked with a B okay this is the pillar on the right that leads to the moon and that is a Corinthian pillar which is a feminine building style maybe elaborate or ornate pillar it is a darker pillar is sometimes simply called the bark pillar in the Kabbalistic tradition this would correspond to the pillar of severity which is on the left hand side in the Kabbalistic tradition they're telling me on the network and that it has not that my voice has not been going out over

Oracle it appears so trying to bring that back up well anyway I will just continue on so as not to lose any more time this right hand pillar is called the pillar of Boaz and is marked with a B at the bottom or the base of the pillar and that B stands for beauty okay so we have the pillar of strength on the right representing the masculine qualities of consciousness and the feminine pillar on the masculine pillow on the left represents strength or the masculine qualities of consciousness that is the active teller the pillar of action okay and on the right hand side we have the pillar of Boaz or Beauty representing the feminine qualities the lunar qualities there is a break let's jump right back into it when I went on with this Freemason symbolism yeah people will have a field day with this one you know getting disconnected as soon as I start talking about the initiation of Freemasonry and some of its symbols will you know think that some forces don't want this information revealed but I can assure you it's just some frustrating technical difficulties and we seem to have have that handled now so I'm continuing on with the breakdown of the first degree tracing board and we were looking at the duality that is symbolized by the two forward pillars okay the pillars marked with the letter S and the letter B the pillar market the letter S there on the left is called the pillar of jocking sometimes pronounced yaqin that's J achi n this is the solar masculine pillar that is called the the light pillar okay because it's it's a basically a white whitish in color sometimes it's depicted as white and it is distinguished from the dark pillar on the right which is called the power of Boaz bo AZ the jackeen pillar is Doric okay in its architectural style and it leads to the Sun because it represents strength or the solar masculine quality that's what the SS at the bottom there's represents and it represents the solar masculine qualities of consciousness the left brain hemisphere and also action it is the active principle in the Trinity of consciousness thoughts emotions and actions the right hand pillar conversely the pillar of bolas boa Z is the Corinthian pillar it is dark because it is lunar or feminine and it represents the qualities of night or passiveness or things being cloaked or you know not out in the open okay so this pillar is the Sacred Feminine or the the lunar qualities of consciousness and it represents the internal sometimes veiled aspect of consciousness called emotion so we have the emotional pillar and the pillar of action and ultimately the goal that we need to scribe toward is to unify these two in a process of synthesis such that our actions are in alignment with our emotions therefore that middle pillar is the way okay and it is marked with the W there because it represents wisdom wisdom is what we do with what we know okay it's what we do when we know something is right or not right and the action that we decide to take on it and if it is in alignment with truth and morality and natural law we are ascending in consciousness and going up that ladder and that middle pillar is again has a Kabbalistic analog to it that is the pillar of mildness which is the middle pillar on the Kabbalistic Tree of Life so here repeat it again the three pets or pillars just like we saw when we broke down the Kabbalistic tradition and the Tree of Life so the the solar male pillar objects would correspond with the Kabbalistic teller of mercy okay which is about action and the external aspects of consciousness meaning what we do and then the pillar of the lies on the right the lunar pillar corresponds with the Kabbalistic color or path known as the path of severity which is about the internal qualities namely the emotional qualities and that is the veiled or dark or feminine aspect so these pillars we can clearly see are all about the three aspects of consciousness thought emotion and action then the pillar in the middle at the end of the board meaning if we look into it from a sense of depth perspective as we are moving forward it lies at the end of the journey okay this is the middle pillar the pillar of wisdom and it is called in the free Masonic tradition Jacob's Ladder okay and there is the ladder and again that's another story an allegorical story told in the Bible jacob ascend the ladder he sees the heavenly realms and the vistas of consciousness that are available to him in the higher state of awareness and when he comes back down to the earth he is sort of disillusioned and basically makes the statement that this place is a terrible place because it is in quite a state of disarray and in a state of ruins because people's consciousness are in such a state of imbalance so the idea here is unification of what seemed to be opposites the masculine and feminine qualities of consciousness or the left and right brain hemispheres but in fact they are really um need to be brought together into harmony and unison with each other if we are to again ascend in consciousness and go up jacob's ladder and this is all symbolic about healing one's own emotional mental and psychological state which is really in the modern world in most people in a very poor condition of all the conditioning and outright psychological manipulation and mind-control that we undergo from a very young age and the indoctrination that we are put through in school and the food's the horrible foods that a lot of people eat and take into themselves and the horrible media that they're connected to and the you know frivolous and trivial pursuits that they pay attention to the forms of media that they take into themselves all keep them in this state of imbalance in the brain and in the psyche which is called which is represented by the dualistic nature of these pillars so again the goal is synthesis and that is what is represented in the the depth aspect of the image meaning moving from what appears to be in front of you in the image to a farther place in the image as you go along that is the journey in life that you make toward unity consciousness okay if we are moving in the right direction which is toward the east you can see the East is in the direction ahead West would be back or door behind you okay South would be to the right and North would be to the left if you are progressing forward in this image okay and indeed East is toward the light or the Rising Sun and that's what is ultimately represented up at the top of the image not only on the left but even in the fall saying I were the rays of light are coming from the eye this is the synthesis or the union of the left and right brain hemispheres that is characterized by the turning on or the opening of the all-seeing eye which is the pineal gland in the center of the head okay the the gland or the chakra area that the Mystics of all different traditions have referred to as the third eye or the one eye the single eye in the Book of Luke in the Bible okay Jesus's words the words attributed to Jesus basically say that if you make the eye single your body will be full of light but if it remains dual your body will be full of darkness so in other words it's showing that the way to balance and light and this is told coincidentally or synchronistically I should say in the book of Luke which corresponds what the word light looks is light in Latin the Book of Luke is the book of light okay and that that very powerful symbolic allegory contained there also is an explanation of how to come on line to a higher state of awareness by unifying the masculine and feminine principles within the self we want to find emotion and action it looks like that yes that is all the time we have today you know it's funny because this this touches on exactly what I'll be talking about at the fear mind conference and I just got back from a dinner party while the technical difficulties one arrives and sure enough I was talking about how we only are seeing so much of the dark and the dark things and in this day and age because of so much light does that make sense absolutely the more light that is shed into a very dirty and disheveled room the more you will see of how bad learn at the state of disarray that room is in and that's what we do on the radio show five days a week the info home radio show our special contributor Mark Hasse Oh what on earth is happening calm is his website mark thanks so much lot to do it again next week mom thank you everyone check out the website free your mind conference calm and come on up out to the free your mind conference in Philadelphia this weekend if you're able thanks Lori I'll see you there folks alright we'll see you tomorrow night with another edition of the into love radio show special guest James fetcher and so much more stay tuned listen your time with Lee Rogers coming up next on Oracle broadcasting calm

What On Earth Is Happening Show #055

Topics: *No Description*

freedom man that's what it's all about [Music] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe [Music] okay welcome folks it is april 12 2011 and you're listening to the intel hub radio show on oracle broadcasting broadcasting five days a week Monday through Friday from 8 to 10 East Coast time that's 8 p.m. to 10 p.m. East Coast time and tonight we have a special treat for you by the way chefs busy busy busy working on many different projects editing so he'll be tuning in and maybe pop in here and there tonight on the show but we have a special treat for you nonetheless it's myself Bob Tuscan joint with our good friend Mark passio with what on earth is happening this is an extended version of what on earth is happening usually mark joins us for the second hour of the program but we're going to do two hours of what on earth is happening with myself and Mark passio of course his website what on earth is happening calm and I just got back from the free your mind conference in Philadelphia what an amazing conference that was I was so honored to be amongst many like-minded individuals and wonderful speakers I posted my talk if you haven't seen it yet or if you didn't get a chance to make it to Philadelphia it's up on YouTube so check it out that not for sale the number to NWO on YouTube that's our YouTube channel for the Intel hub and it's also at the Intel hub comm and the Intel hub radio.com and if having mark passed you on for two hours wasn't cool enough and of course he gave an absolutely amazing presentation that you'll have to watch on police and military occult symbolism and so much more that he got into we're going to have another special treat a fellow oracle broadcaster you know i'm best from his saturday show right before a good friend at truth frequency yes that's right folks none other than Freeman fly will be joining us in just a minute here on the Intel hub radio show so we got a special treat I know you guys haven't heard Freeman on Oracle in a while and we're going to ask him a little bit more about the freighter X controversy you know he's got a freemason not just the freemason I think he's a member of several different groups that you have to be invited to join is this guy really a secretly trying to discredit the movement and is is there a conspiracy amongst the freemen crowd I don't know I've been wondering myself we'll ask him about that we'll see what he has to say well also I've talked to him about his presentation and what he's been working on lately and he I know he's been really busy this month working on a lot of different stuff to to break on his website Freeman TV of course the site Freeman at tv.com and we'll talk with both Freeman and mark passio with what on earth is happening in just a minute but first let me mention that the radiation levels seem to continue to be of concern for most of the world yesterday we had dr. Richard Sauter on the program talking about the radiation leave levels in Fukushima and so we're going to continue to cover that and we'll do an update on the radiation issue at some point throughout the broadcast night and if you want to call up at any point on the broadcast tonight we may take phone calls and you can join us in this open dialogue at eight six six eight four one one zero six five that's toll-free eight six six a four one one zero six five all right so this is going to be a great show I'm really looking forward to we've got a lot to talk about both marking Freeman went to a freemason temple the Benjamin Franklin temple there in the historic Philadelphia and checked out all the symbolism all the stuff that they're not telling us about and we'll get into that and we'll talk about the conference so much more just to come in a little bit folks so folks don't go anywhere this is the Intel hub radio show on Oracle broadcasting you you all right cool guys you know how that's first segment is dude it's annoying or actually you have yours different don't you no no I got the same five minutes yeah it's awkward to bring people on for the first five minutes you know absolutely for then then he's like yeah so I just do a quick rant and preview or whatever and thanks a lot for for sending people I'm looking at the numbers they seem to be improving already all right I actually know I got a minute I'm gonna take a quick Tran yeah yeah he'll make it here doing the same thing here behind the scenes yeah I wish I could have stayed longer man I would have loved to check that temple up today with you guys yeah we have tons of pictures so I'll be posting them I'll post them on my facebook I think everybody who I am an had a great time I took even yarn even the Trivium Nazi himself our tour guide did not seem to like the questions that would be bad and um I asked questions to him that I knew the answers to the right and inevitable Susan whether he would what he would give us the correct answers to them right and every question he declined to answer or either a claim that he just simply didn't know and then I would answer the question to the rest of the crowd and I don't think he liked that and I when Janu more than he did much more when I went to thank him for the tour afterward he like you know wouldn't really shake my hand ah it was it was weird no wasn't wery standoffish you think you you think he was odds I wasn't trying to show a mom III thought it was things that they really should have been aware of I didn't you know they're all being very very respectful yeah yeah but uh I thought that was kind of weird other than that it was great hey I gave my first fake Masonic handshake what to them yeah he gave me a free pin fourth for the handshake yeah hey in their book shot they had Gadsden flag and Ben Franklin join or die key change is pretty cool Wow we got 30 seconds there guys No oh yeah we're on we need it not forget we're also recording on talk-show you might have to edit we're all and talk show yeah you might want to edit the last break there all right okay here we go stand by alright folks here we go the Intel hub radio show the Intel hub comm and the Intel hub radio.com are our websites and now joining us on the program with a special edition of both what on earth is happening and the Intel hub is none other than Mark passio mark thanks so much for doing this I really had a great time at the conference man you are a great host and I'm glad to have this special broadcast today well Bob I want to thank you so much for being part of this great event that we hosted here in Philadelphia this past weekend I want to tell all of the audience that is listening here tonight that the free your mind conference really went off without a hitch it was a phenomenal event it was a packed house standing-room-only on both days every speaker was just fantastic so much information was shared it's hard to even process at all I'm sure people will be processing this for a long time to come and it make wildly surpassed all my greatest expectations and that's all I can say I have absolutely no complaints everyone stepped up and played their role who was an organizer I want to give a heartfelt thanks to all of the organizers of the event without which this would not have happened yeah and I want to say thanks to all of the great speakers who gave of their time and their knowledge to make this event a memorable one who's really the the repercussions of this conference are only beginning because they're once all of this information hits the Internet which it's going to very shortly that's when the real repercussions of this event are going to just explode outward from here on out and I couldn't agree more yeah when people see the lectures and by the way my talk is up at the Intel hub so if you didn't get out there to see it please watch it on behalf of myself in the fear mine conference we felt that this was essential to be an open-source thing you know it's not any different than the occult if we hide this information then right you know that's what the occult is it's hidden information right mark and that's exactly what it is and we told everyone there they were welcome to film or record and the our only stipulation was as if they did so that we wanted a copy of it so we could do as we wanted with it you know since we hosted the event but we told everyone else they can freely share any of the information seen or heard there as well uh you know uh we did have a stipulation for filmers that if they wanted to sell it you know that would be a different story they should talk to us about that but you know because they would be making a profit from it but other than that anybody who wanted to film were record was welcome to do so and a few people did so and now we will be assembling all of that video and hopefully making pretty nice videos to share out there on the web with people will get the audio synched up with all of that and and just get it out there and share it as widely and as freely as possible that's what this and that's what this event was all about the open sharing of information that has has previously really been occulted from human eyes and ears for far too long that's exactly right it was the free your mind conference and it can be found at free your mind conference dot-com and there were so many people that came from all over the world we had so many like-minded individuals there it was just an amazing amazing conference with an energy level that I don't think I've ever experienced and along with myself Yann urban and so many other great speakers we had none other than the presence of Freeman fly and Freeman flies joining us live in the what on earth is happening studio also tonight that Freeman how are you today buddy fantastic Bob it was great to finally get to meet you face to face I know I hardly recognized you without curls I know man I get you know I do these videos and you know do it on a serious topic and people will comment on the hair I know it's such a distraction people the thing that looks great no I appreciate it and I eat tell us a little bit about your review of the conference oh my god it was mind-boggling somehow that the best terms I can put it in it was fantastic the way that everybody's talks in graded with everyone else's I mean it was such an interdisciplinary study of the weird that everybody got a little bit of in-depth knowledge on all these uh seemingly composite topics that all just congealed into one big picture yeah and I would I would love to do it and be like to be that person that hadn't heard any of this stuff before right and sit down I was thinking of our waiter at the restaurant if you don't bud when we're all there eating in this diner and here I'm sitting across the room with a guy who's been to Mars and time to watch Lincoln gets shot and another man whose specialty is orbs and speaking on extraterrestrial politics and we're just gabbing about this he's telling me about the climate of Mars one of the waiters like do you want eyes do with that like if they just knew oh how weird their planet was right it's funny and if they only knew the history that was in that room the the amount of information it I actually that same waiter Freeman asked me he said what was the conference about and for me to have to explain it to him was like uh it was about the and I just didn't think that mountains of Freemason on the way outside of the Philadelphia Lodge asked me the same question dance it out a little bit you're out let's get a little bit more about the the Freemason trip they went to the the freemason temple there and what we'll talk about that after the break but Freeman tell us the people at Oracle broadcast and they want to know where have you been buddy I I suppose I've been up on my little holy mountain kind of getting my thoughts and feelings together doing art do an artistry pulling things together I got a new DVD with five hours together and did all the artwork menus DVD stuff you know all that good stuff so I presented that here at the free your mind conference the first copies to go out they should be limited edition because the print is off but so I worked on that a lot I worked on art and I began my permaculture garden I got the worm farm all together permaculture absolutely we we know and we have our whole block together on this already fine we're all starting to collect our compost we've all got the worm farms going up we've got ours done because we had to get it done before we left and we're getting the whole neighborhood to start to dig ant and we're going to overgrow the Illuminati we're going to outgrow our government I love that idea I'm a huge fan as you know I'm also into permaculture and that kind of thing and I also have a large bin with red wigglers and I give them for the compost and I collect those worm castings and those worm castings are an awesome fertilizer they're they're one of the best things that you can put in the garden and please folks understand how important it is to plants even and going back to how all these stalks connected you ended your talk with that statement Freeman plant seeds and it seemed like almost everybody there was on the same page with the fact that we need to seek some sort of you know solution some sort of light based initiatives some sort of I don't know how you would put it but we needed to plant seeds essentially absolutely I'm calling it the friendship agenda you can call it what you will but for me it's the friendship agenda and friendship is going to be the currency of the future I can guarantee you that you better get out there and start making some Fred you want to make it through these next few years I totally agree absolutely alright here we have about 30 seconds here and then we got to take another quick break but when we get back we'll talk more about that and then mark I'll let you leave the conversation for a little bit and talk about whatever it is that you had planned for the show tonight and of course we'll talk a little bit for a moment or two about the Frater x conspiracy that's been brewing on oracle broadcasting don't go anywhere this is the Intel Hub radio show you all these segments are too short the truth frequency here to tell you all about our favorite suppliers of NPO Jensen tapered plant that has only 10 minutes it's ridiculous supplier that I trust refresh ayahuasca vine directly from the Amazon basin just go to truth frequency radio comic did you see the video yet there's already tons of comments on there with which one Bob the what the talk between him and I I created aa aaan on Facebook or on arm it's on the to do tube here yeah any the link I posted on I'm streaming Facebook as well though here's the way wait until you see all the comments I said oh my god three men gave the lion paw handshake they're saying that you were new age new age that new age now I have been cheating the multinational farmer cartels and have avoided expensive doctor bills by taking inter food product every day needs of the product the promotion peace or Freemasonry total fail oh my god we were promoting take a tour food coconut powder and switch to all organic user cafe coffee and cocoa mojo you won't need them go to the next comments good and to haul this for free-thinking individual the caters no certain religion etc and open mine is a free mind yeah somebody I agree with that this will increase your energy stamina and focus you know you can't take on the new world order from your couch and erm ood calm or give them a call today eight seven six to ninety two thirty eight eight six six seven six to ninety two thirty eight tell them Jack loves Nick amazon.com has become a leader in online skills and is a place where school could find and discover virtually any which they want black amazon offers thousands of products we're all the listeners tonight seems like it's a range of electronic command my name and they fled you know what I'm beginning to wonder man seriously no joke boy we got 30 seconds here guys but also operate retail website offers programs mark why don't you bring us back from the break you got it it could get purchases through Amazon or for podcasting calm a portion if just let it let the music to get right a little bit you know find great price to my hard to find I filled in a little bit Rocky here we go she's on that website again is Amazon or broadcast.com sigh this is my favourite journey live weekdays for my chambers lines of 11:00 to 3:00 p.m. Central time here on the Oracle Broadcasting Network alright ladies and gentlemen we're back here on the Intel Hub radio show I'm mark passio of what on earth is happening dot-com we're joined here in studio tonight with Freeman fly and Freeman after giving a phenomenal talk at the free your mind conference and by the way I just want to say that that introductory video that you play just knocked everybody completely out of the water it was just incredibly great it was enlightening and it was hilarious the chemtrail that was slow why I just got to make sure they get all the props for that flow white calm and those guys are awesome check out reptilian brain yeah they have one that I played with Tim trails I like what I star in hey Eric awesome very well done oh I have for you aside from your own talk whoo what other speaker at the conference really resonated with you and with your material who did you enjoy well you like right definitely I was so thankful that you came in there and explained a lot of the things that I felt that I had neglected and skimmed and you got real deep and anyway I really loved your talk I also really enjoyed Alfred Weber's explanations of chemtrails and I think the most shocking moment I had was when Alfred Webber came out and said that Dennis Kucinich was the one that shot down the chemtrail anti chemtrail legislation yeah that was a bombshell out of all the things I heard that was the one that really really struck me I had heard that I think finish in the new film and all of that and so he introduced a lot of information technical data that I had not heard about the chemtrails as well so that was also one of the most informative presentations for me yeah great so after the conference we went to a diner and enjoyed some food and we hung out with friends and talked about what had just taken place and then you let me know that you while on the remainder of your stay here in Philadelphia we're going to visit the Grand Lodge of Pennsylvania and as I have also taken that tour in the past I said well if you're going to go on Tuesday during the day I'd like to join you and bring a few friends so we all met there and I want to ask you what you thought of the experience taking the tour the Grand Lodge and tell the listeners a little bit about what we saw and heard there today all right well everyone at the conference wanted to come on this tour huh and so I was a little concerned that we were going to show up with like 2030 people because I went ahead and said well this is the time we'll be there so actually we did have a really good turnout of people that showed up all of them were just class aid people and we really tried to teach your treat these Masonic friends of ours with with respect and understanding and ask really nice questions and and see what it was like with them I think that they shorted us that they rushed us that they I had told him at the very beginning of the tour that my main focus was to see that Egyptian room and he rushed us right out of there I you know I don't know that I want to go elsewhere with really like I got into that room a little bit late I barely got to spend one minute 60 seconds if that in that room and he rushed us right out of there there was a clear there was clearly a rush job being done because I've taken that tour before in the past and it was not conducted like that it was definitely a more leisurely pace we were rushed for some reason or another for sure yeah absolutely I mean it was it was hardcore when he I feel like I'm not doing my job as the host or the the tour guide doesn't yell at me at least one you know so he did he scolded us yelled at us because I wasn't going to leave the room I was like no this is what I came here for you see there's a sigil a magical feel up on the ceiling of the Egyptian room that I drew into my picture when I was 10 years old and I've never documented this fact I knew it was true because I'd already been to the Philadelphia Lodge once where they did actually throw it out a man came bursting through a secret passage in the wall and the last time I would there so maybe they're just aware of me now because but you know we were passing it off we had two Mason's in the audience plus one that they thought was amazing or myself and they so you would think that they were given they would give the brothers a little more credit than that and so even with three supposed Freemasons in the tour with us they still yeah we're very very hasty and and wouldn't give us a legit answer for anything either this guy was the most ignorant Mason I've ever seen or he wasn't going to tell us anything I would I would definitely have to agree that that was that was the vibe on the tour I often tell listeners that also I attempted to shake the tour guides Hann and thank him for the tour you know and he was very standoffish yep but Freeman gave him the Freemason handshake and he loved it huh well by the end of the tour they had figured out I had to go back and purchase a couple more tickets for guys that just not getting Freeman style and I'll let them but then the guy counted all the tickets and told you no anyway so I went to get I cut some more tickets and on the way out the guy I was talking to over the tickets he starts talking to me again he's like what are you all doing here and I say well we're here for the free your mind conference well I wasn't going to say that at first but he pressed and he's like well what is that like mind control well I think some people talk about him alter and he's like I don't buy India that you know we got conspiracy theorists in here all the time and they you know I want to make something out of all this and I'm like yeah I know isn't it nuts brother you know and he's like so what larger you're from and I I you know I'm thinking I'm like oh God number one you just totally passed with it and so I started talking about the crazy conspiracy theorist and he gave me he gave me a Masonic handshake and I returned and and so he gave me a few free pins from watch and but yeah what are you gonna do yeah well you know everybody seems to think you're freemason these days Freeman I mean you have let me add that because this is going to lead into what you're saying is that the the Freemason there asked me well what did they think when they saw your free Masonic symbols because I have a compass square and G on that coat and he's like what did they think of you at that conference and I said well you know here there were x8 nests and people that have been to Mars but people were more freaked out about the compass going G than that than any of the people that were there that's too funny and of course mark you came from that dark background unfortunately absolutely I thought it was very fitting that uh in the time frame it's very synchronistic I have been discussing and breaking down the esoteric tradition of Freemasonry on my radio show for the past several weeks and the free your mind conference coincided with that material I didn't plan it that way and then having Freeman speak at the conference and then him telling me that he was going to be attending uh the tour of the temple today on the day of my show I said you know I have to be a part of that and then try to bring them onto the show tonight it's to synchronistic all that's flowing together you know amazing just an amazing conference and a great learning experience from Loren Eisenhower to Alfred Weber and Andrew basiago what an amazing group of speakers and you know open-minded yet not open-minded because an open-minded mind without critical thinking as I explained in my talk mark is a programmable mind so that's right we have to understand being just open-minded anyways mark that when we get back break from break where we got planned oh well we can continue to talk about things that happened at the conference we can continue to go into Freemasonry we could talk about other areas of the occult we can ask Freeman what he has planned next any of those things are up for grabs we can go to into the fraud rx material and see well nice to say about that yeah we should definitely press Freeman on the Frederick's conspiracy if you will I should have got the effect for my voice for that and make a real spooky and anyways and also check out the talk on our YouTube channel that Freeman and I had at the conference a quick little 10 minute talk we did and we had that spooky freemason handshake in there to get people talking anyways folks said this is the inn Hubb radio show where we do the talking five days a week on oracle broadcasting dot-com along with other great shows including Freeman's and so many many more don't go anywhere we'll be right back this is the Oracle broadcasting radio network okay cool break time we just dropped off the talk show really yeah oh no we didn't we did we did not I'm sorry that was Oracle broadcasting I drop Oracle you drop the phone yeah I drop them in the break so I don't have to hear the commercials diet all right you do that you know and thought about that yeah I do it and it you know I kind of get a headache having talked over the commercials and stuff yeah so I just look when you don't drop them how do you mute our voices if it hits it automatically right yeah mouthing as the music stops you're out well not as soon it's like a second or so after as long as the music's playing once the commercials come on you know either there's a tail end of the commercials they're free man that will get you so they dock your voice in and out like a second in other commercials or something dude okay I noticed this because it maybe it's just our bumpers how they're set up or something but I think that's yeah I noticed that that happens sometimes right all right let's all I think in the next segment I want to ask Freeman some things about Freemasonry and then we could segue into the fraud erects conspiracy quote conspiracy cool take it away I'll let you get bring us back again those have to figure out how I want to play that yeah man I don't know honestly I don't know if he is that William could burn uh you know it's very interesting somebody just tagged me in a photo here at the conference this is a great picture cool I want to be brought up to speed on the whole thing because I'm only heard bits and pieces okay so be good enough for me to get caught up on it yeah Bob's been attempting to tell me about it I'm not sure I know the whole conspiracy myself hahaha I've been in the chat room so what these guys are adamant and I need a new microphone what you guys got planned for tonight we're gonna after the show we're just gonna hang out and party that's all cool nice to have a good time on the shoulder they're very it is very richly deserved after you know a weekend of hard hard work dude last night I slept like you would not believe uh I fell asleep I've never fallen asleep in my life this early I fell asleep at 7 p.m. last night and I slept until about 8:30 this morning he kept waking me up why what is what was she doing you get hungry at the boarding come on it was our one day to leave is no it's all good she gets hungry that early I know and then she yeah Wow so all right here we go 10 seconds there we go you you okay the Intel hub radio show on Bob Tuscan join with mark passio of what on earth is happening and Freeman fly of Freeman tv.com let's jump right back into it Marco where do we go from here okay I want to ask Freeman a little bit about Freemasonry in general being that this is a topic I've been discussing on my show for the last many weeks I want to basically see what your perspective is on the dichotomy between true esoteric Freemasonry which is attempting to teach natural law morality and higher standards of behavior versus what Freemasonry but I shouldn't even use the term freemason versus what masonry or what I term dark masonry has become in the modern day through infiltration by dark occult orders and this is a thing that I don't feel that many people grasp or realize about the craft because they don't study it in depth and they don't go into its allegories and into its traditions and into its rituals and into its symbology and break it down and study it on their own and read a lot about it from eclectic sources and and a wide variety of material and and baton and um and resources and they make a quick snap judgment about something that I feel that they know little about I feel young Ervin touched on this greatly when he broke down what the occult is yon included the of the etymology of the word occult as I often do in my presentations and he showed how a cultists get away with what they get away with dark occultists in particular get away with what they get away with because of the methods through which they have hidden information and they've done this through the dark or perverted use of the Trivium the Trivium is a tool it's a tool only if you twist and pervert something and you keep it you keep it back or veil it from people that do not have those same tools at their disposal then you are in a distinct advantage over those people and you were able to use those same tools against them as a weapon and I feel this is what Freemasonry in the modern day in the lodge system has become to an extent okay now there's not not everyone that is again uh there are there are good and bad in all areas okay and I wouldn't make the claim that people in the lower levels of pre masonry are involved in the global conspiracy or anything like that but they're not privy to some of the things that go on in the upper echelons of their hierarchical institution so I Freeman I want you to respond to to get your take on that see what it is that you think will make about Freemasonry in the traditional sense versus what it has become in the modern day and add any other thoughts that you have on that topic when I brought the topic of Freemasonry out when I presented it for the first time on on the Freeman perspective I was trying to announce to the world and people that hadn't known before that magicians were in charge of their reality and in creating their culture now what I didn't expect was to form a witch-hunt I was just trying to say hey look things aren't quite the way that you think they were and that's alright people are used to that with my show I follow that I did not know I was really forming a witch-hunt and what I learned that over experience was in watching what Patriot Christian radio has formed into of what it began as was a very stand on your soapbox point at Satan and say bad bad bad and this was never my intention my intention was to introduce and to explore and so but since I had been put into a platform that was traditionally a Christian Patriot platform and then when I put out those stuff about Freemasonry immediately people wag their finger and say evil Satanist so I had hoped that when I came into this and I introduced it immediately that my father was freemason and that my mother was Eastern Star and that I had grown up with this in my family and that I should have a more fundamental view of it so that you could understand what it is so yes I saw this witch-hunt form and that that kind of shocked me and I was like oh wait okay I need to make sure and balance this I was just trying to make you aware of magic and so when we start to look into the concepts of magic and Freemasonry then you clearly find that this is a unified system at Freemasonry is a system of magic and if you believe within the Scottish Rite legends of Albert Pike and his writings then it's the Kabbalistic practices or the Hebrew mysticism and this is obvious trifa how many hexagrams that we see in that lodge right absolutely Kabbalah is the basis of all Western mystery traditions and it is indeed parallel with Freemasonry to study one is to study the other and I broke down Kabbalah fairly extensively on past shows and showed how there is a light tradition to the Kabbalah as well however being a tool as it is being information regarding self in the deeper nature itself that information can and has also been perverted and used as a weapon against people who remain in ignorance of it this is why taking in information into a great degree and from an eclectic variety of sources is really the only way to build the immune system so to speak that's what the the jaan talked about the Trivium as a message as a method of of building the immune system of critical thinking of not being able to be fooled of understanding how to learn and the true nature of self and uh his presentation I felt dovetailed so much with with yours and with mine and because it was explaining the depths of what the occult really is you know that impressed me very much about Young's presentation in particular and then I went into some of the symbolism of the dark occult with my background understanding how of the controller class the so-called controller class of the military and police are actually Oh ethically mocked through symbols and signs and words as well so I broke that down in the might in my presentation what I feel is that when it comes to different occult traditions we really need to try to get out of unit dimensional thinking one dimensional thinking is so prevalent amongst people in the freedom movement and in the truth movement they think that there is only one side for these different traditions because they have other belief systems that conflict with what they have heard about them but not they've never really gone and depth and looked at what it really is for again from a very deep perspective of study and discipline and taking the time to do that honestly that's why I invited FRA direct into the show this was the whole point in purpose of bringing him out now whether we believe it or not now I'm not too sure as far as I know this is the first time Parata Rex has ever been on the air and he's doing a fantastic job for just jumping in both feet of course there is the whole conspiracy grabs he has been on the air before me is he made it to you Freeman that he sounded a lot like the people that were saying that was him on who was it well I'll tell you I was questioning him I was like are you sure are you sure this is in you this is the Bill Cooper show with a freemason named William Morgan now maybe for otter X's this William Morgan maybe did come out and start to expose Freemasonry as luciferianism which I think Broderick certainly should recognize that it is and problem being is when you start to look into this type of light bringer and things in the the immediate equation with Satan there's massive confusion there and I'll tell you straight forward there is no biblical support to say that Lucifer is Satan so now you got to reorient all your thinking you got a wipe your white mind clean and start over again and this is why I threw for otter X out there in front of everyone and said err pick his brain and his whole purpose was to come out and share with you how the potential of this Scottish Rite Freemasonry there are Scottish Rite in York right there are other masonry as well but these two are the main players and how the Scottish Rite are coming in and seeking to dominate Freemasonry totally and he believes that the Scottish Rite are the Bavarian Illuminati and when we look to the leaders when we look to who are we considered truly evil at least in my book say like Dick Cheney George Bush Hillary Clinton the ones that are truly evil what I call baby Eaters they are so far beyond Freemasonry that you shouldn't even consider the topics together I totally agree I feel that what this is a complete perversion of the original tradition and one of the things that I will often refer to this as is chaotic masonry that the Pope is something that Freeman brought up in his presentation it is the the realm of souls that died in in disgrace or in unconsciousness or in fear and insane insane Wow very interesting stuff mark I don't mean to interrupt but they were coming up to another pesky break here and when we get back we'll dive deeper into that and so much more in folks 6 6 7 is the part of the equation they don't want you to know about we'll talk about that don't go anywhere this is the Intel hub radio show on Oracle broadcasting calm you you Noba constitute back of your hand you read books listen to podcast guys great show uh did Marco run walked upstairs I bet he did grass up dude yo dude we got mark passio and Freeman together in the studio live on the show right now you just missed a little bit of Frederick's talk I know you're interested oh nice not yeah I'll have a listen cool dude hey you know looking at that Freemason ring and I think I recognize that from one of the cops that used to live in my old neighborhood Freeman yeah are you a cop they used to live in Christians neighborhood see there that I think they're muted store they went up went upstairs now that's not a freemason ring yeah what's dude now it was asked Freeman from when Freeman gets back I'll let you ask no dude I saw it in person err you guys live no we're off there were we're on break okay we got it we'll be back I'm in the middle of a show okay yeah we'll be back in a sec I just wanted to call you in like say what's up you know I would have called you live on air like that dude oh no I know I know that's on the show yo are you guys back are you minute mark they went upstairs to put the dogs in with the dog started barking I think they had a meeting there they Robert Bob we're back we had a well take care of something put the dogs up yeah sorry no worries I figured that a I got it's Freeman there Freeman I believe went out to smoke a cigarette okay uh yeah I just we got Chris geo on the line uh we're not back on live you know no no okay great Chris you want to pop on say hi first yeah I'll be more than happy to do you want me to ask the hard core question yeah yeah yeah I'll let you press them live on air okay great is that all right with you Marsh that's fine with me it's a follow up right Chris I'll let you I'll let you do my dirty work for me brother all right none of my none of the knowledge that I hold the secret anybody that wants to ask I will answer to the best of my ability all right cool thanks Ilan I so we'll start off with mark and then when Trainmen gets back I'll let you talk to him and asked in the freighter ex I mean we just got into it a little bit so try not to what will make it a segment all right the freighter X thing is new to me I don't know too much about that those questions will all have to go to Freeman okay want to ask me anything else I'm up for it okay well start off we'll just do casual and Freeman should be back by then sure Freeman just got here okay cool we go stand by us you you that tune you hear there is by our good friend Chris Jill and Sheree of truth frequency radio and how appropriate is it that Chris is now joining us in this wonderful discussion we're having here Chris how you doing tonight buddy all doing great always a pleasure to be on with you Bob and great work at the conference both to you and Mark Freeman I saw some of the videos and I was just really blown away at the presentation particularly it's yours Bob I really didn't know you had that kind of presentation in you and my hats off to you is that because I'm Jewish it is the work because of the hair actually the hair let me jump in and say something to everyone here and the listeners are Bob this was his first real public speaking speaking appearance as a presenter and he did such a professional job it was just absolutely outstanding you would have never known it was his first time he was very comfortable up there and blew everybody away with his presentation a phenomenal job oh thank you guys you're too kind and that's adaxel a baller let's see if I can public speak on my own radio show now but know that talk is actually underneath our chat at the Intel hub radio calm so check it out when you get a chance after talk it's an hour-long talk I called it knowledge darkness and the lights and that was a big theme throughout the conference we may get a chance to take calls a little bit later on the show but first I wanted to bring Chris on to follow up a little bit on some of the freighter X questions in the Freemason questions for Freeman here at Chris I know you've been wanting to talk with Freeman for a while about it so I'll let you go ahead and gear your concerns towards him absolutely and I appreciate the opportunity definitely and for on putting it out like this because I think this is something that needs to be addressed because there's a lot of questions that people are asking asking me too and I have no idea what to tell them all I can go based on the facts that I've seen and we seem to see a movement towards Freemasonry in the truth movement I don't even want to call it a truth movement because it's that that term itself is like the term truth or any other term that the CIA came up with but you know for lack of a better term we'll just call the truth movement and we see it with we are changed craig Fitzgerald coming in and proclaiming that he's a 33rd degree freemason and that was set up I mean definitely was set up now the question is was it why was it set up you know was it set up to create this diversion or a distraction or to cause division etc now I talked to a couple of people on the inside with the Crick Fitzgerald situation and they said a year prior to that Craig had said that he was studying this there all these Freemason manuals just so he can you know get an idea of the way they think then a year later he turned comes out he makes our video so he went from the leap from being a porch mason to being a full-blown 33rd degree and I understand that a lot of its honorary etc and he's probably not a 33rd degree in the sense that you know George Bush and other people like that are but that just goes to show that we are making a move towards Freemasonry and it's kind of getting me on it kind of got me uneasy because on one hand I understand we need to know what they what they know we need to know what they think and the best the best lie is 80% truth so we need to dig out that 80% of truth that's in the lie but when you look at it from the higher perspective and you see you know all the Masonic symbolism on all of these states like 9/11 77 etc and you start to see that the Masons at least the very top level from what I'm able to gather are pretty bad people and if you read morals and Dogma Albert Pike etc you'll see that basically they worship the Lucifer now we can you know go through the question of who is Lucifer and all of that is he Satan I personally don't think so I think Lucifer is um more of a separate entity all right like you know weight ratios yeah what's here is response well you know in everyone's belief it's David Icke supreme Eights and Jordan Maxwell is a freemason a you know Bill Ryan's of Freemasons Zecharia Sitchin's of freemason Freeman's are freemason so I figured I'd just throw the cost of the wind and let anybody think what they wanted to think I thought it was a grand opportunity and I think to say that all Freemasons are liars is showing a bit of ignorance what we need to real lies is that it was the the free Masonic order that brought about the ideas of fidelity chivalry and honor into systems of civilization now I agree with you and we start to look around and we recognize that every single corporate logo out there can be absolutely classified within a free Masonic ritual and it was every corporate founder that I could locate their affiliation with Freemasonry almost every major corporation has been founded by freemason right I mean you know they're known by their by their fruit that the tree is known by the fruit sitted bears and I mean y'all right you're right this is a view on their part as well but see to say that 9/11 is a freemason number it's not correct 9/11 is is an occult number and if you were to study it you would have to turn to some organization like the Ordo Templi Orientis if you wanted to get to kenneth grant and read his whole extrapolation on the numbers nine eleven because see this was something of major concern to them the Satanists will tell you that these are Satan's panic numbers and then also the occult is such as kenneth grant and Aleister Crowley will also tell you that these numbers are satanic now Aleister Crowley went ahead and switched his Kabbalah and in order and switched his tarot cards so as you look to his Tarot his magic he actually incorporated 911 into his magic now Aleister Crowley was considered wicked and I believe he would be anyone that could lead people to freeze and die on top of a mountain without giving a hand is evil so now you're seeing somebody using a tool for evil now I judge Aleister Crowley by his his fruits because he was that wicked and I can judge others by their fruits such as W and HW and those that were involved in the Twin Tower incident but I cannot judge Freemasonry on the numbers nine eleven because this is not part of their practice and if you were to start and talk with any of the Freemasons about any of these topics they're going to go what are you talking about Kabbalah I am I don't what you mean a lot of them are ignorant about the roots of their own tradition I think I believe that I saw that clearly today in the temple where I asked the the gentleman who was the tour guide if he even knew who the face was in the middle of the very emblem that is the the seal for the Grand Lodge of Pennsylvania and he had no idea whatsoever I actually educated him about that telling him that that face is the face of the Greek Sun god Apollo with the rays of light streaming off of his face and uh it seemed like you know he was Jenny just genuinely really didn't know you know the whole thing is that the dark occult has infiltrated every order that was once positive it is Satanism it is dark luciferianism dark Freemasonry is something that is the antithesis of the true esoteric tradition of Freemasonry which if studied is actually a way to arrive at a deep understanding of natural law principles this is why these principles were enshrined in the founding documents of this country and they were largely constructed by Freemasons over time the the 9/11 event as well while I would not say it is a free Masonic ritual it is a ritual that employs the symbolism of Freemasonry in a dark way again d'arco cultists do not create anything they take over things they they obscure they occult they pervert and they they use things that are already pre-existing because they don't have creative energies that's a Sacred Feminine manifestation creativity they don't have that because they don't have true care they don't have a truly developed right brain hemisphere and most of all where that common were creative creativity and creative energy comes from as the heart and we know their heart chakras are completely closed down they're Psychopaths all they can do is pervert they never create they take something that already exists and they twist it and then they infiltrate it and take it over and writing that message is where you can judge fraud or X because Chris you know darn well how hard it is to put on one of these shows and to do it just for nothing but the love in your heart and broader X is very concerned for the humanity and he is giving up his time he has four children he is taking his time out to study and to share all that he has with those that will listen well I understand that one of my one of the big red flags to me was that he uses the name freighter X I handed him okay well for my research freighter X at was also the title held by Alistair kid you know that Scientology also has a Freezone interesting well I have a feeling that we're not going to get this solved at this break before this next break which is come out with an assessment but when we get back we'll dive deep into this folks I promise you and we'll let Chris chill hang out for a little bit longer with us on the program

Freeman fly mark passio Bob Tuscan and this is the Intel hub radio show don't go anywhere our number two to come you alright guys break time let me call my buddy here real quick and ask him something on everybody all talking at once now sorry about we were muted doors that's good that's what it happened to get into yeah yeah yeah I'm on what's what's going on we're loving this we're really enjoying it - I'm hearing and I brought Kristen to be devil's advocate a little bit that's fans matter yeah I'm just I'm completely confused I'm convinced that a couple of weeks ago we stepped into a parallel universe and this is a completely different timeline go ahead yeah what's up man we're doing a good show it's Spacey around around yeah I can come by after the show we're gonna show what's that we're going to start off first - what time is that we're trying to leave here but 9:15 I'm 15 what time you're done with yourself at 10:00 yeah a little bit duffle whatever okay all right well minna I'll meet up with you guys tomorrow something hi face all right sorry how to do that Chrissa I'd encourage you to check out some of the past podcasts I did on Freemasonry in the last few weeks and to continue to listen to the next few weeks I'm temping to break down the really deep esoteric explanation of what Freemasonry really is and how it's been perverted over time if we understand it symbols from the true tradition I think it would make a lot more sense a lot more sense to a lot of people but it takes a lot of time and study and it takes people pointing people in the right direction as well so that they can see as it really is before it's been twisted because believe me I would not tell you there aren't dark evil people involvement in that Lodge system okay I would be lying if I did well looking to look at Christianity or any other after we get that here we go stand by everybody mute Halloween is a disclaimer this program may not go along with your free program both project description Wow our number two yes that disclaimer is truer than ever this episode of the Intel hub radio show definitely goes against Chris Joe and myself Bob Tuscans pre-programmed views on Freemasonry and we're joined with none other than Mark passio of what on earth is happening and Freeman fly is joining us on the program talking a little bit about the controversies that's been stirring around the Oracle broadcasting family a little bit about freighter X a guest host that Freeman had on and I don't want to focus on this too much but I think it's good that we get this out of our system and address some of these concerns that Christian has and and maybe some of our listeners do as well I'm not taking sides that you know Chris I do believe that there are good people possibly involved with Masonic you know lower level sort of porch Masons as you call them and they just do it as a business thing or you know there again I'm sorry to interrupt them but up at the upper echelon you better believe there are beautiful wonderful people up there as well I'm classified manly P Hall as one of these people who ever read his his basics of understanding you would realize how much he loves humanity and and and that's where I judge people from and I I'm going to chime in on that as well for a moment uh at the upper echelons also I know a 32nd degree Mason he's a personal friend of mine he's a wonderful person he's really trying to help the world and I'm going to bring him on the show in a few weeks to do a full interview talk to him about his experiences in the craft and you're going to be very very surprised at who it is and that I'll leave it at that and leave it as a surprise resident but it got me wondering certain is that you know good works are done in the light and darkness is done and the bad word down in the darkness and free masonry has always been in the darkness it's constantly infiltrated if you want to put it like that and the higher-ups are you know pretty bad people I mean look at George Bush Aleister Crowley l ron Hubbard etc all they wanted to do with control now we can apply the same logic to Christianity or any other organization and say oh well the pure roots of it is completely pure etc Bester's hijacked into this evil thing now you know the way they indoctrinate people is they'll tell them that it's all good and oh you know you're a good person if you do it I've met the lower-level porch Masons now they all tell me the same thing you have to be a very good person to join the freemason but there comes a point in time to where they tell you okay if you want to join Freemasonry then you denounce all of your other beliefs religions and take up Lucifer as your as your God they don't put it like that but an example that I use sometimes is they'll say okay here's a Bible here's a cross spit on the Bible and denounce Christianity and proclaim yourself as a freemason and the ones who don't do it they don't move up and they're told oh that's you know good work brother you're not supposed to do that that's what a true freemason would do but the ones that do do it then they get the secret knowledge and then they move up and then they they really start to understand what it is so put half the truth out here and just to tell people oh it's a you know big it's a big party where people wear aprons and bake cookies I'm sorry I just I don't go along with all I'm certainly not saying that absolutely not I agree with much of what you just said actually um there are when you get to some of the operations depending on who is controlling things in that particular particularly you better believe things like that go on I wouldn't doubt that firm for a moment or tell you otherwise however we have to we do have to understand that it is a perversion of the original tradition you brought up Christianity I'm sorry about the real quick yeah well I I want you to finish it up over come up to another break so real quick okay no problem I'll pick it up on the other side sounds good and I think we have a lot to talk about this is a great conversation I didn't realize this would inspire so much great thoughtfulness and you know I think we need to the cell like I said so what will jump into it when we get back here in just a moment this is the Intel hub radio show you throughout history the power station money had been used to claim an interval all right I was trying of something but I lost my train of thought I thought well I think I'm going to chime in is relating the perversion of Freemasonry to the perversion of the philosophy of early Christianity and how the gnostic tradition was basically overtaken and replaced by a show theological Christianity through the Council of Nicaea via Constantine and it's very similar to the infiltration of true Freemasonry which dates back I mean that the people who think that that started in the 1700s don't understand that this tradition has been around for thousands of years and it has been slowly infiltrated by sorcerers which is our whole different class of entities than magicians and I make that distinction between magic and sorcery this is these are unpopular terms by people you know who are left brain thinkers or by people who think that both of these things mean you know darkness and evil as I have explained on the show before like you know magic is influencing change to occur in accordance with higher will higher law natural law you know and sorcery is the perversion of that to influence people to do the bidding of the sorcerer and I Freeman has a lot to say to chime in on that and like makes that distinction in his own work as well all right so where do you guys want to pick it back up when we get back I want I want to jump into likening the default of true Freemasonry to the fall of true Christianity because I think those two things those two of traditions really teach the same message all right well I'll let you bring us back into and get it started sure and Chris feel free to hang out and chime in if you like okay all right here we go coming back in just a moment guys it's funny I brought up Andrew basiago the show last night and the guest was calling them out saying this guy's a liar this guy is a huckster buh-buh-buh-buh-buh it's always great when you bring somebody up and then the guest is like I hate this person they're a they're an agent oh yeah who together Richard Sauter oh really I'm supposed to have him on he's the deep underground base guy yeah yeah oh we got into that a little bit during a panel discussion as well yeah he deep underground bases yeah did I mention the thing that happened on our show no no though we had that guy who owned that company and he yeah yeah the people buying these underground bunkers and and also these arcs now that they're building are these illuminators and Bilderbergers or however you mispronounced it anyway stand by here we go mark bring us back coming back and we're on now standby you all right ladies and gentlemen were back on mark passio we're here with Bob husky and crispy oh and Freeman fly so we were talking about before the break I was alluding to the the infiltration of Freemasonry by dark occultism and how this is likened to the fall of original esoteric Christianity if you study the gnostic tradition which is what I believe the was the early philosophy of true Christianity and you understand how this wonderful heartfelt philosophy about oneness the law of one the divine spark and all beings could not be allowed by the controlling class of its time to propagate and to be to basically be the to come from a spark and and be allowed to be fanned into a roaring fire so to speak the controllers had to shut that philosophy down and they did this through the Council of Nicaea and many people will know about this Constantine making a perverted version of Christianity based upon Astro theology and based upon really older Sun worship the cult of the Sun of the Aten in other words and in Constantine's time this was the Roman Sun God Sol Invictus the Unconquered Sun he simply grafted the same Astra theological story of the Sun onto our this new philosophy which he then basically made into a religion and that's what people to the modern day are still worshipping now Astro theology plays into Freemasonry as well but it's telling the same story about light and darkness and resurrection and and and these these traditions parallel each other more so than anyone really realizes that's why the controller class of our time needs to shut down true esoteric Freemasonry because these traditions are basically teaching the same message they are one and the same at their core and in their original unpervaded in the original unprovided form that is what i would encourage people to get down to and you can only get down to those teachings if you study it deeply and again from an eclectic variety of sources and you realize not through thinking unit dimensionally but by understanding it is not one thing when we refer to Christianity we're not referring to one thing refer to Kabbalah we are not referring to one thing we refer to Freemasonry we are not referring to one thing so I'll let Freeman chime in on this for a little bit because he wanted to get into the dichotomy between magic and sorcery a little bit which is also a topics that I cover in my presentation series and on my podcast so Freeman can you chime in on that a little bit and talk about magic versus sorcery a little well I'm sorry I don't mean in a red mark I just one quick question for sure so basically Christianity was pure to begin with and it was hijacked and turns into an astro theology of astro theological religion then Christian I would Freemasonry is already astrobiology to begin with so how was it that Christianity was perverted into Astro theology yet Freemasonry is pure in Astro theology because you need to understand the difference between esoteric Astro theology and exoteric Astro theology the esoteric form meaning the inner tradition of Astro theology is an allegory about knowledge versus ignorance about the spiritual understanding of who we really are versus dwelling in the darkness of being identified with the physical world this is what the Astro theological tradition is simply teaching in allegory they rip the real ash with the theological tradition and how this verbal tradition is passed down over time of the story of the sons death and resurrection is not meant to be taken literally this is what religionists have done in order to basically turn people off of the path of looking inward to get them to look outward for saviours and and for people to come and rescue them for the things that we created here in our own collective experience we need to change ourselves so that we can change our external reality and that's a process of work that of turning inward to go inside and then look at who we are and to do the internal psychic and spiritual cleansing that needs to be done in order to make a true transformation and the esoteric form of Astra theology was always about that it was never meant to be taken as actual Sun worship this is what they call the solar cult of the ancient world did they pervert those original Astra theological allegories and turned them into a religion that actually worshiped the real physical Sun then that form of exoteric Astro theology was grafted on to the original Gnostic Christian tradition and it was turned into a worldwide religion that is a form of mind control that is exactly what happened and if you study Astro theology in depth you will find that is true well no offense and let me turn my mic up a little okay no offense and I'm gonna let three men jump in here in just a second and but it dis all just seems like hora games that's all it really seems like the new world order religion is Freemasonry that's what they want is their one world religion and it seems like people are just falling for it I think it is dark Freemasonry is the new world order religion there is a difference there there's more than one kind of Freemasonry true Freemasonry is not a religion it isn't it is a system of symbols and allegories that attempts to convey a deep understanding of natural law principles which is what the Declaration of Independence is based upon the natural ball where we derive our own inherent natural rights from I mean even can we separate the two I mean why fly under a flag that's already corrupt and known to be corrupt and there should be a different category for this what Bill Wilson should should we say we reject all of the teachings of real Christianity just because the Roman Catholic Church has become completely corrupt as well let me pick diseases I mean let's let's not follow the teachings of that the words attributed to Jesus you know that that's that's a wonderful philosophy that should be lived absolutely you know I'm not I'm not discounting that what I'm saying is it isn't one thing it's I'm not saying Freemasonry the only thing people should look into her study either I mean I'm empty I'm telling the truth Tero tradition on my show the true Kabbalistic tradition I've gone into the gnostic tradition a little bit i've the real esoteric christian tradition i covered when we looked at ashford theology on the show as well and these are all in my podcasts and they're all up for free on the website and they can be explored and gone into in-depth and I provide references and books for people to go into and read to do further study on their own interesting mark we're coming up to another break but when we get that we're going to hear an extended segment with Freeman and allow him to respond to all of this and I'm sure he has some great food for thought and that's of course 100 percent organic food food without the toxins food without the stuff no it's not that kind of food I just joking folks this is the Intel hub radio show we got a lot of great programs planned for you this week Jordan Maxwell will be coming on Wednesday show not gonna want to miss that and let's see here will cover some news and stuff tomorrow take a break from the news once in a while it's not the end of the world folks or maybe it is with the Fukushima plant disaster who knows let's pick it up on the other side this is again the Intel hub radio at the Intel hub calm you okay all right I didn't mean to step on your premium by the way premium cream went up to take a smoke I think by the way talk shoe is cheering us so yes yeah Freeman was saying that uh he feels that Freemasonry isn't that the new world order religion at all it's basically Satanism and I couldn't agree more perverted Freemasonry is no different than Satanism that's what it really is well as long as there's a group as long as there's a title to it they're going to pervert it into something we just have to face and we have to look to ourselves for the answers not to some teaching of Freemasonry or Christianity or any other organism organism period the answers are all within ourselves I agree yeah then we take away the power of ourselves and we give it to an outside force and that's just a way to be controlled yeah I definitely do not do that I study a what I would call an integral approach I take an integral approach I'll take teachings from Buddhism from Taoism from Freemasonry from Rosicrucianism from Kabbalah from the Tarot tradition from Christianity you name it I mean I don't limit myself everything that resonates with truth I pull from whatever traditions have put it out there into the world and combine that into a synthesis that's basically what my path of study is like and self-examination is like and I agree all of those truths that are that are synthesized by all of those different traditions all ultimately reflect things that are already within within ourselves and that they're just a reflection of that so I'm going to totally agreement with you there I just don't want people to get the idea that Freemasonry is all one thing nor is Kabbalah all one thing those are all are all a part of it and I'm a member of the ADL well I'm a Cree or Mossad agent as well Bobby right here on that yes I mean I definitely agree with that mark like that I'm a Mossad agent Oh what mark so yeah yeah it's more like coming in loudness that's good it's not your normal boom mic but that's cool it okay well no I should be something's going on with Skype here now you seem a little distorted we have a month there it has shaped up a little very that better that's better look y-yeah upgraded my skype I think I need to downgrade again yeah 720 how that work yeah now you're not your ex allowed now super loud okay now check him turn it down it down alright alright is that better no no alright is that better yeah okay excellent it's still outgoing and yet freeing are tightening up my baaaad lesser light source you did you stop your excellent Chris down by well come on on there 9 p.m. central on Oracle broadcasting [Music] you alright folks this is the Intel hub radio show some people are saying that our friend Freeman fly has been keeping some bad company with freighter X and we've been discussing that as well as just the whole idea that you know Freemasonry there's multiple levels of this there's multiple sides to this and just before we got to the break that we went into a lengthy dialogue on you know is this the world's religion this Freemasonry or is it Satanism I'm gonna let free MIT comment on that and we'll take some phone calls maybe in a little bit eight six six eight four one one zero six five is the number join us Freeman what do you think what's really going on here well fear is the mind killer and this should always be your mantra we need to stand strong and we are now reaching a level where we are coming upon well we could say college level conspiracy theory and what has happened is as we become awake you start to be aware it's as if the doctor just came to you and said guess what you're not going to live to see another year and you will go through all those stages of grief denial anger all of these things and this is due to the fact that your whole world has just been turned on its head now what I like to do on my show is turn it on its head one more time that's always my goal because this puzzle has to be flipped over and looked at a few times before you can make any assertions or assumptions and when people jump in and they immediately feel as if they know something this is dangerous and we are getting little bits and little pieces and we're starting to understand something that or we're at least starting to look at a picture that we don't fully have comprehend and as we do we want to start pointing fingers now my goal from day one has been to explore topics to go ahead and open the door and I have walked into every Masonic Temple that's ever been out there that I've ever passed they've always let me in and let me take pictures in film and you can see all the different lodges you want in my photography section on Freeman TV they so what I wanted to do was open this window to understand the idea the concept of Matt and the idea of finding your true Souls purpose and Freemasonry came into this puzzle absolutely because of the very fact that they are at the height of our civilization and that we needed to explore their methods and understandings to figure out what their goals are and in this we cannot get lost in just pointing fingers we have to open the books we have to start to read the different books I've read Albert Pike's morals and Dogma from you know and Edie and I found it a very chivalrous notion I felt very proud and ready to stand up for my purposes after reading it now that's one way that you can take in this information when you start to read Albert Pike go a little deeper then you're going well who's this 'life is Levi's character and what's that goat of Mendes doing there and you get a little deeper and this is what we must do because we are now approaching a college level conspiracy theory and we need to know more and more about what we're dealing with here and the concepts come up now is magic evil is this an inherently evil practice now I would say organizations typically are inherently evil because they form hierarchies and so when we discuss Freemasonry and this is I think part of the confusion of what we're talking about here because on some levels I'm trying to defend the concepts of magic and freemasons are one form of magician OTO Ordo Templi Orientis even I think Scientology could be classified as a form of magic this is a question of magic is magic evil and so then we start to understand that the concepts of magic versus sorcery or self-serving magic or a humanity serving magic and in these ways I think we can empower ourselves and take into ourselves some tried and true methods that have been around for millennia to help support the spirit and its movement to try and change the world because the Freemasons have changed the world more than anyone I can imagine for better for worse huh for better or for worse exactly that's it but here we have Manley P Hall coming out to you and saying look there were a black priests of Atlantis that corrupted the the true inner teachings of our divine doctrine and that they came over after a catastrophe and dominated the system and so now when you start to look at Freemason you're like wait a minute now this guy's talking about Atlantis and so now we're going back to ancient civilization then you open the door to that you go oh my god here's here's the construction I'm at going oh we got that muted now no problem go ahead okay so here's a construction in our ancient paths that is we are incapable of building in the 21st century stone to Baalbek Lebanon things of this nature the pyramid all of the hidden secrets within that the secrets of magnetism all of this encoded in hidden within these esoteric traditions and once you start to take all of this in in the eg connection and the extraterrestrial you see we're starting to move into a whole new paradigm we can't say things are black and white we're starting to learn things about our planet that we never knew before we're starting to understand modalities of even frequencies and of energies that are in our system that we didn't understand before finding gravity right next week we have the International Space Station is going to receive its Alpha Magnetic Spectrometer from the space shuttle that will be April 19th and they're also launching up Robonaut 2 and in this they are bringing up a device that can see the anti universe then we have CERN punching holes into the other dimension while icecat is sending Doritos commercials to Ursa Major now this again is all tied within the occult we know that Jack Parsons was a lead magician sure probably a dark magician force Freeman the shape of a Dorito is a well I am not joking I'm joking okay so we see that it's the occultists that are coming to the heights of most of the understandings of the world and then we're realizing that we live in a multiverse that there's other dimensions and now we've got guys trying to punch holes into the other dimension so this is the level that you start to understand magic none of this technology the television would not exist without a magician now that's probably a bad thing I I don't like television and yet it could be a tool for good but the problem is that we have dark magicians because everyone else is even ignorant to the fact that we are dealing with magic and when you talk to a Satanist he's going to say well I'm building this device so to form a sum or Oregon gas that will open a dimension so the old ones can enter okay so they're using techno magic and that's what you'll find a lot of your Satanists are into and so we have to start to understand this very process and what is magic as much as we have to understand why the Alpha Magnetic Spectrometer can see into the anti universe bark to have something to follow up to that the the distinction between magic and sorcery really has to be deeply understood and I'll I'll quote one of the speakers from the conference Laura Eisenhower whose talk I was also very impressed with really said that it all boils down to the distinction between the concepts of service to self and service to others and that's what magic is about magic is about service to others true magic true magic to service to others but sorcery okay the perversion of magic is ultimately about service to self because that's what Satanism ultimately is the dark occult Satanism darkness if Aryan is in dark masonry dark Kabbalah it is ultimately about self service and nothing else well I'm go is raised to the highest level the ego is raised to the status of godhood and it is put on a pedestal and it is served at the expense of well everyone else sorry because you are cabal to see themselves in a state of separation from everything and everyone here at the Intel hub we are of service to others and a part of this all so folks don't go anywhere we'll pick that up on the other side and get to some phone calls the Intel Hub radio don't go anywhere okay Chris color so gates Chris yeah MMI echoing still no you're done okay I'm sorry about that guy Bob I don't mean to drop you but I got a no I understand um all right here we go let me screen this car real quick hello call oh they hung up oh I hung up on him by accident I always do that I press the hung up hang up on instead of the on live button oops Chris dropped out as he's back yeah here oh there you go cool yeah three men went up to have a cigarette yeah man these guys smoked like chimneys I was getting a headache from all the cigarette smokers at the conference because I go out a lot of them outside yeah go out to talk to them and they don't be smoking cigarettes and you'd think at a free remind conference they wouldn't be smoking cigarettes but I guess it's funny because that group has so much stress and anxiety from this alright good I'm glad to call it calls back 2:09 I'm sorry I didn't mean to hang up on you what's on your mind what's your question hey I have a question for Freeman Ritter Bob make it quick it's a good forward a direction to my boss by the way I don't know whoever whoever their best specially for him and this is weird my kid came out of Afghanistan and Iraq is very special group I came to say and all of a sudden my kid got a letter from the local hall and the main one in San Francisco please you called to invite yourself to join in my kid had never did that I actually been studying with Freeman and I went to the hall okay sir what is your name my name is Ernie and I want to know they recruiting not want to know yeah okay I don't know if I will help my call when we get back thank you very much Samba okay yeah unfortunately people are realized that I don't really care to once I figure out that you're not a crank caller and I get your name on to the rest on the show okay I hear you um yeah you know me Chris I'm uh I'm a crazy call screener yes you are it's one of my favorite things to do no conspiracy radios like pro wrestling dude we got that email into just a little reacts like they're fighting behind the scenes they all have a beer that's kind of funny that's how we've been doing it lately hon Freeman yeah we're we're giving Masonic handshakes on camera you know yeah that's too funny man all right let's pick this up when we get back here what do you guys want to take it I was just going to call the sugar ball first yeah all right we'll kick it off with a call okay here we go stand by the coil can do for you at hip usne org boom winning this is the until hell radio show I am NOT Charlie Sheen on Bob Tuscan and our website the Intel hub radio.com mark passio with us for a special merge of both what on earth is happening his program and the Intel hub radio show and we also have in the studio with mark at the one on earth is happening studios Freeman fly joining us just the fresh from the for your mind conference that we both spoke at all three of us actually and an absolutely fascinating conference had a lot of great speakers and a lot of great energy and we've been talking about a lot about Freemasonry in the pro and con and Mark had been doing his podcast ironically on this very topic for the last couple weeks so if you missed any of that please go back and check it out in his archives also Christian joining us good friend of the program Chris it's always great to have you here buddy hopefully we're not echoing anymore right oh yeah I think I've got it taken care of um you know I just I just want to make this comment you know people get mad and they say hey Chris chucking Frater X and it's like no no I'm not attacking Frater X or Freeman all I'm doing is pointing out the fact that freighter X was a title held by Aleister Crowley l ron Hubbard and Jack Parsons um you know people are pointing asking why are you attacking out Jones I'm not doing that I'm just pointing out the fact that he's you're in the in my diet Chris you're an insider I mean people would not bro it's not that it's just I'm just pointing this out don't get mad at me if you get mad with the information get mad at the people who are doing it don't shoot the messenger huh exactly all right well let's uh get to a call here Chris and of course eight six six eight four one one zero six five the number to join us get out of cran write this down eight six six a four one one zero six five and we have Ernie on the line already welcome to the Intel hub radio what's your question or comment all right guys okay um I just want to run a real quick story by my kid was in military Iraq Afghanistan a very special group okay a little while ago got a letter from the local Mason Hall and the main one in San Francisco my kid never applied or adopted three weeks later my kid gets orders to report back to duty I want to know I'm going to go down Thursday into the hall I don't know before the local and obviously they do retreat and if it is true freezing and guys my kid wasn't some serious stuff so it's going to protect my kid should I look into going down with my Jensen or I should take that route okay well my answer to that would be that's you know that's it's a very personal spiritual thing to go and swear a blood oath to an organization so I wouldn't do it for a reason as what you're bringing out because yes it's true that free masons when given the right sign and symbol will protect you in wartime and perhaps even Masonic Brothers will not have to go to certain areas of the war that's I have found Masons have told me this and they thought it was a great thing of course me I will get by the whole concept so what I would say is that all of the information necessary to pretend to be a freemason or what they call a Cowen is out there on the internet and you could easily craft a character that would then you could use their same signs and symbols to get yourself out of trouble as I have a Masonic sticker on the back of my car so that I don't get pulled over or if I do they leave me alone I might have to say something like well I'm on the level or everything squared away or how are you doing today brother but I get away interesting so Freeman I have to ask though and I think it's pretty clear that you're not but are you a freemason no no I am NOT I've never been a member of an esoteric order I've never gone in and done any particular ritual whatsoever I have yet to practice ceremonial magic so I'm almost like one that's speaking about psychedelics without ever having taken them oh geez and Mark passio us well would never join or are a freemason I am NOT a large freemason no and I don't encourage the listener to do that for the reasons that he suggested either all the information that you would want to know about what the true tradition of Freemasonry is is available in book form it is available in podcast form you can go and listen to my podcasts on the topic now and any other thing you would want to ask me to the best of my knowledge I would speak about with you and give you whatever information I have on the topic but you could educate yourself about this and again you need to understand that what this tradition is ultimately about in its pure form is all about things that go on within the self it is only teaching about things that are that are about you and your psyche your brain your heart and the union of those those two things are and you don't really need you don't really need to go into a large system to learn any of that okay very cool Ernie thank you so much for the call let's move right along here eight six six a four one one zero six five we'll take a few more calls here before the end of the show and then we'll wrap things up with Freeman fly mark passio chrissteele and me Bob Tuscan and folk Shepherd and Bellus is busy on assignment now let's get the Kevin from Minnesota on the line Kevin frequent caller how you doing tonight hello am i there yes you are sir go right ahead sorry about that I was just faking to drink the moment I picked up I caught you off guard huh yes exactly um incredible show I really wish I was able to attend the conference last week it's not as like it was rather interesting to say the least as a Native American and being a practicing Native American however I'm not going to show up at your door with my pipe or my TomTom and try to convert you I have gone to ceremonies where my rationale or a scientific or standard upbringing cannot wrap my mind around I've seen things I just do not make sense and I would consider it magic I've seen incredible wonderful things that have occurred from ceremonies Cheryl with saying that the Anishinabe people we have a mad a lodge or the medallion Lodge which is more or less a priest class and with that priest class they also have levels or tiers and as you go in through the the lodge and as you grow in degrees as you could say you are given more information now information is wonderful and fantastic for everybody to have but as it is told you us from spider-man's uncle with great power comes great responsibility right right but Kevin I do believe though on a certain level and I appreciate the call that information should be open source and and the conference will definitely be open source since you weren't able to make it you'll be able to see all of that online Freeman or Mark Paso or Chris care to chime in on that I wanted to say that when it comes to ritual and the ideas of mystery once you've taken all the mystery out of everything and you don't have anything hidden anymore then the impact is lost and so there is a reason for secrecy and this is something that me and FRA Durex talked about heavily on our first show together the the purpose of secrecy so that there was impact you wouldn't want to know the end of the mystery movie that you were watching in the same way with ritualistic magic the idea of it being unknown to you is part of the ritual if you were not sent sensing a wild outwardness then you would not be receiving the proper purpose and intention of that ritual I'll respond to that from a little bit more of an even down-to-earth perspective arm gradation or degrees are different than hierarchy um in the lodge system there is a hierarchy make no mistake but in in knowledge in knowledge dissemination and in knowledge processing um gradation and and degrees it is not hierarchy and look at it this way could you learn calculus before you learned algebra and could you understand algebra before you understand arithmetic no these are a stepwise process and and there is prerequisites for later knowledge and that is one of the reasons that there is a system of degrees or gradations within certain occult traditions it doesn't mean that there has to be a hierarchy I disagree with the concept of hierarchy and part mentalization stepwise procedural knowledge is important and does not need to be necessarily done away with because again certain knowledge has prerequisites can jump in and say this that Freeman has inspired me over and over and over again with a lot of the things that have said he said a lot of his work etc and I'm just I don't know maybe I need more information on this topic but from what I see we're trying to lump in the other side that's what it is they're they're the enemy we've already pointed them out they're the enemy and we're trying to say oh you know the the majority of them are good and you know some small portion or bad but if that's the case then why don't the small the large majority of good out the small ones that are bad have selling many bad ones I'll respond to this one as well real clear or longer about the mark we're about to exit so a lot to pick that up at the other side of the bridge I promise I'll let you respond and we'll get some more calls in just a little bit don't go anywhere this is the Intel hub radio show yeah buddy get in the having watching that clock guys or mark specifically because he's going to be doing the show you guys already know but probably are lazy because it's not your show that's very true I'm gonna log in right now alright no worries it's all good we all got one segment left here the main screen that's calling Kevin thank you very much for your call brother we'll talk to you soon okay - one five what's your name where he called from please my name is dawn Witkin and I want you to know I identify hello area code to 105 energy or just want to be a fellow yes sir what is your name my name is Tim from Northeast Philly Tim from Philly what's up man how you doing hey I'm great what's up Bob is this the same Tim from Philly that I met that conference Katie yeah that's me man okay I recognize the voice how you doing buddy I'm good and just wanted to ask all about the conference cool man will take your con just a little bit all right okay cool standby thanks so much for calling control all right guys well mark I'll let you bring us back from break here is this our last segment let's see here yeah it is our last segment so keep that in mind on our shoulders you there mark equate it to those C will not help you back in a second oh you know what you're getting into it when I called you up on Chris know I had a feeling you had a feeling really yeah I'm tapped into the truth frequency always oh oh yeah oh boy Chris do tapped into the truth frequency like a true thug yeah I know I mean it's no disrespect to Freeman or anything right now I'm just calling it the way I see it I mean you know even the numbers just it dude what the hell happened people don't like to hear about freemason nah dude they went up up up up up and they tell didn't okay yep I don't know what's up with that numbers your free market story Bob I had to hit the bathroom and I don't know where is dude I will when we get back I want you to bring us back Tim from Phillies on the line Oh great and he wants to talk about the conference we have only one segment left so make it concise so I'll let you bring us back and we'll take we'll finish it off leave leave time for Freeman final thoughts leave time for Chris and Chris make it real quick because we're trying to fit in you know it's ten minutes so absolutely alright and and then we'll I'll let you I'll let you kind of moderate a little bit mark and then I'll end the show sure alright buddy thanks so much here we go you twenty seconds easiest way to see my lips got totally up from the conference mark like so did mine man I don't know why but they're all we're not up and chapped and me too really I stayed hydrated as much as possible I was I was working loads of water me too weird I think what's maybe that cold night we were out all right ladies and gentlemen were back on the Intel Hub radio my website what on earth is happening on mark passio I'm here with Bob Tuscan

Freeman fly and Chrissy Oh Chris posed the question earlier he was saying um that were kind of going in with the other side so to speak and you know where are all the good masons and I wanted to chime in on that briefly and then we have a caller on the line what I wanted to say is that the the the dark occultists have indeed overtaken this tradition that was once something that was attempting to teach something that was pure to humanity and I agree I'm an agreement with Chris at the highest levels that's who's controlling this institution absolutely however that's the Black Lodge okay and they're they're the controllers or the spheres of this institution what we need to become worldwide is the white lodge to combat their efforts of perversion of natural law principles okay into their system of law and authority and mind control and unfortunately it may be sad but unfortunately it is true that Lodge has not been built and that lodge has no meeting places it has no doors it has no walls it isn't something that is inside a building it's something that's inside the human heart that's where that Lodge exists and it doesn't have any hierarchy and it doesn't have any compartmentalization and it has no secrets that white Lodge needs to be built and that's what our work is before us all means who we we ultimately are who need to do this work so who is the Illuminati you are the Illuminati that's absolutely right that's absolutely right and as soon as you're ready to come out and and make yourself known this whole world will shift it's us that's holding it all back they're not holding us down we are and when we can break free from the bounds of all of this and start to live in our sovereign selves start to plant our food across the nation start to live in the homes that we own band on the property that's under our feet that's when we take off back we're not going to get this by fighting the New World Order there's no way in hell you're ever going to win that fight I'm sorry the only way is non-compliant step away realize you are the Illuminati and if you want to get deeper into this read some Robert Anton Wilson get up the Illuminati a trilogy and find out just who the Illuminati are trigger and figure out where Freeman came from that's also right Robert Anton Wilson of course I quote it out and during my talk which you can find at the Intel hub calm and below the chat at the until hub radio great floppy eyes we have a caller on the line sugar - what else okay bring them on hey is this Tim from Philly hey what's up guys come here how are you gentlemen Tim one of the organizers of the free your mind conference right here everyone who attended that conference and and saw what we did have have this man to thank very much so he why he helped out and came through thank so much Tim hey cool I appreciate I have being able to be a part of this great conference you know and it was just a great feeling to add be surrounded by such enlightened people and to actually be a part of that myself you know I'm just just another thank you guys enough you know I hear you I hear you so what what was your what was your review of the conference Tim every everybody was great you know I'm a can't wait can't wait till the next one and I don't want to put anybody on the spot but I'm sure there's a lot of people who love for another one so and here I'd love to help out at another one I think a lot of people would be that well Tim I won't go on the record with with promising anyone anything but you know we'll see is what I'll have to leave that at and uh if if that would happen in the future I'm not saying it's going to but if it would we would love to have you part of the organizational staff because you really did a great job and we were very responsible and I thank you for that full oh yeah you're welcome um so basically I was doing a lot of camera work taking pictures and things and I don't know if you guys spoke on the orbit issue yet at the conference but I was just a curious at what you guys thought of a other pictures I have taken I know I should Bob and and you mark and I was talking to Freeman about it so I just wondering whatever you guys thought if you use address that yet well well thanks so much for calling Tim and thanks again for all your hard work with the conference yeah there was some talk about the orbs and I guess there is a little bit of a debate the skeptics say it's us but freemen mark you guys want to pick it up real quick well it really does seem that these orbs appear when there is heightened mental activity I managed to take photos after each of my talks and always there's just a huge collection of orbs I did get some orbs from the Masonic Lodge as well that showed up in the turkey room which most of us felt was the creepiest room in the place even though is the dining hall I do believe as they started to mention the different reasons orbs come in that I had been a part of each one of those even having an Aboriginal King play the didgeridoo at Maya my conference in Australia which was one of the things that Alfred Weber who is really the specialist on orbs brought up that the didgeridoo would call these things in and I absolutely have a picture on Freeman tv.com of that Australian Shah by the way the de jure to the sound of it they say releases DMT naturally in the brain and I talked about how appropriate was it that with Alfred Webre being one of the foremost experts on orbs that there was plenty of orbs seen in the photos that Tim got and many others that took photos cool stuff I'm interested I keep an open mind on generally when we initially entered the room the main hall the the the main speaking hall that that ballroom upstairs on Friday to set up when we came in in that room was completely empty before we began setup Tim just started taking a couple of pictures and it seemed as if he got all of these clusters and different shapes and colors of these these orbs you know that's what the phenomenon is basically known as in these digital photos he point he would pointed in different directions not get them in point in other directions and that he would show up again and I just got the sense that you know it these these things do show up when there is heightened consciousness in close proximity it seems like they gravitate toward that and I'm an agreement with Freeman that that seems to be when you see these things a lot of he report them they're crop circle phenomenon you know and I just got the sense that this may have been some form of a nod from some higher plane you know it was just uh maybe being saying hey we're watching what's being done here and I think it was something that was a projecting positive energy it didn't feel negative tearing at all and like when we saw this if they are wonderful and mark the orbs aside and you know definitely fascinating stuff and Tim thanks again and we'll talk about that maybe on a future show but the orbs aside the energy at the conference that I felt the talking amongst the the people there the questions the networking was just an amazing experience and I know you don't want to go on the record as to whether or not there's going to be a free mind conference at number two but you're going to have to because there's going to be people come in with pitchforks and knots at your door anyway so we're just about out of time Freeman final thoughts here and then I'll let mark with final thoughts and Chris if you want to chime in with a quick thought or two that's great here we go Freeman all right all conspiracies the truth of the matter is is that we are in a pickle and the solution for us is to find our own sovereignty and it the best way for us to do that is to start to dig in start to practice the permaculture start to get the food growing around the nation tear up the lawns don't worry about it do what you need to do forget about the authoritarian figures and just live and that will shift everything and that's where we're at right now and we've got to stand strong well said mark I couldn't agree more understand that you own you you are sovereign nobody grants that sovereignty to you nobody grant you your freedom it doesn't come from government it doesn't come from the Constitution it comes from no other authority then the fact that you were born into the universe as a sovereign being here on this self-existing that's powerful and of course government mind control mark and then we avoid that at all cost Chris 10 seconds here and nowhere is it alone Chris yeah that's right and Chris is our resident skeptic Chris ten-second finish it off well I agree with 80% of what Mark and Freeman are saying but the percent I don't agree with all right well I already stated my views on that all right we'll have to pick up the other 20% on the future truth frequency and this is the Intel have radio show awesome show guys I got to thank you all for being here today thanks so much thank you mom thanks for everything yeah thanks guys it was great all right folks we'll do it again tomorrow night this is the Intel hub radio show and Oracle broadcasting comm stay tuned Lee Rogers coming up next

What On Earth Is Happening Show #056

Topics: *Crop Circles, Consciousness*

freedom man that's what it's all about freedom man that's what it's all about [Music] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc Pascal [Music] welcome ladies and gentlemen welcome one and all you are listening - what on earth is happening I'm your host mark passio my website is what on earth is happening calm this radio show is live every Tuesday evening from 8 to 10 p.m. Eastern Time and we have a great show lined up for you here tonight we are taking a break from our regularly scheduled teaching classes I guess you could say that's pretty much what I've been doing here on the show for many many weeks teaching different occult traditions going through different methodologies of mind control helping people to understand what the occult is and what it is not and basically we have been over the last many weeks looking into had been looking into the tradition of Freemasonry but we are going to be taking a break from that over uh for this evening at least because I have a very special guest that I'm going to be bringing on the show with me in a little bit it is Suzanne Taylor Suzanne Taylor is a researcher of the crop circle phenomenon and a filmmaker and she was a recent speaker at the free your mind conference right here in Philadelphia a couple of not even a couple of weeks ago to let the weekend before last as a matter of fact so Suzanne Taylor coming up on the show in a few moments it should be quite interesting before we get to Suzanne I want to read an event announcement and then I'm going to give the call in numbers we will not be joining Oracle broadcasting in the second hour tonight as we usually do I'll be doing that again next week trying to get something lined up whereby you know I don't want to make any promises to this it's in the works but we're trying to get something lined up where maybe I get a full two hours on Oracle again that's not official so don't hold me to that but we're in some some talks so hopefully I'll be able to make an official announcement on that soon but for tonight uh all two hours will be right here on talk-show and on what on earth is happening calm and they will be these two hours of interview with Suzanne Taylor will be not interrupted with commercials so that should be a good thing and we'll hopefully be able to take some calls from the listening audience so I have one event announcement bed stock 2 is coming up on April 23rd this is the official and the Fed rally for the city of Philadelphia it is happening this coming Saturday April 23rd at noon 12 o'clock p.m. to 3:00 p.m. is the official times although it will go later than that the location is the Federal Reserve Bank of Philadelphia at 100 North 6th Street that's the corner of 6th and Arch in Philadelphia PA this is going to be the again the official end the Fed rally for the city of Philadelphia and the event details join us as we march from the Federal Reserve Bank of Philadelphia and take part in a massive street outreach thousands of fliers will be provided to help educate the public as to what the Federal Reserve is and why it is a horrible thing for this country uh then Jordan page the musician the Liberty oriented musician Jordan page will actually be on a huge parade float and we'll be following Jordan page as he plays freedom inspired music down up and down Market Street in Philadelphia there will be also performances by live musicians at Buffalo billiards a local pub after the the event March so there will also be speakers at the Fed building ok speakers who are confirmed are Ernie Hancock Adam khopesh Larkin Rose another speaker who just spoke at the free your mind conference a couple of weeks back scott davis and darren wolf so five confirmed speakers the schedule of events at twelve o'clock there will be a meet and greet at the Philly Fed Bank and a sigh there will be sign waving there so bring whatever signs you want to to educate people about the Fed and make your voice heard at 12:30 speakers at the Fed building itself at 1:30 turn your bank back on the Federal Reserve a march behind Jordan page on a parade float handing out thousands of Flyers of provided flyers to the public 3 o'clock p.m. the parade route finishes at Buffalo billiards and the entire second floor will be rented out for the event there will be live acoustic performances uh and a $10 donation is is requested so at 6 o'clock p.m. you if the event officially ends but as always everyone is free to hang out stay afterward and have continued discussion so the Fed fed stock to the official end the Fed rally for the city of Philadelphia here in Philadelphia PA Saturday April 23rd starting at noon at the Federal Reserve Bank of Philadelphia 6th and arch streets for more information about this great activist event go to the coordinators website at www.engvid.com ph IL ly and the Fed comm the call-in numbers that's the end of the event announcements for tonight the call-in number I should say because there will only be one for throughout the two hours is seven two four four four four seven four four four once again the call-in number seven twenty four triple four seven triple four when you call in you have to put in the call ID number which is eight three five one five the call ID number eight three five one five so that is the call in number and hopefully we'll get lots of calls for Suzanne who I'm about to bring on and hopefully people will call in later with some questions or comments for so tonight is April 19th 2011 our guest Suzanne Taylor has been involved with films since she graduated Phi Beta Kappa and summa laude from NYU having been an actor and actress she crossed over to the other side of the camera as the executive producer of the feature documentary crop circles quest for truth her new film what on earth inside the crop circle mystery won the award for Best Featured documentary at the UFO Congress Film Festival where crop circles quest for truth got the audience award in 2003 what on earth got an award for excellence in paranormal filmmaking from the 2010 paranormal symposium and film festival Suzanne is a crop circle authority in the History Channel series ancient aliens as the founder of mighty companions a nonprofit dedicated to consciousness exploration her Los Angeles home is a gathering place for forward-thinking activists a fine arts post-impressionist painter Suzanne had a one-woman show she is an accomplished chef an author of the anybody can make it everyone will love it cookbook she writes a blog called making sense of these times at the website the conversation org were posts about progressive ideas include considerations of how consciousness might evolve and how inch and how instrumental the crop circle phenomenon could be in that regard Suzanne's web sites are the conversation org and crop circle movie.com so I'm going to make a connection to her right now and we'll bring Suzanne on on the line here on what on earth is happening here we go you high/low Suzanne well here do it happen welcome to what on earth is happening it looks like that happening they forces are conspiring looks like the connection dropped just as the show began to your line we had Suzanne on the line beforehand but I read I just finished reading your your bio here and we are successful in data connection so welcome to the show well I think that when you are not going to the Federal Reserve so you know I I don't know exactly who you were chatting about before so we have to start from scratch well I always do an event announcement event announcements the to start the show to let people know about what events are happening right here in the local area in Philadelphia because activism is just a gigantic part of basically the wake-up call to people and that is one of the most important things is not just to know as I talked about all the time on the show but to actively get involved and becoming a change agent and that involves actually taking action in the world so I always know of course that you have an audience that is absolutely rabid in support of what you're up to I could not believe at the conference that we just didn't Philadelphia your conference yes it is probably the most enthusiastic audience I have supportive audience I ever have been in it was unbelievable we had a group of very high consciousness individuals in that room the energy was very very high and we were very glad to have you as a part of it well it was intense really I give kudos to you for you know being able to stir people to that degree so you certainly have been successful at doing that thanks so much Suzanne so Suzanne let's uh let's get started to talk about you a little bit and what you do welcome to common sense care you know absolutely why don't you tell us a little bit about yourself and tell us how you got started researching the phenomenon of crop circles well I was always interested in consciousness and interested just as you are in creating a world that operates along what are enlightened principles this is insane the way we run this world I mean I can't believe we're making war and he what's the matter with us we're so technically capable and and and our consciousness is so relatively low I mean it's really obvious everybody now that we're in a dangerous position I mean we can wipe out humanity and yet it doesn't stop us we just keep on going down this ridiculous path so it wasn't quite as threatening and challenging years ago although I guess we've always had I remember her of course the whole war with a whole other long state of feeling the imminent arrival of nuclear weapons in our backyard Duck and Cover and all that sort of thing so maybe it's just different phases of being on alert for what can get us but you know the better we get at technology the more dangerous we become to one another and the more important it is that we change the way we think so that we really aren't so dangerous that we are cooperative and that we're being creative together instead of being destruct literally destructive so I it's been years that I've had that understanding and that point of view and way before in fact I even knew about crop circles I mean I've been around a long time and years ago I started producing events and projects that had to do with changing the way we thought opening our mind seeing ourselves as part of the bigger reality in this universe where such an awesome universe and you know we're not in awe we're in anger you know and as I was doing all sorts of things I mean the kinds of things I was doing I had a salon in my house if you were in

Los Angeles and you were lucky you were on my guest list because some of the most interesting people in the world actually I mean la gets a cross-section or you know people come through LA who are doing talks or selling books or whatever it is they have reason to be in my big city and they I would snare the most anxious people from my living room who are interested in progressive things whether they were political or spiritual or self-development what-have-you great variety of very interesting people and I like doing that not only because I'm just a born sharer I mean it's my nature to want everybody to be in my club so to speak I mean the four fu men you were in my club I really very happy person but I also got a Chancellor and of course to mingle myself with very interesting people and so I count among my friends now many of the speakers who were doing their thing in my living room and in fact another way that I've connected myself up with interesting people is people should make note of whatever my blog which is the conversation org and I love my blog I mean if I would if I were not involved in the movie situation and just had to spend my time doing what fascinates me one of the main things I'd be doing would be more blogging I'm not an everyday blogger but when I find something really interesting that's not in everybody's email things that actually are hardly anybody's email I post them on my blog and I write about them I say this is why it's interesting this is why I pay attention I'll extract little sentences or paragraphs to tease people into reading you know in more depth and those people who are wrote it then then I communicate with people who have written those things and I get to be connected to them and a lot of them are on the mailing list and then they make comments on the pieces and so we grow this web of really fascinating people who are thinking progressively who are thinking bigger thoughts then the way we've got the world running right now and you know you know that Margaret Mead quote never doubt that a small group of thoughtful progress know not thoughtful committed people can change the world indeed it's the only thing that ever has and I kind of operate on that principle that if we can collectively even a relatively small number of us put our very very good minds and hearts together that we can be a powerful force so it's been many years that I've been looking to create what essentially could be a powerful force well along the line of doing this before the crop circles were known to anybody or many people they landed in my life it was right at the beginning of the phenomenon in the 70s well no I should say that the beginning of the contemporary interest in the phenomenon actually was the late 70s and I didn't tune in until the 80s but just accidentally as somebody showed me pictures a friend of mine have a son stationed in the military in England and he would go out on his leave and he would take pictures of what they were calling landing pads for UFOs and I thought about them but they were cop circles and I thought landing pads for you as well hmm it's not for real it will change the world they will not just change us one person at a time where we tune in to some methodology or some idea or some self development technique or whatever it will catch the imagination of everybody in the entire world and make them think again about the nature of humanity I mean if we're the only intelligence in the universe we have science fiction that tells us otherwise but we don't have any you know science fact about it but if in fact that turned out to be the accepted reality my imagination just went there and I thought wow that would not leave everyone's mind everybody now would have a new you know body of information we are not alone and it's not ancient history that something helped us with the term is it's it's interacting with us it's alive it's real it's watching us it knows us it's sending back signals and information that's reflecting us back to ourselves wow I want an engagement so with that possibility in mind I took an interest in the circles and I started producing programs about them now how much you want me to run on before you know that's that's that's fantastic I'd like to say that I began becoming very interested in the crop circle phenomenon in the early 1990s it wasn't until about 1997 that I had an opportunity to visit the first crop circle formation that I ever got a chance to actually get into and this was about about 50 to 60 miles away from Philadelphia in a small town outside of Princeton called Lawrenceville New Jersey I visited one there in 1997 and just an interesting note on the website underneath the player for this show you could see a related document which is a laboratory analysis of the formation that I visited in 1997 it was done by the Burke Levengood and Talbot research team and they credited me on one of the photos because I took some field photos and presented them to them and they did a lab analysis of both crop samples from the late parts of the formation as well as control samples and the results are there in that in that lab report also up on the site in the related section underneath Suzanne's bio is a pack of related images I got a chance to go out to England with my girlfriend barb back in 2004 and we were hosted by the researcher Chet snow and his wife Calista snow and we took lots of photos of many many more than what I posted here but I picked out a few good ones for people to check out and I just like to mention that those links are up there right on the radio listen page at what on earth is happening but the phenomenon are interested me because for similar reasons as you just stated that this could be the proof that we are not alone that there are other consciousnesses in the universe not only in the universe but interacting with us right here and it just really is one of the major end points for me in consciousness phenom in general and it really started to take me out of the old world view that I had been dwelling in for so long and put me into a different more holistically inspired world view of the crop circle phenomenon I cannot tell the listeners to the show this is the first time we're really bringing this up on this show by the way and I can't tell the listeners how much this phenomenon has affected and impacted my life in particular it is again one of the things I think that I would attribute more than anything else perhaps to changing my level of consciousness to base basically igniting that spark you know to leave me into other things that acted as a form of synchronicity so Suzanne what I'd like to ask is for listeners that may be new to this whole area of research and don't really know too much about the crop circle phenomenon could you just go on a little bit and tell them a little bit about what the crop circles are and what are some of the characteristics that are hallmarks of what you would consider the genuine phenomenon okay big question you know you may have me run on for a long answer go right ahead you have explore okay well let me go back to one of the things you were saying you're saying that you went with jets Noel chatters in my movie saying he has a wonderful way of kind of encapsulating essence and value and what have you so he says some of the smartest things in my movie and his wife Calista who never wants to be interviewed you can never get Calista an interview but I have been in this work for so long that when I went to put the pictures in the credits and I loved my credits people tend to fade out my credits when I do talks or show the movie I say no no keeps the credits we got a little harvest behind them and we got wonderful music and I show the pictures of all the people who were in the film and give them you know their name identification and I had a picture from I think 10 years earlier it was such a gorgeous not just a pictures little footage that I had taken even before I had any idea that I was going to make a movie about crop circles and it was chat with Calista just smiling away and I said oh I'm going to stick that in the credits and get Calista in my move you also so so you know your your your coast which is indeed one of the better people to go with and another thing I want to say is I just love listening to you say that that's exactly the reaction that you know is the wonderful reaction that I hope my movie will produce in people where this is still a somewhat unknown phenomenon and I never from having this movie that a lot of people end up seeing it be particularly because they are shown it by people who do know about the phenomenon and they they have this wonderful reaction of eyes open them changing their point of view or being tweaked you know to be curious about things beyond you know they're there of cards understanding and that's just why I made the movie you know I didn't make the movie just to please the people who already understand this sort of thing so you know your reaction is just the one that I hope to elicit from the people who see this movie and let me say because you know people come and go on listening that it's at the quad cinema the reason I'm in New York now which I am and I was in Philadelphia prior to that my East Coast trip was first of all your conference but then to come into Manhattan because it's going to be at the quad cinema starting this Friday its April 22nd and then it runs there through the whole week to the following Thursday April 28th and the quad cinema calm will give people the details about when the screenings on what have you and we have albeit Q&A s every evening for the two evening shows with some wonderful panelists so I just want to let your listeners know because I know that you know when you do a long show people come and go so if we could say that a few times over the course of the show I'd appreciate it no problem the crop and you've got on your website where they can go and take a look at the trailer and in fact gif DVD which is crop circle movie.com so so much for that and back to your question about you know or your invitation to talk about what what are they think there are people who listen to say wet wet craft circles or who you and get you count encounter in the world and I do crop circles on I make water what is that you're talking about well it used to be that you get that much more than you get it now for the last ten years or so we've had something that I can say back to people that reminds them or informs them of what they already know which is that they are familiar with this phenomenon at least vaguely familiar with it when somebody says to me what are crop circles think the first thing I said back is did you see signs you know it's the fifth largest grossing movie in 19 of a 2002 and a lot of times you could say yeah oh those things those are crossers or but yeah they are I mean they times didn't say one real thing about them but they showed pictures of some of the real ones not the ones they made themselves where the aliens were floating around in them but they did show pictures of the real ones and so after a little bit of a benchmark so that I can know for your listeners too if you don't know what crops are over our did you see signs okay so back to what are they well of course they are impressions in not just crops you get these patterns that are flattened out in vegetation but basing lis enough they have been in virtually everything that grows they've been in strawberries they didn't string beans they've been in rice paddies they've been in grass they've been in Heather you name a vegetation and we've had some at least cob circles but in fact the main canvas and we can think of them as canvases because they are like artworks their artworks land are the main canvases are indeed grain crops and in England where the phenomenon is most focused you might say it's been in 40 other countries and it shows up in Smathers and in fact people don't really know that we've had a several hundred of them over the years in the United States going way back back into like the 40s when there's some documentation and indeed that you talked about one in Pennsylvania I'm sure a lot of your listeners oh no no that's all in England no it's not we do get our slaughter but the concentration where people come every summer from all over the world actually who are the research community we call ourselves because I'm part of that we call ourselves crappies and we're the ones who take pictures write the books through the lectures do the talks of radio shows make the movies so we are in fact we concentrate every summer on going to England we engage with each other we have conferences over there and tourists come to England because that's where you can count on the fact that they're going to show up in the rest of the world you know there's so spotty and you know there's no concentration you couldn't go somewhere and know that you're going to get a crop circle but during the summer months the growing season late spring to early or late summer actually you absolutely know if you go to England you will be able in this little area just a couple of counties now they fan out from there there were others around in other fringy counties outside these two but if you are you know paying attention in these two particular counties or provinces or whatever there are in England yes indeed you will be able to visit crop circles but that's where the most of them land and it was in the late 70s that we have a phenomenon that has grown that has been paid consistent attention to although in fact they do go back hundreds of years in crop circle or the official you might say yeah that's not quite the right word but whenever you get into learning or studying or investigating crop circles the first thing that you absolutely know is a crop circle there is no doubt about it is from 1678 it's a little woodcut that appeared in the literature of the day which was some kind of pamphlet with old written in Old English but you know it's just unmistakable it's a crop circle if you no doubt about it and it's a little story about a farmer and you didn't want to pay the mower and the more said let the devil do it and in the morning this little picture of a devil inside this crop circle so there it is and then every hundred years or so that the little flurries and whatever the literature of the day happens being you know we've got that all in our records if you buy a good crop circle book you read about all this we do a little recreation in the movie the movies called one on earth by the way with a question mark at the end of it and our tagline is inside the crop circle mystery and I named it that because it's me who knows about these things not some observer who like our cable stations go out every few years and make movies that make television programs about them but they're know what they're doing they're know what they're looking at they like the skepticism they like the idea of controversy they focus on hoaxers we all get we care our hair out but I really knew what was going on I was inside the that world and I wasn't a filmmaker who found a subject I was a subject that said we've got that film about this that's the way you tell the world about something so it in now where was I was back the 70s was when it went oh I we feel we do a recreation in the movie of a story from nature magazine in the late 1800s where a scientist reports that he went into a field it was full of circles and you know we read your little story and we illustrated in little sepia tones you know you're making movies and but this is the time when for whatever reason when the circles were stumbled across more people came along more people got interested things started to be written and the phenomena never went away and now it's and it got more and more complicated actually the formations got more and more complicated but now we have a full-blown phenomenon it's been going on since the late 70s and it's great tourist attraction in England and we get these last few years maybe a hundred and ten worldwide maybe half of them in England but then again the hoaxers have become better at it it has always been actually in the very beginning when I the very beginning for me which was the late 80s I found those pictures that said they were landing pads for UFOs and I started hosting crop circle researchers in my little salon underground living room situation and then the phenomenon was so popular that I couldn't fit all the people in my living room I had a power hall's beer halls in the city Los Angeles but then we had our the infamous Duggan gave in 1991 when these two farmers came out and said we made them all oh dear and the press release that said that went all over the world and all of a sudden something that had been of great interest all over the world and it was as a treatment itself amazing all of a sudden interest dropped all it got explained those two guys made them all well we talked about that in the movie first of all why do people believe such a ridiculous story well because it's very challenging to think that there really is visitation going on and it's easier to park it with oh yeah we don't have to think about that anymore people talk about that in my movie consciousness changing the world no no no those guys made them all we are and and the media bought it and the interest just raised and it's been uphill ever since to get real attention paid to them and and yet and and the hoaxsters have gotten better at it since then they did indeed Doug and Dave made some of them and they've been succeeded by copycat copycat in the way of being hoaxing grocers and over the years it used to be that you would seek terrible geometry and you'd know if that's a hoax formation well they've gotten good geometers now you can tell now and there are certain telltale signs like you talked about that philadelphia formation where the material went into the lab we're at the v-- lab VLT research calm easy to remember bacon lettuce tomato research calm and it's fascinating to get on their site and read the reports several of which have after really careful you alluded you know to the factory their control plants and there's down crop inside a crop circle whether there goes a carefully sample which real scientific protocol so that they're you know in the world of science but we pay attention to as being our official reality science has affirmed that there are changes for the plants and the soil that cannot be accounted for there is something going on beyond earthly knowledge and those papers have been in peer-reviewed science journals and the United States in fact although we did we get very few of them there is a rabid community of researchers here of enthusiasts here they'll get on airplanes and go wherever there's a crop circle they do concentrate towards the Canadian border and the sort of the official home of the US researchers in Ohio where they have a little conference every year but those most people will diligently go out and sample the material and bring it into the laboratory and the results from these American ones have been very positive some of those papers are based on the American ones we're getting the real thing here although they don't tend to be as quite as complicated but there are some pretty sophisticated designs in fact we do a montage in my film it was all shot in England but we do one montage what we call international crop circles and you know when you're shooting a movie in England and it's international the US has prepped is part of international and we show you three really lovely formations that have been in the United States so these so now back to getting oh maybe 110 120 worldwide half of which pretty much are in England you don't know how many are hoaxes so you don't know how many you know real deal you're dealing with act and we're getting less than we used to get we talk about that in the movie at the the greatest number I think were 300 in one season and the greatest number in one evening believe it or not in England was 35 we mentioned that also in the movie so can you imagine 35 incredibly complex beautiful formations and feels all over England you know you think that would get were the world's attention to whack hoaxers one evening one good evening one evening I mean you know these are the geometry is so complicated now how do the surveyors tell you it would take them days just to lay out now somehow the hoaxers have figured out some way to do that because the english nights are very short the darkness at night is very short they're closer to the equator Raunak equator the north pole and we are and the summer time stays light very lately gets light very early so I don't know how they're doing I know how they're managing to do it at all but it's not an easy thing I mean it's a very complicated and in fact a lot of the formations now in England are coming in in more than one evening they can't finish it in one evening so in recent years there are a fair number that come in in two and even three evenings and you know those are hoaxes you know the real formation from the eyewitness accounts and we do have them we have I don't know maybe 40 by now eyewitness accounts were people going way back going back into the 1940s where they collected all the stories of people who happen to be on the scene when a crop circle was forming and they all say the same thing they say they say they go down in six or seven seconds we do a little facsimile in our movie and in fact it's in the trailer which you see on crop circle movie calm of the little swishing you know pop going down and one swish and no matter how big it is no matter how big we should show you one little circle but no matter how big the formation is all the eyewitnesses say they shush down in six or seven seconds so okay well now where am i you got to keep getting me back on track or maybe I should stop for a little bit and breathe what can you say that bit sure what I was going to ask is what do you think is the motivating factor for anyone attempting to hoax these formations and had what can be considered noise to a possible signal of contact in some form or another by some form of intelligence not saying that it's you know extraterrestrial by biological life-forms per se but clearly there is some form of an intelligence behind this phenomenon in general I often wonder why instead of researching the genuine phenomenon as it is coming to us why anyone would go out and attempt to add noise to that signal can you think of any possible motives that would be present for people to go and do that Marc you speak so articulately you really ask wonderful questions and make wonderful comments you really are speaking the intelligence of the whole situation and noise indeed well it's a good question now isn't it and it is a puzzling question people ask me if I have another movie I'm going to make well I'm so busy dealing with this one that I don't have another one on the drawing board but if I were going to make another one I would make it about what are those hoaxes up to and what do they do why do they do it how much do they do I've actually tried to hire investigative reporters because one really good investigative reporter would get to the bottom of it you know we're just ordinary folk who are paying attention to these circles ordinary folk in the sense of not being you know the kind of people who would know how to do the sort of investigative reporting we need to do we're not ordinary folk at all actually I mean you've got very intelligent mathematicians and geometers and historians and what-have-you but nobody is in the press and nobody would know how to you know get the secrets out and you know nobody's the media that way that you know they set up these little stings and things like that so so I would make a movie just trying to find out what in the world is going on we do talk some in my movie about Doug and Dave those original hoaxers and how the evidence really points to them being put up to it by the government and governments don't like to deal with paradigm change they don't they don't like it where the rug gets pulled out from under the prevailing reality they are status quo just see a lot of it and it's not it's not like there's something evil about that that's just the way reality works you know people in power are sitting in power and they're not looking to get up ended and it's not evil on their part it's just sort of human nature and so it there it is inexplicable why these folks would do it why do they go out year after year night after night and it's unpleasant actually is it you got a lot of bad weather in England a lot of these things are done in the rain and then the cold and they get no credit I mean that's just against human nature to make gorgeous art and have it be anonymous I mean do you know any wonderful artist who is delivering their art to the universe to the world and not claiming credit I mean it's not human nature and it's unnatural so why in the world are these people doing it it's one of the big questions you know another one question is why is it why are they acquire thee and it's not extraterrestrials you're smart about saying that we don't know where it's coming from could be from another dimension could be from the future coming back we're all kinds of ideas we naturally think ETS UFOs but there never has been a craft sighted that's just the natural way we think but you know the big questions of why is it being delivered to us by the mystery force and what in the world of these hoaxers you know what's what's motivating them it might take is there has to be some form of payoff involved for them not to take credit for their own constructions because yet people would naturally want to do that you don't again see too many artists that just want to put their art out and not have any form of name or credit attached to it and yet that seems to be the case that to me involves some form of a psychological operation being conducted against the public to try to draw their attention away from the genuine phenomenon where you think so you know we don't have a history where we know anything about specifically other than that I sense or not sense but evidence that the British government had something to do with Doug and Dave but aside from that we do have some evidence in the UFO field of where the government has in fact interjected itself to distract attention and you know although I'm not a UFO person and I got into the crop circles really knowing very little about UFOs fortunately the UFO people like the size of the circles it gave me a wonderful award from the biggest UFO organization they gave me their main award of best feature documentary I have the cutest thing I didn't bring it to Philadelphia because I carried around in LA that's too heavy it looks like an Oscar but it's an alien he's really cute he's like a big tall skinny great but the back to the UFO people have you know that the Robertson panel don't you know know you a UFO person I have studied it but I'm not too familiar with that yeah okay so let me tell your listeners in 19 I was 1952 the world is quite peaceful we've been through Wars it was Ozzie and Harriet time and there was a lot of activity of sightings of UFOs huge it was very very prevalent a lot of buzz a lot of noise and curiosity what in the world is it well there was so much clamor that the government convened a panel now that was there was classified information for a long time and now they actually have a wikipedia page you can look it up the Robertson panel and you see the the you know what the goings on of this panel that was convened to determine what the government response was going to be to all of this public curiosity and all of these so-called in all these sightings that were being reported so you listening to read actually what the conclusion was was that they didn't know now that doesn't mean there's not some black ops operation we know the government you know you know that that's what you talk about a lot all these kind of you know whatever you know the names of them better than I do of the things that even the president doesn't know what have you but this was pal by you know the normal course of Congress and they convened a panel and these people didn't know what it was and but but they were worried about that and they thought well if we tell the public we don't know what it is you can be scared you know we're the protectors and that's not good so what are we going to do we don't know what it is if we take if we say that the public will be scared what should we say and the conclusion of this panel was that the course of action that they would employ was to ridicule it wherever came up talk shows newspapers report sightings where the opportunity or the challenge came up of this presumable something going on they would make fun of it and they have never rescinded that policy so I think that is a little clue that we do have a government involvement in whatever it might take to extract attention from whatever might turn us inside out this way and I would presume that these hoaxers are somehow being supported because it does not move me to government well who else would it be I we we just cannot account for all their activity it does not make sense but you know I am just burning with curiosity to actually get to the bottom of it I almost had the hoaxers taking me out with them so I could see how they do it at least and they were very friendly and cordial I think they wanted to know what I was up to what kind of movie was I making and I had a long meeting with someone that was actually very good artist she showed me our portfolio I was really impressed I was sorry to see that I was so impressed because he was one of the main the known body of hope said there's a known body of hoaxers there they used to be called oh gosh I have it they were called team Satan Satan that's right- name they've changed your name now they call themselves circle makers oh thank you very much but it's that should be very interesting to my listening audience right right so team Satan with it so I had a meeting with with one of them and you know hey I want to know what's going on what are you doing why are you doing it and they promised they would take me this guy promised he would take me out and you know it's a hella support role kind of exchange of information and the next thing I know all over the internet I am being slammed and damned and made fun of and whatever by this guy oh and of course they did not take me out and I never got any further with finding out what was going on so we need some real filtration we need investigative reporting by people who fool more trick them we'll do whatever they do their whole MO just smacks of psychological operations to me I mean that's my take on it but I want to shift gears just a little bit and try to go into a little bit of the more SS esoteric side of the phenomenon and ask you what do you make of the connection and many other researchers have made between the crop circle phenomenon and sacred geometry and what do you think that this possible connection between the crop circles and sacred geometry makes may signify well connection isn't quite the right word is that they are employing sacred geometry to make these designs that is the patterning of the designs not all of them but a good portion of them probably the preponderance of them because some of them are not geometric at all when their geometric their sacred geometry and sacred geometry I'm not a real expert you can ask me too many detailed questions even though I was a math Wiz in high school I got a hundred on everything I took all solid geometry advanced algebra but you know facts you forget that stuff that's a long time since I was in high school but sacred geometry is indeed the geometry that is the design of the universe the whole planetary whatever is sacred geometry if you reduce things to proportion and number our bodies if you reduce the translate the parts of our body the forearm to the upper arm the fingers to this the joints to the vet every single part of our body if you relate one part to the next part and you reduce it or you translate it into geometry you'll find that it's this sacred geometry those are the proportions that are the numbers of sacred geometry plants grow according to the proportions of sacred geometry so the universe is sacred geometry and indeed there are the crop circles beings as in this plenty of geometries it's not sacred geometry but there are the crop circles being designed along the lines of sacred geometry so then what do you make of that well why would that be and then you kind of get into well I think these what are the crop circles doing and I think they're calling us to this elemental state where we will we ourselves were not so divorced from nature where we felt ourselves to be part of nature where we weren't set up to be you know just material beings but we were spiritual beings as well and everything about the circles actually pulls us into this other understanding or reminder or expression of a different reality that would make us much more cooperative and loving and I mean the universe is an awesome place you know I don't think it was made so that we would kill each other that's right so you know the the the circles have other aspects to them aside from their geometric design that does echo that idea that they are a that the things about them is to wake us up to this deeper reality broader reality more beautiful reality for instance they typically land near ancient sites again back to the ancient times when we were of a different mentality and they not only land near them they relate to them like if there's a if there's a direction to us to a circle when I say ancient sites I like famous ones like Stonehenge everybody knows Stonehenge but there are many others in England and I think that's possibly also the reason why they concentrate in England because in this particular area Stonehenge disorder to the southern part of it the the it's a very manipulated landscape that there's been sacred ceremony done there for hundreds of years and there's a lot of things that were created by human beings like Stonehenge many many hundreds of stone circles actually in the British Isles and and the crop circles typically land near one or another of these or their land near an ancient burial mound the tomb you lie or or something complex that's the stone chambers that they have all over England that were used in some way by the ancients and and as I say that they not only land near them they will orient themselves in relation to them so that if there's a direction the mandala like one's the circular ones don't have much direction they're just circular but there are plenty of them to do that points somewhere and they'll point like right at the middle of one of these ancient artifacts ruins or what have you or they'll point at a tangent like Silbury Hill you'll find crop circles silver hills the oldest man-made mound in the world and it's kind of got a pyramid under the earthen part of it all and what are the beetles and they make that one famous over a hill yes Suzanne I'd like to just briefly mention for the listeners who are on the listen page if you click the zip file in which I put many photos from my 2004 trip to to England with barb when we went with Chet and Calista snow if you download that and unpack that zip file there will be many images of some of the structures that Suzanne is talking about in southern England are there images of Stonehenge there are images of Silbury Hill West Kennet Long Barrow and also Avebury those are some of the more famous ones and they're maintained by English heritage there's also you know nothing this ones as they say you can't hardly turn around without falling over some little something other than from ancient times but still very Hill is actually one of the most popular places where all around it you'll find crop you can almost guarantee that if you proc some silver no what you can't park there but if you were there you know and you would get crop circles around there you'll be able to see crop circles during the season and they will they will point right at the centre of it or the point right at the side of it which was tangent it and so you know this whatever this visitation force is is not just swapping things down anywhere they're very carefully placing things in ways that are meaningful and I think it's partly as they're landing near these sacred sites as part of that kind of overall situation in which we're being called back to this time when we were more whole but also showing us that it isn't random this isn't like snowflakes that some mind is out there absolutely picking the places not to mention designing making the designs because sometimes people say oh maybe it's just nature and a force like snowflakes are all different no no no there's it isn't that it's something with mind is designing these things and placing them because they are so carefully related to things or for instance I mean getting out of the sacred aspect of it but into the fact that there's mind delivering them they don't land where they cross fields you're not in industrial farming here with huge swathes of corporate farms you're in little family farms and there are like little canvasses and the crop circles are like the artworks but they land in the middle of the field or inside the parameters of field they don't if they were sort of random they kind of cross fields and you know who knows where they'd land no no something is carefully placing them for some reason and you know then we get into the aspect but I like to think about which is why are they coming in the first place and I think it's to tell us that we're not the only intelligence and and and so they're there the evidence is how carefully they're placed how carefully they're designed how the designs are mirroring back to us many things not only are sacred geometry but also religious symbology we've got a menorah we've got a tree of rice we've got many Celtic symbols things that we recognize oh yeah we know what that is you know it's like oh you know again it's not smells like something is putting together patterns that we recognize we get we get astrological alignments I show one in my movie which is the pattern of the planets in our solar system on that fateful day in 2012 when something important is supposed to happen so again there's some yeah we read you we're going to get back to you this evidence that we we read you and that we are in intelligence engaging you I mean I can just picture them scratching whatever passes for their heads as I say in the movie going we're gonna get it how much do we have to do this smart and it's recognizable before these humans go or something is calling us but nonetheless of course that is what they're doing so now I'm at the end of some other kind of break here where I answer something or right no no no but we're coming up to the top of the second hour so let me just give the call and number again and then we can go right jump right back in for any listeners that want to call and talk with Suzanne Taylor ask there any questions that you may have the call-in number for tonight's show is seven two four four four four seven four four four once again the calling number seven two four triple four seven triple four when you call in back when you call and you'll be prompted for the call ID number four what on earth is happening the call ID number four this show is eight three five one five once again the call ID number eight three five one five we're talking tonight with Suzanne Taylor of the conversation org Suzanne is a crop circle researcher and filmmaker she made the film what on earth inside the crop circle mystery you can learn more about her film at the website crop circle movie.com so Suzanne thanks so much again for being here today and your talk at the for your mind conference was great we screened your film on Saturday night a lot of people loved it and had a great comments about it let's jump right back into to talking about this phenomenon and why we think it is so significant for our listeners out there to look into and do some research about could you for some of the more I guess you could say left brained or scientifically oriented of people who may be listening can you make some comments or talk a little bit about some of the actual scientific research that has been done into this phenomenon for example on the plants themselves some of the changes that are observed in occurring with the plants that are laid down as part of the crop circle patterns versus control samples taken from outside the pattern outside of the patterns in the fields that show no such changes well indeed that does that you know whenever if you last you know what's the definitive evidence that you got a phenomenon here there's not people well the definitive evidence is indeed what's coming from the labs because or the that particular lab is the one that's done most of the research the one you mentioned BLT research calm is where you find the papers and it's very expensive of course to do real scientific studies which you know it's what they're reporting on so would that we could do them on every formation of course that's impossible but then again I mean all you really need to do show that on one for instance that oh hello we can't do this then you know that something else is doing and there's far more than one that they've done their Studies on and what they'll do is just as you described before they'll take control plants from outside the formations and many many samples from all over inside because there's different things that happen in different parts of the formation like as the as you get further from the center of a mandala life formation there are changes the further away you get but some of the typical kinds of things that they will discover you got plants and you got soil there have been Studies on both maybe I'll start with the soil actually which was I don't know I think the most expensive study they ever did and came up with this wonderful particular finding which is that they took you know soil from inside the topsoil inside a formation compared to the soil in the rest of the world you know outside the formation and beyond and what they determined was that there was no such thing on earth on the surface of the earth as the crystalline structure of the soil inside this crop formation and it was as they report comparable to the crystalline structure that you might find way down deep below the surface of the earth where the pressure from the top and the heat from the bottom over millions of years had cooked the soil and that would be a kind of crystalline structure in the surface of this crop circle that you would expect to find way down deep and again on BLT research calm you can read all about this so I love that study it's so simple and so specific you know and so telling and they were I believe more than I think there was more than one lab involved with that you can read about I know every time I read it I go whoa this was a really good study and such a really impressive finding as far as the plants go there's lots of other kinds of changes that they've discovered and I show you actually in one on earth I show you some pictures of the comparisons between regular crop and the crop that has been affected and there are different kinds of changes for instance in the seeds if the energy strikes early in the development of the seeds first of all you'll get empty seed heads the plant will continue to grow there will be no seeds I don't show that because it's those seeds but if the seeds have already started to develop and the energy strikes early in the developmental phase the seeds will be stunted and I do show that they will not really produce much in the way of crop when you plant them but if the energy strikes later in the development of the seeds it energizes the seeds and it's very clear to see I mean you see these really robust seeds from a formation where you know the energy came later it was later in the growing cycle that the crop circle formed and you see these kind of puny things from early on where the seed is obviously damaged it has damaged and the later ones where it's quite robust and if we had somebody who was making successive plantings until something happened finally and I think there was a fire in the field and it wiped out several seasons it was the last you know season that was growing of excessive plantings where the seeds that had been highly energized were planted and then they produce seeds just normal in the course of growing they produce seeds and he planted those and there were several seasons of seeds planted and each each crop got more robust it got names steeper couple from one of the Midwest states and unfortunately we don't have the you know we can't say oh look because because he lost his last clap I'm very sorry to say but that is one of the you know situations with the energy another thing that happens is when they when when deform you know the formations occur in all phases of the growing season for the different crops so you'll get formations in green crop of whatever the crop happens to be and you get formations in crop that's just ready to be harvested dry and brittle and well when the formations occur in green crop that's when the plants bend over in right angles at the nodal points they stretch they have figured out or I don't know if it's definitive but I keep hearing I I think it is defended to me I'm not a scientist so you really forgive me that but they do speak about the fact that it seems to be microwave energy which is available on earth and how they harness it who knows but that it that that is the causal factor that makes the plant spend over my heat which is interesting that plants don't burn up which we summarized find singe on them but you know how do they do that who knows who knows how they harness it I don't know but in green crop the plants will bend over at the nodal points and there are nodes in grain crop every whatever so often every few inches or whatever that's how they grow and so at the nodal points of green crop they will just bend over and right angles and then in fact the next nodal point will Bend up and phototropism will take over the plant will continue to grow in the group in the dry crop when the crop is ready to be harvested there's no gift there's no spring and so when they do bend over but how do they then there's no there's no elasticity anymore they blow holes in the nodes and I show you pictures of that in one on earth you see pictures of blown nodes they're clear holes that you know the plant has bent over but the way it bent was when the energy came through it not being able to have springiness that could stretch the node the No just you know broke and and we call their little round holes and then the energy goes through the hole but creates the possibility for the plant to bend over there by the way have been several instances which I find fascinating and I can't find any pictures of them all I were to put them in the movie but you read about them where the plants were bent now the nodal point where virtually you know all except some of the ones I'm going to tell you about the plants Mentos are down near the ground in fact they're not right smooshed into the ground and this crop circle hasn't been walked on if it's in the backcountry or no that's the only way they're not walked on if they're too far away and people don't know that and some of the farmers discover them with the harvesting but if they haven't been walked on the harvester can get underneath the plants and actually the you know they can pick they can harvest them if they've been trampled they can't do that but in the ones that that know unless you - or tell you that the ones that bend over in the dry crop they can't harvest them anymore when people people walk on them oh I guess they could harvest them and if they're in the dry crop in the backcountry they could harvest them as well so that's another thing that that is the you know the the things that happen to the plants in crop circles there's something else that happens to the actual tissue of the soil cognate soil of the other plants brackets or somesuch now we're into the science that I'm not going to be able to speak too much about but it's the biological aspect of the you know put the plants under the microscope and something happens to the tissue of the genuine ones and of course you know that is a way to tell the real from the fake there's just you don't have any of the bro nodes in the fake ones you just have broken stuff there's no bending there's just you know the the bore the the sambar the hoaxes have come along with what they call stomping boards they put their feet into a board that they're holding the ropes are going up from either into the board to their hand and they're just the three foot long boards and they just put their foot in and they stomp one you know one one section down and then they walk one step further and they stomp the next section down and in fact that's the first thing that when you get into a rough circle is it real is it not real the first thing you do is you get on your knees and you look for the crease marks because the board will leave crease marks it's not bending at the nodes it's spending in some unnatural place we show you that in the movie to where this breakage and and at the point at which it breaks they leave a like it leaves a white crease mark or all across three foot bones so you see these you know one plant after another with little white Christmas oh you're in a hoax formation but those are I think those are the main changes that the laboratory has has come up with and discovered and how what it is they look for in order to ascertain whether you're in something mysterious or something that has been human-made yes only I have to answer your question on the website in the lab analysis from the Lawrenceville formation that I was in there is some evidence there was some evidence in these plants which were out and it was a very dry season in New Jersey in 1997 this was in an organic oat field in the formation the first very first crop formation I was ever in and this laboratory analysis yielded the results that there were changes to the mitochondria mitochondria in crying nuclei of the cells and they showed that there were some mitochondrial damage from whatever energies be crops had been exposed to and this mitochondrial change actually um dissipated the farther away from the formation from the center of the formation that you got and the control samples showed no such changes yes now yes yes yes and also I dropped a point actually I was about to make so those are two things I want to say you right about that that's another of the things that I sort of MIT allude to that the further away you get from the center the different this one very famous study and it's done by a Scandinavian would see Norwegian l.joe Hasselhoff and he has a book the complexity of the crop circle that I actually have pictures in my movie from his book where in fact the further away you got from the center there was a greater difference in the bins or somesuch you know another thing that you you you would never find in a hoax circle where whatever it was it was you know throughout the whole formation but there was a different degree of I think it was bending in some way that it was different the further away you got from the center and the thing I started to say that I when I lost my train of thought was that although typically the plants will bend at the first node that's where the harvester can pick it up if in fact I haven't walked in my people but sometimes there have been some and I swear I said I couldn't get pictures of them I wish I could have but I've never seen any pictures but I've read reports from researchers you know know what they're talking about that they bend at the second node so if you could picture maybe a foot off the ground or maybe even a little higher all of a sudden you have a crop circle it's not down by the ground and you know even though they don't the first notice not exactly on the ground itself but it's a couple inches off but the second node comes up higher and they've had these formations several times where they're bent at the second node and I would have loved to have been in one of those I've never been in one of those but can you imagine you walk into something and you know down at your knees this thing is bent over at the right angle and it's all I mean that's just a lovely it must be amazing the in the series of photos that I've posted to the site for those who may be downloading the zip file on if you look at image number 36 near the beginning of the images you'll see a nodal Bend this is what suzanne is referring to and I believe this is at the second node this was not typical of the entire formation this happens to get your picture this happens to be one plant that we found but the entire formation did not display did not display this but it is clearly a nodal Bend and people can can see it there an image number 36 and pack of images that I posted well indeed they have these formations where it's the entire formation bins that way another interesting thing that happens which isn't so much of them a report from the lab but something you see which I just love there are straight prints like little puppies with pretty little flowers on them that you know just as as an any field of anything you get little straight plants that aren't that crop or that you know field of whatever it is which is you know the way farming works or the way agriculture or the way plants work and in the crop formations you frequently will see just this one little plant the whole formation is down and this one alternative plant hasn't been put down it's still standing up your flowers blooming well I think you know what's going on is that whoever whatever whatever force this is is is some heat into a particular plant the energy the signal or whatever and it has been programmed to bend a particular plant that if so a little straggler is in there a strain is in there it doesn't go down I just love seeing that but just one of the little oh look there's a poppy still standing I paying something else I found once I found I was in a formation where it was fairly it was very new actually and there you know the minute something comes down and everybody races toward it now they've even got GPS signals to get us there used to be at a huntin Tech and let's see it's free fields over and you climb over the fence then you go under the barbed wire and then sometimes you never found it well now little GPS signals get us there thanks to modern technology but one of the formations that I was in somebody or you know two feet away from me said oh my gosh look at this and right underneath the lay you know the bench crop was a dead warm bird Wow so hot it had just you know just just expired and I mean it's just no way a hoaxer took a bird and killed it and stuck it underneath you couldn't see it you know people were walking around the formation and they came across you know oh my gosh look at this right under the you know lay of the crop there's just warm dead bird oh well just I guess in the wrong place at the wrong time or just didn't make it out when the energy arrived you know this is actually a funny story I like about two Canadian formations and you know the story is in a well known in crop circle war where they all back up and tell you that what cooking most animals when they sense danger they run and there is a kind of an intimation from the eyewitness accounts that something disturbing is happening right before the circle goes down the air is like sizzly and you know it feels like something's going on and if they were animals around I presume they would run well porcupines don't run they curl up when they sense danger and there have been two formations in Canada where porcupines have been pulled into the middle of the formation and their quills are swirl on top you know they've been subjected to the force well I just love that like I mean I don't love it up poor poor poor poor guys I mean I'm sorry that they got caught in it all but something about the quills swirled right in the center of the formation for something you know interesting about that idea another phenomenon that you see is complexity within the very lays of the laid plants and sometimes what seems like dimensionality within the laid plants there's an image in the pack that I posted which is number 5 7 seven that shows almost like a water like formation of swirled plantain and nests what they refer to as nests inside the laid plans you talked a little bit about the actual complexity that is shown within the lays of some of these formations well indeed that's yet another piece of evidence when you find formations and there's different you know things like me no one could point to that are of this character of the lay but that's another thing when you find these things you go oh this is for real some of it has to do with the entirely like there are formations very few but there are where it's like a basket weave the crop goes under over under over throughout the whole formation we show one of those in the film and oh my gosh you know what it would take four acres of land to get braided that way and that's you know the entire thing then I think you're talking again about another feature where you kind of see like waves going on a swirlie patterns that that are just beautiful I mean they're like you know somebody was painting or something and created this lovely patterning they're not just plants laying side by side they're doing something you know there's a very interesting aspect of what they're doing and then you alluded to what we call we think of as features it's not the whole lay of the formation that looking that that you're talking about when you spin that it's at just a particular place like the most typical one is the center of a mandala like or the ones that have circular elements in them frequently the the most common one is just these rather simple things that are like hey stall you know if you if you tied some hay together and stuck it up you know this lovely kind of stocky thing in the center where the top part kind of moves out and you know the center part has like a band around it but there are also much more complicated situations where again the thing and we do show some of those in what one on earth also where their world things are woven there like tints or their splayed out or but there's and if you picked it up the whole thing would come up it's not you know wouldn't fall apart on you because it's a very tightly ordered kind of you know like a basket somebody was leaving a basket or somesuch and they come in different shapes it's hard to describe them verbally but if you see pictures of your world isn't that interesting you will not talk about that very much you know and the hoaxers can't do that so again that's a you know that actually is one of the things if you knew if you get into a new circle you just run around looking there a feature in here you know and somehow after people trampled them I don't know they don't they don't honor them and they tend to kind of forget smashed and fall apart what have you or not fall apart they get masked apart but oh it's so wonderful to come across one of those it's like you know finding some jewel in the middle or in some place in the crop circle not always in the middle sometimes randomly just somewhere in the circle but typically also more typically in the middle of a circle that's part of a formation folks you have to understand how gigantic some of these formations are yes some of them were a bit smaller you do get some that are not huge but we were in some in England that were over three football fields long that almost tired you out walking in the noonday Sun from one end to another yeah some of the amount of plants that need to be laid is just absolutely amazing indeed staggering and we just picture I was in one by the way although what was the whole future but it was three-quarters of a mile long it wasn't wide it was narrow it's like a winding path three-quarters of a mile long and then along the way of the winding path there were circles that were off the path that were connected to the path I mean it was actually funny in that one where it was a lovely day and reembarked it's actually the one where I took that picture of checking police so we met them they were coming out of it as I was going into it and took the footage of them and so I was with two girlfriends and we we're parked our car we took our picture Chetan Colusa we started walking down this group and we got to the end of the three-quarters of a mile a long way it started to pour and it was an intentional pour and of course everything gets I mean really wet and muddy and whatever we were so wet when we got back to the crime there were three girls the car would see me you couldn't see through the windows we took all our clothes off and running the masks and we came back a little towels in the car we drove back to our bed and breakfast they vaguely wrapped in our hotels it was quite a see those actually makes you laugh you know just it's just so hopeless we're just so hopelessly mired and yuck sure we got caught in one torrential rain while we were out there it just disguise opened up suddenly and just in the time it took us to get back to the car it was like we had taken a shower outside that's how torrential it was well the weather in England is very spotty I mean we commuted the summer I think it was 2003 they were dying all over Europe that summer from over 100 degree heat for a long stretch of the summer and here could picture us in crop fields Oh God and then we've been there we had to keep your jacket on oh shoot that we did you know I'm the executive did we mention I'm the executive producer of crop circles quest for truth which came out in 2002 and we were on a 10-week shoot in England in 2001 and I don't think we got out of our jackets so we were really cold and we are England such a wide variety of weather patterns it's a little bit frustrating actually when you want to play trip because you don't know you know I'm going to get there and and then when it's beautiful it's just beautiful I mean it's um it's heaven you know but uncertain you don't know we were fortunate to have very good weather when we were in England for the two weeks that we were there Suzanne I have a caller on the line would you like to take a call okay there we go all right caller - what on earth is happening you're on live with Suzanne Taylor what do you have for us hey this is Sam from San Diego can you hear me yes we can great uh my question is I've watched a movie that called from the same horrorman and he was using the crop circles to explain is his theory about the shape of the universe you know and give a whole name for this caller oh now speak up a bit can you hear me down cooing actually it's a Klingon urine I can put I can't make out what he's saying I like it I can repeat the question he's he's referencing the physicist called who's named nassim haramein I'm not sure if you're familiar with Mustang he's saying that nah scene brings the phenomenon of crop circles into his work which is related to the scaling law law that he's developed up from everything down to the subatomic structures up to the scale of galaxies and also the basic shape of everything which he talks about as the tetrahedral geometry that underlies all form it's basically sacred geometry so called it you have a specific question yeah they did any research on maybe looking at the crop circles as a way of speaking to us to dissemble ISM okay okay actually I just hear that well yes now the environment is very at the cutting edge these days I've been to a prison hey he's got people trained to do his work and they talk to non-stop for hours and indeed the crop circles are a significant part of how it's the pattern of everything that he's talking about and you've described you know it as well as I could it's very complex and yet he's trying to make you know sense of how the whole world is working and I love that he's got these crop circles right at the heart of how it is that you know he's describing the workings of the universe and the let's say the collar as though it was the meaning of the things well you know frequently people believe as kind of a common perception or belief that we're waiting to figure out the jigsaw puzzle and that when all the pieces come in we'll have the message or something like oh hieroglyphics where if we can translate the alphabet we will know what they're saying now we're in conjecture here you know until you know they specifically come out and say why they're doing what they're doing we have to speculate why are we getting what we're getting and I don't think that either of those are reasonable theories when when you when you tune into the circle phenomenon what you discover is that many of the circles are loaded with information the crop circle in fact your listeners should know that during the season which is just about to start crop circle connector comm will put up a page for each formation that comes in and a very intelligent audience viewers you know people will get on the website and people from all different disciplines will tell you what they see the formulas the patterns the meanings or whatever and the page will be loaded with interpretation that you know it isn't fanciful its objective this is what's in there there's a formula for this in there or there's an astrological alignment or whatever and so individually there's lots of information being conveyed but they don't seem to poop string together in some way that makes sense and indeed I think to myself well you know if they were trying to deliver a message I mean they're so bright they're so smart they're so sharp they're so able to deliver information to us they were just you know write out something in across Co this is what we want to tell you well I don't think they want to tell us anything I think they want to reflect to us that there is other intelligence in the universe and they're just giving us over and over again and all the ways we talked about where they place them talked about where they point them we talked about the different information encoded in them that just reeks of intelligence intelligence intelligence not you us other intelligence you're not the only ones and once we got that once we accepted that once we acknowledged that once you see contact in headlines all over the world your world is going to change you're going to have to rethink oh so we're not alone here what if it would not be today's news that would go away tomorrow it would be forever it would it would be the most interesting thing that ever happened to humanity and we would not be able to stop thinking about it or and then not only would we it were to capture everyone's imagination just just think yourself your mind is that oh my gosh something is signalling and it's not us but we would be in one conversation on earth everyone in humanity would be trying to figure it out together it would be a subject a peaceful kind of subject that we could talk about together and we don't have anything like that we don't have a you know something that unites us and other than danger and and you know when terrible things happen we get United but this would be a subject that would capture everyone's imagination and they would put us into one inquiry on earth as the word was it what should we do about it and well the further thought I have about that is that once we acknowledge that now right now you know we don't we don't give credence to it as as humanity and so it just does what it does and more and more of what it does until perhaps we do acknowledge how things going on and then I wonder what it would do I mean once we will collectively say Wow something's going on would it give us more so we can't ignore it anymore you know it would be so in our face that we couldn't ignore it anymore I see only that but what do you think it would do I mean don't you think it's ahead of us it's visiting us we're not visiting it maybe you could help us solve some of these horrible problems maybe it's got science maybe it's got technology maybe the real conversation would begin at that point it's just knocking on the door and we're refusing to answer it really really I like to you know think whoa that could really start a whole new era not only of our own thought but of the delivery right now it has no receptivity you know why would why would it give us good things that would help us if really if we're not even you know acknowledging it but if we were receptive that's what it do it's attempting right now I think to call us out of the ego to call us out of our self absorption and to call us out of unit dimensional thinking and once I acknowledge all of those things maybe them like I said the real conversation would begin well I'm with you mark I'm in very you know you make very very trenchant comments and observations we're on the same page shame you're not older that look at the hook-up so let me ask you a couple of other questions or let's what's your favorite crop circle pattern that's ever come down just aesthetically or just from an intuitive point of view or you know may has made a resonant connection with you what is your favorite crop circle formation ever well I I can't actually give you one button give you a few but for that we haven't mentioned that my films going to be at the quad cinema in New York for a while in case we lost people and they come on that the reason I'm on the East Coast was one thing to your conference in Philadelphia the free your mind conference but then I moved over I'm in New York now doing promotion for this week's run that's going to come start on Friday the 22nd - 28 everybody in Manhattan knows quad cinema so I'll have to as mention that and anybody who's in the New York area will you know know to look on quad cinema calm and you can find out the schedule for my movie and I'll be doing Q&A is very interesting panelists you can find that out also every evening for the two evening shows okay so back to my favorite patterns are several of them one of them I'll end up with the one we can talk about but I'll just tell you about the others one is that ribbon this pattern that I think was 2002 I could be wrong but it looks like ribbons like six arms I think maybe five leaving in the breeze it's got such a three-dimensional aspect where you really think you'd like a maypole kind of thing you think you're looking at ribbons and it's placed so interestingly there are three to em you lie and these ribbons don't come in the middle there are the edges of them and the thing the ribbons are just placed right inside them so that they don't violate them you know they don't cross over them it's been carefully you know placed inside the land that the things that are in the land and it's just beautiful I just love looking at it I have several images of it in my home actually on my walls because I like looking at it and I have one on a t-shirt now that's one that I like a lot then you can't help but like the the one that came in in 2001 that is the biggest one ever is in terms of a sort of concentration of circles it's that the the the size of two football fields and it's got its fractal pattern with I believe six arms and many little circles off the main main circle was this the one at milk Hill that had four hundred nine circles in it exactly I remember me as well because it came down on my birthday in 2000's on

August 12th yes well that's they call it a Catherine Wheel which has some significance in the Bible I'm not much of a Bible person so I don't know that but that is what they call it and it's exactly the one you're talking about i sat in that one from dusk until night for several hours with a friend with one of the crop circle people who's in my movie actually and we just sat there in awe just you know watching the light go fade out and the lights below little villages come on and sitting in this absolute miracle it was I mean it was so big and it was so good it was so much going on in it it was so impossible that so that for sure has to be you know on my handful and then the last one that I would mention although you know as I think about who I want to mention a bunch but the last one that I would mention is that other one from a little later in 2001 which I thought was going to break the phenomenon into the big world I thought because that one that we're talking about at milk Hill got the attention of the world because at that point it was the biggest one ever and it got staying in there and you know it may every once in a while the world press pays attention when something unusual happens and so then a few weeks later when that message came in I thought okay this is it that the biggest one ever and now this message the world is going to get it's going to be it's what we've done well the world ignored it it's good thing that the person I bet everything I owned that that would happen didn't hold me to it but the message was again if you know anything about crop circles you know about this one and I know you know about it where the it's a rectangular pattern and it echoes something that we sent out into space when you translate binary code into something you draw on paper or wheat field and we sent it out as a commemorative not expecting anything to happen you know the way they they bury time capsules that say all this little bits and pieces about life on Earth and maybe millions a years somebody will dig it up well this is that same thing it got sent into space as binary code radio waves this was sent out from the Arecibo of space or a telescope array into deep space and this is this formation that Susanna referring to as known as the Arecibo reply right and as SIBO was at that point the reason they did it was because it was the world's largest radio telescope that had just been built and Carl Sagan had a big hand in designing this message how we will encode a message that tells about life on Earth it'll tell our table of elements and say our planetary system how many planets do we have how big are we what you know so a facts about life on Earth is encoded in binary code that you can draw out and we send it out we never expected to get a response in fact it was going to be two hundred and some-odd years before it ever would intersect any kind of planetary body it was just floating out there in space and then all of a sudden now that was 1976 that went out in 2001 we get this crop formation and it's mean there's just no mistake about it it is quote-unquote the answer it's exactly the same shape and size and but it has different information in it and the information was that we the we are carbon-based and our table of elements thing well they're silicon based and our Lu are creatures we are however tall we are 510 whatever so you know a little figure what we look like well it'll say you're with a guy came back there short may have little fat round kids like three feet tall they look like little greys you know we think about in our science fiction or whatever we speak about them and and other you know aspects of whatever those things were that got sent out it got sent back as if we sending you what we look like eat and they're sending us back what they look like or what went on in their world there were three inhabited planets remember that was another piece of it all well this was so fascinating and you know just the way they do binary code little squiggly things you're on the ground and going the world could this be little squiggly things but when you get above it they do you see that these are things that you know can get translated into information so I you know that has to be everybody's favorite and in fact you might also point to the formation that was in the same field that came a week before so they came one two three the biggest one ever milk Hill then one I'm going to talk about now and then a week later the message and the one that came the week before the message was something that again on the ground you had no idea they were dots bigger dots little dots well what are dots what are they used to make pictures at adopt newspapers if you magnified a newspaper its dot matrix it's all dot well that was the design element and you could not possibly tell anything about it on the ground but when you saw the aerial it was space and it's like the face on Mars you know that we typically think it's the face on on Mars but it looks like a face whether whether it is a face on Mars or not it looks like a face and that crop circle had exactly that look so that was in a field where you know ten twenty feet away the message appeared a week later so that was quite a little season that was a season that we shot the first no I believe right across from that field as well was a radio observer right but that's another aspect what it landed right near the biggest radio telescope in England right exactly just like Arecibo is the biggest one ever and that's why they sent the signal out and it landed right near the one in England that it's the biggest one in England itself yeah yeah and there are other correspondences as well I mean system fascinated you know it's not this like our pretty pictures there's so much about them and such a fascinating study I'm so glad I know about these things you know so it's a nice to know something hopeful you know that the world is the world were tuning into this things would change you know such a difficult world and if you don't know anything hopeful boy is a it's a hard road to hoe so I'm always very glad I know about these crop circles Suzanne I'd like to ask you if you've ever felt any energy in any part of the physiology upon visiting a crop circle or if you experience any other bodily effects upon entering them well you know different people are different I'm a very mental person so that for me it's always ah it's always like oh how can this be my mind just goes crazy other people are physically sensitive much more than I am and there's all kinds of things they feel sometimes they can't even get into a formation it's the energy so strong it kind of republic tells them and they you know they don't they don't get in sometimes people get in and they have different kinds of physical reactions they can just sing along or it can be like you know all all energized and you know juicy and you know whatever that kind of feelings are and sometimes they feel they'll actually may have to leave that it's not a good feeling that that's not so frequent but it does happen people feel like and sometimes formations will there will be a similar feeling for different people so this one particular formation creates kind of a negative effect in people some particular formations and they feel bill and you know uncomfortable and what have you but I can't attest to any of that personally I'm just I'm just a mental kid who you know just can't believe what I'm experiencing I've heard a lot of reports about electronics or other pieces of technology malfunctioning upon crossing the line into a crop circle formation have you ever experienced that well that is fairly common although not certainly common like everyday common but very common in terms of it's not so unusual either and in fact we in the movie we actually have people telling you stories about that several of them frequently people's batteries will drain for fresh batteries and their cameras or what have you very very very very I don't say very very but it is you know not not so uncommon that that would happen both always won't work inside the formation yet you hold your cell phone out over the standing crop right at the edge it'll work cameras which we tell you what a story in there about camera crew from the television station that came and they got back this is when they were using film then they got back to this station and there was nothing on a film just white light these electromagnetic disturbances are not infrequent you know they're not every day but yeah and again when something like that happens you know you're in the real view you know that doesn't happen in a hoax formation Suzanne we have another caller on the line would you like to take one more call great here we go okay caller from Texas you're on what on earth is happening do you have a question for Susan n ah good evening this is keeper I did have a quick hello I've been following the crop circle phenomena for quite some time and I have questions that I've not been able to answer and if this truly is a kind of communication everybody why are they in such hard-to-reach places you know it is a bit far away if you're trying to communicate make it out loud it will be open and obvious caller you were breaking up a little bit I'll repeat the question for Suzanne I think I've talked to Matt I heard why are they in such hard-to-reach places and then I couldn't hear the rest after that that's pretty much what I made out of it as well was kind of garbled there near the end well right I've been there onto the chart in fact one of the things we think about like why and why are they in this particular area and you know you speculate why one of the things is it's full of sacred sites and another continually is because it's near a major city so that if in fact it ever really first of all the researchers can get there you know to study it and then if ever really the lid blew off and literally accepted the fact that something unusual was going on that it would be easy to get to and in terms of where they land are basically right by major roads they're frequently you know very easy to get into and sometimes you have to hike you know into the into the field sometimes a test on a walk or even more and I don't know what can we say about that that's just the way it is I don't know what you could what conclusion you could draw from that I have also seen some research that the reason there are such high concentrations in the area of southern England is because if there is a major underground aquifer system of that that creates an ionization as the the aquifer water percolates through the basic chalk that is the the the the ground what the ground actually is made of in that area of southern England have you heard anything regarding that high-contrast yeah you're absolutely right about that and in fact that may be what's going on that's a great conductor of electromagnetism is that water and limestone that chalk you know that's right underneath the surface there and it is along that bits where that aquifer exists that you get a high concentration of the circles and that may be related to these failures of electromagnetic equipment indeed that's another thing you know you've got all your little aspects and that is indeed one of them definitely definitely the one that I entered in Barnesville back in 1997 which the laboratory analysis is is uh there on I don't have pictures available on the site of me actually in them but those pictures do exist it was right by a major road there were power lines along the road again was in organic oat field and me and two friends went into the field and took some shots and then after we left the field very strange first time I'm talking talking about it like publicly pretty much we all experienced a dull ache in the same part of the body after leaving the formation and it happened simultaneously it came on simultaneously in all three of us and then dissipated slowly over time in all three of us and pretty much was gone at the same time as well it was one of the strangest things I've ever experienced and it really you know made me think and ponder you know what could possibly do that to three different people all at the same time it wasn't it wasn't highly unpleasant but it was a very just so strange that we were completely freaked out well I think you went on me but it's an interesting you know the things in a synchronous experience like that points to something who knows right but you know points to something going on that you know the season just this and that there's something they happening you know so that's in doing for in my repertoire awareness so I want to ask you other than yourself could you maybe point the listeners to some resources like maybe authors or books or films etc that you could recommend to people who want to do further research on this phenomenon on their own absolutely well what I mentioned before the seasons about to start occasionally there's a format in England this is the concentration occasionally there's an April formation usually they're not very good May there'll be a little matter usually not all that good but sometimes lately have been June is that it really starts to pick up and July is the big runs many papers often August depending on how hot the summer is when the harvest is but thing you want to pay attention to is crop circle connector comm that is the site that is the one that all the pictures will be on each each formation will get a page and if you absolutely want to check in with them you can get on their mailing list I don't know if you have to subscribe to get on their mailing this but it's inexpensive it's like thirty or forty dollars per year and if you're in England that's the way you get your GPS coordinates also but the you'll get an email every time there's a new one you can click on to the page so I highly recommend that the book that I like the best in fact if you get on the conversation org which is my blog and I really urge people to get on my mailing list I send out the most interesting things you can always unsubscribe I don't send out much but people love being on my mailing list I send out things that you won't likely find in other places I never send out things that are circulating on the web popularly but I find I don't know I just have a nose for what's fascinating and and then I write about why you should pay attention to it so I'm kind of drawing you into this other perspective this more interesting perspective but if you get on my website you'll find on the conversation org you can link to the book I like the best it's the newest book it's michael Glickman who is in my movie and is one of grand daddies of research he was a USC architecture professor university of southern california architecture professor who got hooked other circles and he stopped being an ox architecture professor and he became a circle guy he's a great geometers and he wrote the book called crop circles the bones of god and it's the only book of its kind it's where when you read the book first of all he's a wonderful writer he's got a good sense of humor and he writes beautifully and when you read the book he's taking you into his discoveries what did he find out how did he learn what impressed him as opposed to an objective sort of history of the crop circles the so that that would be the book that I highly recommended you can get it from from my website as far as movies go well God knows mine you know top circle movie comm will get you to what on earth I couldn't recommend any more than that but there's also an earlier film that I mentioned which I am the executive producer of and then it makes a good pair with my movie it's called crop circles quest for truth and if you if you won't see it advertised on this is a little bit humorous if you if you if you buy my movie and it's you get a lot of free gifts we give you a lot of inducements on crop circle movie calm as well as showing you the trailer but if you buy my movie on the chopping page you'll see you will also be able at a ridiculously low price I think it's twelve dollars or something like that be able to buy the first movie and as my marketing director says it's do you want fries with that so you buy the hamburger which is my movie and then do you want fries which is the other movie and it's just a very inexpensive little package and they make a good pair because the first movie is the history of the crop circles were more or less and mine is the passion of the researchers why do people give up their lives for this and they have a little different tone to them but it was after the first movie was finished but I thought no there's another movie here and that's why I embarked on on making mine so those are the ones that I would recommend the most and I don't know that there's another crop circle book there's a wonderful course online that I like to recommend but I don't know how you would find it it's the book that is derived from its crop circles the hidden truths if you google that I think it would lead you to this website where a masked guy a teacher of math designed a geometry course if anybody learned geometry through this course which is all based on the circles they would have such a good time but you don't even have to be a mathematical inclined person or want to learn geometry too see because he's got it very beautifully illustrated and it comes from his book to see the fascinating ways that the circle makers have played with cheat with mathematical ideas but they're very translated you know so that as I say you don't have to be a mathematician to see whoa look at what they've done with with with with geometry in the fascination of the design and expressing many mathematical ideas with funny names that I've never heard before except I when I learned this got into this material oh look there's this principle and that principle and this idea this rule and this one ever look the crop circles are expressing so I like that a lot too crop circles the hidden truths will get you to that fantastic I think that crop circle connector is just a magnificent resource on the web people should definitely check that site out and I like the book secrets in the fields it's an excellent synthesis of the entire phenomenon which is some great commentary and some great photos of the phenomenon through time secrets in the fields I believe that was by Freddy Silva so that's you got me on this radio program and I just wanted to tell you that he's very charming and he's very glib but he's I don't really appreciate him because he pretends to know things he doesn't know oh this means that and this means the other I don't really keep conjecture conjectures a bit you think well no he declares like he's the great expert than understands things that nobody understands and he also plagiarizes a lot of his material it just takes roll cloth from somebody else and he points it in his book and he doesn't give credit and you will never find it invited to be a speaker on any crop circle conference because of those reasons oh yeah the crop circle community does not appreciate him very much so and let's say that when you recommended his book I would not recommend that book look at the truth is you know he was running a website that had a lot of good factual information on it it did and I was the kind of before he became the great expert yeah that was the impression I got from the book because it had a lot of data in it but I wasn't aware of any of any of that beforehand okay so what we have two minutes left in final question what do you think for the listeners here is the most important idea to take away from the entire mystery of the crop circle phenomenon so just keep your mind open don't believe you know I need bill of goods that you've been sold and be curious you know be open be wondering be paying attention and I think the phenomenon doesn't lend on the White House lawn and hit us over the head because that wouldn't be it sort of enlightened way to do it I think it gives us the kind of kid that's with which if we pay attention we will have a realization and the realization then we will own that it will be our work that has produced that realization which is a much healthier way for a reality to change you know otherwise we're back in war like this in opposition but when you keep your mind open and you do pay attention you can't help but be impressed by something beyond the beyond and then you really have expanded you've expanded yourself which is really quite the most appropriate way to proceed in life you know a little loan in crop circle investigation fantastic and that's what it's all altum Utley about Suzanne I want to thank you so much for coming on the show tonight tell listeners your websites one more time movie.com you see the trailer and you can buy the DPD and you can sign up for my mailing list also which gets you to the conversation org which is my blog where I post folders fascinating things about consciousness and how in fact the crop circles could impact that fantastic Suzanne thanks again and thank you everyone for listening that's all we have time for tonight folks but I'll be back here on next Tuesday night at 8:00 p.m. Eastern Time you've been listening to what on earth is happening my website what on earth is happening calm thank you very much for listening good night folks

What On Earth Is Happening Show #057

Topics: *Freemasonry, Symbolism, Mystery Traditions, Masonic Tracing Boards, Pillars of Jachin and Boaz, Hiram Abiff , The Widow's Son*

no taboo topics when you call in feel free to talk about anything you like there never are any type of top it's here on what on earth is happening so that's the the event announcements and the calling number let's jump right into the topic and I'll keep an eye on the the phone lines in a switchboard here on talk show while we break down some more esoteric symbolism of the craft Freemasonry here we go a few weeks back we left off on the first degree tracing board and we had also been discussing the legend of Hiram Abiff I'm going to pick up with the first degree tracing board we've already pretty much broken down most of the symbolism for those of you who want to follow the images that I'm going to be talking about they are right there underneath the player images for tonight's show April 26 2011 on the radio listened page of what on earth is happening calm they click the radio listen page right underneath the embedded player you'll see the images there's 13 of them for tonight and they're labeled Freemasonry so image number one shows the first degree tracing board which we had been extensively breaking down in uh in the last show which was about three weeks ago will you're discussing this symbol this complex symbol which is given to the first degree initiate of the free Masonic tradition and for a very very brief review Freemasonry is simply a tradition in which natural law and morality is taught through a system of symbols allegories and rituals now again I am speaking of the real true esoteric tradition of Freemasonry not necessarily what the lodge system of Freemasonry in the modern world has become and it is critical to make that distinction for people that think that any form of the occult is one thing okay and indeed this is a form of ocultism this is an occult tradition for anybody that continues to make the grave mistake of thinking that any particular form of the occult is one thing this is unit dimensional thinking and it is thinking that will lead one astray from what any of the particulars symbols of any occult tradition actually mean in context where they are being used okay because Freemasonry as we've already said is not one thing it depends on who is wielding its tools the occult is not one thing it depends on who wields the occult 'add information whether they are wielding the information to enlighten people and to bring it forward into the light so that more light can be fostered as a result of sharing that previously occult 'add information okay in which case I would call it light ocultism a light occult this is trying to bring forward things that have previously been hidden and make people aware of things that they are not aware of that may be used against them as a weapon because they are they are pieces of information about the human psyche and the human psychology in general that if it is known by people without one's best interest in mind can be used as a weapon against those who don't possess that said information so this is what the occult actually is we've talked about this at length and past show so I won't extensively review that material but the key thing to keep in mind here for new listeners the occult is not one thing any particular occult tradition is not one thing it depends on how it is being used it can be used as a tool of enlightenment it can be used as a tool of manipulation and oppression depending on the consciousness of the wielder okay of that they were set of tools or information so going back to image number one the first degree tracing board we looked at pretty much most of the symbolism in here I wanted to touch on a few things that we had left off on the the initiates up there going up the ladder here and again the ladder represents coming out of base consciousness represented by the checkerboard floor okay and going up the ladder toward the realm of the gods okay we looked in Astro theology that all of the religions are based on the Sun the moon and the stars and planets and you see those in the sky above the checkerboard floor this is known as the the entire image is known as the Temple of Solomon the temple of the Sun and Moon they because it is a symbolic representation of the individual of their masculine or solar and their feminine or lunar aspects okay it is a allegory a symbolic allegory of bringing together the feminine internal emotional qualities okay or one's spirit or emotions together with the solar masculine qualities of right action that's ultimately what this symbol is about so its unifying one's emotions and actions in other words becoming a non dual being what you feel okay you enact in the world there is no contradiction between those two things okay so there's no internal opposition what you think you feel you do that's it straightforward fairly simple BT in the middle held by the green initiative out the frequency green we talked about it being the color of the heart chakra or the center of nature color green provided in greatest abundance abundance by nature the natural world they it's the color of the on a hot - chakra which we talked about was you know the center of self the true center of self okay it's the generator okay this is why you see the initiates robe shaped like a G we talked about that G in the middle of the compasses and square on previous broadcasts representing the generative principle of true care what comes from the heart wouldn't care about is ultimately what manifests and that's the key to everything that's the law of attraction that's the generative principle that is why that key is suspended there from that G okay the or the green initiate the green initiate is also holding an anchor because that is what anchors us in any of our decisions in any of our actions ultimately we have to care enough to get something done to bring something in the manifestation to do it and that key of being suspended by a thread okay and here's the whole key to this entire symbol it's saying that in the world care dangles by a thread and this is the key to everything the key to unlocking everything all of the the causal nature the underlying causal nature of all of the problems that we experience as a species or as individuals um is dependent upon that thread not being cut and the key dropping below okay so this is a symbolic warning if you will okay that key represents care and it's the the the the initiates of this tradition I should say the Masters of this tradition who are giving this tracing board to the initiates are telling them symbolically you're living in a world where care is dangling by a thread that's that key is the most important thing that there is again symbolically that key grant you access to the Stargate which lies at the end of the ladder and that Stargate is illumination it is enlightenment okay and we're going to see how this makes even more sense in a moment in a few moments when we turn the tracing board on to on to its right side turning it 90 degrees clockwise okay we'll look at that in a few moments some of the other things I just wanted to touch on was some of the symbolic language that is encoded into something like the tracing board okay first we have columns okay and we looked at the word Kalume in the French language Kalume means dogs okay the dog is associated with the spirit okay it's associated with the goddess okay again the green initiate in the middle is a symbolic representation of the goddess again okay however but the columns themselves are word play call column Kalume is word play for the dogs okay or the Sacred Feminine principle care is what this entire thing is ultimately about and this is why in the free Masonic tradition it is said that we can only make good men better okay or I would we revise that because I horribly horribly disagree with the idea of masonry even within the lodge system excluding women in the official Lodge systems okay and putting them in a separate organization known as the order of the eastern stark if you're talking about bridging the masculine and feminine you need to take an integrative an integral approach when it comes to the sexes in your own Lodge and I understand all of the all of the justifications that go for keeping that segregation in place and how its tradition etc and how you know oh there would be different kinds of sexual dynamics going on in the large system nonsense that this segregation is part of what keeps people away from Freemasonry and I wouldn't even recommend going toward the large system period but it puts a bad taste in people's mouth that this is what this institution who is allegedly trying to teach this integration of masculine and feminine forces indwelling forces okay it paints a bad picture in people's mind because what they're doing in their initiatory traditions is segregating men and women therefore how can anybody think that ultimately what they're going to do if they're doing that in a physical sense is going to raise people's vibrations in in consciousness to come out of that level of duality okay that's expressed that symbolically expressed through their own segregation of the sexes it's ridiculous and it's something that you know the the true light masons in this tradition need to take a good hard look at and admit that it's time to reevaluate that policy but again I'm not interested in Lodge Freemasonry anyway I'm just stating that for the record that's what I think about that I'm interested in the real tradition of Freemasonry from an esoteric perspective which no one needs to go inside any particular building in the world to understand and embody in their life just like I need to step inside no church to embody the principles upon which true esoteric Christianity is based in which the teacher attributed to under the name of Christ is put forward and lived and then you know showed people that this is the way out of suffering and this is the way toward true enlightenment I need I need no affiliations with any Church on earth to live my life according to those standards and ideals absolutely zero therefore one needs zero affiliations with any institutionalized free Masonic structures in order to truly embody understand and live the philosophy that is contained within the front and a true free Masonic esoteric tradition okay so I in those ways I could say that I consider myself an esoteric Christian and I consider myself an esoteric freemason okay however I belong to no institutions on the earth that structure themselves in a compartmentalized hierarchical and segregating way all right and never will so that's just my stance in position on that and for those who you know might have been curious about that there is on the table so going back to the symbolism okay because we have a lot to break down and I want to try to get through most of the images here tonight the the latter represents coming up to higher levels of consciousness and balance because that's what this symbol is all about is about balance and synthesis the merging of the masculine and feminine forces the synthesis between them uniting emotion and inaction okay and that pillar in the middle represents that synthesis coming out of the world of duality which is what the two pillars represent and as you progress through time represented by moving from west to east okay the western direction at the bottom okay away from the gods in the eastern direction up at the top okay you are ascending that ladder away out of darkness and toward the light of the Sun okay and you're going up the middle pillar toward the all-seeing eye and we talked about the masculine architecture on the left-hand pillar the pillar of team or the pillar of strength as it is known is dork or a masculine style of architecture the feminine pillar on the right the power of Bo eyes or the power of beauty BA is Corinthian in its architecture which is a feminine style of architecture and it leads to the moon in the middle you have the ionic pillar okay an ionic pillar this is wordplay again just like the columns themselves the Kalume okay the column it's wordplay right here's more wordplay the ionic pillar okay it leads to the all-seeing eye which is turned on the eye on okay which represents as we talked about many shows before the awaken pineal gland or the third eye chakra okay so this is the spiritual vision that is turned on so that one can see the world for what it really is once they have acquired enough knowledge or understanding which is represented by light okay and you don't climb that ladder unless you have the key which is care you have to care enough to make that climb out of darkness and into light or out of ignorance and toward knowledge okay in order to turn the third eye on which represents balance that's why it's in the middle between the Sun and the moon okay the Sun and the moon or so low moan okay that is it's the Temple of Solomon the Sun and the moon and the temple okay or the the cranial cavity where the temples are at of that that's what holds the human brain and again this is about the left and right brain hemispheres being balanced or coming together to turn on the third eye or awaken the dormant the otherwise dormant if it's in a state of imbalance if the brain hemispheres are in a state of imbalance the pineal gland really doesn't truly come on line okay or activate or turn on okay to grant one the spiritual insight with the spiritual sight that they need to see the world as it really is okay so they won't see all the controls they won't see all the manipulations they won't see the methods of mind control they won't see the flagrant violations of natural law and inherent human rights that are taking place all around us okay so this is a pretty much where I want to hold breaking down the individual symbolism okay we can talk a little bit more about some of the tools okay I believe I went briefly into that you have the the level at the base of the active pillar that means our actions must be in balance okay you have the plum leaned up against the feminine teller okay this means that we have to govern our emotions and always keep them upright try to mane as much positivity as it is within our ability to maintain okay in order to you know bridge our emotions and actions in a positive way okay are our emotions have to be upward upright because that's what the plum does it allows one to build things up right okay and this square in the middle of the leaned up against the middle pillar or the pillar of wisdom marked by the W this is also known as Jacob's Ladder okay the square in its inverted configuration there where the point up means that we have conquered our base nature okay the base animalistic nature you know that basically results from staying in base consciousness represented by the floor of the house this means we have come off the floor of the house in other words or out of beast-like consciousness okay base consciousness a being ruled by the fight-or-flight response in other words okay the brain is not in a state of balance when we're in that modality of consciousness the square inverted okay or turned up upside down okay with the point upward okay not with the point downward as you see it in the compasses and square that means that the compasses need to rule over our base instincts when we turn it upside down like that this is often the emblem that is granted to the master of the lodge okay in Freemasonry because it is saying that if one is a attained self mastery okay or mastery over one's own base instincts they rule over the square they have turned that that base instinct okay we're animal-like instinct upside down they have come up out of that mode of duality and just low consciousness and they have ascended the middle pillar or Jacob's Ladder okay so wordplay all over this okay not just with the car we saw it with the the ionic pillar the ion pillar okay where you could even break it down further than that if you want to take it into you know again this is called green language okay now chemical language and you you don't have to think that every single aspect of this is planned this could be a form of synchro mysticism which we also talked about on the show in the past if you just break down the word ionic okay you could break it down to I then the word on then I again and the letter C so I on I see well yeah if the eye is on you will see okay so this is wordplay its occult wordplay this is called green language okay and the reason it's called green language is because green is the color of balance you won't see these things if you have an imbalanced brain you'll only see these things if you can comprehend allegory okay comprehension of allegory is really only the gut begins to dawn on one in any kind of fullness when one has begun to balance the brain hemispheres to a completely unconscious individual who has never studied anything who watches tons of television on a daily basis it's a garbage diet okay believes all the propaganda that's out there on TV and in the news okay accepts human authority as something that is real all right lives their life in a state of base awareness doesn't really care about anybody but themselves they're not gonna understand allegory this symbol is going to be completely meaningless to them and they're not going to begin to ever understand it until they start working on balancing the brain a little bit all right it could be said to you and told to you all all I want okay I can go on ad infinitum explain the symbolism but until somebody understands that in order to truly see this for yourself okay not have to be explained details every little thing or even my interpretation of every little part of it in order to really comprehend what's being said wordlessly through the hidden language of symbolism the person's brain would already have to be in the state of green frequency which is the balancing of the left and right brain hemispheres the left again the red frequency and the right brain the blue frequency okay and this is why again these colors are used for dualistic purposes okay sports teams political parties police lights etc news you know Fox News red MSNBC blue okay just watch how the frequencies of red and blue are used all around us in our culture and you can understand why these are the colors of imbalance all right when we bridge those together the third frequency of light we're not talking a pigment here but light is green green is again the fundamental Center it's the center of the visible spectrum the center of the colors of nature the center of self in the chakra system and it is the color that represents bridging the left and right brain and that's why it's in the middle of everything and that's why the initiating the middle is green okay so I think that's where I'll leave the first degree tracing board unless anyone has any particular questions about it I believe I did talk about the ash Lars or the tubes of stone on the back one is imperfect one is perfect the only way you get from the imperfect state to the perfect one is by going through the place of balance which is the middle pillar then lies at the end of the spiritual journey of seeking of seeking for truth one could call the Middle Pillar the pillar of truth again because it is about the synthesis of male and female is about the synthesis of solar and lunar and it is about the awakening process and the coming on of the all sink the turning on of the all-seeing eye which exists within us all so let's move on to the second image woman I'm going to try to break down all three of the first second and third degree tracing boards if we have enough time this evening the second image there is a simple picture of the great pyramids on the Giza Plateau in Egypt and the only reason I wanted to mention this is for something that will be coming in the future this is considered by many esoteric occult researchers to be the true Temple of Solomon okay or in other words the building that was built to embody the Temple of Solomon the true Temple of Solomon is within okay let's get that clear and understood that but if for those who are researching or their ever an actual real Temple of Solomon there is a lot of work that has been done through many researchers that talk about the possibility of the building that was built the structures that were built to represent the Temple of Solomon in man were initiations occult initiations did indeed take place was at the Great Pyramid complex on the Giza Plateau in Egypt so here we see this image from Cairo Egypt of the three great pyramids okay the biggest of which there on the right is the called simply the Great Pyramid and these are symbolic analogs to the three pillars which we see in the traditions of Freemasonry and Kabbalah okay and these traditions were or indeed this old they do go back to the ancient Egyptian or Commission traditions and they even predate those okay go right back into antiquity and antediluvian times okay so the three pyramids represent thought emotion and action they represent the male the female and the synthesis of both or the child okay so that's something that is there to just spark people's mind spark their interest and to put a seed in for something that we're going to talk about in the future okay so I want people to understand that symbolically we will also often see pillars and pyramids used interchangeably okay that's just a concept to just put out there again for something that I'll be talking about in the future all right so let's move on to image number three which is the tracing board on its side which I mentioned that I would be going into now we can see how this is a further exploration of the allegory that the trait the first degree tracing board represents when we turn it on its side we clearly see Astro theology for those who have been looking at Astro theology okay you can clearly see that this represents the sun's path with respect to the year okay with respect to this the the sun's path around the Earth or the Earth's past path around the Sun and it's basically the same thing just depending on what motion frame of reference are you're using are you keeping the Sun stationary or the earth stationary it makes the same basic orbital path and we see that due to the tilt of the earth as I talked about when we went into a show theology and looked at the astronomy to create you know the astronomical aspects that are responsible for creating the season which is the tilt of the earth with respect to the plane of orbit that it makes are going around the Sun each year okay we get the seasons as a result of that and the Sun basically makes a sine wave in its path as it as it is um how can I wear this it makes a sine wave in it's apparent path with respect to the earth's equator as the year progresses and this just continues in this sine wave or serpentine pattern if you started let's say for spring equinox okay and then you graph with respect to time the the graph would go would go up like a sine wave until it hit the the summer solstice which it would be a 23-point the Sun would be at 23.5 degrees north latitude with respect to the earth's equator okay and then when you move forward in time you would then go to the fall equinox and it would be at the zero Degree point again or at the equator and then when you went down to the when you move forward in time more you would come to the winter solstice which is the sun's lowest point of power because it is at the 23.5 degrees south latitude with respect to the earth's equator so the northern hemisphere is not being favored by the direct angle of sunlight and that's winter okay in the northern hemisphere so and this process would just keep repeating and repeating as you graph it if you graph the sun's angle with respect to the equator with respect to time okay so I could put an image of this a graph such as this to make it easier to understand off maybe I'll post that in the podcast section but essentially that's what we're looking at here we're looking at the earth on the left hand side okay on the west side of the tracing board marked by the W okay and the East represents the Sun okay the Middle Pillar here represents the earth's equator and that the two pillars represent the tropics the top pillar okay the pillar of jocking the male teller or the pillar of the Sun or strength represents the Tropic of Cancer the time that the Sun is at the summer solstice and it is getting ready to enter the house of cancer okay so that would be when it is at 23.5 degrees north latitude with respect to the equator and that symbolized at the top there on the right by the Sun in its full expression okay the middle pillar represents the place of balance which is the equator okay the equator is where the all-seeing eye is because the all-seeing eye only comes on when there's balance between the brain hemispheres do everything folks this is should be no surprise to anyone who understands the law of Correspondence the principle of Correspondence everything is a reflection of everything else just on a particular scale the universe is self-similar across scales as the individual goes the solar system goes the galaxy goes the universe okay the universe is like the atom or the the subatomic particle there's no difference it's just the difference in scale all right so this is an idea of the journey out of darkness and into light being reflected in the solar system the individuals journey is reflected in the entire solar system and then it's further reflected in the even greater cycle of the galaxies okay going around its center so to go back to the symbolism itself the checkerboard floor in this orientation represents the earth itself this is the earth these are the lines of latitude and longitude of the earth okay and the earth is a place of density of base awareness essentially as a whole the idea is to come off of the ground or the earth meaning stop identifying so much with the physical reality right not not living in it and effecting change within it but not identifying so much with it that you don't think that there's a spiritual reality which is our source okay so that kind of materialistic worldly identification thinking that you are the body you are the roles that you play here on earth is darkness and that's why the bottom or base of the ladder toward the place of darkness okay which is the lunar pillar there in this orientation of the tracing board okay the pillar I'm sorry the ladder is ascending it's going upward toward the Sun out of darkness and into light and as it comes out of darkness it goes away from the earth we're away from the so called prison planet okay and toward the Sun the Stargate and now this is symbolic all right again the colors of the prisoners uniform are black and white in stripes well we have something very similar there the checkerboard floor of the house representing base consciousness materialistic identification worldly identification etc they become out of that then we go up the ladder and out of darkness and toward light okay them it's a stepwise progression it doesn't happen immediately right it takes it requires time to go from the bottom left there which is still identified with the earth up toward the realm of the gods and the Sun and again the Sun up at the top represents the Sun at the summer solstice the highest point of light or this most strength in the northern hemisphere we even have the directions marked north and south that's the pillar the the pillar of Jokke nor the S pillar the pillar of strength up at the top there is the Tropic of can't of cancer okay which is 23.5 degrees north latitude okay so the Sun makes its fullest expression there at the summer solstice at the bottom we have a teller of Capricorn okay the Tropic of Capricorn I should say the pillar of bolas symbolically represents in this orientation the Tropic of Capricorn all right so this is 23.5 degrees south latitude so we even have the directional markers showing us which way is north on the earth and to a south on the earth and and which way west represents darkness if you're going deeper and deeper in the worldly identification and you know base consciousness represented by the floor of the house you're going toward the direction of West which is the direction of death not life but death okay darkness is the West and in Freemasonry there's also that idea that North is the place of darkness and we'll get to that symbolism and in a few moments hopefully today um but when we go toward the eastern direction we are going toward the Sun we are going toward the light the all-seeing eye the Sacred Feminine as well the bridging of the Sacred Feminine the unit unison of Sacred Feminine and sacred masculine and the opening of the all-seeing eye or simply the realm of the gods okay higher consciousness okay so I think that's pretty clear-cut for anybody who you know now has their eyes open to it I think you know if this is simply explained in this orientation it's fairly undeniable that this is what this represents and it took me years to understand this no one told this to me this was never told to me by any occult even dark occult tradition that I was initiated into I found that out okay I discovered that by meditating on this board all right so it's um it's something that really does need to be contemplated all right now yeah I threw the mystery right out there and put it on the table for everyone to just grab but there it is hey it doesn't mean you still can't look at this in wonder and all and meditate on it yourself and find other things and I'm constantly finding new things in this one image this one set of imagery because as I said this is a book it's not just an image it's a book okay it's that the the complexity of the image and the spiritual nature of it makes it a book okay it's not just a picture alright there's so much in it symbolically to understand about the world and life and the nature of things and natural law okay that it's unbelievable it's truly a wonder so this is the power of symbolism ladies and gentlemen I mean if you know I know I don't probably do the best job of explaining how it all fits together and explain all the interpretations I try to do is do it as well as I can to try to make people understand it but you have to contemplate it yourself that's ultimately what has to be done and that takes time you know again I said I looked at this image for years before I arrived at this understanding not not days not weeks not even months years so I'll leave the further mysteries of the first degree tracing board for you and I'll stop there with that okay if anybody has any thing to add to that just feel free to call in call in number seven and two for triple for seven triple for the call ID number eight three five one five let's move on to the second degree tracing board image number four on the website okay so the second degree is known as the fellow craft degree in Freemasonry and here we see a depiction of the second degree tracing board so you see now you're seeing the porch of the Temple of Solomon or the portico as it is known okay and there's a spiral staircase and this is a critical element of the second degree the spiral staircase used in the symbolism and rituals of the second degree there you see the two pillars the initiate the base of the steps and the the porch of the temple there with the spiral staircase leading up to the first level of the temple okay so what this symbolically represents not you see the light up at the top of this image as well in the Triangle and there is a seat there I don't believe that is a G and again I would say that that represents true care okay but it's it's it could be used interchangeably there with the G which is often you see everywhere in modern Freemasonry particularly in the Western lodge traditions but you also see the name of God the unspeakable name of God in the in the biblical tradition they're written about the the archway you see yah hey Bob hey and we talked about that name extensively when we looked into the tradition of Kabbalah and Tarot okay so again the Temple of Solomon was a temple built for God with a creator by Solomon and he commissioned the builders Hiram king of Tyre and Hiram Abiff Hiram Abiff being the chief builder of the temple we're going to talk more about Hiram Abiff tonight when we look at some more symbolism related with Hiram Abiff and his death okay and we're going to look at the virgin birth again I believe I alluded to it before but I'm going to break that down what that is a little bit because we need to understand the symbolic associations between Hiram Abiff and Christ because again it is the same concept it is that level of fully awakened higher consciousness or Christ consciousness but Hiram Abiff represents in the true esoteric tradition of Freemasonry so this spiral staircase leading into the greater mysteries of the temple of the Creator okay getting in touch with one's own divine nature this is about going within okay that the spiritual journey is a spiraling one okay it's not linear okay it's not straight all right we've saw in the first degree yes time is required right to make that jerk to make that journey toward ever greater levels of perfection and that's what the latter in that orientation represents that it's a stepwise progression through time however what this degree is all about is the internal world okay this is the this degree is probably what I would consider to be the most important degree in Freemasonry and it is the least understood and it is the one that people are past before they should ever be past I feel that almost every freemason who calls themself a freemason should never have been past the first degree in other words they should not have been granted the second degree because and I'll get into this for a bit because it's very important in the original mystery traditions okay the initiated to go further or into the deeper degrees of the mysteries which is what this second degree represents again coming up the spiral staircase which you cannot see the top of as you are going up up it it is a journey of faith okay you have to have faith that it leads someplace to continue the ascent which requires will to ascend up the spiral staircase it also represents you cannot see what is unfolding ahead okay it must unfold naturally as you go forward okay so this is also an idea not to give up okay in the journey don't concede continue to press forward because eventually an incredible Vista opens up with sublime mysteries represented by that archway at the back past the checkerboard floor which has the creator's name etched under it okay so to truly enter the temple of the Creator the temple of God so to speak it's an inward process that requires a journey of faith and and I don't mean faith like believing in dogma I'm talking about faith in yourself okay that you have the tools that you need and will be provided with what you need to go forward in the journey that we're all on in this physical domain okay which is a spiritual journey alright so moving up this ladder okay up this staircase requires faith and will and it's a process that really isn't an external one it's an internal one okay this whole degree the fellow craft degree is all about the Sacred Feminine alright just like the FIR the first degree is that that meant that base okay it's the first step the second step is about truly going inward the first step is about understanding that you don't have all of the knowledge that you need and that there are other people who do have a lot more knowledge than you but you need to maybe be led to which again symbolized by the cable tow which we talked about that you've been blindfolded or hoodwinked and that you have to understand first and foremost that you don't know a lot of things alright and that's one of the most that's one of the things that most people will never admit to because they're in such ego they want to think they have it all figured out and that there's nothing more that they could know or come to understand but nobody else could possibly teach them they have all of the information about life that they could ever want or need and the information is essentially useless okay you see this I saw this the other day at the end the Fed rally you know people who think oh I have enough information I don't need to take any information out of your hand in the form of a flyer you know I can't be bothered for that yet you saw people coming up as well asking for information with lots of questions curious hungry with a desire to learn so you had some encourage encouraging situations there and some deplorable situations it's a combination but we continue to press forward and do what we can so to go back to the symbolism again um the spiral staircase the journey of faith the journey of will the understanding that time unfolds in its course you may not be able to see what's just ahead but eventually that Vista will open up to you and you'll you know basically be at another level at that point so this is about spiritual evolution represented by the spiral staircase okay and again the light is the goal which is up at the top level all right so the second degree is this internal qualities within the individual and it's all about care you need to care enough to ascend that staircase you need to have the will to ascend it and you have to have faith that you're ascending it for a reason that there's a purpose behind that journey that requires care and will okay and there is a purpose behind it however it is my contention that again 99.9% of the people who are passed this degree and again the first degree of the entered apprentice is called being entered okay or in turn because it's about coming out of the grave the spiritual grave of Darkness Hiram

Abiff and entombed in other words to come up to that first step who want to know hey then the second degree is called fellow craft and it is about being passed that's what you are called when you're granted the second degree you have been passed this is a reference to the ancient mysteries okay the ancient mysteries were structured in such a way that the the apprentices would only be passed into the further degrees of the mysteries okay or in other words taken off of the symbolic porch and then granted access to the true level of the temple okay sim symbolizing the tracing board there they would only be granted that if they were able to display a particular level of understanding and this level of understanding had has everything to do with this level of Freemasonry and this is why it is my contention and I know that sounds cryptic right now but I'll I'm going to ask a question in a moment which is the all-important question that can ever be asked really and only those who would truly be able to answer the question and I I believe I have actually answered this question in previous podcasts and I often say this thing but I'm not going to directly answer the question I'm sure someone will be able to provide the answer maybe I'll do another contest like we did with the whole idea of what is the the only thing from which the Philosopher's Stone can ever truly be distilled and you know you did that as a contest for the free your mind conference free tickets for the weekend the answer was the human imagination human imagination and what actually opens one up to the wonders that are inherent in the universe and helps us to really create what is known as the Philosopher's Stone we did a contest of that in the past the human imagination is the only thing that can ultimately free our minds and get us out of base levels of awareness and mind control but maybe I'll do a contest about this on the world RF is happening Paige maybe I'll take yeah let's uh since we're going down this direction let's just follow this path okay so let's say yes we're going to do a contest I'm going to ask the question tonight we're going to start opening up the answers for people on the first show on Oracle broadcasting next week how about that all right so we'll have a little bit of fun here and learn a little bit along the way so the contest is going to be this in the mystery traditions there was a question that was asked asked of the lower-level initiates and they needed to display an understanding or they need to essentially correctly answer this question if they were going to be granted any further entrance into the deeper mysteries okay and yes this is a form of this was a form of control I will not permanently control the certain will give the answer but I think that people should be given adequate time to think about this question and to try to answer it on their own and here is the question the question is how does one know that one is suffering that's the question that's the question of the mystery traditions and again I've probably said this before on the show for people who are paying attention or actually you know listening you probably know the answer so if you do know it don't call in and give it tonight let's let leave this for next week okay anybody answers I'll come up with a suitable prize I don't know what it'll be maybe I don't know we'll think of something okay but for now the question okay well I'll think of a prize and mention that on on the show and we start the show next week and we'll take we'll take people to answer this question on the air okay but the the question is and this is the mystery tradition question and I would say that this is indeed the question of the second degree of Freemasonry as well okay this is the question that would have to be answered correctly all right to be passed into the further mystery traditions and I feel is the question that should that the initiates of the three Masonic tradition should have to display an understanding or a mastery of in order to be taken further into that tradition okay because so many people consider themselves higher-level freemasons and they don't have the answer to that question and that's what this degree is ultimately all about and that's why to go into the further higher level knowledge represented by degrees three and and further okay you need you need to truly display an understanding of the answer to that question in your own mind and heart and you know there's even a hint right there okay so I'll repeat the question again and this is the question of not only all of the mystery traditions but particularly the second degree of Freemasonry known as fellow craft the question is how does one truly know that one is suffering and how do you yourself know that you are in a state of suffering okay that's the question so we'll take answers to that next week and they'll be a prize of some sort I'll think of something maybe me and Bob or me and another a couple of friends will think of some kind of a of a gift or prize that we can award to the winner of that quest correct answer to that question on the air next week okay so the clearly I will not be giving that answer tonight so we won't be looking at that as another aspect of the tracing board the answer to that question we can do that next week but again this second degree tracing board again I just want to help people to understand this is all about the internal qualities of the individual this is about what you ultimately hold within inside it's about the spiritual journey which is a journey within not in the external sense and that's indeed what the Temple of Solomon represents again as we talked about many times it's some it's an internal process and it's a symbol representing the self okay so I don't have any other particular things that I want to break down on the tracing board as far as symbolism goes so we'll leave that tracing board there for now okay and we'll look at it a little bit further when we go into the answer of the mystery tradition question okay which is once again how does one truly know that one is suffering okay so let's look at image number five which is the third-degree board okay the third-degree board is a coffin and at the top of the coffin right there is a sprig of acacia growing out from the be grave that this coffin is in all right West is at the top east at the bottom south on the on the left side north on the right side there is a skull and bones the skull and crossbones on the coffin we have the compasses on the top we have a circle we have some Hebrew characters we have some Masonic cipher there in the middle on the yellow rectangle we have a scroll with a pentagram on it we have three masonry tools being a level a 24 inch gauge or it may be a plum and a setting Maul or mallet okay yeah I believe that is a problem there okay so this is the third degree tracing board or the Master Mason okay clearly for those who remember the legend of Hiram Abiff this is a reference to Hiram Abiff and his grave okay we talked about Hiram Abiff being accosted at the temple of Solomon okay and again he is the symbol of truth he is the symbol of one awaken the process of awakening coming to the light of truth okay being initiated into the mysteries and coming up higher in them toward more light okay toward greater understanding and he is accosted at the temple by the ruffians who strike them with three tools including the setting Maul in between the third eye which puts him down and then King Solomon has to dispatch a crew to go and find him I find his body which was scattered by these ruffians and was basically broken up and scattered and he has to be actually reunited with the lost word okay and again that's pretty much unspoken in the true in the logic system of masonry I said several weeks back that the lost word is indeed the concept of equilibrium or balance because it is a lost modality within the human species that must be reclaimed so equilibrium is that lost word or modality of consciousness that brings Hiram Abiff back to life which brings the spirit back to life which brings the understanding of our own spiritual nature represented by hilum abyss back to life okay so this is indeed his coffin and his coffin is sealed by the Skull and Bones now we know that the Skull and Bones is indeed called the order of death the secret society known as the Skull and Bones is a rogue Lodge of dark masonry the elite green people to come up into this system it's it's basically feeds into think-tank institutions and military industrial complex institutions etc government banking you name it religion okay one of the most vile of the dark occult traditions skullenbones and the reason that the Skull and Bones are used as the symbolism of this institution is because as we said and I've said many times previously on on the podcast this is symbolic the symbol is symbolic of thoughts and actions okay so intelligence and we'll right intelligence is in the skull the brain right and the crossbones represent will action however the spirit dead okay so psychopathy not having any emotions burying the emotions burying the spirit that tire of ifs grave what is it killed by it's killed by the dynamic of having intelligence and will without care and let that sink in I mean this should be you know an empowering understanding of symbols here and I've had discussions with people who have said to me that the understanding of that symbol eluded them for so long but then when they may hear here that explain it makes such sense that it's like a bomb going off in their brain okay and it's true the these symbols are there to awaken people and to help people to understand concepts about life and living and the right way to live this is a warning this tracing board okay it's a warning not to kill the spirit because if you killed the spirit it's in a grave and you're heading in the western direction which is the direction of death away from the light so this is saying you've already gone away from the light the spirit is dead the idea is to help spread the rejuvenation of spirit help foster the rejuvenation of the spirit of the the knowledge of spiritual nature that we all share the spark of the divine that is within us all so that the three tools are the tools that murdered Hiram Abiff put him in his casket and indeed that was done by the Skull and Bones and I don't mean by the order of the Skull and Bones or the order of death I mean by that the concept of having intellect and willpower but yet leaving our spiritual nature out of the equation and that's what puts Hiram Abiff in his tomb okay we see the three Hebrew letters hey hey hey the first name of Hiram Abiff okay and if we transliterate those into numerology which is done in gematria which we've talked about davis is the fifth letter the the number five is associated with hey in Hebrew so this would be 5 5 5 and that is Hiram Abiff number whenever you see triple 5 that is a reference to Hiram Abiff and it's a reference to the spiritual nature and we see the five pointed star there on the left with the point in the middle of it this is the star of Venus okay the morning star the light okay it is the Sun it represents the Sun because they point with the line around that you'll notice this pentagram has a point in the middle of it so it's actually a combination of two symbols it's a combination of the Venus star which is the goddess principle the Sacred

Feminine okay with the point upright okay and then the dot with the circle around it is a symbol of the Sun so this is the symbol of the combination of the Sun and Moon coming together the Temple of Solomon and the builder is Hiram Abiff who is dead if we dismiss or discount the spiritual nature that we all have within us and that we all share but we all are all part of the idea that is that if we do integrate that spiritual side with the goddess principle the generative principle true creation okay we will awaken out of this slumber of believing that we are the body okay and come out of this grave and the hope of that resurrection not only within a single individual but within all of humanity is that spring of acacia that is growing from the top of the tomb and it's something that we can grasp it's it's a spirit it's a symbol of spiritual rejuvenation that's what the acacia represents so whenever you see a patient applied to Freemasonry that is what it is saying that the spirit can be rejuvenated okay and that's what we can use to pull ourselves out of the the grave that we are in as a species spiritual death okay I am I I'm always reminded of the words of one of my favorite rock artists a do Ronnie do who is since passed he died I believe last year and I think it's been a whole year I there was a song that he had lyrics to they wrote lyrics to when he was in when he was originally in the band Black Sabbath he said kill the spirit and you'll be blinded and the end is always the same play with fire and you will burn their fingers and lose your hold of the flame and this just to me represents such a magnificent understanding of the concept of kill the spirit and the end is always going to be the same intense suffering until you understand that's the true nature you're playing with fire when you do that the third degree is a warning to always keep your actions geared toward the true will helping to not only help yourself but helping others to ascend in their spiritual understanding and the symbol of this entire degree is the trowel because once you have that key in hand and that understanding in hand you are supposed to spread it and never deny anyone true knowledge as you understand it always disseminate what you know as long as someone is receptive as long as someone you know wants to know you're not forcing it on them but you're telling them and you may even put it out there so that they hear it at least okay you can't force anyone to accept or believe anything trust me I think anybody who's pretty awake has tried that and I do think that we need to be vocal and never stop talking never stopped spreading this message through the voice okay you can't on here something seeds are planted through the voice that's what the trowel represents go out and spread the word the lost word spread the equilibrium by what know people will come to a place of balance once enough people are in this vibratory energy of consciousness of higher consciousness and once they're speaking it the voice has to become louder and louder and louder collectively more people need to know this so well that they become teachers of it okay so I don't know if much more to say on the third degree board because I think that pretty well covers it and basically that's uh you know what it's all about it's about spiritual rebirth this is about the second birth or symbolically the Second Coming okay this is being born again you were born physically into a world of darkness put under mind control and then being born again is relearning or remembering your spiritual nature represented by coming out of that coffin okay which let's look at number image number six hey here is perfect example coming out of the coffin Hiram Abiff coming back to life there we see him in the coffin and folks it's no coincidence that

Hiram Abiff looks like Jesus in this image that's not a coincidence it's deliberately designed like that okay because it's the same conceptual idea Jesus was the light of the world Hiram Abiff is the light the spirit understanding your true spiritual nature being in the world but not of it coming out of the tomb resurrecting rising back to life after being dead there's the numbers five five five as we said the skullenbones the at the very top the square inverted the three tools on the coffin there near the bottom with symbolic Temple of Solomon in the middle the upright pentagram with the all-seeing eye in the middle and the light streaming out of it representing man's spiritual nature I covered this extensively in the in my free your mind conference presentation in which the pentagram was a huge symbolic reference in that presentation we saw how it is used extremely subversively when it comes to the military and the police but that's another presentation there's the sprig of acacia over his head okay and he is called the widow's son why is he called the widow's son and cause again he is the neocortex enlightened balanced in equilibrium okay and this is made possible through the connection to the Sacred Feminine part of the brain the right brain hemisphere and specifically also the limbic brain with the positive aspects of the limbic brain the positive emotions not the fear aspects of them okay connection through emotions to other people all right and when we integrate that emotional those emotional qualities that are the internal qualities of the beam and we integrate those with our actions that's what awakening that's what true spiritual awakening is all about so he's the widow's son because the r-complex the base brain is the controlling father figure okay it's the oldest part of the brain evolutionarily so it's the reptile complex the midbrain is the mammal brain and then the higher brain is the human brain the neocortex so we have to conquer the base instinct part of the brain not not conquer it not even the right word for it okay it's going to be there but it needs to be there as a tool for when it is required like a hammer a hammer as a tool you use it if you build the house with a hammer or even if you use it as protection against some kind of a predator right you wouldn't hammer would not take over your house and say since I helped you build this place I'm taking over no you pick the hammer up when it was required and put it down when you're finished using it well that's what the lower parts of the brain are like there are tools there it's there for when we need them yeah we need them for basic motor skills and respiration etc but if we dwell in that part of the brain and we get locked into the identity that is brought on by chronically living in that part of the brain fight-or-flight mode pure survival you know in a fearful sense gremlin constantly pumping talk about an adrenaline at the free your mind conference a bit at the beginning now when we live in the base bring you know the kind of negative effects it has on the entire brain function that bass brain the r-complex is that father there needs to be mastered let's say needs to be checked put into its place symbolically it needs to be conquered okay so that it is essentially gone it does not rule us okay it has been conquered or put down therefore from the positive aspects of the emotional brain the midbrain we bear the sacred child of the neocortex the light if you're confused as to the symbolic unwrapping of this these concepts go back and listen to the podcasts about the brain but essentially these three structures within the brain are the father the mother were spirit and then the divine child which is masculine okay because it is a it ultimately is what governs our actions and allows us to think critically and make decisions about how we will act the neocortex as such since it is born of the divine mother or the mem million brain the limbic brain once the base instincts of the r-complex have been conquered is said to be a virgin birth or the birth of a Widow's son okay the widow is the woman who's whose husband has died so in the the base that the base brain is viewed as the husband and the midbrain is viewed as the the wife or the the widow okay whose husband has died because the base brain is no longer in in rulership right she then gives birth to the neocortex which is the divine child the son okay so this is what the in this is what the virgin birth is all about a the same thing in Christianity the widow's son is born from a mother who has no who has no relationship with the father okay so the widow giving birth to the son it's the same as saying the virgin birth the Virgin who is not known man they were the mother who has not known the father okay nonetheless gives birth to the male child I hope that's clear to people and they understand what's being said here symbolically through the language of the widow's son who is Hiram Abiff who again is symbolically Jesus coming out of his coffin he is the Masonic Christ it's an same allegory but again people don't understand this unless you understand me at the esoteric side of Freemasonry because it's all teaching the same story these are symbolic individuals it's all about you being raised and again the word raised is something that we use with respect to our children most of our children ladies and gentlemen are not raised most of us are not raised the word raised is a Masonic term go back to words and word play okay we are raised when we understand the answer to that question that I posed you can really answer that question you're raised you really know the answer to it in your mind and heart and you don't even need to be told what the answer that question is and you know it how does one know that one is suffering that's how you know you're raised now I would suggest there's very few people in the world in the world that are truly raised not to be negative just to be honest and I certainly would say that most Freemasons in the log system of Freemasonry are ungrazed they are unraised and I don't care who that pisses off or makes angry or you know puts a bad taste in their mouth because I said that most Freemasons and the lodge system are unraised they don't have that key in hand the true key from the first degree board they don't understand the second degree board and they're not really out of the coffin of the third degree board okay they haven't really made the journey up that spiral staircase they haven't gone off the ladder they haven't ascended the middle pillar to have them come out of Hiram Abiff coffin or grave haven't truly received the lost word and they certainly don't have the key of the mystery traditions in hand to understand the answer to the question of the mystery traditions that's the true key so we'll find an appropriate little reward or gift you know a little gift of appreciation for the first person who calls in next week with the answer to that question so let's move on to the next image so there's Hiram f coming out of his coffin and we understand why he's the widow's son now we understand why what the virgin birth is all about and it's these are just reflections of each other in the next few images we're just gonna see a repeated theme of the pillars okay and see different ways that they are shown in Freemasonry and we're going to see imagery that has already come up over and over again okay an image number 8 we have the Masters carpet that's what this image is called and we have again the three steps representing the first three degrees we have the coffin at the bottom or the base that's what incidentally folks this is why they call people the dead and I don't mean real freemasons okay you had dark Mason's okay dark oak cultists call people the dead because they have not come out of that coffin they're still on the they're below the floor of the house in this image they haven't even gotten to the first step they call them the unbe gun they have not been born again they have not even started the Ascension in in the spiritual understanding and the spiritual journey coughing is there at the at the very floor the ground level then you have steps 1 2 & 3 entered apprentice fellow craft Master Mason here we see the three candles of the lodge and a little representation of an altar this is indeed with altars in the middle of three Masonic lodges look like I could actually probably post a picture of it as well maybe I'll post images of my journey to the Grand Lodge with with this podcast so you see some imagery from inside of an actual free Masonic Temple but um the coffin down at the base level the first three steps representing the first three degrees and then the three candles represent the sun's position in the sky as it makes its arc across the sky each day not the yearly position of the Sun but the valley position of the Sun Sun rises in the east makes a arc across the southern portion of the sky and then sets in the west so that's what these three lights represent and the North has no light in it has no candle because it is considered the place of darkness because the Sun during its daily Trek does not traverse the northern part of the sky it traverses the southern part of the sky in the northern hemisphere that is okay so we'll break this image down a little bit more on either later or next week depending on we have time for I know Bob is going to want to have some questions for me and then we can maybe take some questions from the audience so I'm going to connect in with Oracle broadcasting right now and we'll bright mark let's jump into tonight's topic you've been talking a lot about Freemasonry symbolism and let's get back into the slides that you have again at what on earth is happening calm sure so for the listeners who may be joining us on Oracle broadcast and you can see these images at what on earth is happening calm if you click the radio listen page on the left hand side of the site right underneath the player and will say images for tonight Show April 26 2011 and then there will be 13 images listed that you can bring up in a slideshow within your browser we were going through these tonight and we left off at image number 7 we finished up through image number 6 before we get into image 7 what I just want to say here is that people need to become aware that the occult in general and any of the traditions associated with it to think of these things in a unit dimensional way meaning to think that they are all one thing meaning all good or all evil is very naive we have to understand that these are sets of tools they are sets of tools and they are tools that help us to understand and delve deeply into the human psyche and the subconscious and our psychology and our nature ok so that these tools once understood once being grasped firmly in hand by the wielder of them may be used for great good or great ill it depends upon the level of the consciousness of the person who is wielding that tool ok that's the first thing I want to make clear the second thing I want to make clear is that this is a tapestry of information which if you haven't been following along with it through my other podcasts may not make full sense until some of the prerequisites the prerequisite symbols are understood so it would I would highly recommend going to the podcast archive on my site and making your way through that information in which I break down your symbolism in a stepwise progression in a building block fashion so that when we get to more complex symbolism as we are going to do now it will be more readily understood so with that in mind those two little caveats in mind let's jump into image number 7 on what our F is happening calm on the radio lesson page this is a stylized representation of again the Masonic pillars which we've been looking at and we saw the first degree tracing board having these two pillars as their main indeed three pillars and here we see these two pellet this theme of two pillars repeated again but this is in an older alchemical representation this is used in the alchemical tradition of alchemy okay and it is also sometimes used in Rosicrucianism so these are the same conceptual ideas represented as we saw in the first degree tracing board of Freemasonry however there's a little bit different of a take on these we see that they are indeed marked with the letters of the first name that they are given the color of jocking and the pillar of Boaz J and B the light pillar on the left they're represented by the Sun up at the top and a lighter shade to it the darker pillar the pillar of Boaz on the right there has the moon a topic okay and we have the alchemical symbols on these pillars now I'm going to go into this a little bit help people to understand what these symbols are at the basis of each of these pillars and at the top or apex of each of these pillars at the bottom we see on the left hand side a an upright equilateral triangle that is segmented okay was it has its top basically cut okay and then at the right hand side we see an inverted equilateral triangle that is segmenting in the same place so it's like the other the symbol on the left there just turned around 180 degrees on the right hand side let's start there okay that symbol is the alchemical symbol for Earth and as we talked about when we looked at on previous shows we looked at the tradition of of Kabbalah and we looked at the the Tarot tradition we saw this symbol represents what we have at our disposal or our resources that we come into the world with or happen to acquire in the physical world as we live so these are our this is basically the situation we may be born into okay it may be what physical or monetary resources we have at our disposal okay it may be resources in the form of people that are around us that may help us along the way okay it is essentially situations and resources in the physical world okay and it could also be innate talents and characteristics characteristics that really you know we could grow that if we put time and attention into them but know certain people are simply good artists and they're they were good from the time pretty much they were very young and some people are natural musicians some people are naturally gifted dancers there are in hate innate I'm sorry innate characteristics and qualities and talents that we do carry within us that are seemingly not come from experience okay not everyone can sing in Opera like Bud Tuscan can I'm joking yeah you're absolutely right so that's what this symbol represents our resources that we have at our disposal and how we're going to use them in the spiritual journey that we're all on how we may put those to use this is why it is at the bottom of the dark pillar okay and now the dark pillar is not necessarily negative okay it is simply what we would consider spear material worldly identified okay it is the feminine pillar okay but the base of that pillar we need to understand it we're making the journey from the dark side of things to the light side of things from the moon we can look at it but again we don't want to look at this as net positive or negative right we could see that these are inherent things on the right hand side where these are internal qualities on the right hand side right that's why they are lunar they're marked by the moon there to talk of the pillars on the left you've been getting a lot of questions mark I don't mean to interrupt but we'll come up to a break you've been given a lot of questions about the left and brain and and this is very interesting stuff to me so when we get back in a little bit let's pick it up right from there what's more to come so what will we be breaking down later yeah what's what's the autumn well we I had some work images of these pillars to show different representations of them I was going to break down the tracing board of the Royal Arch degree of New York right and I was going to look at a symbol that is uh classically used to represent the the Sacred Feminine when it comes to Freemasonry which is be a depiction of the goddess standing at the broken column interesting alright well we'll get into that in just a moment folks this is the bot Susskind show with mock passio with what on earth is happening now on oracle broadcasting starting this Sunday and of course folks his web site what on earth is happening dot-com [Music] okay we're taking a look at some of the symbolism and whether or not we believe it or look believin it's rather it's not really important because the powers that shouldn't be they love this stuff they they put this stuff right in our face and they know that we can't read the symbols therefore we can't see what's really going on but our friend Mark Cassio has a wealth of understanding of what these symbols represent and Marko I'll let you jump right back into it I think the main thing to keep in mind is ultimately that these are symbols to tell us about us and that's why there's such a power differential when it comes to the so called powers that be over the masses who do not understand these things what these symbols are all about at a fundamental level is what's going on in our psyche and again if you have knowledge of that and you know how that works you can manipulate if you were so inclined to do so people who do not have that knowledge it's it's simply a power differential through knowledge and if you can occult that knowledge right you can then certainly wield it as a weapon against those who it has been occulted from or hidden from where's all that word means so we were looking at image number seven and this is a alchemical depiction of the the pillars of the temple of Solomon the Sun and Moon okay Jah keen and bolas and we were looking at the symbol at the bottom representing the resources we have at our disposal and understanding the pillar of Balazs where the lunar pillar itself represents the internal qualities of the individual and we can see that at the top because we have an inverted triangle with no separation between it this is the alchemical symbol of water water okay and this represents the emotional dynamics that take place within an individual okay so this earth would be your resources okay and then at the top of the feminine pillar we would have water which represents emotions so we need to develop care first and foremost before we start making the journey regardless of what we have or do not have as far as resources go that anchor us you know in the physical world right regardless of what we have or do not have in order to start making truly making the journey out of darkness and into light or away from the dark and toward the Sun okay we need to care enough to do that to come out of darkness is to come out of ignorance and to go towards the light is to go towards knowledge that's what these concepts symbolically represent okay so we see that then the journey continues at the base of the pillar on the left-hand side the pillar of Jing the solar pillar now this is the alchemical symbol of air and air in the and the symbols of alchemy represents intellect or knowledge okay so you're you're starting with base resources you have to care enough okay in order to begin that journey out of darkness and toward light and then you go to the base of the pillar of jocking and you see that represents the beginning of knowledge you're coming out of darkness and into the light and that is the symbol of the intellect okay so that's air the journey is not finished by just knowing however see that's called the basic concept of understanding but understanding is doesn't isn't the thing that really puts you toward true enlightenment what puts you toward true enlightenment is acting upon what you understand okay so wisdom is the application of knowledge in a way that serves that which we truly are so the very top of the left hand teller they're the solar pillar it was a tiller of act again the lunar pillar is we should look at it as negative we should look at it as internal qualities okay the emotions are internal qualities however action is an external quality okay so the top of that solar pillar is there that upright triangle represents fire okay fire represents action I'll chemically symbolically okay so these are our actions what these two pillars are ultimately about are the internal qualities of the being on the right hand side and the external qualities of the being okay so what we know about what's going on around us and what we do with that knowledge on the left-hand side now the idea is to synthesize them or unify them to bring them together and you see the left-hand side the latin word popped hair hot hair means father and on the right hand side the the scream of light coming out of the other so the left hand side the scream of light coming out of the Sun says Potter which is father because that's the male side and then on the right hand side we see coming out of the lunar assemble the moon symbol mater which means mother so father and mother male and female coming together to bear the child the sacred child into the world and that child is the synthesis of our emotions and our actions we can't simply know that something is right or feel that something is right we have to act upon it you have to act with with right action in the world take right action in the world not just no but to do with with what we know again I've said on my podcast many times a great philosopher from the east Yong Ming said that to know and not to do is not to know you don't have real wisdom if you're not actually acting upon what you know to just say I know that and I and I'm done is a spiritual huge mistake because wisdom entails action okay it's not just a feminine principle it's a feminine principle combined with the masculine principle of action to create a manifestation in the world which is symbolized by the third pillar which would be the child now here it's symbolized by the union in the middle that circle with the two triangles joined okay is the symbol of physical and divine worlds okay it's basically means bringing the kingdom of heaven to the earth okay making this place a better place more in line with our true spiritual divine nature okay that is a part of all of us and that we are a part of it okay it is improving the world in which we live for ourselves and our posterity that's what that circle in the middle represents and you can see down at the bottom where that this a checkered floor is you'll see that as a theme throughout Freemasonry and other occult traditions if you look at the word down there it's inverted and it's in Latin and it says in furious inferior simply means the lower or the inferior okay and then at the top above Potter and mother joining and receiving the other symbols of the planets the planetary symbols or the gods so to speak symbolically in the heavens we see the word superious written which means the greater or the superior okay so that's the divine world is at the top the realm of the gods of higher consciousness and the lower world or the earthbound consciousness the material identified consciousness is the lower world and our goal is to bridge those and essentially through higher consciousness or through climbing these pillars to make the physical world a better place were much more like the divine world the spiritual world so that's what that's all contained in these symbols and again this is my interpretation of them I think I have a fairly good handle on all of the symbolism as I've studied it for many many many years but hey there are other interpretations my word isn't final on anything you might contemplate upon this symbol and find things that I've never seen in it so that's what I would encourage people to do contemplation bridges the brain hemispheres it uses the left and the right brain simultaneously and it helps to bring us to the place of balance which is indeed where we need to be if we're going to turn on our third eye and ascend to a higher modality of consciousness well they want to continue to go after our third eye and of course fluoride calcifies the pineal gland which is that tiny organ in the brain that scientists believe is the center for spirituality it's the place that secretes DMT

What On Earth Is Happening Show #058

Topics: *Debut Show On Oracle Broadcasting, On-Air Contest, Mystery Tradition Question, Occultism, Masonic/Alchemical Pillars of Jachin and Boaz, The Royal Arch*

[Music] alright ladies and gentlemen we are back on what on earth is happening I'm your host mark pasty oh my website what on earth is happening calm and for the first break there I was sort of giving the new listening audience here on Oracle an idea of what to expect of this radio broadcast as it will be going out every Sunday from 4 to 6 p.m. central 5:00 to 7:00 Eastern again what I do here is talk about causal factors of what's creating the reality that we are experiencing and I get very deep into these topics and they form an in-depth tapestry so we'll be talking about topics as you heard in the intro such as human consciousness mind control and all of its various methodologies natural law the understanding of how what our thoughts our emotions and our actions the the ways that we use them actually create what we are experiencing around us and that those dynamics have discernible laws that we can come to understand and therefore employ to our benefit and if we remain in ignorance of we will continue to experience suffering a big part of what I do here is attempt to explain to people the causal factors of human suffering of self generated suffering and there's that's going to play into this show tonight because there's a contest that I'm actually holding for the first show which we'll get into in a few moments I again as I said I also discussed the occult in depth and later on tonight we will be continuing a discussion that I've been doing on the show previously because I've actually been doing this show through different forms of media over the past 13 months on other networks and so the show is an ongoing tapestry so we'll be actually picking up sort of you know in the middle I guess you could say and I want to let people know that they can go to my website at what on earth is happening calm and sort of get caught up on what we've done up to this point now I know that won't really help out you know brand new listener as much but if you go back and check out the podcast page and look at all the podcasts I've done up to this point on my podcast page on my site and you take that material in okay you will see how the tapestry that I'm weaving here works and you'll basically be able to catch yourself up to the to get the prerequisite information that you need to understand what we're going to continue talking about down the line here on this radio show so with that having been said I want to thank a few people for helping me out to get to this point of where I'm I have a show hosted on a great network like Oracle and the first person I'd like to send thanks out to his Bob Tuscan who is another host here on the network Bob helped me out from the beginning starting my show over a year ago and he's been a great help in any way that you know I may have needed his help over the past year and I encourage everyone check out Bob's show the Bob Hoskins show that's every weeknight on Oracle had 8 p.m. and check out Bob's site Bob Tuscan calm the next person I'd like to thank is Doug Owen one of the co-owners of Oracle his site blacklisted news.com and I want to thank Doug for taking the show on to the network and for all of his help in in getting me started here so go go and thank you very much finally I'd like to thank my partner

Barbara who deserves to be sainted for putting up with me it's the course of our daily lives but she's just been of invaluable help and I can't say enough about how if it weren't for barb helping me out in my life I would not be able to continue to do what I do so barb thanks so much from the bottom of my heart I love you very much so with that being said let's jump into some of the topics that we're going to talk about here this evening so I usually begin the show with event announcements okay and I have one event announcement for tonight and the reason I do this is because I think bringing people together is one of the most important things that we can do as truth tellers okay what this information is all ultimately about is taking action okay knowing is not enough so many people sit on the knowledge that they have and they don't take action with what they know this can often be fear-induced they may fear the hassle that goes along with taking knowledge they may fear the reprisals that may come of actually speaking out and taking knowledge in their own rights okay however this is what this show is ultimately intended to inspire in others it is intended to inspire action right action in the world so when I read event announcements even if they're not in your in your area which oftentimes they will not be I'll usually read it announcements that are taking place around the area that on that which is Philadelphia PA however the the goal here is to bring people together for common causes that will assist the general cause of true human freedom so all of the event announcements I read have that end goal in mind so I'll start off with one simple event announcement for this week then I'm going to announce the contest for tonight which I came up with the idea of doing last week and then I'll give the call in numbers for the show for anyone who wants to attempt to answer the contest question and there is a prize involved which I'll explain in a moment so the event announcement for this evening I have is regarding an organization that I am involved with and here in the Philadelphia area called the Tesla Science Foundation Nikola Tesla was one of the greatest inventors if not the greatest inventor who ever lived he basically brought us all of the possibilities of the 20th and 21st centuries because he brought alternating current which is the form of electrical power generation and distribution that we use in all of our homes and essentially that made the Second Industrial Revolution possible and gave us all again all of the modern conveniences that we have today so Tesla's name is essentially removed from the history books because he wanted to take his technologies even further and provide free wireless electricity for the entire world and this was possible through standing wave technology also known as non hurting waves or a scalar wave some people call them and he would basically send wire wire wireless electricity actually through the earth as the medium ok the earth would actually act as the wire believe it or not Tesla proved that this was possible he began prototyping this model at Wardenclyffe off of Long Island New York and eventually he was shut down by his own financier to finance the project when they learned that this would have leveled the playing field of energy for the entire world so Tesla is a name that everybody should become familiar with if they're not already I'm sure many of the listeners on this network are aware of Nikola Tesla but there's a great group here in Philadelphia called the Tesla Science Foundation you can check out their website at Tesla Science Foundation org and they're having as they do every July around Tesla's birthday a celebration based on Tesla and his technologies and I'll tell you a little bit more about that after this next break you're listening to what on earth is happening [Music] alright folks we are back on water Nashville to dispatch I hear on local broadcast network find their host Mark Hasse oh my website what on earth this happened calm before the break I was starting to tell people about the Tesla Science Foundation here in Philadelphia and the Nikola Tesla energy independence celebrations that they hold every year in the summer around Tesla's birthday and this year there's going to be multiple events going on as part of this this conference that they hold each year but I want to tell people about one of them and I'll be telling you more as they announce new events and locations but the first is the 2011 Philadelphia Tesla science conference this is going to be happening July 7th 8th 9th and 10th here in Philadelphia at Liberty to place Liberty to is at 1601 Chestnut Street in Philadelphia the conference topics include ether theories alternative energy exotic propulsion technologies electrogravitics electrotherapy Tesla coils and of course the wireless transmission of power this conference is open to the general public and is only $100 to attend for all 4 days students with a valid student ID will receive a 50% discount and can get in for all 4 days for only $50 you can register online at the Tesla Science Foundation's website at Tesla Science Foundation org I encourage everybody to check out this great group and get involved in in the work of trying to complete the vision that Nikola Tesla had for the future because as I said many many times the control of energy is the control of human beings and until we develop true free energy technologies we are going to be under some form of control or another so that's the only event announcement I have for today and I would hope that people will follow up on this great conference and attended if it is within their power to do so definitely check out the Tesla Science Foundation they're a great group of people so the contest let's talk about this we have a contest on going tonight on the show and it is a single question that there is indeed a single answer - last time on the show I was talking about mystery traditions okay basically mystery schools of the ancient world and we were talking about how these are the place that modern mystery traditions like Freemasonry or Rosicrucianism are derived from they're actually a much older esoteric tradition from which these modern institutions pull many of their teachings and I was liking Freemasonry second degree to a an initiative tradition of the ancient past particularly in Egypt what was known as commit long long ago and this tradition the Commission mystery tradition would essentially reserve some of its higher order teachings for people that they knew would not abuse them and they needed to display a fundamental piece of knowledge in order to then be passed on to go into the higher-level teachings because the teachers of this mystery school were fully aware that if someone did not enter some of this higher level knowledge with the right consciousness okay that they could enter it with ego and in doing so they might take some of that higher level information perverted twisted and perhaps use it as a weapon against those who were not at that level of knowledge in their own experience in life indeed unfortunately this is what has happened in the world that very scenario is what actually occurred that is what the occult simply is for people who again will hear this word occult or mystery traditions and immediately think evil the word evil is the first thing that comes into your thought process that is a form of mind control the actual meaning of the word occult simply means hidden it is based on the verb in the Latin language occult RA and I would highly suggest the people to attempt to think of the word occult instead of as a noun which people immediately think of it as and give it as a verb because that is what it is occult RA which is where the word of cult comes from is a verb in Latin and it simply means to hide to conceal or to keep secret what we're doing on this show and have been doing for thirteen months it is revealing via the world of the occult that which has been hidden from our eyes and when we truly understand what this body of knowledge is it may come to surprise some individuals because what it really is is information about ourselves it is information about how our own psyche functions and operates what our motivations are ok how our thoughts emotions and actions create the world that we see around us collectively that's what the the occult teachings are all about whether anyone wants to accept that or not is their own business but that is indeed what the occult is now the reason that that has been hidden from evil is largely because this body of knowledge was hijacked by dark Oh cultists and it was then used as a weapon against people who did not have that same information so in other words ocultism in the modern world as it is being you is a form of a power differential that you've heard the term knowledge is power and I would actually disagree with that knowledge isn't power in and of itself okay applied knowledge is power acting upon what you know becomes powerful so what the dark Oh cultists who are ultimately the Masters of this reality right now as it stands that is unfortunately true that is unfortunately the case they are controlling the entire game here so to speak the reason they are able to do this is because they are in possession of this information which they have subsequently occulted from the rest of humanity and I know this firsthand because I worked in occult orders in my past and I've talked about this previously on former shows we can get into it in the future in future shows but essentially what I'm trying to explain to people is that the occult is simply information that has been hidden that's all it is the the mind trick in words that is played upon people is to get them to associate the word occult with evil okay now don't get me wrong there is such a thing as Satanism okay there is such a thing as dark occult ISM no question about it I know this firsthand however what I'm trying to explain is that the information that is contained in the occult is simply a tool and it's the consciousness of the wielder of that tool that determines what that information is used for so this is a critical thing to keep in mind and we cannot fall into unit dimensional thinking about any given topic least of which is the occult because it is not simply one thing which many people fall into the habit of believing that it is with that in mind I want to tell people about the contest and tell them what the prize will be and then give the call-in number so oh we're cut off by the break music once again they sneak up on you like that but right after this next break we'll get into the contest and give the Palma numbers and hopefully we'll have a winner tonight on the air you're listening to what on earth is happening be right back okay we are back here on what on earth is happening under host mark Casto my website what on earth is happening calm this is a new show on Oracle broadcasting from 4 to 6 p.m. Central that's 5:00 to 7:00 Eastern Time every Sunday so before the break I was getting ready to announce the contest that's going to be going on on the air tonight and hopefully we'll get a call or call in and win the prize a little trinket that I have here for anyone that can answer the question of the mystery traditions so this was a question that would act as sort of a form of insulation or a buffer and the people who could not answer this question of their own volition they could not come to the understanding of the answer to this question in their own mind in their own heart would not really be passed on to the higher levels of knowledge that were available to mystery tradition initiates because it was basically deemed at that time that that knowledge was too dangerous to pass on to someone at the state of consciousness where they did not understand the answer to this question so that's the the background the framework which I kind of came up with this contest idea last week when we were talking about the second degree of Freemasonry and how it related with this iniciative tradition of the ancient past so the question of the mystery traditions which is what we are seeking a correct answer to this evening is simply this how do you know how do you truly know that you are suffering I'll repeat the question one more time how do you truly know definitively know that you are suffering that is the question of the mystery tradition schools okay that would separate lower-level initiates from higher-level initiation they needed to understand that dynamic in order to be passed and as I said last week on the show um I was talking about Freemasonry or I should say earlier this week that most modern Freemasons should not be passed the second degree and I know that's a controversial statement to make and I will stand by that statement because it is indeed true most modern Freemasons of the Lodge system of today could not answer that question and they do not hold that key to the mysteries in their mind and in their heart that's sad but that is the case and again zharko cultists have infiltrated every area of society and turned what was what should be traditions that are teaching esoteric truths into nothing but social clubs that are actually seeking to find psychopathic individuals to pull them up into the higher ranks to further agendas that were never intended to be even entertained at all in the true esoteric forms of these traditions but they are horribly fallen ladies and gentlemen to understand the true esoteric core of any given tradition is not to associate that with a modern institution and as I've said before we can understand true esoteric Christianity in a highly different light than modern institutionalized organized the a modern institutionalized organized religion called Christianity the two are almost antitheses of each other okay and share very little in common sadly the same could be said of Freemasonry of esoteric Freemasonry of the ancient world compared with what Freemasonry has become in the lodge system of today and again when I talk about and teach the symbols of Freemasonry which we're going to look at a little bit later I'm not talking about the modern logic system I could care less about that system and I don't encourage people to go and run and join it all of the information of Freemasonry is available to anyone who wants it ok there's no secrets in the craft as I've said many times and we're going to talk about lots of occult traditions ok we've already discussed Tarot in some depth we've already looked at Kabbalah in quite a bit of depth we've looked at Freemasonry and probably the most depth of any tradition I've looked at so far but we can even though we might even go into dark occult traditions on this show and look at Satanism look at luciferianism dark luciferianism okay we might look at Rosicrucianism in the future on this show and I'll again I penetrate these subjects fairly expensively because they're not something that are just to be skinned you need to understand the symbolism you need to understand the allegory ok how there is a symbolic story being told through the symbols through the rituals of these different traditions ok and it's rich symbolism okay that has prerequisite understanding in order for some of the more complicated symbolism to be understood and symbolism is important to understand I can't stress that enough really what we're doing on the show is this is an extension of the section on symbolism which I've been looking at as a form of mind control if one does not understand the language of symbols then they could be used to go in right into the subconscious mind right past the conscious mind and basically dictate behavior so symbols are a hidden language so for anyone that wants to attempt to take a crack at the answering of that question for the contest let me give the call in numbers and then I'll tell you what the contest prize is for tonight the calling numbers for the show if you're on a cell phone and you have free weekend service I encourage people to use this first number five one two nine zero four eight zero one four five one two nine zero four eight zero one four if you want to call the toll-free call online you could do that as well that number is eight six six eight four one one zero six five that's a good option for people who may still have a landline once again the toll-free number is eight six six eight four one one zero six five the prize for whoever answers this question right it's nothing you know huge or gigantic it's highly symbolic but it in many people's estimation does actually perform a function i haven't listed on the website on the radio listen page which by the way i'll be referring to that page often that is if you go to what on earth is happening calm and you click the upper left hand of button there that says listen live okay if you're not already listening through there i will often put images that are associated with the concepts and ideas that i'm going to talk about for visual reference for anyone that has internet an internet connection and wants to listen along while i'm talking about some of the symbolism and ideas you can do that at what on earth is happening on the radio listen page you click that right on the left hand side there and it will show you the images listed there in a sort of a slideshow type format so those images are from a little bit later on and the prize for tonight is an organized pyramid an organ aight pyramid now this substance called orgonite was essentially put forward into the world by a gentleman named don croft and he based his research upon the works and research of wilhelm reich okay who talked about oregon as a form of energy that is the underlying lifeforce energy that is essentially all around us it's very interesting research and work i am not an expert in this field by any stretch of the imagination this organized pyramid was given to me good friend and a fellow speaker at the just recently passed free or mind conference here in Philadelphia we had a conference earlier actually last month on April 9th and 10th here in Philadelphia called free your mind a conference on consciousness mind control and the occult it was tremendously successful we had a full house both days and one of the other speakers who spoke about the dark aspects of the occult was a gentleman by the name of Jay Parker and he gave me this organized pyramid as a prize for the mystery tradition the person who answers the mystery tradition question correctly on the show so the question is how do you know definitively truly that you are suffering and the prize is a about four inch tall orgonite pyramid beautifully made by Jay Parker a good friend of mine and a fellow speaker at the free your mind conference so you have the calling numbers feel free to call in at any time another thing I'd like to say about the the calls into the show is that there are no taboo topics as part of what on earth is happening and there never are so when you call in anything is on the table and that will be the policy as we go forward on this show I don't limit people's speech I don't expect them to limit mine so no taboo topics ever here on this show there's the break music we'll be right back and take some calls you're listening - what on earth is happening I'm mark Pesce the right back [Music] I we see the same things all the way to the minerals in community okay No alright folks we are back on what on earth is happening on your host mark passio my website what on earth is happening calm I think we have a few callers on the line that may want to take a crack at answering the question for the contest for tonight to try to win the orgonite pyramid let's go to the phones there we go that's let's give this a shot caller you're live on what on earth is happening can you please state your name and where you're from it may your hearing your name and where you're from yes I can hear you thanks Louise Anna hi Dan how are you would you like to take the shot at answering the question or the contest okay and then first ask it the other day and I have to sit with it for a few days kinda expanded my answer okay so my initial answer was if somebody else is up rang I thought about it sir yeah that is the correct answer to the question you have you were rot you simply arrived at that by really pondering the question on your own that's that's great so our unit so we have a winner folks the first person who called in amazingly gets the answer correct and the answer is if there is one other that is suffering you are suffering that's the answer there it is right there simply put in plain language that's the answer and think about that deeply ladies and gentlemen and understand why the mystery traditions of old would not have passed anyone up through the higher ranks of this esoteric knowledge without holding that knowing deeply in their mind and in their heart that is the key to the mysteries to all mysteries that's the key to stealth understanding the law of one that there is no separation between what we consider ourselves and others that's what it is all about right there so then correct yet phenomenal I would shake your hand if you were in the same room just brilliant so are you comfortable sir in giving your email address to me over the air or do you like me to just place you on on mute and you can wait until the break and I'll take your email off the air what would you like to do you can give me another cup recently 21 okay hold on just give it to me one more time okay hey-ey yes 21 okay I'll repeat it ke y z ER s oze yeah 21 Act a oh well doc oh yeah great I'm gonna get in touch with you after the show and I'll get your um your mailing information and I will get this little prize boxed up and sent out to you just a great job sir I can't congratulate you and often like I said I would shake your hand if we were in the same room together because to arrive at that understanding is to certainly have progressed an extremely far away at the journey and consciousness in life so birdie job and thank you and I'm shocked that the first / first caller to the show gets the answer correct I thought this would be a long one but phenomenal job you have anything else for us while we have you on the line thanks so much I'll be in touch tonight okay you take care incredible um so thoroughly impressed as I always end with all of the culverts that call into this show I've said before that the caller's who call in to my show are the best callers on any talk show a particularly internet talk radio and I continue to be astounded by the the quality and the caliber of calls that we get and the depth of knowledge which is displayed by the callers so I would hope that that trend continues here on Oracle broadcasting and I can't tell you how energized that makes me feel that first person who calls in gets the answer of their own recognition just fantastic so that wraps that part of the show up so we do have a couple of other callers on the line I believe so let's continue to go with calls and then in a little bit we'll go to some of the material that I had planned so here we go all right caller you're live on what on earth is happening you want to state your name and where you're from and tell us what you have for us Christopher Ottawa Canada hey how are you Christopher fine thank you a remarkable question and that's a profoundly moving and amazing that your show with Ben as a guest that was just magical absolutely mark my background I'm a clinical forensic psychologist who studied the occult for 40 years and have written a book on the nature of human consciousness did I share a few of what I've discovered through my researches sure the whole of modern psychology is denied spirit and soul for over a century and that was part of even the protocols of Zion is to promote Darwinian ISM and existentialism and Marxism and to deny human spirituality and the soul life and the whole of modern psychology and the investigations of consciousness has assumed the consciousness is produced by debris and the mind in the head and I'll call that the head doctrine okay yes my studies through my life of a scary mystical teachings is that all the esoteric tradition says that the true self is connected to the heart and consciousness into the human beings originates out of the heart and in the body consciousness is connected to the blood flow and the circulation of the oxygenation of the body through the blood and consciousness in his light of light because the self within the heart is described as inherently self-illuminating like the Sun in a sense it's a God's spark or a divine element or the spiritual self within the heart and the light of the self within the heart if you were waiting in God that's the basis for higher states of consciousness and levels of Samadhi and the light of the self within the heart can then be brought out and he can experience a higher 3 higher chakras and an including the awakening of the 3rd eye yes now a person in life would not want to awaken the 3rd eye as you said like so profoundly if you're in false ego right in the mystical tradition self-realization is defined as the dissolution of the false mind into the Lotus of the heart and in the Hebrew tradition they say the truth is under your nose the whole time under your nose is within your heart and often when I give lectures on consciousness I play a pointee game where are you ask people to point to the wall of the ceiling with their left foot in their right ear and then I say point to yourself and no one ever points to their heads right instead the majority of people talk point towards their heart always yes well a lot of people are confused because they think about the answer and they kind of point towards their throat area because there's confusion between the mind in the head and the self within the heart the heart business design the center of the self that's the very center of the shopper system I talked about this extensively on previous shows we talked about the chakra system when we were talking about Kabbalah and talked about the center of self when we talked about the first degree tracing board because the middle of that board is the green initiate upon the ladder with the key and that represents the heart chakra the anahatha chakra of course is the green lotus flower okay and that key is the key of care which does not unlock the mysteries unless one truly understands the connection that one has to everyone around them and to the entire universe for that matter so that is a very profound information and I think that more psychologists really need to understand this and come forward and embrace this because what the occult what the dark occult really is is a perversion of psychology of ancient psychology that has been understood for millennia and using that affirmation to basically gain leverage over other people in unfair ways and and basically exploit them in their ignorance of those same concepts and ideas exactly tonight this share very quickly one or two of the for free right now I'm gonna hold on the line and I'll bring you back kick for thank you much we'll be right back folks you're listening the one on earth is happening [Music] [Music] addition now firstly you say about in my studies of esotericism you have to regard human beings as three grains beings to function mentally emotionally and physically head heart hands exactly as you were saying but what is consciousness is consciousness just thinking and feeling and sensation no consciousness is something separate from what I recalled the psychological functions like you can be aware unconscious of parts you can be conscious of emotions you can be conscious of sensations but the consciousness is something different than thinking or feeling or sensation and most its consciousness is most similar to light and if you have light in your room it'll is illuminating so you can be aware of all different objects that are illuminated by that light similarly a human beings has this inner light within themselves and that light allows them to be illuminate the mind illuminate their feelings and their sensations so consciousness is like the light and we can have more or lesser of that so that's one point 110 a a second was you know how the Star of David is the symbol of the heart chakra yes and the heart the Star of David is a sacred symbol not only Judaism of Kabbalah but also it was called Vishnu shield and it was sacred in all different esoteric traditions but the Rothschilds have perverted it and the way they perverted it in a way they ate the Tsar of David but it has no central point like if you put the Star of David in the heart the upward turn triangle represents spiritual nature and the downward triangle represents the element of water like a human or the material nature and the heart is the seventh of the point in the center of the star of david' so that's the flag of Israel has this sacred symbol but there is no I in the center there is no self it is soul lusts because these people are soulless they lack the capacity for divine conscience there they're degenerate in their heart functions and so their heart is controlled by the three lower chakras which govern the motivations of money sex and power and they're obsessed with money sex and power like you for Kissinger he says powers - okay he's a hostile Aziz the psychopath this idea of power is a false one it is it is not what true power really is it is the use of undue force that one does not actually have a right to take under natural law against other beings natural law rights not not that should not be infringed upon yet they do it anyway because again these are psychopathic individuals the dark occultists of the world who ultimately control the monetary system and are actually the unelected hidden rulers and thrown behind all systems of government and financial institutions in this world and now though these concepts that you brought up first and I want to thank you once again for bringing up all this information and it sounds like you have a pretty good handle on this but this these concepts are things I have actually discussed in depth before on the show and you can check that out in the archives on the podcast section of my sight I'll make my welcome back everyone you're listening to what on earth is happening here on the Oracle broadcasting network I'm your host Mark passio my website is what on earth is happening calm and we've had some good callers in to the show so far I'm going to continue with this and we have one other caller here waiting to go on live this is this is Keith from Arizona Keith from Arizona you are on live on what on earth is happening what do you have for us well thank you I'm very happy you have a show now your subject matter is something I've been interested in since I was a little kid I was gonna gasp on your thing that what the answer to the trivia question my guess was going to be because you're alive a lot of people would take that approach and it I I don't agree with the contention that life is suffering there is suffering as part of life and some of it is self generated and there are solutions to that self generated suffering but it's basically up to us whether we inflict self-inflicted pain I'm not going to say that just being in a physical universe it will not contain some form of of suffering in some form or another but the real deep esoteric answer to that question is indeed that if any suffering is taking place around you you know the Baloch you hey it was a great question and I was very impressed with bender figured it out all by himself you know without searching on the net that was amazing yeah it was the first R in caller - I thought very impressed as well and all he deserves the little prize that we have anyway the one quick thing Tesla is my biggest hero of any incarnate being you know any anything that's ever incarnated well me I don't know maybe Jesus I don't know but he the experiments he did to set the earth into electrical resonance he actually did a Colorado Springs and he was gonna build a huge one at Walden cliff and when Jason Morgan found out it was going to be unmetered free energy and communications all over the globe that he pulled the plug on it yep especially communication I mean imagine free communications how much are you packed for phone and Internet no yeah according to Tesla I would have literally unlimited channels yes I don't know how that would work I have built my own Tesla coil which is kind of a truck and I used to build a Tesla coil that event I would encourage people to go there's no fun when you go to those kind of events you meet like-minded people when I go to him I just I just my favorite thing is meeting all the neat people and talking to the speakers actually and for a bunch of people here in Philadelphia as part of the Tesla Science Foundation it's one of the groups I'm pretty you know the most excited about working with in the area and there that you know the leadership of that group knows what could be done with this type of technology in hand given to the people for the betterment of mankind and that's what they're really working towards you know they have a good ethic ethics is a huge part of this organization and I'm proud to work with them and again like you said when you come out and work with a group like that the kind of people that you meet are just like really wonderful people so I encourage more people to get involved in topics like that as well I still have friends from years ago okay yeah we are kind in contact with and we talk and stuff so it is a great great kind of venue to go to one of my messages to people these days is to be a good hard don't let the fear get you down be kind of fun we are creators so we literally create reality and I don't just mean our paradigm thinking of this way I mean with the physicality that we're in we literally spin it around us and we collectively do this together and I believe we we consist this world in a second if F of us just decide to and it probably doesn't even take much maybe a couple percent I don't know what do you think I agree that it could be you know the difference between can and will there it's often a large difference whether we will choose that reality is up to each one of us and you know your own times it sometimes it does require time because there's a lot to unlearn people have a lot to unlearn a lot of baggage that they've taken on and have a lot of attachment to that's one of the main things that a lot of great teachers have have attempted to teach people that what about what's related to why we suffer it's it's the attachment to certain ideas and ways of doing things it isn't necessarily that um you know there's something has just dictated to be that way it's that we are attached to having it that right and we have a hard time letting go of things that may have once served us in the past maybe not even then but even if they did when times change we want to we will resist change and we don't want to let go of that which we used as a tool in the past but now it is no longer serving us and in many cases it has become the master so the ego is like that you know the ego is a tool it's better to simply be employed you know in order to do things in the physical reality in which we live you know and I'm talk I'm not talking about you know the hot like runaway ego I'm talking about simply the force that helps me to understand you know that if you put your hand out to hand me something that you know I can put my hand out and take it from you that's what I mean by the simple ego I'm not talking about an ego out of control you know where identification with the ego you know the ego is just a tool to make things possible in the physical domain it's the attachment and identification to the ego that creates all the suffering that we see around us the attachment to the physical you know at the expense of the the spiritual side of ourselves we need to integrate those boats and understand that we are a spiritual being living in a physical reality we are spiritual beings having a human experience yeah and I again with stress we are creating this reality I'm solution we have to own our own responsibility in the fate of the world that's what it's all about that is the the highest message or gold I'm attempting to get people to really grasp at a high level is what true responsibility is and that each person truly owns themselves they are sovereign beings by nature of their birth into the cosmos they are sovereign and that means you are the owner of your own thoughts your own emotions your own actions and ultimately it is only you who directs those three things and that's what creates manifestation in the physical world and that becomes what we are experiencing collectively the sad part about where we've arrived that collectively is that most people have abdicated that true personal responsibility and want to basically point fingers or play a blame game and say that other people made me do it or I had no choice there's always a choice and we need to own that choice in our own lives and that's what true responsibility really is we make the decision ultimately about how we behave yeah it's very easy to be in denial and I take responsibility for the place you are I'm very encouraged I see this information spreading like wildfire I've been a guest on some talk radios and I call it some time to come in and it just means more and more people are starting to figure out something's wrong and are looking for answers and they're finding people thank you and it's wonderful NetWare I love work with my favorite networks I think that has the best lineup and it's not compromised like many others keep us the intro music for this next break I want to thank you for calling you brought up some great points and I agree with you this is a great network and I'm proud to be a part of it [Music] alright ladies and gentlemen we're back on what on earth is happening great great callers into the show today I'm always impressed with the quality of callers like I said before but for the last three segments let's jump into something else that I had planned which is continuing on our breakdown of the symbolism of Freemasonry and I want to direct everyone up to my website at what on earth is happening dot-com for those of you who may be listening at your computer if you are not I always post these images with the podcasts on my site on the podcast tab of the of the website so you can always pick these images up later when you are at your computer if you happen to be listening in some form of a with some form of a mobile device so with that being said go up to what on earth is happening comm click on the listen page the radio listen button on the left hand side of the site that will take you to the player page and right under the player you will see images for tonight's show and there are I believe 12 images listed there that are connected with Freemasonry and again this is an ongoing tapestry if you look in the podcast section you'll see that we've been talking about Freemasonry for many weeks now so there are prerequisites to understand some of the symbolism that I'm going to continue to discuss if you feel like you're lost don't panic just go to the podcast section and pick up either from the beginning which is what I would highly recommend or at least from the beginning of the Freemasonry section so I'll attempt my best to give very brief reviews of certain symbols so in image number one we are seeing an image that I began to break down last week and this is from the alchemical tradition which is very closely related to Freemasonry some Rosicrucian schools also will use this image okay so this is a old depiction of the pillars okay these towers we saw when we looked at the first degree tracing Board of Freemasonry and pillars play a prominent role in the symbolism of Freemasonry in general they ultimately represent the masculine and feminine sides of ourselves okay that's what we have to understand about symbols is that they are used to encode information okay so this image that you're looking at here isn't just a series of symbols and and drawings it's essentially a book it's a story okay that unravels okay and delves deeply into the psyche the nature of self-consciousness etc I know that may be difficult for people who are unfamiliar with symbolism to accept or to believe at first but if you follow through the tapestry that I've continued to basically put piece together here over the many weeks I've been doing this show okay and that's why the podcast section is just a great resource of information for that and often with many links to documents and to images related images and related videos it's a wealth of information and its own right that one single page so I highly encourage people to make use of it this symbolism will begin to make sense if you have the building blocks in hand in order to decode it okay so it is a form of encoded information now ultimately what the checkered floor they're down at the bottom of the image represents is lower consciousness base consciousness okay like the caller said of the psychologist caller Chris said earlier we basically have a threefold nature and that we have a three-fold physical brain and this is information I've broken down extensively in the past on the show and again it's in the podcast archives on my site we have a reptilian brain a mammal brain and a human brain these are the constructs of the brain the are complex or the reptilian complexes based consciousness it's our lower lower level of instincts okay that drive lower-level material world identified behavior alright so the fight or flight response is governed by this part of the brain simple physical respiration and motor function all right fight or flight response is if you're attacked if you're under direct physical threat you have to make a choice if you want to run and attempt to escape the physical danger or you want to stand and fight okay and that's the lowest level of consciousness there is is essentially pure concern or identification with the physical matter and physical surroundings survival only based consciousness okay from a fear minded perspective so that's what that floor that Shepherd floor represents being as low as you can go you haven't really begun coming out of animal type qualities all right you're still identified with that reptilian brain now the the pillars represent the spiritual journey into higher states of consciousness through the integration of the masculine and the feminine aspects within our self these are not external qualities they are internal qualities so we see there are four symbols on these pillars two on each one one at the base one at the top of the pillars and they are the alchemical symbols of earth air water and fire earth being at the bottom right hand side of the image okay the inverted triangle and it is sect segmented okay this is at the bottom of the B pillar the B stands for Balazs which is what this pillar is referred to as in Freemasonry the pillar of bolas these are the pillars that were outside of the temple of Solomon because the Seal of Solomon were wood is known as the Star of David as the previous caller also mentioned is the unification stands for the unification of the spiritual and the material and the unification of the masculine and the feminine okay it is ultimately about the unification of our emotions and our actions that's ultimately what this symbol represents okay so down at the bottom of the b-pillar right the darker pillar is the symbol of Earth now this represents what we basically come into the world innate qualities all right maybe our physical attributes maybe the innate talent that we may have and be good at all right the circumstances that were born into the surroundings our physical environment our mental environment as far as the other people that we are born around etc in other words earth represents our resources and our surroundings when we go farther along the top of the pillar of Boaz there underneath the moon because this is the lunar or feminine side okay these are about innate aspects all right the unseen that which is not carried on the outside but that which is pretty much dwelling within us okay so we employ our emotions in the world that's one of the main ways that we basically navigate the space that we're in our emotions our guidance system okay it's like I liken it to a compass okay we need to have compassion to have a compass or direction in life that's ultimately what guides our behavior all right so at the top of this pillar representing the higher consciousness not just what we have as far as RNA talents or sir or what's in our surroundings but what we truly have is our makeup within ourself the inverted triangle there up at the top of the pillar on the right is the alchemical symbol of water okay and this represents our emotional qualities hey the types of emotions that we display there's the intro music for the break I'll continue to break down this how chemical symbol of the twin pillars after these messages you're listening to what on earth is happening here on Oracle broadcasting I'm your host mark Castillo we'll be right back folks [Music] welcome back ladies and gentlemen you're listening to what on earth is happening on their host mark Hasse do we need last two segments I'm just going to jump right back into the breakdown of the symbols they're listed on what on earth is happening on the radio listen page we're looking at image number one the twin pillars and this is now chemical detection of these pillars we looked at the dark color of my eyes now let's look at the light color of jackeen marked with the J this is the solar pillar and these are the qualities that are pretty readily able to be seen by others so at the bottom there we have so these are more external principals at the bottom there we have the alchemical symbol for air this represents intellectual capacity which won by being around you can probably gay or SS readily because you would display basically through your behavior and through your words your general intellectual capabilities so this is also a masculine quality because pure intellect is what is being discussed here we're not really talking about holistic understanding or wisdom okay we're talking about the intellectual capacities or in other words left brain capabilities the capabilities to analyze and to dissect and to see patterns etc okay so the air qualities are on the masculine side the male pillar the pillar of jocking and this represents a journey out of dark into light towards light that's why it's on the light pillar okay however as I've said already on this show simply knowing something that you've arrived that through a linear process of understanding through looking at different patterns through analyzing resources of information etc is not the end of the journey what ultimately needs to be done is that needs to be bridged with the emotional quality in order to take right action in the world and also combined with the resources at our disposal so in other words the knowledge that you acquire at the base of this pillar which represents a progression out of the simple internal qualities may be feeling or intuition about what is actually going on then you know it's okay but it's still at the base of the secondary pillar there of jocking it has to be used in the world it has to be put into effect in order to create something better in the world with that knowledge so at the top of the pillar of jockeying there on the left underneath the Sun is the alchemical symbol of fire the upper right triangle and this is the symbol of fire which represents action in the world okay will power to act so we have the resources at our disposal at the base of the right hand pillar we have the emotional qualities that we carry within ourselves and the intuition that's the top of the right hand color the water symbol okay the emotional aspects of the individual the lunar side okay this is what we have to work with in our innate qualities and what we have within us as far as our emotional makeup those then on the left-hand side we have our intellect at the base of the pillar and then what we actually do with the other three qualities okay so what we actually do with our intellect combined with our emotional qualities combined with the resources at our disposal and our talents that that the highest point of this is fire okay which is at the top of the secondary pillar which is what true enlightenment ultimately encompasses is taking right action in the world not just knowing but knowing and then applying that knowledge in the world so this entire image okay represents coming to a better understanding of our spiritual nature because this is the generative principle this is the principle of creation you see at the bottom there the word in Furious in Latin representing the lower material identified world then as you come up to the top and unify the pot hair which means father the son and ma ter mother the moon okay to create the Union the union of opposites the synthesis the chemical wedding as it is known okay you have the word superious which means the higher world okay and that is where the gods there you see the all of the gods of astro theology the sun the moon and the planets there at the top of the image in other words the heavenly bodies the heavenly hosts so to speak okay and then you see two words there at the top I'm sorry before I get to that you also see this circle with the two triangles in it you defined the divine and the material worlds okay and you have the alchemical symbol of mercury inside of there the elixir of life okay formed by the mercurial qualities the divine union okay between the Sacred Feminine and sacred masculine between our emotions and our actions so the words at the top here okay on the left and right hand sides in the clouds up top iseman right this simply means the generative formation or the principle of creation you can look at those words as meaning this is the way that the physical reality in which we live is brought into manifestation it is brought into manifestation based upon our behavior okay and the the unification of the masculine and feminine principles or in other words what we know and how we feel right so our thoughts and our emotions then give rise or give birth to our behavior in the world our actions okay which is why that's at the top of the left hand pillar the masculine pillar and that creates this synthesis this union of opposites called the chemical wedding a lot of times in in our alchemy okay and that is the generative principle generative meaning the principle creates or generates okay this is connected with Freemasonry very deeply because the G inside the compasses and square stands for this very principle the generative principle okay as we've talked about already on this show so that's this image is a fundamental basis for the pillars of Jacque Tina and Boas information Li and again this images used in alchemy and Rosicrucianism as well so what I wanted to do with the time we have left is simply look at some other themes that show these two pillars and then look at what's known as royal arch masonry which is a degree of the York right degrees within New York Rite of Freemasonry which are about this generative principle and coming to a higher level of consciousness by bridging the sacred masculine with the Sacred Feminine okay so the emotional qualities of the Sacred Feminine being United with the active qualities of you know that the masculine aspects of ourselves our actions so we need to act in harmony with what we know and heal to be right thoughts emotions and actions in unison with each other and there being no contradiction between those three modalities or the the expressions of consciousness again that's not consciousness itself that's something much more all-encompassing but the way that consciousness expresses here through us in the physical world is through our thoughts our emotions and our actions I call it the expressions of consciousness so what we want to look at is in the Royal Arch tradition how this synthesis is often depicted as the keystone of the arch so we're going to look at that coming up but let's look move on to image number two the Masters carpet of Freemasonry here we see this same theme repeated once again with the two pillars you know the altar in the middle with the three candles which I have already said in previous shows represent the path of the Sun from the eastern horizon to the western horizon and it makes a trek across the southern portion of the sky I posted good visual aid to that in the last podcast so that's why there is no light in the north on free masonic altars because it is considered the place the sun does not pass through hence it is called the place of darkness again this is more basic astrology but it's Astro theology because you know the whole idea is getting to that enlightenment which is represented by the Sun coming together with the moon and giving birth to the all-seeing eye of an awakened consciousness so again we see this being repeated here again I want to draw your attention to the heart right in the middle of the image true care okay the heart the center of self because these pillars represent the self okay below the floor of the house represents the spirit being dead end okay and needing to be raised out of its grave we saw the legend of Hiram Hiram Abiff okay the Christ consciousness in the free Masonic tradition so to speak all right this is the spirit that is within us all the spark of the Divine which needs to be awakened and basically come up in its understanding in our understanding of true self that's what the the entombed Hiram Abiff represents okay this this coffin etham underneath the floor of the house the checkered floor is when higher learning that is dead where the Spirit is dead the true spiritual nature of ourselves is not properly understood and therefore it is in its grain it needs to be raised up out of the dead and be real welcome to New Life a second person so we'll continue with this on the other side of the break we listen to what on earth is happening if you're on oracle broadcasting every day [Music] welcome back everyone what on earth is happening on your host mark passio before the break we were continuing to look at some of the symbolism of Freemasonry particularly the theme the recurring theme of two pillars and how they are representative of the masculine and feminine side of our psyches and our nature and they need to be brought into a synthesis a positive synthesis by uniting our emotions and our actions and this is what basically brings our spirit to life and this masters carpet depicts the dead and spirit in the coffin there and the journey that it must make out of that realm of darkness and the grave to the light of the all-seeing eye or the Creator and we see tons of symbolism on this image we have the moon star and the Sun okay we have again the the out the Astro theological cults of the ancient world the lunar called the dispeller cult and a solar cult we see of course we looked at that in the Astro theology section when we talked about them being the foundation of modern religions we see y'all seeing I representing the light of the Creator the light of consciousness okay we see the ladder representing our climb or our journey out of darkness and toward light we thought we see the symbol of the Sun its path through the of the year on the right hand side that that's circle with the two lines the parallel lines that's representative of the Sun and it's a parent path during the course of the year as the Earth orbits revolves around the Sun how it makes a progression between the two tropics an angular progression from 23.5 north 23.5 south during the course of a solar year we see the allagash with the sand running through it wanting us to make good use of our time because you see the site there behind the hourglass representing decks approach which is one thing we all share in common it is the grand leveler as is known internationally it levels the board for all of us because indeed we all are all on a schedule that has an appointment with that fate eventually no one gets out of here alive as they say we see the Trivium depicted as the basis for coming out of darkness and starting to ascend the pillars there on the right hand side depicted by the Pythagorean try the Pythagorean triangle with this squares depicting be a Pythagorean formula so that's representative of course of the Trivium the quadrivium and the five senses and how we come to learn anything basically of phenomenal information to study the Trivium which we will get into in future shows so what else do we have here of any significance we have the anchor that means that we must be anchored in truth okay we must have accurate knowledge and that's why it's on the active teller to act upon is so we have to have a firm anchoring in hand of the truth that is taking place around us before we begin to act or climb that left-hand teller and take action in the world so this is just another symbol another way of saying the same thing it's about the chemical wedding of the union of opposites the divine union it has been called in other traditions between the principle of action and the principle of the Divine Feminine or our emotions the heart okay I've called the heart mind guts you know it's what we know what we feel and how we act these are the chakras that have to be unified the solar plexus chakra connecting up with the higher chakras of the heart and then the knowledge chakras of the third eye and the throat what we know and being willing to speak the truth unifying that with the full of action represented by the solar plexus chakra so we've covered this all in the past this is pretty much a kind of like almost a review of some of those concepts but you're saying in symbolic form let's move on to image number three which is a depiction of an old Royal Arch tracing board now again as I said in the modern logic system the Royal Arch degrees are part of the New York Rite and they are touched upon in the Scottish Rite but this image here again we see the word Solomon the combination of the Sun and Moon king of Israel right Rex Israel means king of Israel Israel Isis Rael okay Isis the Divine Feminine raw the male child L the father okay we look at that when we looked at asteroid theology again this is for people new to this there's prerequisite knowledge for some of this and we've seen some of these word plays and symbols before so I highly encourage you to make use of the podcast section of my website as a resource if you get caught up you'll have a much firmer grasp when we start to talk about this complex symbolism I know it's you know kind of an inappropriate way to pick up on things but I can't go back and you know repeat the same things I've already said on the show over and over and over again so again those resources are there they're free they're at your disposal you can go and download them all for free and listen to them all at your convenience so we saw the three builders of attempt the Temple of Solomon representing the male and female sides of ourselves the masculine and feminine the Sun and the moon as being Solomon Hiram king of Tyre and Hiram Abiff H ad they're representing Hiram Abiff name and we see that the Royal Arch symbol there on the on the left on the other side of the altar from the letters H ad here we see the two pillars once again okay representing basically the same thing we've been talking about the floor the checkered floor of the house on and now the arch coming together on both sides but the keystone of the arch not being there okay now what this represents and here's the real key to this the the stone okay of the archway represents the pineal gland but in a state of not being fully activated when that stone is removed and light pours into the center of the self toward the heart right the center of this image is always the Union so we see these two angels with their wingtips combined right in the center of the image this is the activated heart chakra okay and the light it is knowledge coming in the the knowledge of true self coming in and activating the center of self or the heart chakra now people have a very bad misunderstanding of this because in biblical terms the chief Cornerstone or Keystone okay is referred to as Jesus and when people see the cornerstone of the archways being taken out they look at this as if it's saying reject the Christ consciousness okay or reject the values of Christianity nothing could be further from the truth this stone in the place of the arch okay needs to be translated to light that's what the Christ consciousness is actually represented by the light of the Creator pouring through into man's consciousness okay so two part of the Royal Arch ritual is to rise meaning come up in consciousness Rhenish forth the Keystone meaning clear the debris from your pineal gland the truth the all-seeing eye insists in the center of each one of our heads okay and it is often calcified and I've talked about this extensively through the chemical sludge that we often put into our body through and laughingly call food which you know getting hot on the healthy foods is a huge part of the way in process we need to basically remove that wordy stone it or take away all the debris okay that is that is calcifying it and then the light pours in because that's the spiritual vision gland all right I'll stop there we have a caller here from Texas John from Austin you're live on one earth is happening you're going to take us out go hi how are you it's really nice to be on the show and I appreciate very much all the imagery that you are giving us and you're transmitting through us I wanted to touch on the subject of the pineal gland as you were talking about it was beautiful what you said there at the end and what I wanted to do porn is well the pineal gland is our spiritual seed or the seat of the soul yes where we that's our inheritance from gods who us individually so we can have the experience of the unlimited creator within us and and this limitless being of which we have come to experience this birth in can emerge into that into that unlimited being and retain consciousness and I agree that that that's more or less where you're going now sorry John but that's all we have time for tonight on a more orifice on what on earth is happening I highly encourage you to call into the show next Sunday

What On Earth Is Happening Show #059

Topics: *Occultism, Freemasonry, Royal Arch Symbolism, the Goddess and the Broken Column, 32nd and 33rd Degree Symbolism*

ladies and gentlemen are back on what on earth is happening here on this little podcast and every I host mark Hasse on my website what on earth is happening dot-com and last week was the first what on earth is happening in its entirety here on Oracle broadcast and it went very well we had a contest on the show last week it was won by a gentleman named Ben in Louisiana he won the the prize for answering correctly he question of the mystery traditions and the topic that we had been talking about the week before was self-generated suffering and we got into the question of the mystery traditions as we were relating it to the modern occult traditions that one may come across in their studies mainly we were relating it to Freemasonry because this has been an ongoing topic of discussion on the show for the past many weeks and we've been probing the symbols of Freemasonry of true esoteric Freemasonry for the last couple of months and we will continue to do that tonight tonight will be probably the last show where I break down some Masonic symbolism for the listeners I will probably have one more show on the topic however and I'm hoping to make it sort of a roundtable discussion with some official Lodge Freemasons in this area or perhaps in other areas I'll probably be putting that show together if it doesn't come together I will simply move on to continue the topics that we've been discussing such as symbolism in general as a methodology of mind control and to subversively gain access to the subconscious mind when an individual does not is not aware that symbolism is being used like that they certainly can indeed be controlled through it so becoming symbol literate is quite important but to go back to what I was talking about regarding the show last week we had a winner of the con he answered the mystery tradition question correctly the question was how does one truly know that one is in a state of suffering how do you know that you are suffering and the gentleman called in and correctly answered the question that if there is even one other who is suffering then you are suffering because everyone is interconnected inextricably interconnected by the field of life that is all around us therefore if any suffering exists one knows that one is suffering themselves so that was the answer and he won a orgonite pyramid which was made by one of the speakers of the recent free remind conference here in Philadelphia just to get into that for a moment as well videos for the free your mind conference will be posted to the for your mind conference website at free your mind conference com probably within about three weeks to a month I'm just guessing that videos are currently being processed so anyone it was interested in that conference could not attend we will be releasing that information to the general public for free over the next coming a few weeks so be patient the videos will be forthcoming and you'll be impressed with the information that you get to see in here there for those who don't know about the conference with the conference we've just held here in Philadelphia last month and you can check out the conference website to read all about these speakers and topics that were covered at WWF or your mind conference calm so far so good with the the new show here on

Oracle it's been it's been a great experience and it's it's an honor to be part of a great network with all of the caliber hosts that are on this network and the topics that they discuss I think it's probably the best internet radio network going online today with that having been said the only drawbacks that people had written in about that listeners uh kind of commented from how the show used to be in its old format to this one that was the ads and I want to respond to that briefly yes the ads do kind of basically create an interpersonal between the information as I'm giving it out here on the air but that's a good thing because people who support radio networks like this want to get their products out there and make a living for themselves the network needs to do what they need to do so and that isn't for free you know that really costs a lot out of private individuals pockets so they make some money by selling ad space I have absolutely no problem with the ads for those who think it's a distraction I can understand where you're coming from however it's a trade off like anything else I get to be on a bigger network where there's more listeners able to hear my voice and get the message out to more people and for that the show is broken up a little bit with some ads interspersed here and there like I said I don't have any problem with it I hope it's not too big of a distraction from people coming over from just listening to me on what on earth is happening previously before we came over to Oracle but it is what it is and that's my take on the whole ads for listeners who have come over from listening to me previously so let's jump into the topic for tonight shall we we've been talking about Freemasonry for the past many weeks and Freemasonry is an incredibly complex topic it is an occult tradition and for those of you who still have not made the connections that ocultism is what ultimately everything that's going on on the earth is all ultimately about you need to take another look at what the occult really is because there's a mind-control technique that's played through words and word association games and what true evil people and dark Oh cultists always want to do is have you associate something in your mind through words that really that thing has nothing whatsoever to do with or it only has a partial connection with that word but in other words then the technique works too for example as it is said throw out the baby with the bathwater you will say well that's associated with something that's it's dark or evil and therefore I won't look at any of it and I'll throw it all out and not ever ever go into the esoteric understanding that the dark occultists really wish to hold people back from that's how this technique works and the word occult is used occult is used in this sense it's a mind control technique if if a dark ocultist who does not want anyone to look into his methodologies into what he is doing through hidden techniques okay and that's what the word ultimately means hidden it is hidden knowledge that is used as a weapon against those who do not understand the techniques that one is working with because they are hidden from that individual if someone doesn't understand it those who do can wield it as a weapon if they're in the mode of consciousness where they may be inclined to do so and that's what the psychopathic ruling elites of this planet are they are dark occult business they are using hidden knowledge against us as a weapon when we bring that knowledge to the light of day they can no longer do that effectively because it becomes common sense we'll be right back folks you listen to what on earth has happened there on the oracle on every network welcome back everyone there listen what on earth is happening here on the

Oracle Broadcasting Network on your host mark passier I'd like now to wrap up what I was talking about about the occult the word occult as we have said many times previously on this show simply means hidden and it is hidden knowledge that is attempted to be held back from the general population by d'arco cultists who used this knowledge as a weapon against people it is ultimately knowledge about consciousness it is knowledge about how the human psyche works it is knowledge about the deepest parts of a human psychology that drives our motivations and fuels our understanding of reality and when you get into that and control that you have people at your beck and call okay you have people right under your thumb right where you want them because they don't understand themselves and ultimately that's the only knowledge that is truly worth having is knowledge of self and what we truly are and what our true potential is and that's what we do here on this show is try to help people to delve deeply within so that they can understand what that the outer world that we see around us is merely a reflection of what is going on inside of us collectively so with that in mind I want to jump into the topic for tonight which is the symbolism of some of the higher levels of Freemasonry and we're going to look at Royal Arch Freemason reading we're going to look at some of the symbolism of the 32nd and 33rd degree and we're going to talk a little bit about what is known as illuminated masonry tonight and hopefully I can get through all of this symbolism before the end of the show so we can do a roundtable discussion on Freemasonry next week so I'd like to direct every one person hormoz to my website at what on earth is happening com if you're not listening on the computer you can go and check out the podcast where you will be able to see these images the podcast is in the podcasts tab of my website as what on earth is happening and they're all free they're all available for download too and digital music devices so make use of that archive as a great resource for information I post a lot of image links a lot of document links a lot of video links so there's tons and tons of study that can be done at the podcast section of my website if you go to the radio listen page which is right on the front page and then you click the button over on the left hand side that says listen live you will be taken to the radio listen page and there for shows where symbolism is required to be seen along with the explanation of that symbolism I post related images for that that night show on that page so you'll see they're listed images for tonight's show may 8th 2011 and there will be I believe 11 images or 12 images 11 11 images posted there the first image there is simply the poster for the Tesla science conference which I just announced as part of the event announcements tonight so we are moving to image number two on the what on earth is happening radio listen page if you look at image number two this is where we left off on the show last week we were talking about royal arch symbolism royal arch masonry is a part of the York Rite of Freemasonry but overall this is basically higher-level esoteric symbolism that is contained in the Royal Arch degrees and we see an image number two the tracing board of the royal arch so this is a board that has deep complex esoteric symbolism in it that is meant to be contemplated and meditated upon in order to understand what is being said through this imagery again Freemasonry in general it is a tradition in which natural law and morality is taught through a system of symbols allegories and rituals okay and we also looked at the word allegory as part of our understanding the three May in previous weeks as stories poems pictures symbols that may be interpreted in specific ways to reveal hidden meanings typically these meanings are moral in their messages that they are attempting to convey they are attempting to convey moral lessons and that's indeed what all the symbolism we have seen thus far in Freemasonry when it is properly decoded by people who understand what this symbolism was originally intended to embed into the subconscious of the viewer who may not be consciously aware of it it was originally intended to embed a moral lesson sadly in the modern era much of this the meaning of this symbolism is lost even to lodge Masons okay and I'll be the first to tell you that that large Masons are horribly ignorant of the esoteric aspects of their own supposed tradition and they do not understand these symbols in any way that they really should be understood and part of that is simply their own ignorance and not wanting to go farther and deeper into the topic and part of that is deliberately being misled by those who have corrupted this institution from the higher levels and being then put into places of power within institutions such as Freemasonry in order to deceive and mislead and again I am in no way here to be an advocate of Lodge Freemasonry I am talking about the esoteric underlying tradition that lies at the core of true Freemasonry okay that I want to make abundantly clear therefore let's start breaking down some of the imagery here in the Royal Arch tracing board we saw last week that these pillars and we saw in many weeks in the past and you can check that out in the podcast section that these pillars represent the double aspects of the nature that lies within all we all have a masculine and a feminine aspect to us and the masculine side is logical it is um a linear it is it analyzes things it's left brained okay so it's our solar nature our active side okay well what the information that we break down and then ultimately take action upon this is the solar side of the personality okay with a masculine side of the personality right the scientific the logical the linear the analytical okay on the right hand side the right hand peddler represents a feminine nature within the individual it represents intuition creativity caring nurturing of the creative principles okay it represents our emotional qualities not the active ones but the ones that are hidden within how we feel about what's going on within us and around us all right so these two basic principles need to be bridged or brought together in order to come into harmony with each other such that our emotions and our actions are one in the same and we do what we feel is truly right okay so unity consciousness thoughts emotions and actions brought into harmony with no contradiction between the three we've talked about this ad infinitum on this show and I'll continue to repeat these concepts because they sink in more as they repeat so the arch itself is that coming together or a bridging between these two aspects of the individual okay and it represents coming off of the checkered floor of the house the checkerboard floor they mean upon being led not understanding light from dark being just one of the pieces that is being moved by the chess master because they have a higher level of awareness and they're looking at the board from above and they can pick up pieces and move them as they see fit all of these allegorical ideas here need to be picked apart through the unders stood properly in the context of symbolism complex symbolism is what we're talking about here we'll continue to break down these royal arts tracing whereas when you come back from these messages you're listening to what on earth is happening right here on the oracle

Broadcasting Network I'm your host mark pass feel my websites what on earth is happening comm we'll be right back folks [Music] I hope everybody's got their sunglasses on out there that those samples they're from the great movie they live and that was David Icke actually explaining some of the symbolism in the movie they live everyone on earth should see the movie they live folks that's all I'll say about that if you haven't already seen it probably almost everyone listening on this network has seen it but anybody listening in the podcast section if you haven't seen the movie they live it's something you definitely should do immediately because that movie's not just a fiction it's an allegory about what's happening in our world as is Freemasonry and we were talking about the Royal Arch symbolism of Freemasonry before the last break let's jump back into the image here which is image number two on the radio lesson page at what on earth is happening calm we see that the heart is coming together to form a semicircle at the top of these two pillars okay we'll see ultimately what that symbolism represents in a moment we see the keystone of the arch ray okay off onto the left-hand side it has been pulled out of the arch okay now the Keystone is the strongest part of the archway this is the thing that actually gives it its strength that's where all of the forces is is leaned up against on both sides okay so this is critical to keep in mind why would the Keystone be removed from the arch and we were getting into this at the end of last show and I want to really reiterate this so that I hammer in the real understanding of this symbol because it's very important and it's very widely misunderstood the Keystone is being removed okay as a symbol of enlightenment okay this you see the light pours in when the stone is removed see people misinterpret this okay because in biblical terminology there's such a thing called the cornerstone or the Keystone all right and this is what Jesus himself is referred to as in certain books of the Bible in the Gospels he's referred to as the chief Cornerstone with a key stone okay and this does not represent taking away the Christ out of someone's life or out of their consciousness it represents letting that consciousness into oneself okay as a symbolic aspect of higher consciousness now I'm not talking about exoteric organized Christian Christianity the Christian religion as we know it in the modern world that's not what I'm talking about here no more than I am talking about organized Lodge Freemasonry in the modern world I'm getting down to the esoteric core symbols and the core understanding that under Locke underlies those symbols okay and it's all about consciousness and awakening of self it's all about when we bridge the left and right brain hemispheres together the masculine left brain hemisphere and the feminine right brain hemisphere through the this divine process this divine union the chemical wedding as it is known in different forms of mystery school teachings okay we are removing all of the barriers and the blocks to the light okay and we do that by also awakening the tiny land the spiritual vision gland in the center of the human head this has been referred to by mystics as the third eye okay it is the Ozma chakra in the Vedic chakra tradition okay the third eye is the single eye that is spoken of in biblical terms when in the story in the New Testament Jesus is telling his followers that what you need to do is make the eye single if you make the eye single the body is full of light it I is dual the body is full of darkness what this means is it that your your brain is imbalanced toward either hemisphere or both hemispheres the left and right okay you're seeing with duality us versus them thinking okay you're in a state of either Dominator or slave and we've talked about this almost endlessly when we talk about the functions of the brain the brain hemispheres you can go back and research all this material in the podcast archive it's all there folks I can't you know repeat every single aspect of it just to touch on it the the the making of the I to be single instead of dual is a reference to the brain it's a reference to bridging the left and right brain hemispheres and uniting them it's also making your emotions and your actions unified as one okay so that you do what you feel and know to be right all right and there's no contradiction your actions do not betray your thoughts and your emotions this is what awakening is all about this is what enlightenment really is okay and that process is the awakening of the all-seeing eye the pineal gland the light that is within us and it's a connection to the heart as well the last week we left off on helping people to understand it the removal of that block that barrier that stone that Waits okay is the removal of the barriers to awakening the barriers to the light the barriers to letting the Christ consciousness enter the heart okay and then therefore change one's actions and one's view view of the world first and foremost and then one's actions so that's why the light is streaming in through the missing Keystone okay because now it's full of lights and that light is coming into the center which of the image which represents the center of the self or the heart and this is represented by the two angels on both sides have been bridged together and their wings are touching in the form of a chalice or a heart or the inverted triangle which is also known as the chalice in ancient symbolism okay because it represents the sacred feminine side of the self so this is the union between thoughts and emotions the union between knowledge and then why we do what we do with knowledge and ultimately what we do with it and that has to send from the heart okay so that's that's what the Royal Arch degree ultimately is attempting to teach people through this complex symbolism to come up off of the floor of the house duality alright us-versus-them thinking not understanding natural law not understanding what our rights are and what they are not not understanding light from darkness right from wrong and there is such a thing folks you know Satanism if I learned anything during all the time that I was involved in Satanism in my past which some people on Oracle may or may not be aware of I used to be involved in dark occult ISM I speak about the dark occult from being personally involved with it in my past and having torturously come out of that level of mind control and being so asleep that my life was in such a state of disarray that it was only two places to go as I've told people in the grave or up and I chose the latter both and that's deliberate pun okay I chose the later option but I also chose the latter which is a symbol of Freemasonry a ladder meaning something that we use to climb out of the depths okay which we'll see in we've already seen in past shows when we looked at the first degree tracing board with its ladder on the middle pillar which is the which is called Jacob's Ladder in Freemasonry so that's what this Royal Arch degree ultimately represents letting in of the light by decalcifying chipping away the stone from the pineal gland hey the all-seeing eye so that the light can stream in into the heart and we create what is known as the heart mind okay and I add the heart mind guts because it's ultimately what we do that makes the difference in the world so there has to be courage involved there as well it's not just what you know and and what you care about right it's also what you actually take action and then do in the world so we have to combine all three of those principles the thoughts the emotions the actions I call it the heart mind guts so intelligence is required true care is required and ultimately courage is required and willpower as well the the dual aspects of the active principles courage and will so that's what this complex symbol is saying here and it is also about the coming together of the left and right brain the Temple of Solomon okay we see the repeated images here Solomon being the Sun and the moon soul Sun Moon Moon okay and Hiram Abiff H a B at the bottom there of the builder of the temple okay he represents the generative principle and truth and care true care okay he is the Sacred Feminine aspect in this Trinity all right so we're going to look at other examples of royal art symbolism you have a couple other royal arch tracing boards that I'm going to break down and then we're going to move on to some different free Masonic symbolism when we come back from this break you're listening the water on earth is happening we'll be right back folks [Music] welcome back we're back on what on earth is happening I'm your host mark Castillo my website what on earth is happening dot-com we're breaking down complex esoteric symbolism of the tradition of Freemasonry here on what on earth is happening this evening and we were looking at image number two on the radio listen page of my website what on earth is happening calm I want to touch a little bit more on some of the symbolism here on this tracing board before we move on to image number three you see the tools at the top I want to touch on those have been the tools of the Royal Arch are the pickaxe the Spade and the crowbar or of you know the pry bar alright this is what we need to dig ourselves out okay when we've been covered up or buried with dirt okay the the the darkness has covered us has blocked out the light we these are tools of digging okay we dig for the truth we need to dig ourselves out of the hole that we placed ourselves in as a species all right and then finally we need to wrench forth the stone to let in the light all right so to with all of our will and power use the pry bar to get that stone okay representing the calcified pineal gland all right that we actually the stone to open up the spiritual vision center within us all okay that's what these this symbolically represents all right then we climb out of the grave and we're gonna see the coffin and the next image Hiram Abiff coffin this is ultimately about resurrection okay and you can see the parallels in biblical tradition because Jesus was resurrected from a grave okay and he rolled away a stone in order to do it you see to come out into the light of day from the grave where Jesus was that he had to roll back the stone of his grave so this is a direct correlation to two Christian symbolism okay and it's not meant to be taken literally in the sense of the story of Jesus all right regardless of what you believe about whether Jesus existed as a real person or if it's pure Ashford theology we're going to see how much this connects the Asheville theology in the next image and what the little arc is from a national Asheville theological point of view but this is this pales in comparison to the true esoteric meaning of the Royal Arch and how it relates to the resurrection of the soul from the state of badness of spiritual deadness of not understanding that we are a spiritual being having a physical experience not understanding natural law not understanding the law of one not understanding that as one suffers all suffer okay it to come out of that state of spiritual deadness and resurrect ourselves to the light that's what this that the truth that the knowledge of truth the knowledge of the true nature of self okay which is the spiritual nature of all things okay and ultimately that's what this whole system of Freemasonry is all ultimately supposed to be teaching spiritual resurrection not identification with the physical world okay not just worrying about what's happening in my daily life but seeing the big picture about what's going on all around us as a species and being concerned with the wider picture true care not just small care with a with a small see meaning I care about what's going on in my life and making my families maybe the people around these lights lives but the capital C version of care which is care on us on a wide level on a global level on a universal level to be concerned with the suffering of all beings all right that's what this is ultimately all about that's what we are trying to raise people to the understand okay so the the language that goes along with this degree if you read into the rituals I won't be specifically getting into that tonight I posted many books with elaborate breakdowns of rituals on the website you can go there and read all about those again there's much allegory contained within those rituals as well I find it much more poignant to get right to the heart of the matter and break down the symbolism for people because I think it expresses it even more beautifully so part of the ritual of the Royal Arts degrees is to rise and wrench forth the Keystone we already understand what that means now from an esoteric perspective to let in the light and to let that light into the heart and develop true care care with a capital C this is what being raised is ultimately about we talk how this is about how this is connected with raising children we use the word being raised raising children okay how many children are really not raised how many adults are really not raised in the world how they are simply going through the motions of life and not really understanding any of these wider issues about what's really taking place around them in the world so what I want to do now is move on to image number three on the website and look at another variant of the Royal Arch tracing board so here we see this in context with the first board alright we can see how this relates to also the first degree tracing board that we broke down in previous weeks the first of which we can see the two pillars once again the left and right pillar we can see again the symbols of the three astro theological cults of the ancient world which we broke down when we talked about Astro theology many weeks ago the Sun the moon and the stars with the Royal Arch right in the middle between all of them because it represents that place of bridging or coming together the balance point that unifies all these things thoughts emotions and action coming together as one okay so we see the well I wanna briefly before we get into the symbolism of this particular board and the the sign of cancer there on the Royal Arch and it is a yin-yang symbol as well to just talk once again briefly about words and we look at the words royal arch okay why Royal Arch well two reasons royal means related with kingship were of queenship okay and what this is ultimately about what the knowledge that is acquired upon bridging these two sides of the self and understanding what's going on in the world in the wider sense the that knowledge is ultimately about sovereignty is about self ownership is about understanding that there is no authority other than the creator itself okay the generative principle truth is the authority Authority is not truth it's an illusion okay it's not that there's no real power in the illusion of man-made authority it's all ego based and fear based you have to be in fear to believe in that concept okay it does not exist it never has existed it never will exist it's an illusion it's a fantasy that people have made up in their own minds and then bought into in their own fear and in their own abdication of personal responsibility okay so royalty in the true sense means sovereignty being one's own King one's own Queen one's own ruler one's own inner monarch one ruler no external ruler no external government internal government internal control over one's own mind over one's own thoughts emotions and actions the only thing you're ultimately allowed to control over those three things okay without a breaking natural law so that's what the term royal here really represents an arch is synonymous with arc we already saw that the Ark of the Covenant and the last image we'll see you know an ark is also a word for a tomb okay so it's the tomb of the Spirit which is represented here and needing to come out of that tomb to understand that we are all part of the ark okay an arc AR C okay is a part of a circle okay the circle in almost all esoteric traditions represents the divine shape the shape of spirit the shape of divinity okay it's God's shape it's perfect it's it's never-ending it has no beginning or end it's based on something that can't be calculated in its fullness because we can never fully understand the mind of God okay the Creator is never-ending it's continuous okay no beginning no end therefore the circle represents that shape and an arc is a piece of a circle which is what we all are we are a piece of that totality that wholeness that oneness okay but therefore that's what the Royal arched inwards represent those concepts sovereignty and part of these the all part of the one of this the one spiritual divine center that we all are arms are part of you'll get back into the breakdown of this next racing board right after these messages you're listening to what on earth is happening on the Oracle Broadcasting Network [Music] [Music] [Applause] [Music] and at eight six six eight four one one zero six five once again the toll-free line is eight six six eight four one one zero six five let's sit on break back into the images we're looking at image number three on the radio listen page at what on earth is happening dot-com for visual aid reference to the concepts that I'm talking about here tonight on the show you can also get all of these images in the podcasts I post them with each podcast on the podcast archive at what on earth is happening calm here we go the the symbolism of the Royal Arch here has a whole lot of other imagery associated with it at the bottom here we see the coffin this is again Hiram Abiff coffin which represents the entombed spirit which needs to be raised out of the state of spiritual deadness the dead needs to come back to life to be born again okay so it is of course below the pillars and below the floor of the house because it hasn't even made it to the point where it starts the journey the process of initiation okay we need to climb those pillars in order to form that arch between the sacred masculine and sacred feminine sides of the personality the little tree there the sprig that is growing at the top of the coffin is acacia acacia okay represents the hope of resurrection meaning can be awakened people can we bring into the understanding of oneness can we bring them out of the duality of mind control can we bring them to the place where they have a firm grasp on natural law and sovereignty and their own sovereignty and the sovereignty of all others around them okay can we get them to understand those ideas and understand what the true nature of self is has a spiritual dimension not a physical one okay as a spiritual nature having the physical experience okay and that's what that vacation that tree of life ultimately represents okay the hope that we can indeed fractally radiate this knowledge out to everyone and awaken the world okay so the archway itself represents the time of the year where the

Sun is active okay it's the half circle of the year when the Sun is in the northern hemisphere alright the favored season of the northern hemisphere where most of the population of the earth lives all right at the very top the archway is detected the keystone of the arch is depicted by the sign of cancer this is when the Sun is at the summer solstice when it is entering the house of cancer it is at the highest point of its power during the year at this time of the year this is half of the zodiac if you go back and look at the astrogeology section that I did and show the signs of the zodiac you will see it's hop portion of that zodiacal wheel alright represent a favored citizen of the Sun were the lights okay when it has been resurrected from its tomb of the southern hemisphere where an another break we'll be right back after these messages folks unmarked pass notes you're listening to what on earth this happens [Music] welcome back folks who are listening to what on earth is happening here on Oracle broadcasting on your host mark passio my websites want on earth is happening dot-com in this hour we are breaking down some of the symbolism the complex symbolism of Freemasonry some of them the higher degrees of Freemasonry namely the Royal Arch degrees we're going to look at some more complex symbolism of Freemasonry and we're going to get into some of a higher degree symbolism specifically the 32nd and 33rd degree symbolism in a little bit in image number three on the website on the radio listen page we were looking at another royal arch tracing board and we saw that had the symbols of the major religions we saw that it had the Sun the moon and the stars we saw that it had the symbols of the zodiac particularly those that are in the top portions of the zodiac meaning when the Sun is in the northern hemisphere the houses that it goes through are depicted here and at the very top of the Royal Arch is the sign of cancer which is a yin-yang symbol representing the correspondence principle of that which is above as light to that which is below and the union of opposites the divine union or wedding between the male and female okay the yin and yang sides of the self yang being the male and Yin being the female so this is the time of the year when the Sun is at 23.5 degrees north latitude with respect to the earth's equator and this is the beginning of summer the high point of the Sun the high point of Lights because again this is all about lights and it is about God's light God's Sun okay allegories that we saw in the Christian tradition when we looked at it from an astral logical perspective also the same when it comes to Hiram of this the resurrected one okay the one who represents the light of truth and knowledge and justice okay balance alright the way the truth the life etc these are all allegories for the same modality of consciousness non-dual consciousness all right it has been called christ consciousness it's been called Buddha consciousness it has been called Krishna consciousness it's all the same thing it's the awakened mind the true understanding of sovereignty the understanding that authority is an illusion that there is no one between us and the Creator that we are all sovereign beings and that we are free and sovereign by nature of being born into the universe of the creator that's it period with nothing after it the end in other words okay no justifications needed no explanations needed no compromises needed that's how it is that's the truth okay I've arrived at that understanding and have for a long time and are waiting for other people to complete that work within themselves because this is internal work that needs to be done for each individual to truly comprehend that to truly understand that and then to live it and that's what the great work is ladies and gentlemen that's the true great work that lies ahead of us all and each one must contribute their part to it individually no one can do that work for any of us so let's look at some of the other images here of course we have the G in the middle of the image again representing the generative principle true to care the hearts okay the generator of everything including the pump that fuels our body with blood okay the lifeforce energy within us all right the heart is the generator the pump that drives our drives everything care is ultimately what creates our experience what we care about is what we ultimately manifest we care about frivolous things we will manifest negative things in our lives as we care about the things that truly matter and are of true value namely truth and knowledge and moral right okay then we will create a world that is much better than the one that we've created so far so we see the compasses in square there again representing that our higher nature has to basically trump or rule over our lower aspects of the purr of the personality namely the the ego and the physical identity identified aspects of having lived in a physical world the things that we basically need to do to survive on a daily basis can't be the things that ultimately govern us that rule us that are the main focus of our attention we need to understand our higher nature and let that be in a position above that it's so-called lower nature okay represented by comp compasses the compassion okay bridging left and right flexible right ruling over or above the square okay this the compasses draw the circle the divine shape the cotton the square is not found in nature 90-degree angles rough edges that need to be smoothed over okay it's the lower nature of the square in this aspect all right base consciousness in other words and the compasses represent divine consciousness or true compassion true higher care the cornucopia represents the harvest of what we get as a result of our thoughts emotions and actions okay the harvest time is what happens upon whether the light was received okay see the allegory here the light comes down to the earth it gives energy right it is either received well or it is not received with all and then we have a harvest based upon that exchange of energy what we did to cultivate the truth and knowledge right or to cultivate the plant in other word the planting of the seeds and and how well those seeds were receptive to light and were able to sprout and generate on their own so the cornucopia represents the harvest okay and we'll see other signs of the harvest as we move on alright so there's much more symbolism in here I won't break each a single aspect down one thing I do want to point to is in the bottom right hand corner you see another representation of the Ark of the Covenant again this is the place where God was said to be stored or kept or or entombed okay it represents spirit it represents that we have a inner core spiritual nature and we have to get in touch with that that's that's the true treasure that lies in the Ark of the Covenant okay and again it's a a wordplay on arch arch and Ark are often used interchangeably okay it means that a tomb it means a part of a circle which are both things that we see here all right the Ark of the Covenant okay we're going to see that we saw that in the last image we're going to see another arc in the form of a tomb in the next image let's move on to image number four and there's the break music we will continue to break down some of the complex symbolism of Royal Arch Freemasonry when you come right back we'll be back after these messages I'm your host mark Casto you're listening to what on earth is happening right here on the horrible broadcasting that stay with us folks [Music] [Music] okay folks who are back on what on earth is happening on your host mark Castillo let's jump right back into the symbolism of Freemasonry which we have been breaking down we're looking at image number four now on what on earth is happening calm on the radio listen page so here we see yet another representation of the pillars and the arch with the Keystone in it you see the all-seeing eye once again we see the Sun in the moon and the stars we see the two Globes at the top of the pillars in this image a little bit different of a take on this particular tracing board but we see the terrestrial sphere and the celestial sphere so you see Earth there on the left and on the right hand side you see the band of stars known as the zodiac and then the wider stars of the celestial sphere around that so on the these two seers in conjunction with each other represent the principle of Correspondence that which is above is light to that which is below or in other words the universe is self-similar across scales and we are simply a part of the all but the essence of the all is contained in each of its parts so that principle is conveyed here in this tracing board as well want to just quickly point out some of the symbolism on this board we see the G right in the middle again representing the heart representing true care representing gnosis representing the generative principle again wisdom okay Sophia what we do with what we know because of how we feel about it true care okay and it's ultimately about taking action all right we see the arc in the middle again the tomb as the altar with the volume of Sacred Law of the Bible on it with the compasses and square set on that the three lights representing again these three principles of Astro theology the sun the moon the stars and planets but also the sun in it struck across the sky in the in the southern portion of the sky in the northern hemisphere and in the West okay we see the anchor representing that we we must not totally you know wander off in a spiritual days either that we have to realize that our work is to be done on the ground it is to be done here in the physical domain it isn't about escapism it isn't about just knowing that you're okay or that you feel good it's about helping others who are suffering and who aren't understanding the things that really do need to be understood in life and there are such things it's not that's not Ana a statement that you know people should be offended by hearing that yes there are things people should be looking into and should know people hear the word should and they immediately recoil it's a form of mind control okay that they think nobody else should ever use the word should nonsense there are things that should be understood and known and lived in the world I'm not afraid to say that I've come to recognize and understand that now I wasn't doing it in the past but now I am there are things I have come to understand and I live these principles in my life and I'm not shy about saying other people should understand a lot of the things that I understand and it's not just my understanding this is just knowledge about the world and life in general and how things work and how natural law operates so it's like saying you should know about gravity if you don't want to fall and hurt yourself from a high height yeah it's the same thing we should know about this if we don't want to hurt the entire world like we're doing and continue to do in our ignorant of these principles so going back to the symbolism that's the anchor okay stay anchored and in the world be not of it okay be in the world but not of it that's the concept there okay understand the work is to be done on the ground meaning don't drift off into a spiritual haze just because you understand higher minded concepts which the New Age movement is so fond of doing I'm all okay I'm fine I understand higher spiritual nature and I'm just gonna sit here and meditate you know and not worry about whether anybody else really gets it this is a cop-out it's further abdication of personal responsibility to act upon what one truly has come to understand in the world and again I'll quote the Chinese philosopher Yong Ming he said to know and not to do is not to know so do these do these New Agers really understand what's really ultimately going on and what needs to be done about it and are willing to do that do they really know no I would say they don't really know and the reason they don't really know is because they don't ultimately take action they want they want to sit and think that just the internal process is the end of the journey wrong that's the beginning of the journey that's the beginning of the journey taking action is required you may have the Sacred Feminine principle but you don't have the sacred masculine principle of right action in the world and that means you don't have the Divine Union you've only gotten half of the equation the other half is action okay so going back to the symbolism on this tracing board quickly we see the two ash Lars the imperfect ash bar there on the left and the perfect one there on the right okay we see a five-pointed star which is a symbol used over and over again in Freemasonry on the archway okay the five pointed star in its upright orientation representing man's spiritual nature spirit raised above the other four elements okay earth air water and fire so earth air water fire and spirit and the spiritual point is at the top and because that's what we need to understand and embrace above all else okay two other quick symbols I'll mention on this one and then we'll move on is at the base of both colors at the left we see the hourglass and at the right we see the sky again these are symbols of death these are symbols of time time running out and hard okay and these are concepts that may make some people uncomfortable but they should be discussed we should understand we are mortal we will live in a physical body for only so long we need to make proper use of our time and our attention the spiritual currencies okay what we pay for things with what we buy things with is not this fake money it's ultimately what we are ultimately getting or reaping or harvesting okay what we are ultimately manifesting in our lives is dependent upon what we do with our time and our attention or in other words what we care about this is the spiritual currency that actually gets us what we have the harvest okay so that's what this is saying here what do you pay attention to what do you care about what do you spend your time doing do you spend your time on self-improvement and then helping others to improve themselves or do you use your time frivolously because you only have a limited amount of it alright so symbols of death and we're going to see that come up again later on tonight okay in image number five here's another depiction of the Royal Arch tracing board the Ark of the Covenant once again the tomb spiritual nature that needs to be resurrected by bridging the left and right the masculine and feminine the Sun and the moon okay the Ark of the Covenant we see the five-pointed interlocked star once again in the middle of the archway okay the semicircle all right man's spiritual nature being resurrected and again at the top this is a very simple one but a very powerful one I like I really like this interpretation and again we see the stone being pried away or rolled out of the way so that the light can come in resurrection okay to higher spiritual understanding and the spiritual nature of self very powerful symbolism they're all off there for the taking there are no secrets and true esoteric Freemasonry I can't speak for the large system I'm not a member of any institution on the earth I help assist with some local groups here I don't consider myself a member of anything I'm an individual that understands my own sovereignty and tries to help people understand their sovereignty so we get more into the timbl ism of Freemasonry when we come right back after these grapes I'm your host mark passio we're listening to you what on earth is happening here on the oracle broadcasting network we'll be right back folks that stay with us [Music] welcome back everyone you're listening - what on earth is happening I'm your host Marc Castillo we're talking about some complex symbolism in the esoteric tradition of Freemasonry here tonight on the show and we've been looking at the symbolism of the Royal Arch in Freemasonry and what that ultimately represents let's move on to image number six we're looking at images here from what on earth is happening on the radio listen page image number six is a Master Mason certificate that has some of the most esoteric and complex symbolism in all of Freemasonry and I would add some of the most important and it is much lesser known than some of the other tracing boards which we have already seen and looked at and some of the other symbols and tools that we've analyzed and broken down however this I really like to call people's attention to in a big way because to understand what this is saying really says it all about what's going on in our world today so here we see an image of the Temple of Solomon that's what that structure there is on the right okay and then you have in front of the temple okay you see a scene depicted by a woman okay who is standing in front of a broken pillar all right or a broken column she is holding some sort of a twig or branch over the column she has a cup or an urn of some type in her other hand there is a book upon the column behind her there is an angel with a Skype clearly representing the Angel of Death holding her hair and there is an hourglass set beside him which is the sands are running through all right in the background we see the Sun the Moon the Stars and the all-seeing eye symbols which we've already looked at in depth we see the five pointed star on the right-hand side of the image and we see the trowel the symbol of the master basin on the Left representing to spread the length or spread the knowledge of what one understands and has come to know in their mind and heart and this is indeed the cement that will make good people stick together in the world and therefore for the light to spread okay so let's look at what specifically the image of the woman and the Angel of Death here represents well this isn't a depiction once again of the goddess of the Sacred Feminine okay and we've seen this in the Astro theology section when we went through what the goddess represents how the goddess is always attacked and sacrificed that it represents the lunar or feminine qualities within all individuals the Sacred Feminine okay it represents creativity the creative principle care nurturing all right intuition all of these things that we really need in order to come out of the horrific mess that humanity is in because of the belief in authority and government and money and religion from an organized perspective of course not a true esoteric understanding of the core truths that underlie those traditions okay so this is the goddess aspect of ourselves a Sacred Feminine that is broken in the column is broken again this is a wordplay on the French word word of Kalume column okay which means dung the dog is historically traditionally the symbol of the goddess in many ancient traditions that revered the goddess and then we saw all of her names when we looked in natural theology she's been called Isis and Semiramis and Diana and had conte and Aphrodite and Astarte in each car you name it you can go on and on and on and on of all the names of the goddess Mary of course in the Christian tradition all right but ultimately this represents our sacred feminine aspect true care the generative principle and it is nearing defeat in this image it is hath broken only the very base or foundation of it remains and upon that it is the volume of law which represents natural law I'm not talking about how the Bible is interpreted talking about the symbol that it represents this is the book of natural law that is on this pillar here in this in it I'm not specifically referring to the Bible although that is what the volume of natural law is used interchangeably with in Freemasonry it's the concept that needs to be understood not to get hung up on specifics okay it represents natural law and sovereignty that's the Grail the Holy Grail the sacred feminine side of ourselves okay what she is holding is the sprig of acacia which represents the hope of resurrection in Freemasonry and what this sprig of acacia is saying what the goddess here in the image is saying is I will hold out and stay with you until the very end if you wish to continue your course I will be here and always be giving you the chance to change and you understand the truth and to come to a place of balance and to come to an understanding of natural law and sovereignty and oneness and right action however behind her sits the principle of decay death Azrael the angel of death and it's a reminder that saying we don't have all the time in the world to make this transition to make this change in consciousness there is a time when a negative harvest would arrive and we're nearing that time ladies and gentlemen not to scare anybody or try to put any fear into anyone it's just the case nature does not allow the kind of abomination that the human race has become in their ignorance and abdication of personal responsibility to continue forever eventually the slate will be wiped clean the Skype will come out and it will reap the SANS will go through that hourglass time will be up and a reading will have to happen and whether nature does that or man does that to himself you can bet on it if we don't change our ways it's gonna happen that's just the law of things it's the way natural law works in the universe okay aberrations are ultimately really not tolerated once they make things go into a state of disrepair and imbalance for so long there is a natural cleansing system that is inherent to nature that comes in annihilates what needs to be annihilated wipes the slate clean so that there can be new room for growth get is upset about it as you want town your fists against the wall pound your fist on the table crying your milk in joy that's how it works that's it and there's no one who's creating that except us we are always creating the manifestation that we are receiving but what's being said here is that the goddess is always holding out hope Ross and again it's not a physical being or a physical goddess understand that this is all symbolic ladies and gentlemen and not get hung up in literal interpretations like people do with the Bible as well when it's largely allegorical okay this is all allegorical this is to get you to think deeply about concepts that relate to you and you our role in the creation of what we see around us and I know many of the people who listen to this network understand these principles so I don't want to get too preachy or harpy about it but for the people who have not thought about these things it needs to be emphasized and stressed we are the creators of our collective experience we need to step up and own that responsibility okay so in image number seven I simply put a close-up in another interpretation here of the broken column the broken dove or broken goddess the goddess that is crumbling but she's holding the sprig of acacia and behind her is the angel of death possibly preparing his negative harvest if it comes to that okay so this is a symbol of time running out it's a symbol of urgency of what your work is to do to spread the light to spread the truth to spread awareness to spread knowledge to speak the world that you want to see into existence into manifestation the creator spoke the world into being let there be light or the words that were spoken we need to speak the truth and the light in order to create a better world and bring that world into manifestation we have a caller on the line we get two couple calls coming up in the next segment we'll be right back folks stay with okay we are back on what on earth is happening on their host mark passio this show is live every Sunday from 5 7 p.m. Eastern 4 to 6 Central Time my web site is what on earth is happening calm we've been discussing the esoteric symbolism of Freemasonry over the last many weeks tonight we looked at the Royal Arch degrees and we looked at the symbolism of the broken column and the goddess and the the reaping or the harvesting which is basically the idea that we reap what we sow this is the Golden Rule essentially if you don't want bad things to happen to you treat others as you would be treated it's really as simple as that people make it something more complicated than that but that's all it really is ladies and gentlemen but the sad fact of the matter is so few people are in that understanding and actually live it in their lives they are basically under a myriad of mind-control methodologies and basically will buy any buffet of lies that is set before them because they want to not take personal responsibility for their own thoughts emotions and actions and do the hard work that it is to raise oneself from a lower vibratory state of consciousness to a higher one that work no one can do for us we must do it ourselves we must do it because we care enough to do it because we have developed a Sacred Feminine principle of care the generative principle which is what the G in the middle of the compasses and square in true Freemasonry is all ultimately about I have a caller on the line from California here we go to the calls caller from California you are live on what on earth is happening what do you have here for us this evening hello caller from California are you there going once going twice gone okay I guess he either got tired of holding on or just didn't really build up the nerve to come on and say what he had to say caller from California if he would like to call back in I'll take your call right away sorry I let you hang there for so long I I knew you were there but I wanted to get through some of the concepts before I took some calls so that's okay in the last segment we'll just look at some of the things I had planned I may not finish this up in this segment but we can continue next week with a little bit before we jump into our roundtable discussion should I end up doing that but here we go image number eight on the site let's look at some of imagery some imagery from the higher degrees of Freemasonry now we're going over to the Scottish Rite of Freemasonry here this is the 32nd degree which is the last I guess you could call it official degree that you can move up through the ranks of the Scottish Rite of Freemasonry and attain the 33rd degree is the honorary degree it's an honorary imparted degree that is given to people who display certain qualities that are looked for either by light Mason's or by dark Mason's okay we looked at that there are two different forms of masonry true Freemasonry which I refer to as light masonry and then there is simply masonry or dark masonry which is building with material other than lights which is building with weighty heavy material such as stone that creates blocks and then directs walls or barriers between people to create duality this is what occultists always do they take a system that is already in place with its symbols and allegories and then they twist it for their own purposes so indeed there is such a thing as dark masonry we need to become very mature in our understanding that all occultism is twofold it can be used to create something very positive or can be used to control people and that depends upon the consciousness of the wielder this is all just information it is all just a tool and all all this information is ultimately about what is going on within us and consciousness in general and the laws of the natural universe that is all around us and that we are an inseparable part of so that needs to be understood when we talk about what occultism is in general and any specific occult tradition for that matter can be used for good or for ill so in the 32nd degree we see the symbol of the double-headed eagle and the pyramid or the upward pointing triangle okay we see a sword that is being held by the eagle with the two heads and then we see the latin fries deus beome Quay use deus may own quite use and what that means is God and my right okay so these are two of the biggest concepts in Freemasonry the Creator and what your rights are what they are not okay so this is about natural law okay yes is the root of justice in Latin okay yes meaning right or law okay deus is God and my own Quay and Meyer and me God and my right the understanding of the spiritual nature of man what your rights are what your rights are not natural law sovereignty your existence is a free being under the Creator the Sword of Truth okay it's a symbol of power that knowledge is power applied when it is applied in the world okay right action represented by the upright triangle the masculine principle that new heads coming together representing the divine union okay the left brain and right brain in one body a unified all right when they come together right they form the chemical wedding or the divine union now this process is not completely finished because there are further degrees than the 32nd degree as I'm going to talk about either if I can get to it in the next few minutes or next week okay these two heads looking in both directions represent also the past and the future and the understanding that we need to be in the present moment but we need to have a good understanding of the past or in other words to have an insight about where we have been and how we got to where we are now to understand where we are going and how we might change it so an understanding where an accurate vision of the past gives us an accurate vision for the future okay an ability to predict patterns should things continue on unchanged or if we want to change the rudder okay move the rudder to change the direction that we are headed as a society as a species then we need to understand what got us there what actions led up to this collectively in the past that got us to the present moment so that we can say oh we're not going to continue to do that we're going to change do something different and then we'll change direction for the future so that's what that symbol basically is saying if there's another variant of it they're an image number nine it's basically the same image but there is a different saying underneath in Latin it says spez maiya in deo test says maiya in de OS means my hope is in God my hope is in God meaning my hope for the resurrection of humanity lies with the knowledge of the creator and that we are spiritual beings having a human experience a visit experience in the physical world because it is a place where we can come to have experiences in apparent duality to come to know ourselves all the better so the hope is placed in the knowledge and in the the higher level of consciousness that comes through to us through the Creator itself so that's what that symbol there represents and again I'm giving you the core esoteric interpretations of this symbolism not what it may have been twisted into in the world my intent here in this whole Freemason reception is not to cover dark masonry or what may be being taught in certain logic systems my intent here is to go to the heart of the original intent of what these symbols were about and attempting to convey esoteric true Freemasonry the builder of freedom okay that's what Freemason ultimately means all right so the last symbol here is one that a lot of people have seen it is the symbol of the 33rd degree we're going to talk a little bit about the illuminated degrees next week but I'll hold off on that until next week that's really all the time we have for this week folks that goes by quick I hope you've enjoyed the show we'll see you here next Sunday on what on earth is happening on your host mark pasio check out what on earth is happening calm up next the vantage point with Michael Vale stay tuned everyone [Music]

What On Earth Is Happening Show #060

Topics: *Freemasonry, Illuminated Degrees, Reverse of Great Seal, Pyramid and All-Seeing Eye, the Great Work*

we're back on what on earth is happening I'm your host mark Cassio my website what on earth is happening calm I'm gonna give the calling numbers and then we're going to jump right into the topics for today to call in to what on earth is happening here on Oracle broadcasting you can call eight six six eight four one one zero six five once again the calling number eight six six eight four one one zero six five no taboo topics on what on earth is happening there never are I'd like to take call so feel free to call in any time during the show please if you do call in wait on the line I will get to you I may be in the middle of explaining a concept or an idea so please be patient okay let's jump right into our topic for today which is a continuation over the past many weeks of our exploration into the true esoteric tradition and symbols of Freemasonry so last week on the show we left off looking at some of the symbolism of the Royal Arch degrees of Freemasonry in New York right and in the Scottish Rite some of the higher degrees namely the 32nd and 33rd degrees so we left off looking at the double-headed eagle of the 32nd degree of the Scottish Rite and I'd like to direct everyone to my website at what on earth is happening dot-com and you can click the radio listen page the link is on the left hand side of the site the graphic that says listen live and you will then be taken to the player page underneath the player there will be something that says images for today's show and then there will be a series of links of numbered links you can click on those to follow along with the imagery that I will be talking about on the show today and this is basically how I do this for any shows where symbolism or imagery needs to be comprehended along with the talk so that's where the images can be found so looking at image number one we see the symbol I broke down last week of double-headed eagle of the 32nd degree of the Scottish Rite holding ah the sword with the symbol Deus my own Quay yes right underneath of the sword on the sachet that is draped around the sword that of course means God and my right we saw another actual pin emblem on image number 2 which basically is the same thing with a different phrase in Latin on the sash which says Esme are in de OS which means my hope is in God and sometimes you will see these two phrases combined sometimes you will see them combined with another phrase which we're going to see in the next image that we bring up instead of re-explaining this symbol I just want to reiterate one part of it and that is that the two Eagles are coming together but the very top of them the heads still have not completely come together indeed they have still have two heads both pointed in opposite directions this represents knowledge of the past can help us to understand the pattern that is making its way into our future so that we can change it if we wish it also represents that balance in both the left and the right brain hemisphere is absolutely essential if we are to come together as one and again this is the positive interpretation there are indeed negative interpretations of all of the symbolism that I'm going to talk about but again I am reinforcing here the true a satiric aspects of the three Masonic tradition not looking at dark masonry per se here over the last many weeks now I am going to bridge this into what is known as dark masonry when we talk about one of the main symbols that we're going to break down in this show which is the reverse side of the Great Seal of the United States the pyramid and all-seeing eye a much talked about and much misunderstood emblem or sigil a series a collection of symbolism of simple symbols that are put together to make much more complex symbolism known as a sigil so we'll be looking at that later on today and indeed that is a symbol of both the light aspects of Freemasonry and the dark aspects of masonry in general which I referred to as dark masonry not true Freemasonry so in image number two what I want to emphasize here is that the the very highest aspects of the the spirit have not fully been unified at this point this is why this so-called highest level of the Scottish Rite okay is not indeed the end of the degrees of free masonry this is simply the end of what is known as the Red Lodge degrees the Blue Lodge is degrees one two and three okay which is entered apprentice fellow craft and Master Mason degrees four through thirty-two are referred to as the Red Lodge okay we saw the colors red and blue used to represent different extremities okay red representing the left brain reason logic intelligence blue representing the right brain intuition creativity nurturing etc okay these need to be bridged together brought together to create true awakening or illumination and that is the higher degrees of Freemasonry known as the illuminated degrees the degrees where one is truly coming into the light of true knowledge true reason and that's all about the internal world the internal processes of the self okay going within and understanding what we truly are as pure consciousness and pure knowing all right these are the true higher-level degrees and they are personal degrees they are Kollek degrees there is one degree that is officially recognized as higher than the 32nd degree of the Scottish Rite which is the 33rd degree which I show its emblem in image number three and this is an honorary degree that is conferred upon Mason's and freemasons that are considered having contributed great value to the work of the higher lodges and that would include both the white lodge which is above the blue and red lodges and indeed the black lodge okay these are basically unspoken of lodges they are known to be in existence by people who truly have bridged the left and right side of the brain hemispheres we understand that these lodges exist in both a real and the symbolic way the black lodge certainly exists in a coordinated real tangible physical way and it's doing its quote great work all over the planet and we're seeing the results of that work in our daily lives the white lodge however also exists but in a less organized way it exists scattered throughout the world and needs to be brought together through our understanding and our actions so we'll continue to analyze this and break down some of the symbolism when we come back you're listening to what on earth is happening you're on or abroad head Hey we are back on what on earth is happening on your host mark passio my website what on earth is happening calm before the last break we were discussing the higher degrees of the Scottish Rite of Freemasonry namely the 32nd and 33rd degrees we were looking at the emblem of the 33rd degree in image number three on the radio listen page of my website what on earth is happening dot-com and in this image we see the emblem of the 33rd degree of the Scottish Rite which is an honorary degree conferred to Mason's that are considered to be instrumental in the continuance of what is known as the great work and we will look at what that frieze the great work means later on tonight so this symbol is also a sigil it is a complex series of symbols put together to form a more complex symbol so we see that the motif of the two crosses which we saw before when we were looking into Astro theology on previous shows all previous shows of this program are in a podcast section of my website and that information is all available for free at what on earth is happening the two crosses here we see the equal armed cross in the background with the the smaller equal armed cross motif all over it the two pillars which we analyzed over the last many weeks here shown as well and we see a second cross in an X form in addition to that first equal armed cross which is the the main cross that we see here on this emblem these crosses are known as the cross of st. George and the cross of st. Andrew the cross of st. George being the vertical one shaped like a plus sign and the one shaped like an X that is formed by the two swords overlapping each other is called the cross of st. Andrew so these are the solar and galactic crosses the solar cross represents the cross of the Sun on the zodiac okay it represents the solstices and the equinoxes at 90-degree angles to each other when we symbolically depict the sun's path as a circle so the X cross formed by the two swords represents the Galactic cross which is the fixed signs of the zodiac the four fixed signs of the zodiac all houses and this is Taurus in spring Leo in summer Scorpio in fall and Aquarius in winter their respective seasons each one of these houses also represents one of the alchemical elements Taurus representing earth Leo representing fire Scorpio representing water and Aquarius representing air earth air water fire and basically in the middle of this image you see three overlapping equilateral triangles on top of these two crosses so this this second cross this X cross formed by the two swords the Galactic cross basically pinpoints our position in relation to the galaxies the soul the solar system's position in relation to the galaxy the arm of the great cross that points toward Taurus is actually the arm that is pointing away from the center of the Milky Way galaxy the one pointing toward Scorpio is pointing toward the centre of the Milky Way galaxy this very center of the galaxy actually is between the constellations of Scorpio and Sagittarius the Scorpion and the Archer so on top of these two crosses representing light the light of the Sun and the light of the stars and planets okay these two astra theological cults of the ancient world which we looked at in the Astro theology section we have three overlapping equilateral triangles so it's 3 times 3 for a total of nine points the number three is multiplied by itself here because the three is a sacred number it represents the Trinity and again this is the Trinity of our thoughts our emotions and our actions coming together as one this is then multiplied by itself for greater effect so then this this Trinity is rotated okay three times it's repeated three times each rotation okay forming another equilateral triangle so we have nine points and each one of the points representing one of the letters which we see here in the inner space of this larger nine pointed star and that word that is spelled out is Sapientia which means wisdom okay soppy entia wisdom this is the combination of our thoughts our motions and our actions coming together as one not in opposition with each other but unified okay so there is no contradiction as we think so we feel so we act and there is nothing that tears those three things apart what we know to be true we feel to be right we act upon we don't know something feel it to be true and know it's right and then act differently our actions do not betray our thoughts and our emotions okay so that's these three triangles coming together to form wisdom inside that we have Ordo AB Chao a Latin phrase which means order from chaos or order out of chaos and there is a positive interpretation to this phrase and there is a negative interpretation to this phrase depending on who's wielding the knowledge who's employing this emblem etc the negative of course we've mostly heard of the Hegelian dialectic as we talked about previously on what on earth is happening past shows okay creating the problem that needs to inspire fear and it has to be a chaotic one and then waiting for the confused reaction and then stepping in to propose to use that opportunity to propose the solution problem reaction solution or as I have called it chaos confusion opportunity create the chaos wait for the confusion that ensues and then step in with the opportunity to propose your solution that you wanted to propose all along okay so that's one way of seeing order out of chaos I call this chaos sorcery all right it's the Hegelian dialectic simple dialectical mechanics at work another more positive way to look at order out of chaos which is the real deep esoteric understanding of this phrase is that when chaos ensues to the point where one must recognize that the ego is creating that chaos and if they cannot state in that stay in that state of ego identification eventually one will look into the causal factors and the causal relationships of the state of consciousness or I should say lack thereof that created that situation to begin with and only by understanding those natural law principles can they ever effectively create good or order in their lives that's the true meaning of the phrase although at heyo lights out of darkness we'll be right back you're listening to what on earth is happening on the Oracle broadcasting now folks we're back on what on earth is happening we were looking at the emblem of the 33rd degree of the Scottish Rite of Freemasonry and the phrase Bordeaux a Bao which I described as being representative of light out of darkness the state where the ego is finally broken down and the being suddenly becomes ready and willing and able to understand that they cannot go on living the way that they have been living in a state of ignorance apathy and laziness and without courage to act in the right way it is the goal of the true goal of true philosophy everywhere because it represents true wisdom this word sought the NTS surrounding it means wisdom and this is what we're actually trying to distill we're trying to get rid of the chaos that we're living in and actually create true order harmony with natural law not the laws the whims the dictates of man the lowercase L laws of man but harmony with natural law capital L and for those who have not yet seen it it would I would highly recommend to check out my podcast number 36 and listen to it and see the document that accompanies it I will eventually put this presentation on video at some point in the future I have not yet had an opportunity to do that but I will at some point in the future and I will post it to the site however podcast number 36 goes into natural law and its manifestations if it's expressions how natural law works in our reality in a very very deep way podcast number 36 please avail yourself of the knowledge that podcast and the accompanying document so in image number four here on the radio listen page which is where the images that we're talking about here tonight can be found on what on earth is happening calm the radio listen page image number four shows this emblem as a an actual pin okay that is presented to a thirty third level degree thirty third degree initiate of the Scottish Rite this is an honorary conference and you see on the top of the right hand of point of the sword okay three fingers pointing off the thumb the index finger and the middle finger and two pointing down you'll see this symbol over and over again in the occult this is a symbol that represents the Trinity being raised okay truly raised to the light namely thought emotion and action and duality is being put down ego dualism us-versus-them thinking the two fingers put down okay because they represent the small or lower aspects of us all right things that need to be ruled over the reptilian instincts in other words okay identification with the physical etc the ego mind alright the these are the five points of the pentagram and the five aspects of the stuff earth air water fire sphere okay ultimately we want to create merge water and fire which is our actions and our emotions the masculine and the feminine sides of our self the higher masculine and feminine sides and merge them with the spirit the fifth element this is what truly raises the Trinity within us so you'll see high level initiative different occult orders and traditions often making a gesture with these three points upward these three fingers raised upward sometimes they will touch the side of their head with them to show it's it's a symbol that I am one of the initiatives to the illuminated degrees or the true light of wisdom which is within unification of the self within and the coming together truly of one's thoughts one's emotions and one's actions for a higher purpose so this is a simple interpretation of a complex symbol and inside of it you'll see if you look back at image number three you'll see the double-headed eagle of the 32nd degree crowned okay with the light the scales depicted there on the left hand side of that which is representative of balance and unison and harmony alright and then the compass isn't square with the G in the middle there on the right hand side so this degree of the 32nd degree is the first degree of what is known as the illuminated degrees of Freemasonry and again these are it's a dual Lodge system there is the white lodge of true illumination which we've been talking about the positive aspects of this and then there is the black lodge dark ocultism those who have the knowledge and are going to use it for the opposite of the true great work which is the work of control manipulation keeping other people in the dot keeping other people down not helping to raise others up to your level of knowledge again this is just knowledge it is a tool it is what we do with it that matters that's where true wisdom lies are we going to actually employ true wisdom through the sacred feminine side of ourselves the merging of the masculine principle of right action with the Sacred Feminine principle of true care or are we going to use this newly acquired knowledge as a weapon because the dark occultists that actually owned most of the people on this planet they know we are spiritual beings they know this there are only two happy to tell you that they know this and they're using this knowledge as a weapon to manipulate people who do not know this that they are spiritual beings that this isn't a mechanized machine that we're living in that ultimately it all derives from spirit they have this knowledge but they're trying to convince other people of the exact opposite so they can keep them enslaved because only when you become material world identified can you live in fear of anything that's going to happen to you in this domain once you shove all that fear no one can alter can ultimately control you no matter what they do to you even if they physically destroyed you you would remain the essence of you because the flesh the body is not that which we really are and darker copas understand this and they ultimately reject this and seek to suppress it while they know it they want to use that knowledge only as a mechanism of manipulation and oppression against others by trying to convince them that that truth does not exist and in doing so keep them in a lower state of awareness and in fear not understanding who and what they really are so that all of their energy flows to these dark Oh cultists at the top who heat this knowledge for themselves and ultimately twisted pervert it and use it as a weapon against those who they look at as lower than they are so these illuminated degrees again it's a double-edged sword it's about the light it's about having that knowledge what we do with it is another story so let's bridge all of this back into the idea of symbolism and the hidden language called symbolism because that's where this whole discussion of Freemasonry came out of and ultimately it is done because so many symbols are using free Masonic symbolism all right I should say Masonic symbolism in general not just free Masonic but the symbol of symbols of masonry whether it be white masonry or dark masonry okay because as we've seen the word Mason simply means builder what building material do we build with what is the purpose of our building why are we building something what is that something that we are building I'm going to attempt to answer all those questions here tonight through the breakdown of an extremely important symbol that is very misunderstood and it's all about one thing in image number five we see this symbol placed on the one dollar bill money and indeed ultimately it is all about money but not in the form that so many people are familiar with that term not in the fake form that you're seeing here on paper which isn't even worth the paper that it's written on that it's printed on what is the real money let's talk about that when we come back they're listening to what on earth is happening on Oracle broadcasting we'll be right back folks welcome back ladies and gentlemen this is what on earth is happening here on the Oracle Broadcasting Network I'm your host mark Topacio the images were discussing can be found that what on earth is happening calm on the radio listen Paige we were looking at image number five which is a $1 bill showing the front and the back side and we're going to be talking about the image on the left-hand side of the rear of the dollar bill which is the pyramid and all-seeing eye and I'll be breaking down this symbol from no cults esoteric perspective tonight it's a very misunderstood symbol it is placed on money for a very specific reason what we're talking about here tonight is talismanic symbolism a talisman is something that is imbued with a particular kind of energy by having symbolism placed on it and then carried with the person that it is going to in view with that energy okay the energy is going to work upon in some form that the person that is carrying that talisman that's what it is all right so when we talk about a talisman it is carried symbolism is a simple way of looking at it and ocultist s-- are behind the monetary system of all countries they invented money as we understand money as most of us understand money I should say some of us know what money really is but were few and far between and what I mean by that is the money that is created by these dark occultists all throughout the world is all fake now some people listening to this network and they know that but what is the real money and that's what you'll hear a lot of debate and argument over and that when you understand this from an occult perspective you understand that their version of money their fake money is being used as a proxy okay at it as a methodology of transference to replace the real money in someone's mind it's a form of mind control because they know what the real form of money is and everyone else is ignorant of what money really is and therefore they believe in this fake form of money and papers and digital lights on a computer screen or so-called precious metals or any other various forms of exchanges that we have that we call money but all of that is done to keep back the true understanding of what money really is and it's all contained in the word in the word you break down the word money and you have the words one eye inside the word money Mon M o n is the root or prefix of one mano it means 1 ey phonetically is I like the letter I 1 I and we see the one eye on the money it's not two eyes it's one eye it's on the one dollar bill now people will immediately Rebelle against this and say oh this is too simple you're seeing something where it doesn't exist the occult is so simple that the occultists who use these techniques terms symbols words colors sounds vibratory frequencies etc are hysterically hysterically belly laughing that it is right in front of people's faces on a daily basis and they are incapable of seeing it it's hilarious to them I have personally heard them belly laughing at people when I was involved with these people in my past laughing hilariously now what people will accept when these simple simple truths that are right in front of their eyes are rejected out of hand as being oh that's oversimplification that's that's it's too easy it couldn't possibly be that because it's all ego based thinking it's all the mind racing to say I couldn't have seen that it could have been that there my entire life and I just ignored it or didn't see it or didn't recognize it because no one wants to think that they're that gullible or stupid that something that's simple that the word money means one I was there since you were born every time you heard that word spoken that ultimately what it's referring to and this is called green language which brings us to our next piece of little occult information the color green which is why this symbol is placed upon something that is green we talked about this before especially when we looked in the Kabbalistic tradition and the system of chakras on the Vedic tradition Green is the color that represents balance oneness centering coming to the middle love nature green is the color of the heart chakra terror okay it is the color of nature nature provides green and the greatest abundance the healthiest foods the energy to put into your body is green energy it's a symbol of health of life of balance of healing it's the energy of the heart okay it's the coming together or balancing of the left and right brain hemispheres to give birth to the light the one eye the pineal gland being awoken in the center of the head helping us to see the true nature of ourselves as spiritual divine beings part of the all one eye meaning there's not me and another we are all one there's only one I not dualistic thinking us and then me and everyone else green language is wordplay that one only really sees in place and its usage when the brain hemispheres become balanced and the all-seeing eye the true all-seeing eye the one eye opens so this symbol is deliberately placed on the one dollar bill because it's a proxy for oneness for unity consciousness for balance for healing for life energy for love and money in this paper form is none of those things or any other form of exchange other than actual love between people that's the only form of real exchange for recognizing our own oneness and acting in that capacity that's what money really is you need no mechanism of exchange for of doing that you only need to become enlightened in order to be willing to do that but there's so few people at that level of consciousness it's it's funny rather than being sad past the point of being sad it's a joke okay so green language will see it in the future alright but that's basically what it represents you can only understand these word puns and plays and symbolic meanings when you're bridging the left and right brain hemispheres coming to a place of green energy true care true intelligence true wisdom so they put it on the money and they make the money the one eye a fake form of it a proxy for the real thing that's what the occult always does it never really creates anything it takes an idea it perverts it it degrades it and then it hands it over to somebody else and says here this is the real thing take it in place of the real thing when in fact you really don't have that real thing when in fact that's the only true thing you really want and desire but I'm going to give you this instead to fool you into thinking you have the real version of it [Music] and yes the occult is that simple folks we'll be right back on what on earth is happening [Music] the United States that is placed on the left hand of the rear side of a $1 bill here in the United States this symbol is the symbol of the mystery traditions it's the simplest way I can put it as a basic introduction this is also the most widely misunderstood emblem or sigil in the world the interim of the interpretations that are out there are wildly off-base although some people have a understanding of part of it but they don't have a full grasp of this symbol because it's a dual symbol as all complicated symbols maybe they have more than one meaning not a one-dimensional meaning to be interpreted in a single way but they have a deeper meaning that can be employed in different ways depending on who is using the symbol so I am going to offer quite a an alternative explanation for what this symbol really means and if you follow me through the breakdown of this symbol you will understand that this symbol is much more even if you have heard interpretations of it before in the past you'll see that it is much more than what certain researchers have made it to be so let's simply look at what the symbols on this emblem or sigil are first and then we'll break them down one at a time first let's look at the words on the symbol the latin phrases the first there's two latin phrases the first is at the top it says annuit coeptis I knew it kept us okay a n and uit I knew it kept us co e P T is this phrase means he she or it favors or looked favorably upon that is the word I knew it means he she or its favors that his third person singular they he she or it favors or looks favorably upon or gives their blessing to okay that's what that word means co-op this means an enterprise a building project a project in general okay something that is being worked upon our work in progress okay so he she or it favors looks favorably upon gives their blessing to our work our enterprise our building project alright simply put he favors our work that's it that's how we could look at it she favors I don't work all right who favors our look what is the nature of that work [Music] what is that building project there is any progress look at that when we come back like what on earth is happening I'm your host mark Hasse oh I left like what on earth is happening calm weave get into the reverse of the Great Seal the United States and great depth if we come back here on Oracle broadcasting on what on earth is happening let's jump right back into the breakdown of the great the reverse side of the Great Seal of the United States the pyramid and the all-seeing eye that the two latin phrases we looked at the first Latin phrase honor with collapses in the last segment and saw that it means he or she favors our work which is a work in progress and there's a second Latin phrase on the banner below and it says Novus Ordo seclorum now this phrase is often debated about and contested as to what it means and I'm going to attempt to lay this to rest once and for all although I know people will still insist that it means something other than what I'm going to show people that it means believe whatever you want okay because it means one thing although as we will see that one thing were freeze which it does say on this sash here on this banner actually is two different things depending on who's using it or trying to create it this is this banner represents the building project as we will see okay so Novus means new or though means order these are not the words that are contested so new order and then the word set clorium the hotly contested word which in images number seven and eight I show in a Latin dictionary the difference between the word set quorum and Psyche lorem now the people who insist that this phrase means new order of the ages clearly never open up a Latin dictionary and have no connotative understanding of the ability to translate Latin they don't understand what that word that they're saying SEC lorem actually is so I'm going to attempt by looking at the word and the actual Latin root of the Latin meaning of the word to lay to rest once and for all that this word does not mean of the ages so the word for age generation or time period in Latin is psyche lorem SAE Cielo are you a message the genitive or possessive case of the word psyche uluma side Coulomb is a Latin noun that means age generation people born at a time a breed a race a present time period a present age or century okay the word cyclone cyclone okay so the the genitive of it would be psyche lorem sae CLO r um but we don't have the word psyche lorem on that banner we have the word sect lorem on that banner so if you put this into any decent latin dictionary or look it up into in any decent latin dictionary it will tell you that it is a truncation or a word modification of an original latin word which is set Hugh l'olam the you in the in the word section norm can often be eliminated or truncated it's like a contraction kind of in English instead of saying cannot we say can't okay is not isn't okay instead of saying step q Loess right Sekulow m-- we would say that clone or speculum we would say seclorum so this is called a word modification or a truncation in Latin it says here on this image which is image number eight an internal CL might be rendered by C ul okay so the word actually derives from the Latin word secular 'm which is the genitive of Sekulow okay the possessive case meaning of right we wrote being belonging to that's what genitive means the possessive case okay fat Coulomb is the root word that this comes from and we see that that's a noun that means world the first word back in the definition is world Sekulow which is where we get the word set quorum from okay now there it is right there you don't want to accept that enjoy believing that it means of the ages for all the possible listeners out there who have been told that that's what that word means it does not mean of the ages it means of the world okay so the word speculum means world universe secular temple earthly or worldly affairs cares or temptations that's it the simplest translation of the phrase Novus Ordo seclorum is New World Order the end that's what it means period anybody that thinks it means anything other than that does not know how to translate Latin period and I'll tell them that to their face even if they're the if they're they have tenure at some University I really don't care they don't understand what that phrase means that they that means new order of the ages it means new world order and I just showed that definitively here okay now that's the building project that is being referred to in the first Latin phrase he or she favors our work or our project that it is being built okay Novus Ordo seclorum the New World Order right there on every single dollar bill being carried that is the phrase and if people say there's no such thing as the New World Order well why are you carrying around pieces of paper with you every single day that says the words New World Order on it only in another language if there's no such thing oh there's such a thing the the the key here to understand it is what is the New World Order because it's not one thing yes the words say one thing nope new world order but there are two different New World Order's and that's what I want to attempt to get the listener and the person who is attempting to understand what this symbol is really saying to grasp here okay so now that we've established the meaning of the words let's break down the symbol we're going back to image number six now okay so seven and eight was just definitions six I want to break down the rest of the symbol we see a pyramid okay that is being built but it is not completed and then we see a hole in the sky with an eye in it with light radiating out of it okay above I should say actually in the background behind this 13 leveled pyramid that is made of stone what do these symbols represent what do they mean what is trying to be said fear you get into this a lot deeper in the next segment don't go anywhere folks we're listening to what on earth is happening right here on the oracle broadcaster network [Music] [Applause] [Music] we're back on what on earth is happening learn their host mark Hasse of my website what on earth is happening tom we are breaking down reverse the Great Seal of the United States today on the show this is the symbol of the mystery traditions of consciousness it is also the symbol that in general represents masonry in all of its forms as we will see tonight on the show all of the images I discuss all the time on what on earth is happening can always be found on the radio listen page of my website which you get to by just clicking the listen live button on the left hand side and then you will see images for tonight's show images for today's show listed on that page underneath the player you can click that and get a little slideshow we're looking at image number six the pyramid and all-seeing eye from the back of the one dollar bill we see that the latin phrases mean means he or she favors our work of a new world order and then there is a 13 level brick or stone pyramid okay 13 courses of blocks of bricks okay with the the letters m d c CL XXVI these are roman numerals and they form the number 1776 1776 this is of course a date but it is much more than that I will leave that there for today will not be getting into the date and its meanings or representations we will do that next week when we look at the real meaning of these 9 letters ok so the 13 level incomplete stone pyramid above or you could say behind which in the sky behind the scene in the foreground ok is a equilateral triangular hole in the dimensions of space ok and find this in another dimension in another world in another reality is one eye with light screaming from this dimensional portal or gateway or hole in the sky okay screaming out of this into the scene this is the light that illuminates the entire scene that we see in the image that's the light source okay so there is one eye that is representative of the light and then below that in the foreground is a huge pyramid being built out of stone what does this mean how is this connected to what is known as the great work which someone favors or looks favorably upon and how is this connected with something known as the New World Order this is what needs to be understood through the analysis of this symbol and I'm going to offer my interpretation of this fear in money the bricks first of all let's look at each individual component all right you have the pyramid being built on the earth this is something else that's in the symbol the earth the physical world the planet that we live on that's where this work is being done the work is done on the ground the work is done on the ground okay the earth this realm that's where the great work is done that's where the New World Order in one of its forms will be built right here in here and now okay the bricks what is a brick let's just look at what is a brick what is it made of what is the material it is made of okay it's made from Earth it has been baked it's made from Earth made into clay and then baked in heat right Sun the solar principle is added to with the male principle masculine principle needs to be added to it see a brick forms one form it only takes that one form and it has 90-degree angles hard edges okay it's not the circular form right it is heavy its weight it's not light it's heavy okay that which is not light think about this in symbolic terms it means if it's not light it's heavy but it also if it's not like it's dark the opposite of light is darkness not just heavy or weighty all right it weighs us down it has darkness inherent in it it's the opposite of the light it's not enlightening okay the bricks whatever it's what our walls use to did we build walls with bricks we become sheltered with bricks meaning not seeing the bigger picture yes shelter can be a good thing but too much shelter can be a bad thing meaning symbolically sheltered from information from knowledge from the light walls are barriers they divide us from some other people yes they can be a form of protection but if we stay inside walls they are divisive we're not merging with other people we're not seeing us as one with others we're seeing the world as also versus them so walls are barriers to true understanding symbolically they're barriers to the knowledge of the true self that's what a wall is it walls us off it keeps us separate bricks weigh us down they're not light they're dark all of these ideas are inherent in the symbol of a brick also inherent in the symbol of a brick is a form that has been made into a uniform a singular form not being able to take different expressions were change oneself from one form into another where in other words transformed not able to make that process of transformation happen within oneself because one has been baked into that hardened form by too much Sun the masculine principle gone awry the left brain hemisphere without the union of the right brain hemisphere the Sacred Feminine principle true care too much intellect too much reliance upon intellect without the integration of the Sacred Feminine lunar aspects of itself too much Sun okay but not really receiving the true light of knowledge of reason of the true Sun so the one the one I which is made by combining the left and right brain hemispheres combining the masculine and feminine aspects of the self that's what the one I actually represents the true light of creation of the Creator always coming into our domain here in the physical reality in which we live if we are open to receiving it the reception of that light being made aware and then helping to make others aware of it of the true nature of self of higher soft stuff capital S not being identified with the lowercase s self as we talked about so much here on the show so these bricks represent the process of becoming hardened okay staying in material worldly identification going into ego getting past these bricks and going toward the light would represent coming out of the state of Google downed awareness and materialistic worldly identification to realize the nature of true self we'll get more into this when we come back after this text break I'm your host Mark patio you're listening to what on earth is happening [Music] all right folks look back on what on earth is happening I'm your host Mark patio my website what on earth is happening calm that's where you get the images that were talking about the earth today on the show on the listen life is right underneath the player so we are looking at the steal of all forms of masonry the pyramid and all-seeing eye with the two latin phrases onto it kept this which means he faked he she he or she favors our work and Novus Ordo seclorum which means the New World Order well as I've said before when talking about masonry is simply another word for a builder is what a mason is and what a mason does is either builds with stone or he tears stone down meaning he either builds with things that divide way off down separate us and keeps us in the dark or he attempts to remove those barriers or blocks so that the light can come in the light of truth and knowledge and self-awareness and freedom so as I said when we started talking about Freemasonry in general either one is a true freemason a light Mason he builds with lights and it tends to remove the barriers with a stone or he builds with stone weightiness darkness is a dark Mason he was she everyone is a Mason this is another controversial phrase two other Oh how can you say that I'm not amazing I don't believe in any of that we are all the collective builders of our experience here on earth we are always building through either our acceptance and living within natural law principles in harmony with those natural laws or our rejection of them whether in full knowing or in simply a state of ignorance and thereby creating chaos in the world the more people who understand natural law and work towards spreading it and building with those principles of self ownership true freedom oneness the principle that as one suffer all suffer okay that's how we build order in the world that's how we build the world we actually want to create one to see and want to live in if we ignore those natural law principles we get a world of chaos confusion disorder these are the two new world orders that we have a choice between building the world is a state of transformation right now will it be a transformation into the light of true knowledge of self of freedom of harmony with natural law and the natural universe in which we live or will it be a transformation into the dark new world order either way whatever happens in the future all of us are the builders of the reality that's coming everyone who has ever lived has taken part in that building project we are all builders by what we do or don't do by what we know or don't know by how we act or through our failure to act so let's look at image number nine well which I bridge this symbol with the main symbol of Freemasonry and this is where another important phrase in the free Masonic tradition comes from okay we already talked about the three fingers okay representing the points of the pentagram pointing up three up and two down all right we're going to look at this concept of five points because in Freemasonry there is something known as the five points of fellowship on which masons are supposed to meet each other understanding these five aspects and their rightful place earth air water fire spirit all right so in image number nine I simply place over the masonry seal or emblem or sigil the main symbol of Freemasonry the compasses Square and G and we see that five points are seen to emerge meaning that on the symbol we see the points of the compass the points of the square pointing to letters if we just trace out these five points okay we can see that they point to letters on this seal in image number 10 we can see what I mean by these five points okay the left-hand side of the square points to an a the right-hand side sine of the square points to an S the compass arm on the Left points to an N in Novus Ordo seclorum okay the right-hand side of the compass arm the right compass arm points its bottom point points to the M in seclorum and then the middle point of the square pointing down at the earth points to the letter O if we look at image number 11 I've removed the compasses and square symbol and rearranged the letters into the word Maison this is an anagram the five points of fellowship as it is called forming the five letters of the word Maison because this is the symbol of masonry both light and dark depending on what material you are building with masonry is about the choice between building with barriers divides walls bricks separation duality or building with the light that helps to end lighten raise people unify them bring them to a higher state of self-awareness and true knowledge of self which is what the light represents which is what the one eye represents the essence of the Creator in a higher state an even higher dimension of being and it's an internal dimension of being this represents going within ourselves to understand the true nature itself that's where the light actually lives the spark of the divine it is within a Hall is within everything because it's what infuses this dimension with being in life we are all Masons we need to make the choice about how we will build and what materials we will use to build what we will build with what we know and what we have at our disposal so a dark mason is looking to build with stone well just follow it logically is all you really need to do look at the symbol look at what's already there look at what it is saying to you if you build with stone which you already have a whole lot of in the image it's saying something about the state of the world in which we are living there is already a whole lot of stone that has been built with that has been laid down meaning the world is full of darkness it's full of weight and oppression and ignorance and separation but there's a small amount of light in it streaming through from a higher place if you continue to build with the brick what would happen in that image while image number 12 shows this you will get the completed pyramid which does not represent anything good it represents a male Dominator world the shape is the blade without the Sacred Feminine chalice the upward pointing triangle representing the masculine principle but without the stake or feminine principle involved that's been put down the male-dominated world has been completed and in doing so the light has been put out and the light has now been blocked from reaching the world at all [Music] this is the last segment here on what on earth is happening today on your host mark passier my website what on earth is happening calm tonight on the show we're looking at the reverse of the Great Seal of the United States and it's esoteric symbolic meaning we left off before the last break on image number 12 on my website on the radio listen page which is a symbolic depiction of the dark New World Order building project which is already well underway and this is what it would look like if it comes to its completion and the god of the dark Masons favors this work okay that is the force of opposition of chaos of death of this order it's been known as Satan it is the dark aspect of what has been known as Lucifer because these darker cultists have the light they have knowledge of how things really work and how they are really created that's why they're able to successfully create the situations and scenarios that they want don't fall into the trap of thinking that these people are not intelligent they're the most intelligent people unfortunately walking around right now from a intellectual left-brain point of view they're psychopathic though so they don't have any of the stagers feminine quality true care but they have a form of care that I call dark care they care about the work that they're doing they want to see it come to fruition because they're driven by their God and that God ultimately represents the ego gone haywire that's what the god of Satanism is that's what the god of dark luciferianism is that's what the god of dark masonry is it's not the true light of the Creator the true creator reality which is the higher aspect of consciousness and self it's what we all come from it's what we all have a spark of that divinity within us we're all a part of it it is a part of all of us there is no separation ultimately this is the dark new world order in image number 12 and it represents the light being put out if you look at image 13 this is a animated gif that I made to represent the difference between the situation we have now which is a transitional phase with a little bit of light still in the world trying to manifest itself and the dark new world order you see the light being put out in the symbol and then I show coming back on to show how this is the this is the idea between what the new world order in a light capacity or term represents versus what it means in the sense of putting the light out and I the best way I could describe it you have to really look at the image image number 13 which is the animated gif where I transition between the actual great reverse of the Great Seal and the version that I made with the light no longer there image number 14 shows what kind of Mason is building this new world order those who are building with bricks with barriers with divides with things that wait us down and when we connect all five letters in this configuration without any connection to the light of consciousness and true reason and true knowledge self the knowledge of higher self we have an inverted pentagram meaning the material physical ego identified world being raised those four principles earth air water and fire being raised over the spiritual element which is put down underneath the pyramid buried under the weight of the blocks conversely an image number fifteen if the light is incorporated we see three triangles not just the male Dominator world which is what the finalized completed pyramid of stone represents we see that principle which is the active principle the masculine principle if it is governed by the light the light rules over it over our actions okay meaning we take our actions with the one eye being on not turned off but activated the brain hemispheres in a state of balance we see that another shape emerges when we incorporate the letters there is the active principle governed by the light those are two of the triangles but a third triangle emerges made between the letter A oh and s in the five letters which we outlined before and there is the symbolic chalice the sacred feminine aspects of consciousness and they are supporting the light the light rests at the very top of the chalice this is known as the Seal of Solomon the Sun and the moon soul and mon sun and moon come together the masculine principle unites with the feminine principle the chemical wedding the sacred union the philosopher's stone is born is distilled the widow's son is born the light born out of the lunar principle coming out of the chalice this is the holy grail symbolically it's the only way we're going to build the positive New World Order of truth love and freedom which has no blocks no barriers no divides and this is symbolically depicted in the seal in image number 16 one eye there is no us and then there is no separation as one suffers all suffer and look the word one represents victory we won when you say you lost that means you didn't have oneness you didn't win right you did not have victory of the true self the all-seeing eye did not come on the light did not come on instead darkness prevailed and you lost meaning you lost your true self wandered in the darkness so you were lost this seal image number 16 I actually put together and it says one great work truth love and freedom truth emerges if we have knowledge love emerges is you have our emotions is only in the right direction and freedom emerges if we act in the right capacity and correct moral capacity in the world truth love and freedom and that's how we will create the positive New World Order or what is known as the true great work and that will be a reflection of the divine here on earth the light with no barriers no blocks no bricks no one being weighted down divided separated no more infliction of self created suffering because the light and knowledge of true self has come into all of us this is the true esoteric breakdown of this great symbol this great seal the seal of all masonry masonry is about choice will you build with bricks or will you build with light will you help people unify and come together as one or you keep them separated and in the dark and in the state of ignorance and when you build that dark pyramid right see it's putting out that light but what it really represents is that the dark o cultists who are doing that marker ruling from the shadows they're ruling from the place of darkness they look at themselves as those with all the light and as God of a world that they created in their own image and likeness male dominators we can't let that New World Order emerge we have to build the tree new world order truth love and freedom that's all we have time for here tonight folks I hope you've enjoyed it I hope you look more into the symbolism I hope you'll join me next on them here on Oracle broadcasting I'm mark passio check out what on earth is happening calm I'll see you here next week

What On Earth Is Happening Show #061

Topics: *Symbolism, Pyramid and All-Seeing Eye, the Great Seal, the Great Work, Gematria, the Numbers 777, 666 and 93*

freedom man that's what it's all about welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host Marc Pascoe welcome one and all you're listening to what on earth is happening here on the Oracle Broadcasting Network I am your host mark passio this show is live every Sunday from 5:00 to 7:00 p.m. East Coast time that's 4:00 to 6:00 p.m. Central Time today is Sunday May 22nd 2011 my website what on earth is happening calm and there's a great show lined up here for you today we are going to continue to discuss the esoteric symbolism behind the reverse side of the Great Seal of the United States this is better known as the pyramid and all-seeing eye that is found on the back of the one dollar bill we started this last week and I began to extensively breakdown the symbolism of this seal we're going to continue that today we're going to look at the gematria or the hidden occult numerology in this seal today and look at some of its deeper underlying meanings so that's coming up on the show a little bit later I have a couple event announcements to read the first is right here in Philadelphia today there is an event that is happening at Independence Mall visitors center right on the lawn it's called raise the vibration and it's basically an event where all activists of Philadelphia of any persuasion that are attempting to really improve the state of the world are coming together to talk about you know what the world they want to see come to fruition would look like and how to make that happen so it's a good positive event and that's happening today all throughout the day right here in Philadelphia at Independence Mall visitors center right on the lawn there so anybody who happens to be in the area that might want to check that out that'll be going on until 11 o'clock tonight I'll be going out to it right after the show finishes so raise the vibration a good friend of mine Dave and door four really helped put this event together and hopefully it'll be a big success the second event is the Tesla Science Foundation Nikola Tesla energy independence celebrations coming up here in Philadelphia July 7th 8th 9th and 10th and there's the Tesla science conference which which is a big portion of the overall energy independence celebrations that happen every summer around Tesla's birthday the science conference will be open to the general public and its topics will include ether theories alternative energy exotic propulsion technologies electrotherapy Tesla coils and the wireless transmission of power this event is open to the general public and only $100 for registration that's for all four days and students will receive a 50% discount with a valid student ID you can register online for the Tesla science conference coming up here in Philadelphia July 7th 8th 9th and 10th at the Tesla Science Foundation's website Tesla Science Foundation org we'll be right back on what on earth is happening and we'll jump right in with our topic which is esoteric symbolism stay with us folks alright ladies and gentlemen we are back on what on earth is happening I'm your host mark passio my website what on earth is happening dot-com we're going to be discussing the esoteric symbolism on the back of the dollar bill namely the reverse of the Great Seal of the United States we started this last week before we do that I want to direct everyone to my website at what on earth is happening dot-com and if you click on the radio listen page which is the graphic on the left the upper left-hand side of the homepage when you enter the site it says listen live you will come to the radio listen page and then on that page it will say images for today's show and there will be a list of of numbers that are links and each one of those numbers is a link to an image if you click one it will come up in a slideshow these are the images we're going to discuss today on the show and we were beginning this topic of conversation last week and I was breaking down this sigil which is an occult collection of symbols that are put together to make a more complex symbol and in order to understand how that process works we need to be versed in the building blocks or the vocabulary so to speak of what this this sigil or this complex symbol is comprised of it's like being able to read involves understanding the vocabulary of the words and in turn understanding the letters that comprise each word so understanding a complex symbol the prerequisites of that process are understanding the simple symbols which the larger more complex symbols is Kumble is comprised of so we started this breakdown of the Great Seal last week and we ended up understanding that it essentially represents the world in transition to a new world order and whether that trend is a positive one in which we emerge in a state of freedom or whether it is an extremely negative one in which humanity emerges into a state of slavery is a choice and it is up to us and it is up to how much we become enlightened and bring enlightenment to the world through the process of acting rightly upon that which we know so you have to come to a place of enlightenment through knowledge and then turn that knowledge into true wisdom by acting properly upon it this is symbolized by the eye above the pyramidal structure the light okay or the the source the oneness the unification of our thoughts our emotions and our actions and I made a if we look at the seal in image number one that light is a very small portion but it illuminates the entire scene what is of a very great proportion in the image is stone which represents unchanging this it represents stubbornness it represents staying in one form okay the uniform okay conformity it represents heaviness weight the opposite of light okay it represents low consciousness connected with the earth meaning bound in ego based awareness not connected with spirit okay not that earth in and of itself is anything negative okay it means identification with the material all right the stone is what we want to transmute into light okay we looked at this as the symbol of all masonry both light and dark true Freemasonry and dark occult ik masonry it's both okay because the dark Masons or the dark o cultists of the world the dark builders because as we said we are all builders of our collective experience in the world and therefore everyone is actually a Mason everyone is a co-creator of the experience that everyone ultimately lives in in the three dimensional space-time reality that we experience here on earth we are the co-creators of that reality whether we understand the laws that govern it whether we understand the process of co-creation or not that is the case so we're creating this reality forward into the future and it will either be one where the entire world is devoid of light okay meaning that that light has been bricked up the small amount of light that still remains in the world has been completely blocked out from the world and a male Dominator structure the blade okay the symbol of the blade the upward pointing triangle by itself rules the world so in image number two this is an animated gif that I created to show this dichotomy of the current world in transition with a little bit of light left in it attempting to reach or transmute the stone which is the vast majority of the population and the dark New World Order of the bricked up light where no light is reaching the world no light is reaching the earth you can see this animation if you click image number two so an image number three I show the representation of this dark new world order represented by the completed work of the dark occultists so we said last week that annuit coeptis means he or she favors our work favors our project favors are undertaking our enterprise however you want to look at that word coeptis and we can see that this is that work this is what the dark new world order Novus Ordo seclorum is it is the world with no light in it that the light of the Creator no longer reaches anyone in the earth and they are in a spiritual prison they are in a prison actually of spirit mind and body all three and a mail Dominator world reigns supreme and this world is ruled or governed by Darko cultists behind the scene who have all the light and yet have removed it from meaning they have the knowledge of what really is going on and has really taken place but they have removed that knowledge from general circulation so they rule as God from the shadows because that is their intention they want to be God here on earth they want to rule in hell because that's what their rapidly turning this world into a hell unless we do something about it by changing ourselves by learning by taking true personal responsibility by acting on what we know to be right and by helping to influence as many other people as possible into making that same great change within themselves an image number four I showed that there is hidden geometry contained in the seal images four and five show this if we look at the dark New World Order symbol and I showed that you derive these five letters or five points by actually placing the compasses and square of Freemasonry the symbol of Mason's overtop overlaid on top of the pyramid and that is in the last podcast you can go back and check that out you can find the five letters the points of the compass 'iz and the points of the square point to these five letters and they are they form an anagram for Mason if they are connected without the lights they form an inverted pentagram which is the symbol of the satanic mindset and uh that's the intro music for this next break we will be right back after these messages folks stay with us we'll continue to break down on the other side all right folks were back on what on earth is happening we were breaking down the reverse of the Great Seal of the United States symbolically and we were on image number four from the what on earth is happening radio listen page on what on earth is happening calm image number four shows the dark new world order completed and how this is a satanic world that has been created because when we connect the five points that are formed by the word Mason the anagram that we derived from placing the compasses and Square over the pyramid on the reverse of the Great Seal it forms these five letters when we connect them in a way that does not include the light we get an inverted pentagram which represents the rain of the material world over the spiritual world because the inverted pentagram represents the thrusting of the fifth element into the ground burying it under the weight of the pyramid okay of stone the the spirit represents that fifth element that fifth point which needs to be in the upright position which needs to essentially be given a superior position to the material aspects of ourselves that we understand that we are a spiritual being having a physical experience and not simply a physical mechanized machines in a physical mechanized universe so this is the dark New World Order and in image number five we see what we will create as Mason's as builders of our collective experience if we incorporate the light so the five letters spelling the word Mason if the light is included forms the Seal of Solomon the Sun and the moon it contains the Sacred Feminine or spiritual aspect of ourselves incorporated with the male aspect and the male aspect is governed by the light which is in the in the superior position and we see that now that that that point of light which is the source of all and the unity of everything actually reigns at the top of the image but the Sacred Feminine element is also included in the image so this represents right action combined with the Sacred Feminine component of care true care and that is what a light Mason wishes to build now when that is perpetuated when that is done chronically okay when we live like that all of the time what will eventually happen is that stone becomes transmuted into pure light okay that's what the goal of the light Mason actually is is to transmute that stone and bring the light down to the earth to to bathe the world in light so to speak such that there is no more stone there is no more unenlightened people there is a state of universal enlightenment in which the truth reigns supreme not the authority of man okay the authority of truth so this is an image number six if we proceed to image six we can see the representation of this positive New World Order the New World Order where truth love and freedom are the end results where there is no Step Pyramid of stone there is only light and that is the true great work the unification of thought emotion and action which will create truth love and freedom and an image number seven I have put together a slide showing all three of these states in juxtaposition with each other so this will really clarify what this image ultimately represents and you can see at the very top of the image it says the world in transition and it's showing the reverse of the Great Seal and then the question is asked which new world order will be created and on the left hand side I show the dark new world order and I describe it as a male Dominator world without light we're dark occultists rule an ignorant enslaved population with an iron fist on the right hand side I show the light New World Order and this is what our choice is between these two worlds that are going to be created in the near future it's all our choice this is the state of the one great work here should depict it on the on the right the light New World Order one great work truth love freedom Universal enlightenment through wisdom and personal responsibility truth love and freedom prevail that choice ladies and gentlemen is up to us as I said this is a very misunderstood symbol people only tend to look at the negative side of it where they look at that light representing the so called Illuminati and them keeping everybody else in a state of disconnection from them in a state of ignorance which is represented by the stone and that is certainly true that is the dark New World Order way of looking at that symbol but we need to understand that that light represents the true creator and the true source see the dark aluminous or the dark o cultists consider themselves as God here they think they are God they want to be God so they usurp that role of the light and say that they have all of the light and they are the gods here and there nothing of the sort they're just demented twisted psychopathic people who happen to they do happen to know a lot about the spiritual reality in which they live and they choose to deny that version of reality and they choose instead to want to serve only themselves without any care because they have no emotions that's what a psychopath is a being that doesn't have the ability to feel and in this state of actual self-hatred because that's what it really is it's not true self respect these people ultimately know that they're damaged goods at some form or another and that there's something that is horribly broken in them because they have no emotions and therefore they want everybody else just to feel as miserable as they do all the time about themselves and sadly you know that is working for most people that is that is working there their plan to make people feel like that works when it comes to most people on the earth because not many people are living a fulfilled life doing what they really should be doing they're just wasting their lives wasting their time working to pay bills working for fake money that's valueless that's not worth the paper it's printed on and they're going along to get along and in doing so they are unwitting accomplices of this dark new world order they pay taxes to service wars they pay taxes to to service the pedophiles that are in office and in their religions and to help basically bomb people in other sovereign countries that they have note that we have no business being in they continue to keep their money in banks and banking institutions where basically they're owned and ruled by dark occultists that don't care about them but are making money hand over fist in a basically keeping all this money lending it out extracting derivatives upon it charging ridiculous interest rates on it and fueling their other Ponzi schemes of you know fractional reserve banking and the Federal Reserve with all the people's fake money but people continue to let it go on because they don't know any better because they're basically on red because they don't care they've become apathetic because they don't really have any true self-respect and that's what ultimately needs to change if we're going to start to transmute things here and start sending them sending them in a positive direction so we'll get back into all of that when we come back after this next break you're listening - what on earth is happening here on the Oracle Broadcasting Network we'll be right back folks stay tuned alright ladies and gentlemen we are back on what on earth is happening I'm your host Mark Hasse oh my website what on earth is happening com all images that we discuss on this show are on what on earth is happening calm on the radio listen live page and you'll see it listed under images for today's show and then there's a series of numbers there that all represent images we have been looking at these images which represent the reverse of the Great Seal of the United States and breaking down its esoteric symbolic meaning here on the show over the last couple of weeks and we're going to look at a different dimension of this today we're going to introduce another occult topic known as gematria that spelled GE m ATR IA and what this basically is is a form of occult numerology and this is also embedded in the reverse of the Great Seal and in other places in occult symbology we're going to look at it specifically as it relates to the reverse of the Great Seal now if we look at that image of the reverse of the Great Seal with the pyramid and the all-seeing eye we will see nine letters on the base of the pyramid again this is a 13 level pyramid and as I said that's a solar number okay it represents the Sun and the 12 houses of the zodiac and indeed that's what the ruling so-called elitists or illuminated ones consider themselves a solar cult they are the cult of the Sun they are dark atenists okay they are dark Luciferians they are dark set Tian's all of these are simply representations of the dark Sun okay it doesn't mean that those names well when it comes to set it does mean that it's a negative it's set there is no really positive side to him in Egyptian cosmology he was the opposite or antithesis of Horus the Rising Sun the true bringer of light in red you know the dark solar principle represents the force that keeps people in a state of opposition or duality it's the set on principle as we've talked about before many times on this program and again in Hebrew the word Satan means adversary or opposer the one who tears apart the one who creates strife division opposition and this is an internal opposition ultimately and that's what they want to foster at all times they want people torn between themselves and each other that's the only way they can rule through divide and conquer so this thirteen is symbolic of the solar called nature of the pyramid or the great work that they want to build that's why there's 13 courses of brick for the dark new world order okay and again this also this number 13 also represents the positive side the Sun and the 12 houses of zodiac depicting the light the true light the light of reason okay the light of knowledge of self that the the light meaning being connected to the true source of oneness we have to understand that there is a dual nature to symbolism depending on who's using it and what the purpose that they're using it is we can't get locked down into unit dimensional thinking about what any given symbol means and this is the trap that most researchers when it comes to Freemasonry in general when it comes to the occult in general when it comes to this type of symbolism which has clearly has a dual meaning when you get deeper into it and don't just skirt the periphery don't just look at it on a surface level but really dig deep and understand what these symbols really mean we understand that it's not as simple as meaning one thing so the number thirteen is a classic solar number okay and it represents when when it comes to building the dark new world order or beginning the work in earnest of building this pyramid of stone then it sits it carries a negative connotation when it means building toward the light okay and actually helping to transmute that brick that stone into pure light which is embodied and symbolized by the Sun then it carries a positive connotation all right so we're going to look at these nine letters and understand what they really mean and why they're on the base of this pyramid so we need to understand them as Roman numerals first of all okay they're they don't clearly aren't forming a word the letters are M d c c LX x vi9 letters they represent roman numerals the roman numbering system okay and in slide number eight here in image number eight on the radio lesson page of what on earth is happening you can see the breakdown of each one of these Roman numerals and what number they represent in the Roman numeral system M is the Roman numeral that stands for the number 1000 D is the equivalent of 500 C is the equivalent of 100 L is the equivalent of 50 X represents 10 V represents 5 and I represents one so when we add these all together in the nine letters that we are given at the base of the pyramid we get a number so let's do that we have em a thousand D we're adding five hundred so we've reached 1,500 okay now we have to seize each C is worth 100 so now we are at 1700 then we have an L L represents 50 so we're 1750 we have two x's which each represent ten so now we've at were adding 20 to 1750 we have 1770 then we have a V which represents five 1775 and then we have a 1 an AI which represents 1 1776 which of course is a very significant date a significant year because that was the year that we wrote the Declaration of Independence and declared our independence from the tyranny of Great Britain and the the old world order so to speak and as we know immediately the new world order began being built after that year and this is also the date that the dark marriage between royalty and the dark occultists really occurred in earnest through the formation of the Bavarian Illuminati in 1776 that organization of course is much older but it's simply a symbolic date for a number of reasons which we're going to get into tonight and that initiation of the so-called Illuminati was done in on May 1st Val purchase knocked of 1776 Beltane a specific reason for that as we know that's the most significant occult holiday or Sabbat of the year so 1776 is what we get when we add up the digits or the numbers that these Roman numerals stand for now let's apply gematria to these now gematria is a combination of number and form okay it stands for Jamaa tree gematria stands for geometry plus mathematics okay so there's form and number so let's look at the number first and explain the concept of gematria reduction as it is known and this is seemingly a an oxymoron because gematria reduction is actually addition which we look at as the opposite of reduction okay but it's essentially reducing complex numbers down to more simplistic numbers through adding their digits that they are comprised of together and then summing that result okay just looking at the result of that making it more simplistic so 1776 the number is simply comprised of a 1 a 7 a 7 and 6 if we add those all together ok we will get 1 plus 7 which is 8 plus 7 which is 15 plus 6 which is 21 okay so if we add the 2 and the 1 together we can reduce it further from a two-digit number to a three-digit number and we will get the number 3 this is the simplest reduction of the term 1776 and what I want to do is continue this on the other side of the break so we can see that there's more complex ways that these numbers can be reduced and that's what we're going to see when we look at how they're put together on the reverse of the Great Seal we'll pick that off on the other side of the break you're listening to what on earth is happening with mark passio stay with us folks all right ladies and gentlemen we're back on what on earth is happening in the last segment we were talking about the concept of occult numerology known as gematria and we were seeing how this applies to the reverse of the Great Seal of the United States and the symbolism that is contained therein we were looking at geometry or reduction of the numbers in Roman numeral digits digits on the base of the pyramid MD CCL XXVI of the Great Seal and we added those up it sums 1776 that is the sum of those Roman numeral digits again significant date for two reasons the signing of the Declaration of Independence and the formation of the modern incarnation of the Illuminati the dark form of the Illuminati I should say we see that the numbers 1776 reduced to 3 because they add to 21 and then 2 plus 1 equals 3 this is how gematria reduction worth works it's simple addition of the digits until you get a single-digit number however we can also simply sum up the 6 and the 1 and keep the other two digits ok this is another way of doing it you can simplify in a very simple way until you get down to one digit so if we simply add the 1 and the 6 we get 7 and we can keep the other two 7s in place and we get another very significant occult number seven seven seven three sevens okay we'll see what that means in a moment but I just want to show you that it works out the same seven plus seven plus seven of course is still 21 and that still equals three this is the community commutative property of addition it means it doesn't make a difference if you change up the the order that you're adding them in you're still going to get the same result so let's see how this applies to the Great Seal if we look now at form and how form is incorporated into the Great Seal we see there is essentially one shape that is repeated in the Great Seal of course it's contained all within a circle however the main shape or focus of the image is a triangle I'm cutting a three-sided polygon so if we take that and replicate it three times because we can see the repetition of three okay we have nine letters so we need to put those around the triangle three times we have three sides or three vertices of the triangle right and we have nine letters so you could do this with one triangle and just you know start at the top and then go to the base and then you could repeat it three times you'll get the same result I'm just showing it here for simplicity sake with the first three letters around one triangle the second three letters around a second triangle and the third letters around a third okay you could do it on one it will basically come out to the same thing so again these images are very critical to just be hearing this I know would be difficult the images are paramount they really need to see the images to go along with this talk so they're at what on earth is happening on the radio listen page and it's you'll see that in a section that says images for tonight's show if you're listening on podcast the images are listed with the podcast on my website in the podcast section so the first three letters are MDC we place the first letter at the vertex of the pier at the apex of the pyramid and then the second two at the base so this is representing that there is unity at the top where there is light and there is duality at the bottom where there is low consciousness okay so one letter at the top two at the base all right we do this again for the second series of three letters see at the apex of the pyramid and L&X at the base then the last three letters are x VI X goes at the apex of the pyramid and V and I go at the base so now we're going to substitute the values of these letters with that we're going to substitute in the values for these letters so the next slide image number 10 okay we were looking in image 9 where we place the letters around the the respective pyramids or triangles now we're moving the image number 10 where we are now substituting the values for the letters okay so now we have one 1000 at the top of the first pyramid and at the at the base of the first pyramid we have five hundred and one hundred because M is 1000 D is 500 and C is 100 all right now the next pyramid was CLX so this is 100 at the apex at the very top and then 50 and 10 L&X at the bottom okay the third pyramid we had X at the top and V and I at the bottom this translates to 10 the number 10 at the top and then 5 and 1 at the bottom okay so if we move on to slide number 11 we have a further reduction because what I've simply done is I've kept the 3 powers of 10 which is also symbolic language powers of a 10 powers of at 10 okay it works out in the English language like that for a specific reason all right we see that those are perfect numbers those are perfect powers of 10 all right but at the bottom we add the 5th the 500 and the 100 on the first pyramid to get 600 and then we add 50 and 10 on the second pyramid and we get 60 and then we add five and one on the third pyramid to get six so I think some people will begin to see a pattern emerging here I know I do and people who think this is accidental or it just works out like that somehow get over it this is deliberately designed all of these things are not accidental they were very carefully crafted into this sigil because it is an occult sigil so if we go to the next slide which is slide number 12 we see the reduction of these because all of the zeros simply add to nothing they go away so we're left with all ones at the top okay one at the top of every pyramid and that's symbolic that's significant there is unity in light the source the Creator the oneness of everything okay at the bottom we have three sixes because we had 660 and 6 which is 666 so there's three sixes when we remove all those zeros even if we just add them together as 660 and six we have three sixes 666 and I think we've all heard that number as being the number of the Beast the number of Satan the adversary the opposer however you want to look at it it's the number that represents low consciousness base consciousness evil the Beast Satan etc okay so if we move to image number 13 I've simply combined them back into one pyramid again I said you could start with just the one shape if you want just keep the pattern going of putting them you know the first letter at the top and then the second two at the base and then repeat that but I've merged them now so we have three ones at the top representing the Trinity of thought emotion and action in a state of unification unison oneness non duality ok the Trinity United and we have the number 666 at the base of the pyramid of stone so the Trinity representing the light and that's the Trinity that our of the expressions of our consciousness thoughts the Creator emotions the divine mother or spirit and actions the divine child the Sun male action the male principal action is the male principle okay and it's the byproduct or the child of our thoughts and our emotions so that's the state of those three being unified and activated or enlightened true enlightenment is when all of those three aspects or manifestations of consciousness are unified within us and not in a state of opposition or duality the state were they where we don't have these principles activated at all where we exist in a state of ignorance apathy and laziness / cowardice is the Beast consciousness 666 the stone the state of darkness without the light of weight that crushes our spirit we'll pick this up on the other side folks you're listening to what on earth is happening right here on the Oracle Broadcasting Network stay tuned complex symbolism that is comprised of more simplistic symbolism that is combined together to form something that carries a more complex meaning or story so in the last few segments we've been looking at the concept of occult numerology and how the date on the bottom of the pyramid M DC c LX XVI the Roman numeral date which represents the year 1776 if we break down that's that those letters and place them around the actual shape and then convert them into their numbers so if we place them around the pyramid in a specific sequence and then convert them into actual numbers that that the Roman numeral digits represent we get after the gematria reduction or a simple addition of the digits we get the number 1 1 1 at the very top of the pyramid representing the Trinity or thought emotion and action in a state of unification and at the bottom we get the number 6 6 6 representing base consciousness consciousness without light without understanding without reason in a state of ignorance apathy and laziness and cowardice the opposite of thought emotion in action the opposite of true holistic intelligence true care and right action in the world through courage so what I want to explain in this segment is that when we look at the number 1 1 1 we see that that is the equivalent actually of the number 777 which we have already spoken about and the reason for that is in gematria if different numbers or words that we are ultimately converted into numbers if they add to the same number if they reduce as it is called in geometry to the same number they are have equivalent meanings okay so one one one adds two three one plus one plus one is three and we already saw that seven seven seven adds to twenty-one which then adds to three two plus one is three so since both of these numbers add to the same reduction number which is three they can be interchanged they can be transposed they can be used to represent the same concept or idea they are equivalents in gematria in occult numerology 1 1 1 and 777 are equivalents they are identical they essentially carry the same symbolic connotation so 777 is the unification of thought emotion and action in an activated state of higher consciousness it is the representation of being like the divine in human form unity in human form it's not saying that you are the divine that you are God it's saying that you have arrived at a place of unity within yourself so you are embodying that divine spark that you carry within you you are expressing it in its fullness through your thoughts your emotions and your actions in a state of oneness you're listening to what on earth is happening ladies and gentlemen I'm your host mark passio my website what on earth is happening calm we'll continue this breakdown of a culture mantra on the reverse of the Great Seal after these messages stay with us folks welcome back ladies and gentlemen - what on earth is happening on the Oracle Broadcasting Network I'm your host mark Cassio we're talking about gematria or occult numerology as applied to the reverse of the Great Seal of the United States the pyramid and all-seeing eye on the back of the one dollar bill all of the images for any of the talks that I give here on what on earth is happening can be found on the radio listen page when the show is live of what on earth is happening calm click the listen live button on the upper left hand corner of the website if you're listening on the podcast the images will be listed underneath the podcast on the podcasts section of my website which brings me to my next point for those who may be new to the show I understand that it may be difficult coming in at a point like this where I'm breaking down complex symbolism and a lot of these concepts have prerequisites to understand all of the prerequisites have already been touched upon and explained on former shows and you can go back and listen to any of those for free and download them all the entire archive of podcasts is at what on earth is happening calm in the podcast section just click the podcast tab every show is listed with its topics shown the date and topics are shown and then associated images documents and videos are also shown below the podcast listing so avail yourself of that information if you want to catch up and it's easy to download put them on any digital music playing device copy copy them up send them to other people do whatever you want with them they're there for for your edification basically so that having been said let me give the call-in numbers which I didn't do in the first hour if anybody wants to call in feel free to call in and chime in on any of this calling number is eight six six eight four one one zero six five once again the call-in number eight six six eight four one one zero six five and let's get right back into the breakdown of the occult numerology in the reverse of the Great Seal the symbol of all Masons the world over whether they be light or dark Mason's whether they be building with light or building with stone this is the symbol of both the light and dark Oh cultists this is the symbol of the world in transition this is the symbol of the law of attraction what do we build with what we build with will directly influence what we get we reap what we sow as we think so we shall become that's it and I would add as we think feel and act show so the world that we are co-creating through those principles so it will be like so it shall be and then we will have to experience it in other words you made your bed and now you have to lie in it and I don't think we're doing such a great job folks quite frankly compared to all of the possible permutations that we could have created with this divine gift of the mind look at what we've made the world into you know a practical prison planet that we've heard this term used by people like Alex Jones and others and it's true that that's what the dark new world order is it's a prison for souls that is being built and it is almost nearing completion so if we want to change it we have to understand the same things that the dark occultists who are running that ship of state that are running the entire hierarchical occult system that people are unwitting accomplices in we have to understand the same knowledge and information that they do which means we have to bring hidden knowledge out of the darkness and into the light of day we have to make the occult no longer hidden we have to make it common sense we have to make it known to a point where it's common sense to anyone just like some of the things that people take for granted today seem like common sense to them even though they're most of the time radically off the mark about it about what is real and what isn't we need to make this information into common ground that we can build a better world on because again it's just information about ourselves it's what we do with it that determines what the world that we will experience and live in will be like so we saw in the last segment that when we add these digits together we're looking at we're picking up on image number 14 on the radio lesson page of the website and we see that when we finished the gematria reduction of these nine digits MDC CL XXVI we get at the very apex of the pyramid 777 representing the unification of the expressions of consciousness in man and then the number 666 which represents base consciousness unconsciousness in other words being kept in the dark no activation of thought emotion or action so image 15 is a simple chart that explains this concept and these two occult numbers and their associated meanings image 15 is a chart about gematria or occult numerology it shows the numbers seven seven seven and 666 and explains their meanings seven seven seven means man in a state of unity consciousness thought emotion and action are activated unified or complete the gematria reduction is 3 for the number 777 again the Trinity the law of 3 etc ok the true triangle or pyramid fire in the middle Pyrrha fire mid middle pyramid the fire in the middle is the awakened pineal gland in the middle of the head the third eye the middle I the one I the true one I not the fake one that were given as money which is why this symbol is put on money Mon eye one eye and yes that is how simple of the occult is through words and terms and symbols that's it that's what it is but because we don't understand it as a whole it has effect upon our subconscious we don't understand what's really being said to us through the money that we carry around as occult talismans this ultimately is all part of talismanic magic the number 666 its meaning is man in a state of base consciousness or beast consciousness opposition adversarial duality thought emotion and action are inactive or incomplete and this is what most people are in this state of consciousness it is the number of mankind as they exist right now unfortunately the vast bulk of them its reduction is 9 because 6 plus 6 plus 6 is 18 1 plus 8 is 9 what is the symbolic significance of the number nine we'll pick that up on the other side of this next break you're listening to what on earth is happening with Mark Hasse oh here on the Oracle Broadcasting Network we'll be right back folks don't go anywhere all right folks we're back on what on earth is happening and before the break we were looking at the number nine and it's symbolic significance and I'm sorry about the background noise I'm not sure what's causing that I think that's something outside here so we were looking at the number nine and it's symbolic significance and we see that when we reduce the numbers seven seven seven we get the number three when we reduce the number 666 we get the number nine so these being at the respectively at the apex and base of the pyramid 777 reduces to 3 and we put 3 at the apex this is image number 16 now that we're looking at on what on earth is happening calm on the radio listen page at the base we reduce the number 666 and we get 9 because it adds to 21 sick I'm sorry it adds to 18 6 plus 6 plus 6 is 18 and then 1 plus 8 is 9 so that's how we reduce in Jamaa tree meaning we add together to get a more simplistic number to take it down to a single digit number so in image number 17 I've put a slide together that explains in someone else's words what 9 means on an occult level so this is the word these are the words of Anton LaVey the former high priest of the Church of Satan who wrote The Satanic Bible and the satanic rituals two books that basically encapsulate the ideology of Satanism and from his book The Satanic rituals here is a quote about the number nine and what it means in occult terms Levay says despite others attempts to identify a certain number with satan it will be known that 9 is his number 9 is the number of the ego for it always returns to itself no matter what is done through the most complex multiplication of nine by any other number in the final equation nine alone will stand forth now levae is telling you what the number of ego is and hence what the number of the adversary or the opposer were the one who divides the one who keeps us separate the one who keeps us in duality and I shouldn't shouldn't even use it as the the term want the one it's the force that does this we can't look at this as a being or a person it's a force and it's a force that we have a choice whether to cooperate with whether to align ourselves with or whether to go in the other direction which is the force of unity and true power and truth and light which is the opposite of duality the opposite of satan okay we need to understand this as a concept not a person or a being all right so he's telling you part of the truth but he's not telling you about gematria about reduction of digits when you add them together he says despite others attempts to identify a certain number with satan and he's talking about the number 666 but what he's not telling you is that 666 and 9 are equivalents when it comes to gematria or occult numerology they have the same meaning 666 and 9 are identical because when they when 666 is reduced it reduces to 18 and then to 9 so when he's talking about this these properties of 9 when it comes to multiplication what does he mean well in image number 18 I've put together a chart about the multiplication and addition properties of the number 9 and what this means symbolically okay not just from a left brain mathematical perspective but symbolically occult eclis what does this uh what is it is saying to us about the number 9 okay so the numbers 9 when added to anything when we add 9 to any other digit we change no value of that digit in in the final result in the reduction so when we get when we add 9 plus 1 we get 10 and the the number 10 reduces to 1 ok so we have changed nothing we started with 1 we added 9 we get 10 and then 1 plus 0 reduces to 1 we go back to where we started let's do this with the number 2 we add 2 plus 9 we get 11 and then 1 plus 1 is 2 it reduces to the same thing that we started out with which was 2 3 plus 9 equals 12 we add 1 plus 2 and we get 3 we're back to 3 we do this with any number okay or any series of numbers we add 9 it changes nothing ok so if we look at what this ultimately symbolically represents is adding ego 9 the number of ego 2 anything changes nothing you cannot create change with the ego okay until you get out of ego no true change is going to take place if you're focused on service to self instead of service to others ultimately no no transformation is going to take place ok in addition to this we can see the properties when it comes to multiplication which is what LaVey was talking about in his statement from the satanic rituals 9 plus times 1 is 9 ok 9 times 2 is 18 and and then in the reduction ok 1 plus 8 is 9 all right 9 times 3 is 27 2 plus 7 is 9 9 times 4 is 36 3 plus 6 is 9 we're always coming back to 9 9 is replicating itself through multiplying okay you can do this with any number even a decimal number okay and the result you add the digits even it has many decimal places you're going to get a result that adds to nine and what this symbolically is saying when it comes to the proper properties of multiplication as applied to the number nine is that whenever the ego is multiplied all that you ever end up getting is more ego when you multiply ego you get more of the same you don't change anything in this method as well you're you're starting with something you're multiplying it through something else and then you're coming back to the same thing no change is being effected things are staying the same in a state of base consciousness because ego is being applied and you get more base consciousness which is ultimately illusion see ultimately nine since it represents ego which is the false self the false identity that we think of as our self whenever you add it it changes nothing whenever you multiply it you get more of the same and it's all illusion nine is the number of illusion because the ego the idea of the ego as that we think of as ourselves as something separate from everything else that's what we mean by the ego the state of separation of duality of us versus them thinking ultimately that's illusion it has no actual value adding nine as we see on the left-hand side of this chart is like adding 0 1 plus 9 is 10 add the two digits 1 and 0 you get 1 let's take for example 8 plus 9 8 plus 9 is 17 1 plus 7 is 8 we could just substitute 0 for 9 and it would be basically mean the same result anything plus 0 nothing changes not add nine is like adding 0 because adding ego is an illusion right after this break stay with us you're listening - what on earth is happening I'm your host mark passio my website what on earth is happening com we'll be right back folks okay folks we're back on what on earth is happening I'm mark passio my website what on earth is happening calm in the last segment we saw the properties of the number nine why it is the number of the ego why is it is the number of Satan and revered in Satanism in general because it represents base consciousness which is what Satanists and dark Luciferians want to keep people in so that nothing changes and they continue to rule this world so 9 being the number of ego being the number that represents the inability to create change that's what the force of opposition which is conceptually referred to as Satan once that force wants people in a state of duality in opposition most of all with themselves not just with each other so that people won't actually do the things that they know to be right and will continue to make justifications and excuses for not doing what they know that they really should be doing so in image number 19 on the website I show this process okay of coming out of that state of illusion of ego where the ego is ruling the being where it is ruling their mind in their actions and that is at the base of the pyramid I should also show in conjunction with the pyramid and all-seeing eye the compasses and square of Freemasonry because again the symbol has everything to do with a building project referred to as the New World Order and we I placed the number nine at the bottom of this image which represents the number 666 and I placed the number 3 at the top of both symbols on the left and right here the pyramid an all-seeing eye and the compasses and the square this is image number 19 on the radio listen page of what on earth is happening calm and I've symbolically put on here these arrows that represent the direction that we need as a species as a hole that humanity as a whole needs to attempt to move this is the great work that we are charged with doing of taking ourselves out of base consciousness okay out of the beast or animalistic modality and moving up toward the state of true reason of alignment with natural law of understanding of ourselves as sovereign beings understanding ourselves as part of the all having a divine spark within each of us and trying to express that in its fullness which is represented by respectively the all-seeing eye and the compasses compassion true compassion true care the divine shape okay that traces the circle in the grand geometry okay the design of the grand geometry so we need to come out of the base out of the blocks get past the barriers to the light right because the barriers of stone is what's blocking us from the light we need to come off of the square and go on to the compasses and we do that through G right getting in touch with gnosis with the grand architect the Creator true care the Gaia principle the divine mother all of these things the G represents we talked about that extensively in the past when we looked at this symbol in the break down of free Masonic symbolism so coming out of base consciousness or 666 and ascending to 777 embodying the light activating thought emotion and action each one of these numbers represents thought emotion and action the first six in 666 thought the second one emotion the third one action we need to make them from the number of incompletion which is six to the number of completion in human form which is seven this does not again mean that we become God okay it means we embody the light within us we are in this world but not of it we recognize our true source we recognize our our true nature as spiritual beings so that's 777 is the number of Ascension all right and the this process of Ascension of having having completed the great work in other words is 777 this process of ascending coming out of the nine and going toward the three or out of 666 and going toward the seven seven seven is the number 93 is what is symbolic of that because we're leaving the nine and going to the three so this is in another occult system called Thelema is the number that is used to represent the will that is required to make this journey to make this climb from base consciousness to higher awareness from ego to true compassion and care and right action it's called Philemon Zwilling valves willpower and the other thing it represents is agape or love that's the word love in Greek okay so interest interestingly if we take the gematria of these two words in Greek because you could do gematria in any language you could do it in Hebrew you could do it in Greek you could do it in English in the Greek language if you take the two words that this this number of the process of Ascension 93 right represents it represents will and love those are the things required to complete the great work alright if you look at their gematria their numerological addition of each letter in the word so the the word thelema comes from greek is spelled theta epsilon lambda ada mu alpha okay if you take each numerical equivalent of each letter of that word theta is equivalent to nine in Greek gematria epsilon is equivalent to 5 lambda is equivalent to 30 ADA is equivalent to 8 mu is equal to 40 and alpha is equivalent to 1 so we have theta epsilon lambda ada mu alpha which is 9 plus 5 plus 30 plus 8 plus 40 plus 1 and we get the number 93 and that word means will philemon gap a which is alpha gamma alpha pi ada and we take the jima the gematria equivalence of each one of those letters in greek alpha is 1 gamma is 3 alpha is 1 again pi is 80 and ada is 8 we get 1 plus 3 plus 1 plus 80 plus 8 which again is equivalent to 93 this is telling us that these words are basically equivalent that they mean the same thing the true will is love and love is the true will it is higher consciousness and it is the process of ascending to higher consciousness we loved ourselves to get up to that level of consciousness from where we were at and we love others if we attempt to communicate the same message that got us to that level of understanding and helped us to perform that great work upon ourselves it is love that drives that so Thelema and agape will and love are equivalents and it is they're both what are required to make this process of Ascension happen to go from the 9 to the 3 that's why 93 is a very significant occult number and all of this is going to come full circle specifically when we look at the 911 event so image number 19 showing this occult number 93 and how it is a process of Ascension out of base consciousness and to the activation of thought emotion and action and those manifestations of consciousness coming to their completion within humanity that's what that represents and ultimately that's what this symbol on the back of the dollar bill represents when it comes to the positive side the light New World Order being created and that seal that I made showing one great work truth love and freedom what is the great work completed and that's what it will manifest as the truth being known love being the emotional quality that is the most active and present instead of fear like it is now and true freedom and sovereignty being understood and lived so with that having been said I'm going to go to the calls after this next break and then at the very end I will attempt to tie this all together with what is known as the higher degrees or the illuminated degrees of Freemasonry which we touched upon last week in the last image image number 20 on the website so coming up in the next segment going to the calls and seeing what some people have to say and then I'll wrap it up to take us out stay with us folks stay asleep Oh bad when he looks at it with his eyes as what we see when he looks at it in the sunglasses we see the same things all the way through the subliminal simple to be okay Joey defendant welcome back folks you're listening to what on earth is happening on Oracle broadcasting I'm going to go to the phones in this segment and then I'm going to wrap it up with an explanation of the illuminated degrees and what that really means so here we go let's see what some callers have to say caller you're live on what on earth is happening what do you have for us today hello caller yes your lives oh yes Anthony from Portland how are you doing mine great hey Mark I first started catching you through yon Irvine yes on your Gnostic media yes and listen to some of your podcasts and I gotta say is well it's great information I can't believe you're giving it away I appreciate that it's this is this isn't my information this is information that belongs to the people of the world and you know I I don't charge for that there's nothing for sale up on my website I'm doing my best to help enlighten people to what's really going on in the world yeah and believe me I really do appreciate in fact let me identify something my own kind of poison worldview and I'm trying to work through that and as things go anyway the reason I called and I have a question and what I'm looking at is how do these elites avoid the law of attraction how do they avoid their putting out all this negativity into the world how do they avoid having that come back on them that's a great question and I I do have an answer for that I do understand how that works they're not the ones really doing it they're getting other people to do it for them and absorb all of that negative karmic consequence see David Rockefeller or as a business in ski or the Pope or George Bush or Henry Kissinger aren't going in waging war against other people who they never met and killing people and taking their resources from their country etc they're just telling people to go and do that they're not the ones who are putting down political protests and freedom of speech and people's natural law inherent rights they're whispering in people's ears and getting them to do that for them okay they're putting they're poisoning their worldviews through what they're saying and the through the things that they are teaching people that they are accepting as reality by not critically judging that information to determine its veracity or truth and then they are going and taking actions based on that falsity so ultimately the bulk of that karmic consequence is being directly absorbed by the people doing those actions and this is a huge point of contention and disagreement and people will say oh no it only has to do with what the intention is absolute nonsense it has everything to do with the action that is taken or not taken that is where the karmic consequence of the law of attraction is derived from and anybody that will tell you otherwise is lying or doesn't know so the people who are really performing the evil of the world are the one who are going to absorb the most karmic consequence as a result even if they think they're doing it for a greater purpose or the common good or whatever the lie that they by have bought they do not understand that it is them and them alone who are going to absorb the Karma consequence of that action and that's a hard pill to swallow for most people but that's the truth yeah so so someone hires the Hitman they both bear responsibility but of the karmic consequence most of it goes to the Hitman absolutely right ABB's 100% absolutely right that's right they're both they're both acts of evil but the person who is taking that action actually performed the evil think about it deeply I mean sit and think about that really contemplate on that for a long time that's something that most people do not grasp if you grasp that and think about that in relation to your own life and your own actions the finger stops being pointed outward and starts being pointed inward and that's the whole purpose of this show to get people to examine to re-examine themselves because if we don't cooperate on this agenda it's game over the world would be free there tonight if people stopped cooperating with this agenda and living in the fear that they propagate so yes okay yeah the other question I had for you was who do you think is at the very top I mean read some of the David Icke stuff and he kind of postulates that there's some kind of demonic and entity that feeds off of all of the fear and all the pain and going on in this world it's a it's the force of fear the force of fear is what wants to continue to live and be fed whether you look at that as something that is embodied in an actual consciousness of a being or not to tell you the truth it doesn't matter the game is the same it's played the same way it uses the same methodologies whether it happens to be an extraterrestrial species demonic entities a noncorporeal force or just humans living here on this planet it doesn't matter who's at the top all that matters is the ideology that they are promulgating and the methodologies of mind control that they are using to get us to go along with that agenda we wake up to that it's game over so great question I appreciate the questions thanks so much for the call I'm going to move on to another call now so thanks for thanks for following it thank you you too it okay here we go we have another caller caller you're live on what on earth is happening hello hi how are you yes you are you're on live what do you have for us oh no I just wanted to tell you that of course carbon we lived in a we live carbon-based world and it has six protons six neutrons and six electrons interesting right also I mean this is interesting because these um principles apply to actual properties in our world the nine in Vedic math is nine and zero interesting yeah I just wanted to tell you that so absolutely you'll find this in many different things you'll find these number systems you know in many different occult schools you'll find that this applies in so many different aspects of the world in which we live I mean look at the number seven seven seven for example how it's used by people it's where you see it the most often in casinos you see that's the jackpot number because they're trying to get you to identify with that number they know what it means occult eclis and they're trying to sell you on that number to get you to keep playing and giving them money you know that's one of the main uses of that number they know it's the number of that what people ultimately want in life is back to that level of completion within themselves that they don't have and so they're selling it to them there was symbol on it on a jackpot on a a slot machine so I pre appreciate the points thanks alright thank you you're welcome ok I think I'll stop there with calls and we will look at the last point that I wanted to bring up for the last couple minutes if you look at image number twenty which is the final image for tonight you'll see the compasses and square a freemason replaced over once again the pyramid an all-seeing eye and as I said this symbol is a representation ultimately this reverse of the Great Seal is a representation ultimately of the illuminated degrees of masonry okay so the the lower degrees go up to level thirty two and this is the number of freezing the freezing point of water meaning that the water is still ice 32 and below it has not thought it has not become flowing it has not warmed to the point that it has received the warmth of the light come out into the light of day so that it could melt or thaw okay it's still frozen the blocks are frozen below 32 but upon reaching the 33rd degree that's the beginning of the illuminated degrees and there are 13 of these illuminated degrees when we add those 13 degrees or Illuminati degrees to the 30 second the 32 below them of the Red Lodge the red and blue Lodge okay we get 45 now what is the significance of the number 45 well that is the angle or the degree that you need to reach to go past but the square and go to the compasses when we transcend base consciousness and go to higher consciousness or compassion we make a 45-degree angle with that square in relation to that square that's why 45th the 45th degree is the top of the illuminated degrees of masonry that's all we have time for folks I'm sorry you'll see here next week on what on earth has happened

What On Earth Is Happening Show #062

Topics: *Pyramid and All-Seeing Eye, Illuminated Degrees, "The Stone The Builders Rejected," Language, Form, Archetype, Architecture, Geomancy*

freedom man that's what it's all about welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc past ago welcome one and all you're listening to what on earth is happening here on the Oracle Broadcasting Network I am your host mark passio my website ww-what on earth is happening dot-com this show is live every Sunday from 5 to 7 p.m. East Coast time that's 4 to 6 p.m. Central Time we have a good show lined up for you here today today is Sunday May 29 2011 and we are going to continue our discussion about the esoteric symbolism of the pyramid and all-seeing eye on the reverse side of the Great Seal of the United States as used on the back of the one dollar bill we've looked at this over the past couple of weeks I'm going to wrap this up tonight with a brief wrap-up and just an explanation of the concept that this symbol represents the illuminated degrees of Freemasonry as I really began to touch upon briefly last week before we ran out of time in the second part of the show tonight I'm going to be starting to look into occult symbolism in architecture so that'll be very interesting we'll see how this form of symbolism is really all around us it's everywhere if we only open our eyes and look at it it is indeed hidden in plain sight so I have one event announcement for today and I'll read that before the first break comes up and then we'll jump right into the topic when we come back the Tesla Science Foundation of Philadelphia presents its third annual Nikola Tesla energy independence celebrations this summer in the city of Philadelphia July 7th 8th 9th and 10th and it's going to be comprised of 4 separate events the Tesla Science Conference would which runs Thursday through Sunday July 7th through July 10th at 2:00 Liberty Place on the 30 second floor and that is at 16th and chestnut in Philadelphia each day that conference will be going on from 8:30 a.m. to 5:00 p.m. and it is only $100 for registration $50 for students with a valid student ID there will be a social at the ethical Society with a few lectures as well the ethical Society is on Rittenhouse Square in Philadelphia that'll be Saturday July 9th at 5:00 p.m. to 10:00 p.m. then there will be a Tesla coil exhibition and birthday commemoration Saturday July 9th from 11 p.m. to 12:30 a.m. in the Visitor Park area of Independence Mall visitors center at 6th and Market Streets finally during the day at Independence Mall on every day during the conference Thursday through Sunday there will be exhibits vendors music and contacts contests on the grounds of Independence visitors center will have more about this when we come right back after these messages folks stay with us alright folks were back here on what on earth is happening on there host mark passio my website what on earth is happening calm before the break I was telling people about the Nikola Tesla energy independence celebrations a yearly event that takes place during the summer around Nikola Tesla's birthday here in Philadelphia and this is hosted by a great group called the Tesla Science Foundation it's going to be happening July 7th 8th 9th and 10th lots of different events going on during those four days here in Philadelphia I just want to finish with the last part of that event that I was reading I made a mistake when reading it the first time it is only Saturday and Sunday July 9th and 10th this is the last part of the celebrations this will be taking place at Independence Mall visitors center at 6th and Market Streets on the weekend of the event with exhibits vendors music and contests taking place right on the grounds of Independence a visitor center out on Independence Mall here in Philadelphia so for more information about the Tesla Science Foundation and this conference that is coming up here this summer in Philadelphia I'd encourage everyone to visit their website at Tesla Science Foundation org that's Tesla Science Foundation dot o-r-g so that's the only event announcement I have for tonight I want to give the call-in number anybody wants to call in there's never any taboo topics here on what on earth is happening feel free to call in at any time calling number eight six six eight four one one zero six five once again the calling number eight six six eight four one one zero six five so as I said the topic for tonight will be a wrap-up of the esoteric symbolism of the reverse side of the Great Seal of the United States also known as the pyramid and all-seeing eye and then we're going to be getting into esoteric symbolism as used in architecture and in Street plans in other words things that are all around us that are really everywhere to be seen if we understand the language that they are speaking then we can see how these things are being used around us in actual physical form and that carries energy with it as we will see tonight so let's jump right into our topic before we do I want to let people know that all of the images that we will be discussing tonight because when you're talking about symbolism you need images in order to portray it properly and show people what you're talking about and in order to do that I know this doesn't quite lend itself to pure radio very well but when you combine that with an internet connection it very much helps to illuminate these subjects so if you go to my website what on earth is happening calm and you go to the radio listen page by clicking to listen live button on the upper left hand side of the site you will see listed there underneath the player images for today's show and there are lots of images listed there there are links numbered links you can click those and it will bring up the images that will we will be talking about tonight and there are 28 images that I'll be attempting to make my way through during the show today I don't know if we'll get to all of them but we'll certainly do our best so here we go in image number one this is a recap from last week when I was explaining the dual nature of the symbolism on the reverse side of the Great Seal the pyramid an all-seeing eye this is a very misunderstood symbol people think it only means one thing namely the dark occultists who call themselves the illuminated ones or Illuminati ruling over a world of ignorance that is in the dark and that is part of what the symbol actually portrays and represents what people don't seem to understand is that two New World Order's are gret are symbolically shown in this image the the New World Order that will come about if the pyramid is finished meaning that there are no there's no more light in the world and everyone is kept in a state of ignorance and that will build the New World Order of the pure brick or prison society okay that has no light in it and the opposite of this is taking down the barriers or the walls that keep us separated or the the blocks that keep us from ascending higher in consciousness and therefore merging with the light and bringing the light down to the earth for everyone or a state of universal enlightenment and this is the positive New World Order in other words it was two forms of masonry the dark Mason is trying to build with brick with things that way down with things that divide us and the light Mason is trying to build with light things which illuminate which enlighten which take away the heaviness of life and take away the things that block us and divide us so these two New World Order's are quite different and they are attempt being attempted to be built by very different individuals indeed so one of the aspects I did want to look at was a concept of what the pyramidion or the very cap of a pyramid represents and how that is related to this esoteric symbolism by a phrase known as the stone the builders rejected and we'll look at that in a moment just to finish the review in image number two on the site we see that we looked at the gematria of the Great Seal and gematria is a system of occult numerology that combines form and number and we showed that the date on the bottom the date in Roman numerals on the bottom of the pyramid when placed around the pyramid in a certain configuration which I took people through that whole process on last week's show which is in which podcast number 61 in the podcast archives on my site we saw that the numbers added to 666 at the base of the pyramid and 777 at the top of the pyramid this of course reduces in gematria by adding the digits together to nine at the base of the pyramid because 6 plus 6 plus 6 equals 18 and 1 plus 8 from the 18 that you result with 1 plus 8 equals 9 similarly with 777 you add them together to get 21 and then add the 2 and the 1 in 21 together to get 3 so this is called gematria reduction it's simple addition of the digits until you reduce it to a single digit number so 777 and 666 are very occult numbers we see in slide number 3 that I am showing the occult significance or meaning of these two numbers and what their reduction is and in other words the numerological reduction carries the same meaning as does the extended form so the triple digit number 777 means man in a state of unity consciousness where the thoughts the emotions and the actions are all in unison there is no contradiction they are activated unified and complete ok as we think so we feel so we act and we cannot be made to act in the contrary way to how we think and feel so this is unity consciousness it is also represented by the 3 because the trinity is unified thought emotion and action we saw the number 666 represents man and beast consciousness or unconsciousness thought emotion and action in active and incomplete also represented by the number 9 the number of the ego will pick this up on the other side of the break folks stay with us you're listening to what on earth is happening alright folks we are back on what on earth is happening before the break I was reviewing some of the aspects of the pyramid and all-seeing eye symbolism on the back of the one dollar bill which we were looking at over the last couple of weeks and we were talking about gematria or occult numerology and what some of the numbers that are associated with that symbol actually mean in occult terms we saw that 777 represented unity consciousness it simplifies to a3 which is the symbol of the Trinity it is also a number that is been held Revere in all forms of esoteric thought since time immemorial basically this is considered a perfect number this is considered a number that represents divinity in many different schools of esotericism and mystery traditions and just the mysticism in general so the number 666 conversely represents man in duality in beast consciousness in base consciousness quite simply in a state of unconsciousness thought emotion and action not even activated certainly not unified in a state of ignorance apathy and cowardice / laziness no willpower okay so no intelligence no care and no will that's what 666 has represented and that's why it is the number of the beast because when mankind is in that state of consciousness he's essentially very much like an animal and that number reduces in gematria to a single 9 because 6 plus 6 plus 6 is 18 1 plus 8 is 9 so the idea of ascending in consciousness as we saw last week related to this imagery related to this symbolism of the pyramid and all-seeing eye is to get out of the or the base consciousness which is represented by the number nine at the base and to get to the Trinity or the unification of thought emotion and action which is the awakening or the opening of the all-seeing eye which is represented by the number three so to go from nine to three and we we see that this number this concept is repeated once again in the symbolism of the compasses Square and G which we overlaid on the pyramid an all-seeing eye to show that the five points of the compasses and square symbol sometimes called the five points of fellowship okay point to five letters in the Great Seal that spell out the word Maison because we are all collective builders of the experience that we must live in we are the co-creators of our own reality through our own thoughts our emotions and our actions and when you put those all together collectively with what everyone is doing with their co-creative capacities you get the world that we have today so we're not doing a very effective job as co-creators of our reality but nonetheless those laws continue to apply and continue to work whether we are cognizant of them whether we recognize them whether we acknowledge them and try to live in harmony with them or not so again look at look at the concept symbolically here at the top of the compasses is the three and that's the state of compassion of higher consciousness of you know understanding that we are one the left and the right have come together the masculine and feminine have merged okay we are no longer in the unnatural state of being squared on the square okay and and that sometimes used as a compliment in Freemasonry singing well he's a fair and square guy you deal with him you're getting a square deal okay in other words he's dealing fairly with you on the square in general is is more of an insult than it is a compliment because if you know the esoteric meaning of the square in the configuration that we see in related to compasses in square it means base consciousness to invert the square so that the point points upward is to correct that base consciousness and balance it so in the configuration that we see it used in the compasses in square symbol it means that we must circumscribe our base instincts and and lower levels of consciousness by higher awareness and knowledge of self so just think about it three squared is nine okay just in mathematical terms it also make sense okay it is the squaring of the circle rather than the circling of the square we need to circle the square meaning refine our rough edges okay take our unnatural state which we've been conditioned into and try to make it perfect again and resemble the divine shape of the circle okay so this number 93 which is one of the most important occult numbers which we talked about a little bit about last week means to go from the nine to the three or from base consciousness to higher level awareness and it is the process of Ascension which requires both willpower care and love okay not just intelligence but knowledge and then the care and will to act upon that knowledge which is ultimately what wisdom is all about so we saw these concepts last week that's a brief review at the end of last week I was once again showing the image of the overlaid compasses and square this is now on image number five on the website on the radio listen page at what on earth is happening calm I overlaid the square and compasses on top of the pyramid an all-seeing eye and showed that these 13 levels of brick that lead to the all-seeing eye of enlightenment at the top of the pyramid represent the 13 illuminated degrees of masonry which when combined with the blue and red Lodge degrees give a total of 45 degrees and this is a symbolic number okay this number is symbolic it's that it's the highest level of masonry for a reason these are personal degrees this is sometimes referred as the true lodge of perfection okay it is also referred to as the illuminated degrees of Freemasonry and some people simply refer to as either the White Lodge if it is based in light Freemasonry or the Black Lodge if it is based in dark masonry where the building material is stone meaning base consciousness okay so there are three degrees in the Blue Lodge okay then the Red Lodge culminates in the 32nd degree okay so twenty-nine additional degrees in the Red Lodge a total in lower Freemasonry of in the Scottish Rite of 32 degrees this is the freezing point of water okay above 32 degrees water thaws it becomes free-flowing it's no longer ice it's no longer in one form it can take many forms it can take many shapes okay but below that it's still frozen meaning you're still frozen if you're not in the state of enlightenment meaning you're still part of that brick structure thinking that you can modify that structure from the inside that you're not fully outside the box a thirty third and higher degree me degree Mason is referred to as the illuminated degrees the first the 33rd degree is an honorary degree of the Scottish Rite above that there are these personal or illuminated degrees 13 of them total starting with 33 culminating in 45 okay and there's a reason for the 45th degree as the main symbol of the highest level because in order to transcend the school err and go to the compasses through the G which represents God which represents gnosis which represents the Great Architect which represents true care as we saw in past weeks looking at this symbolism you have to completely make a straight line from the very bottom point of the square to the top queen of the compasses that's the straightest line out of base consciousness to higher knowledge of self we'll continue with this on the other side of the breaks folks don't go anywhere you're listening to what on earth is happening on the Oracle broadcast okay folks look back and what'll hurt this happen I'm your host mark SEO my website what on earth is happening calmly talking about the illuminated degrees of Freemasonry as related to the symbolism on the back of the one dollar bill the pyramid an all-seeing eye we were looking at image number five on the radio listen page of my website and we were seeing that the illuminated degrees are the last 13 degrees out of 45 degrees in esoteric Freemasonry and this represents the splitting of the square or in other words getting off the square in a direct line to head toward the apex of the pyramid or compasses toward the light so that's why the there's 13 degrees at the end or above the 32nd degree not only to represent the state that water melts and water melts when light and heat is it is exposed to the the heat of the Sun the light okay when it's iced to become water it has to be exposed to heat and it this also represents getting past all of the final things that bind us that we may be holding ourselves back through not only understanding all the things that have gone awry with the world in an external sense but then working on ourselves in the sense that we take care of all the little bits of ego that is still binding us and holding us back ok so this is sometimes referred to as the Lodge of perfection or the illuminated Lodge and when we get past those 13 final levels and again it's a symbolic number because 13 represents the Sun plus the 12 houses of the zodiac another number that is associated with light and the Sun okay we get past that 13th level of brick and we stand in the space okay now this concept is easier to see if you look at the image without the square overlaid so if we go back to image number one we can look at the seal in the middle without anything overlaid on top of it and we can see the space that exists between the brick and the light okay now this represents being out of the prison but we don't identify with that all-seeing eye because that would mean we think of ourselves as God we stand under that all-seeing eye in a state of sovereignty there is nothing between us and it okay we stand alone atop the base consciousness that we have conquered we have moved past we have gotten outside the boundaries of okay until we are in that space that wide-open space the widening the broadening okay the awakened consciousness where we understand that we are sovereign that there is nothing between us and the Creator represented by the all-seeing eye itself that we are sovereign under that and that alone so that's what this symbol ultimately represents this is some of the deeper aspects of it and the final thing I'd like to bring up about this symbol is the concept of the stone the builders rejected when it relates to this because this is a concept of the capstone or chief Cornerstone also known as the pyramidion of a pyramid that the top piece that completes the pyramid at the very apex okay there are two stones that the builders reject this is a term in masonry okay a light Mason rejects the dark stone and a dark Mason rejects the light stone so I will explain what I mean by this okay as we saw in light Freemasonry a true freemason from an esoteric perspective is trying to build a world based in freedom that's the end goal okay based in knowledge of oneself which is light okay enlightenment freedom love all right in doing so he wants to remove the stone meaning ignorant and things that weigh us down okay to bring more light to the earth so that eventually the earth is completely enlightened all right the d stoning as we saw when we looked at Royal Arch masonry also represents the decalcification process as related to the pineal gland or the third eye or all-seeing eye within us in the center of the head in the human brain so the light Mason rejects the stone the chief Cornerstone at the top of the pyramid of stone that is the piece that needs to be added to block out the light okay the light Mason that has a stone that he rejects the stone those builders reject okay is the actual stone pyramid iana that we see on the left hand image here of the dark new world order that cap stone is put in place and blocks out the light from the world the little that that does remain so that the dominate male Dominator world can be completed the prison for souls that is the stone that the light mason rejects the stone the builders rejected okay I have rejected that stone and it will not be placed if I have anything to say about it and do about it the dark Masons conversely also reject a stone the stone the builders rejected when you're referring to the dark builders is the light capstone that we see in the middle image there the all-seeing eye the light of the Creator they are they reject that stone and want to get rid of it from the so that they can complete their dark new world order project so the seal completely makes sense ah no it kept this he or she favors our work the New World Order well which God are you serving which force are you serving are you serving the light or you serving darkness are you serving the force of good or evil are you serving true freedom or do you want to enslave the world okay and the God that you're serving the force you're ultimately serving certainly favors your work that you're doing the building project you are undertaking to build the world that they want to see come to fruition so this symbol represents all of us collectively as the builders of our world which force which God do we serve I'm comfortable with the word God which creative force do we serve which generative principle which form of service service to freedom and helping others and helping the world become enlightened illuminated truly in truth or service to self where you only care about yourself and your own ego with needs in which case you're certainly helped building that dark new world order that we see on the left hand side of that image so I'm gonna leave the breakdown of this esoteric symbol there we're going to move into architecture a little bit later on but I see we have some people very interested and we have some folks on the line so I'm gonna go to the phone's be patient I will get to you if you're hanging on the line the calming number once again eight six six eight four one one zero six five feel free to call in let's go to the phones and take some calls here we go caller you're on what on earth is happening oh hi you're on live on what on earth is happening how are you what do you have for us hi this is mark from Delaware how you doing and how are you good um I've been listening to you since the Gnostic media what podcast I'm interested in the green language that you've been talking about and I was wondering if like all the English words are constructed with good and bad meanings or is it just some or where you have to figure it out for yourself or I I think that is the best course of action to take I hear different people's opinions on this the English is a horrible demonic language I hear other people say the English is an angelic language I think that the intent of the the people who ultimately constructed this language when it was in its infancy has everything to do with where the words came from and the the energies that they carry we need to go back to ed Amala jeez and understand where words come from in order to basically interpret their meanings and not everything is all one-sided or all the other way I mean there are some things that are like that but when it comes to something as complex as language and there's been around as long as language you can bet that there's some form of a dichotomy or a dual nature to it so my best suggestion when it comes to that is study it on your own understand where words come from that's the most important factor when it comes to this but I wouldn't look at it like it's all just even know Norway I look at it just all good either the word degree like you're talking about degrees a lot and I keep thinking like they're using degrees for temperature floods Masonic plus mathematical is there tie-in with all three of them or hold that thought to point hold that thought all night we asked the question on the other side we're coming up to a break we'll be right back folks on water on earth is happening don't go anywhere welcome back folks listening to what on earth is happening I'm your host mark Cassio my website what on earth is happening calm before the break you were taking a call I'm gonna go back to the caller well are you still there yes why hey dot right you had a quick one yep sorry I was wondering about the word degree if there's a tie-in with the temperature part of it and the geometry of course with Masonic and absolutely doesn't seem like there would be a connection but I like I said the 32 degrees are the frozen degrees you have to get up to the 33rd in order to get to the illuminated place and there's no work to be done even there that's the freezing temperature of water is 32 degrees so water finally begins to melt or thaw okay so the the actual state of becoming free-flowing and not being in a unit form one form being able to flow freely comes when we thaw when our ice thaws okay you're starting to really understand true care and get out of that state of being frozen or thinking that the system as it is now doesn't need to be completely done away with basically you know that you think you're gonna work within that system you're one of those bricks in that pyramid in the wall you know and that is that is one of the symbolic meanings of the term degree it also represents the degree of Arc when it comes to the measurement of of astronomical measurements so this is the degrees of a circle because it's all you know the degrees in astra the measurements in astronomy that we use degrees in are based in the circle because the the circle is the the form of the celestial sphere okay same thing with the lines of latitude and longitude on the earth we used the and arcs etc when we measure the earth so when we're measuring the earth or the sky we use degrees okay and this is related to the Astro theological cults of the ancient world as we saw previously on this show when we looked at the cults of the Sun the stars and planets and the moon these are the three great religions of the world Christianity Judaism and Islam so as they come down to us in the modern world through religion so it's another aspect of degrees you know the zodiac is broken into twelve houses each thirty degrees okay you can look at the eight sections of the zodiac broken down by the forty-five degrees each of the the places between the crosses the sections of the zodiac between the arms of the the Solstice cross and the Galactic cross ok the equinox and solstice forms one cross on the zodiac and then there's something called the Galactic cross formed by the four fixed signs of the zodiac representing earth air water and fire and the the sections between those arms of the cross are our eight since you have two crosses that forms eight arms there's a 45 degree angle between all of those so again this number 45 is a number that's based in the circle if we do the gematria of the complete circle which is 360 degrees we get the number nine if we add four plus five you get the number nine so 36 360 and 45 are equivalent when it comes to esoteric numerology when it comes to degrees so it's like saying you've come full circle you've made the complete transit the complete journey is what that 45 is saying it's a complete completing of the circle which again is the divine shape is the shape that represents truly knowing oneself coming to a place of true higher level knowledge of self so that's my take on what degrees represent it's so synchronistic I mean everything fits together like a puzzle you know sure of the words and stuff I have one more word and that I'll let you go but it's all right there before us we just have to become conscious you know see it yeah I had like one more word to bug this shit out of me for a long time and I'm still maybe you can explain it the word die at the IET like people go on a diet and the word die is in there true and most of the diet stuff is artificial sweeteners which aren't good for you other than like stevia and stuff like that is that intentional I've heard that I don't know if I make anything like that but I've heard people refer to it that way the word itself represents power represents in general some form of power namely personal power usually in its true form so you know it could be the power to help ourselves if we use diet in the proper way and it could also be the power to arm ourselves if we are unconscious of of you know how dangerous it could be to eat the wrong things right so yeah I thought so too because I thought there was a good side to it though sure okay hey thankful after your answers absolutely thank you so much for the call Hey okay here we go another call caller welcome to what on earth is happening what do you have for us hello hi you're live on what on earth is happening hello hello caller can you hear us hello yes you're on you're on live what do you have for us can you hear me now yes I can hear you go ahead excellent mark very glad that you're covering these topics is very illuminating I think I had a question specific to geometric reduction yes this part of the Pythagorean system I don't think that it's part of his system of mathematics I mean maybe he possibly did use geometry and some of the things he did I can't say that I know that for certain maybe someone else could illuminate that but in general this is just a very ancient form of a cult numerology that takes things and distills them down to their essences through simple addition meaning if you add this to something here's what you'll get as a result and then they just make that simpler and simpler by continuing to do the addition until you get down to a single digit number which cannot be reduced any further so it's like a process of distillation when it comes to the symbolic meaning of a number as I understand deep and you've given some of these numbers like ego is the number of nine and I believe you said that four was a number of goddess I didn't really get into the number four much for you know basically represents the elements and the cardinal directions you know it's a way of seeing the physical reality you know five then adds the the spiritual nature to that equation you know because of the five points of the star and the pentagram etc you know so earth air water and fire that force physical aspects to existence and then ether / spirit true self higher self consciousness is the fifth element in that equation so that's my take on the number four I didn't specifically mention it too much when we were looking at numbers I mostly stuck to nine and three right and I understand those now that you mentioned it I looked at the kuddusi inside the symbol of the doctors correct nowadays and I saw the two serpents there and I was like interesting they're they're not actually part of the the spine illuminated person--i they're that being described here they're actually added to it right and I was wondering is this the makers mark it's merely that the serpents are the ones who did the change to the to the DNA of humans back when right and is this their mark of them well that's one way of also looking at that the other way of looking at intertwine serpents serpent's making their way up a pole or a spine would be the Kundalini energy that is connected with enlightenment and true health both physical and mental so again it depends on who's using it for and what purpose it's being used for so in modern medicine I would say that that's definitely being used in a negative way because modern some the science of modern so-called medicine is very stuck in the left brain intellect without a holistic approach to the to the body and mind and and spirit as well and it's really doing more damage than good in the modern world and you see how these doctors are completely in bed with the pharmaceutical industry and looking to make a profit above helping the patient and I know that's a harsh way of putting it but really that's what's really going on some people don't want to see that but it's uh it depends on who's using that symbol and the purpose they're using it for whether it you look at it with a positive connotation or a negative one but I would say as any other symbol it can have dual meanings hold that thought we'll be right back on what on earth is happening after these break this break I'm your host mark Hasse oh my web site what on earth is happening calm don't go anywhere folks we'll be right back on the oracle Broadcasting Network or your lives hello mark how you doing it's the freighter act callin freighter X how are you great to hear from you to try to get all the up for about a week I knew I'd find you here though I'm sure you'll hey listen I wanted not to say only on these topics so go right ahead yeah I wanted to digress a little bit back to your 45 degree analysis yes where you spoke about the red and blue lodges coming together to form a the first phase of that would you say three three degrees in the Blue Lodge and then the 32 of the red right well 29 additional in the red to form this lower 32 degrees of the Scottish Rite and then above that is the 33rd and the twelve above the 33rd to for a total of 45 those are personal unacknowledged degrees however sure sure I understand you've called them the illuminated degrees right yes thirteen illuminated agrees come connected to it I was just I guess I misunderstood you because I thought you added the blue to the red at the beginning and I was going to discuss with you know you know because I the Scottish rights claim to those three degrees is very debatable as far as I'm concerned right I wanted to also point out to you that you know there well I don't want to seem as if I'm contradicting because I really appreciate a lot of the announcement especially that the numerology concerning the the nine and the ego that was based on the Greek word for Lima right yes well ninety seven ninety three is the Lima which mode the process of a coming up in consciousness ascension toward higher levels of awareness coming out of the nine and to the three out of ego and to the light so ninety-three is it means a fillet Mamina will and it also is equivalent in gematria in numerology to the word agape in Greek which means love because these processors mean the same thing they are the same thing if we're doing it for the right reason the will to make that climb consciousness is love and you know it's funny because isn't that the Saint Augustine said love and do what thy will is the law and then Aleister Crowley said the same thing you just said do what thou wilt is the whole law right the laws but we ma if we add in addition to that that love is the law to love under will which means that in order for will to be truly activated in the world it must rest firmly upon a foundation of love place the word right place the word love under the word will will on top of love we have to build our will on a foundation of love of understanding that we are all one that as we do to one we do to all the principle of the golden rule of treating others as we would be treated therefore love has to be the very foundational basis of any of those actions that's what that alternative or yes and that isn't that the quote of st. Augustine's right love I do what I would have to agree in me is the same in and I wanted to pratter they were coming up to a break here there's the intro music for the break please hold on through the break with us and we'll get back into some more material which I'm sure you have lots of other finer points to discuss stay well great thank you all right we'll be back on what on earth is happening folks after these messages don't go anywhere this is what snap under host mark pavia my website what on earth is happening calm before the break we were talking to fray directs he was bringing up some points about Freemasonry Frey directs are you still there I am mark I am thanks for uh thanks for talking to me I just wanted to say first of all I don't listen to your show every week and I really really really enjoy it you are it's like college level courses here man you're like a professor I tell you it's amazing i panel Minh thank you yeah it's really great yeah of all I've been listening to a lot of shows a lot of different networks lately and you really are on the top my friend you're doing a great work but I wanted to bring up a couple things that I think might be pertinent to what we're what you're talking about here understand from the perspective that I can apply somehow chemical keys to the Masonic ritual and still you know stay outside of the paradigm of the mainstream blue large system because everyday Masons that I've come into contact with have no idea and this is not even offered overtly in the symbolic instruction of the degrees okay so but it's research that I haven't uncovered you know laterally and peripherally sure so what I have for you is is you've spoken much about the the numbers in numerology and and you spoke about the number seven and the combination of four and three and what I what it brought up in me especially in last week's show I was talking about the seven liberal arts yes and of course you you've spoken up the Trivium and the quadrivium yes and the combination of those two the three would be a lot logic rhetoric grammar and then the four would be geometry astronomy music and what's the fourth one I can't remember right off top my head okay but you get it the three and the four combined would be the seven liberal arts which align with of course the seven planetary bodies of the ancient world the Sun the Moon Venus Mars Jupiter Mercury Saturn that's right and of course we we know each one of them having a day of the week a color and herb a stone always find acceptance seven exactly and then an alchemy first and foremost seeks this is from my understanding seeks to join the spirit with the physical and symbolism the earth represented by the square as in all four corners and the spirit world represented by the circle with no beginning or end an eternal state and that in the system of Freemasonry it actually even though it's not going on I think on the conscious level of the average member the system is available to those who would know to use employ the two devices to achieve the so-called great work which would be the square of the compass in the three degrees the mason gradually overcomes the physical world of the square and with the spiritual world he uses the compass to overcome the squaring and then early alchemical texts of we of the 1500 show plainly they state that that to attain the philosopher's stone one must square the circle that's right and then if you are familiar with this yourself the Penal signs of the degrees you know the pursue the Penal plant of the master degree is basically a separation a dividing of man's lower and higher nature right and so there it is you know the same thing you're talking about and that's directly applied to the Blue Lodge degrees exactly I mean of course the the power of the number seven goes with the seven degrees the first degree to the seventh degree which is the holy royal arts degree in the York Rite system so at top of that symbolic Septon airy represented by that but you know the the four physical elements and then the thought emotion in action on top of those like you said the gods of the ancient world the the seven visible planets in the sky the the Trivium combined with the quadrivium etc you can go on and on about the number seven and how many symbolic things it represents yeah it's amazing you know but uh really good work you're doing I can't wait to have you come on my show because I really I've got one of the things that I'd like to talk about with you more but I'm going to get back to your show and that is the what I what I've been calling and referring to is the secret war inside Freemasonry and what that is I never really got a chance to go into that on a Freezone but what it really is is there is a within that you have you've mapped it out as the esoteric masonry versus the dark masonry yes or the you know the light and the dark and it is that but I think that there is a clear line of demarcation that can be you know followed that is the incursion of the Scottish Rite into the American Freemasonry system in the beginning of the 19th century the interesting century I wouldn't race not definitely like to talk more about that yeah and you know of course there's the famous letters of Washington which you can look up at the Library of Congress where first he is sent a copy of proofs of conspiracy by John Robinson yes any sort of dismisses the whole Bavarian Illuminati thing but then several years later there's another letter where it comes up again right at the end of his life and he says I must acknowledge that there is this problem with the Germanic Illuminati and that the american rights were infiltrated by a son order and he talks about them as possibly the illuminati so you know you're familiar with that yeah that letter okay so that's where i'm based on my research right now i was trying to how you familiar with the book the secret founding of america by Nicolas Hatcher I have I I'm familiar with with the the title of the book but I have not read it it's a really interesting new newly written it's 2009 I think is a whole chapter that are called Freemasons but Freemasonry is battle for America which I highly recommend that chapter the this country was supposed to have been founded upon true esoteric Masonic principles but it has gone horribly awry from that and this or that you're talking about there is a struggle between the true light Freemasons and the dark Masons who are trying to build their dark New World Order and we need to help people to integrate all of the truths about all the esoteric schools that are out there in order to combat this dark order that's coming to fruition so quickly because until they have that knowledge of self in hand they're basically powerless to defend themselves against that because that's what those are the tools that they're using as a weapon against us the knowledge of how we work the knowledge of how consciousness works and unless we come to know that same in Meishan we don't even know how this game is being played or how this war is being fought however you want to look at that I couldn't agree with you more that that's what put me on my path is the same motivation as the realization that I began after the you know after birth the birth of the realization after an abundant amount of research you know and like you said connecting the dots and realizing that there was a language being spoken all around me that I was not privy to that's right and I required more data and that's what we're doing right that's it yeah and we're going to expose right we're gonna use that knowledge to build the true world of freedom it's gone we're gonna make it happen freighter X thanks so much for calling it I'm gonna have to have you on the show for a whole show one one time and get your views on a bunch of different things fascinating information thanks so much for sharing it with us no problem contacting we'll work it out and you have a great night thanks again for all you're doing alright happy Memorial Day weekend fantastic thank you take care okay freighter X great call let's move on to another call I'm glad to see people calling in here we go caller you're live on what on earth is happening mark this is David in Idaho hi David how are you great thank you for what you're doing it's truly the most valuable time I found on the radio oh thanks so much I appreciate that when are you gonna break oh sorry I heard something we're coming up to a break we'll go ahead and then you all keep you over okay so I've been studying this topic in my faith or religious and I keep coming up with parallel bloodlines that intermix and blend you could distinguish the between light and dark but and that really helped me I had a question on the population controls there's that right I'm in the bath right there hold that thought and question ask it right on the other side we'll be right back folks welcome back folks this is what on earth is happening on their host mark passio we were on the line with a caller before the break he had a question I'm going to go back to him we're at the transition point between two different topics of material just wrapped up the explanation of the symbolism over the last couple of weeks of the pyramid an all-seeing eye from the Great Seal of the United States we're going to transition into talking about architecture and symbolic symbolism in architecture so as a little change of pace I've taken a couple of calls good to see that a few people called in today so let's go back to this caller and he had a question before the last break caller you still with us yes as I follow the to inner meaning bloodlines of one of the light God and one of the dark God I find they both have similar themes and one of them is to cleanse the earth so one of them wants to do it for the earth to protect the earth one of them wants to do it to redeem mankind or to give mankind a state of rest where they can I just kind of wondered how come these themes like this run so parallel you could get lost so quickly it's um it's something that is a dichotomy in all areas of the the occult where I differ with the dark occult this isn't necessarily in the form of knowledge that we hold it's in what we decide we want to do about it they want to call the population because they look at the world as being completely ignorant and apathetic and cowardly and lazy and not worthy of even living here and they want the planet for themselves okay I don't agree with that that means that genocide would have to be conducted they want to kill 90 percent of the population of the earth so that they can have a more sustainable way of living and basically control the few remaining percentage of the population as they're cattle so that they can basically rule here as gods now while I agree with some of their assessment that there is a large the largest majority majority of the human population is ignorant a pathetic cowardly and lazy and doesn't really want to work on themselves or understand anything higher than what they're gonna throw on the idiot box during the day or night you know and and and veg out in front of the TV with some GMO food ok I agree that maybe the current conditions that may be the case of what's really going on but my assessment about what to do about it completely differs from theirs I think we need to properly morally educate people I think we need to give people true incentive to want to improve themselves help them to understand natural law that this is really the only way that you can improve the quality of your life by understanding these esoteric principles that lie behind what we see in the appearing apparently physical world you know there are physical laws and then there are non-physical ones that apply to our behaviors and apply to the effects of what what we get as a result of what we're creating through our behaviors and this is what people need to become truly educated about and you know you you change the basic education of what people are receiving and you'll see the external reality change because their actions and behaviors will change if they're educated that way from when they're very young so I don't think of masks calling needs to happen this is where I completely diverge from my views when it comes to other occultists and that's one of the reasons when I saw that this was a prevalent view in the occult that's when it started making me really uncomfortable I mean at some point what how do you think that your god that you are allowed to do anything like that you know you know it's it's it's pure egotism run amuck run haywire to a point where these people who have had so much power through money and other influential means think that their God here and you know I that's what it's ultimately all about and I totally disagree with that perspective and think that we need to be helping each other come up to higher levels of consciousness and awareness through proper moral education in the world and that's what the world is lacking I went back and I rewatched George Bush's announcement we need a new world order you wanted to talk about when you know just before that he said are we gonna follow the law of the jungle or the rule of law he's distinguishing between natural law and made-up law exact native law was the rule of law and that the law the jungle was a natural law which we should be following everybody you are exactly right sir that is exactly what was meant by that speech and most people overlook that that is exactly what he meant by that that's excellent so good Tom it seemed like so your show has really brought peace to my heart and I just was listening to William Cooper's series on Babylon and I just kept getting darker and darker and I was not in a good place and for the last three or four weeks he brought me out of that well I appreciate that so much I'm glad to see that I could be of some some help in that regard and now bill Cooper yes he understood quite a bit and he was a onto a lot of aspects of the occult he looked at it from an extremely dark point of view that is true I think we can see that there is another side to this knowledge and it can be used to help us not only to hurt us as it is largely being used in the world by these twisted Psychopaths and dark occultists but we can understand that this is ultimately knowledge of self and that if we take that into our possession and cherish it and really wield it as a mechanism of Ascension rather than as a mechanism of control there's no telling the heights that we might go to so call or excellent points to mark thank you so much and what a great point about a Bush's speech about the New World Order when he says that we want to build an order in which the the law the the rule of law not the law of the jungle reign supreme that is the the usurpation of all natural law rights and the supplanting of them with man's law us being God here is what he's saying that's the new world order they want to create and it's all based in mind control because there's no such thing as the law of man we are not the authors the authorities of anything there is one Authority there is one true author and regardless of what you think of that force as you can call it God you can call it the Creator you can call it the Great Architect it doesn't matter what you call it man is not it man is not God okay and that's what these dark occultists actually think that's ultimately what their form of God is the ego self as God lowercase as self not higher case s not the true self the connected self connected to the divine order in creation connected with natural law but man as God the ego reigning supreme and just trying to get its way all the time through control through dumbing people down do keeping knowledge back from them so a great assessment of Bush's speech there and I could not agree more I mean that is exactly what that Satanist that Luciferian dark Luciferian meant by that statement and it's something that needs to be understood by more people so here we go another caller caller you're live on water on earth is happening well hello you're live what do you have for us thank you I'm a question on numbers numbers sure no in in jovanna and numerology we're working with a base-10 system there are other base systems as I recall this to Marian to Babel you know about ellonija do they base 60 that's were specific here oh I'm not sure whether it was a base 60 or base 6 but it was based in the number six that's it well yeah that's where we get our 12 the other yes well about twenty four-hour-a-day 360 degrees everything else but event impact commands really reducing numbers either or other parts them can also be used in base nine or base eight or seven or six regardless of the base system that is based on I believe it still holds true for those systems as well but oh we can take a pick up this on the other side of the break you're listening to what on earth is happening folks stay with us don't go anywhere glasses as welcome back folks you're listening - what on earth is happening I'm your host mark passio my website what on earth is happening com we were taking calls I haven't taken a bunch of calls all once in a while so I figured this is a good place to do it since we're sort of in between topics so here we go back to the caller from the last section caller you still there sir okay you can continue with your request these numbers but they're all constructs there's that number doesn't exist in nature as a you know an entity on it under itself we like humans created numbers because of the e circuit seems like it's a symbolic concept that the number is there to represent an idea about something that does actually exist in nature namely our consciousness and the way that we we operate it in the way that we interact with it in the way that we express it in the physical domain so it's it all of this is just symbol it's symbolic we have to understand it from a metaphorical symbolic and allegorical perspective of how this all fits together to weave a story to basically present a version of reality as the people who constructed such systems are seeing it but if you go down deeper and deeper into it everything is built upon some form of archetype some form of basic underlying form and underlying quantity or amount or shape or design and that that's the underlying fabric of nature really is form which underlies function so that's all that numbers and symbols ultimately are there deep article building blocks through which we are constructing a model a working model of the reality in which we live in order to better navigate it and to use those basic ideas and principles to better serve us rather than act as detriment toward our way of existence and being in the world there a direct relationship between numbers and language oh well there's a direct relationship with letters and language I know that Hebrew carries a really really deep undertone as far as the meaning of the words when it comes to their alphabet some people say that the English alphabet is a degradation of that some people say that the as I said earlier that the English language is an actual advancement hence they called it an alchemical language or an angel ish language based on you know the idea that more green language is found in English than just about any other language French there's a lot of green language puns as well but no no other language has more than the English language so I would say that there definitely is some kind of deep underlying significance to not only letters but number as well when it comes to language absolutely I think that these things can't really be fully separated because as you said number in mathematics is a construct in the mind and so is language you know it's just this is how what we use to express ourselves and to describe the events that we are seeing and to describe quantities that we see around us in nature it's it's all constructional again does it is it used to bind or is it used to serve in man's law languages used to bind in nature if we employ it to really truly accurately describe the natural world and the systems around us it could be used to serve it's all about its usage and the consciousness of the wielder of that tool these are tools like any other tool so I hope that answers are aware oh yeah yeah and ultimately how did we become come in possession of language we come into possession of numbers sure driven driven to think and describe things in higher ways than just grunts or scratching some liners in in some sand or a wall or something like that it's a high expression and that's what we're always seeking to do is follow a path to a higher expression that's that's what the process of evolution is harkens back to the Tower of Babel story however you want to interpret it anywhere we were at one time at a unified altar unified purpose sure okay and there and then and then we wanted to be like gods you know and that system came down and that's what they're trying to build up again and I will talk about that symbolism okay the Babylonian gold headed man in future shows and how that's a symbol of total unified control you know total centralized control and how what this dark New World Order is looking to do is build back to that system because it's level of control through dissemination of knowledge has been weakened and they want they want to they want to real all that back in and take back all of that power for themselves concentrated in the symbolic gold head which represents the illuminated man you know this group this cabal of illuminates that really has all of that knowledge and wants to keep the rest of us in the dark so that's a good point what we will get to symbolism of Babylon in future shows including the the Tower of Babel and the Babylonian gold headed man as described in in the book of I believe Ezekiel so okay well thank you very much really getting a lot out your show more than any other so it's fascinating I appreciate that sir thanks okay okay I'll let you go now thank you very much take care bye bye okay great calls here we go one more call and then maybe I'll introduce the topic of symbolism in architecture to take us out in the last segment tonight caller you're live on what on earth is happening welcome yes how are you the 14 waves of control yes yes a lot of people are calling in and talking about that and a lot of people seem to be getting a lot from that explanation how the the occultus you are in control are in control of us right now really use that to their distinct advantage they play upon other people's worldview that is dark that is that is poison that is very much in Polaris forces them a state of thinking and that is played to our great disadvantage if we healed our worldview and understood we are all one and that really what we need to be doing is helping each other to come up that ladder of consciousness you know to make the climb up to that at the top of that Great Pyramid so to speak symbolically that that's what our work really is that's what we really need to be doing if we understood that their systems of control and methods of manipulation would be all futile and pointless but because of this dark way of we have of seeing the world in each other in our relationships within it their methods of control actually become a piece of cake it's much it's much easier for them to employ those to their benefit in to our detriment if we have a dark world view absolutely I briefly spoke of that in a section on money I believe absolutely it might might have been in another section but it's in the podcast archive but the the dollar sign is two twofold one is that it is representative of the goddess okay because money money is based in that green principle that balance principle okay being put forward as a substitute or as a proxy for nature for balance for energy for true care it's the color of the heart chakra okay the green energy of the six petaled Lotus of the anahata chakra okay so this is a proxy mechanism that the occult world uses all the time substituting one thing in place of the other and presenting it as the real thing when it is in fact a fake they're putting the goddesses name which is recognized as a universal archetype in place as money okay so that we are more readily willing to take it and accept it on faith because we all want the goddess in our lives with that this is what we all ultimately subconsciously aspire to that's that sense of true care true togetherness true unity consciousness is the goddess principle and they're they're substituting through that that form that s with the line through it which is is okay Isis is name is is is and they're substituting that in proxy for the real thing which is true care true energy true natural law etc it also is the word is the state of being is you know just pure being so they're saying that this is existence itself this is reality this is the energy that actually makes you be able to exist able to live the ability to live it's your isness etc we'll be right back these messages folks don't go anywhere caller hang on the line I'll bring you back for another question you're listening to what on earth is happening on the Oracle Broadcasting Network welcome back folks this is the last segment of this edition of what on earth is happening I'm your host mark passio my website what on earth is happening calm tonight we took a look at the last remaining aspects of the esoteric symbolism of the reverse of the Great Seal of the United States namely the pyramid and all-seeing eye from the back of the one dollar bill and we took a bunch of calls because a whole bunch of people called in I enjoy seeing that on the show sometimes and always great callers on the line here on what on earth is happening we had a caller from the last segment I held her over let's go back to her and I'll wrap things up for today here we go caller you still with us thinking about the fence time to see in the flash which could be an eye I know they can apply to everything I see yeah sure sure interesting interesting interesting sense yes since your ability to proceed see it's everywhere it's everywhere fantastic that's right there's a there's a reason that the Latin word book is the basis of the word freedom Li bear in Latin means book and libertas means freedom because if you read the right books and you know how to interpret what you read reading will make you free caller fantastic thank you so that's what I mean always incredible calls valid points bringing up new fresh aspects that maybe I hadn't even thought about her scene just great great job as always this show is the best calls on internet internet radio without any questions so for the last little bit of this segment here let me just introduce the topic of architecture and how actual building projects around us have an effect on our consciousness and this may be a difficult one for people to grasp or to see or even to acknowledge and some people will scoff at this and hey that's fine believe it or don't do your research into it don't believe me all of this stuff is out there to look into on your own but what I will say through my studies and my understanding is that form has effect carried within form there is effect okay and this is because we're all made of form of some type of an underlying form okay so when you put things in a certain proportion on a certain place on the earth in a certain configuration at a certain angle different energies will be created as a result I mean just think about it you know a palace doesn't make somebody feel the exact same as a haunted house okay a church doesn't make someone feel the same as let's say a a supermarket okay there is a whole lot of different ways of combining shape form angle energy flow some people have called this function Eastern traditions the way energy flows through different shapes and passages the way the actual structures themselves are shaped okay carries meaning carries energy and this affects us whether we want to admit that or not it has a profound effect okay we are not unaffected by the external circumstances or the external environment we're very affected by that and we're not separate from that so these shapes and forms are used as resonators they resonate with it's us they are putting out a vibratory energy into the world and that's going into us so this studies have actually been done on this if you research psychological experimentation that's been done on rooms of certain shapes and sizes and angles that people have been put in they their behavior and disposition will change in a room shaped a certain way okay it with air quality a certain way - okay in a certain environment so you put somebody into a different environment with different flow of energy different shapes or forms that are around them they will not only think differently they will behave differently so if you're constructing whole cities in certain forms like modern big cities are constructed in 90 degree angles especially prevalent here in the United States the grid system of layout of cities this is regimented it's conforming conformist it's constructed with 90 degree angles that are not found in nature there's no free-flowing namely based on arcs or circles or even just meanders you know basic free-flowing forms that aren't straight lines you will find different energies when you use these different forms and largely in the West in the Western civilization the straight line grid approach is used when it comes to the construction of cities now you can also look at the intersections of different roads or streets within city layouts which we'll be doing you could look at specific buildings and the forms that they're constructed in which we will will be doing as well the idea here is that form is not purposeless there's an intent behind the building of a specific form and that form carries a specific vibration with it that has an effect on the consciousness of the people that it is in close proximity to that's the idea this is otherwise known as Geo Mansi the study and measure of the earth and the energy lines of the earth and how to put things on specific lines of energy points construction points okay and forms in which to build these things specific geometric forms so that the building project carries with it a certain vibratory energy that affects the consciousness of those around it so we're going to be looking at archways we're going to be looking at pyramids we're going to be looking at spires or obelisks we're going to be looking at star-shaped buildings and patterns whole street systems layouts of street systems that form esoteric symbolism and this is denied by some people and some people go too far in trying to see things in it we're going to talk about things that can clearly be seen in it that are related directly to the occult world and we're going to look at the meanings of these symbols as they are embedded in architecture and Street arrangements and layouts so that's going to be coming up on the next what on earth is happening all shows on this radio program are always archived for free both on Oracle Broadcasting's archive page and the entire series of what on earth is happening shows from the very beginning which I highly recommend anybody just new to the show to go back and you know as they say the best place to begin is at the beginning go back to the podcast archive on my website what on earth is happening calm and there you will see all 61 shows this is show number 62 and you can download those for free and play them back on your computer or any other digital audio device including your cell phones so avail yourselves of that information on the podcast archive page there is always other supplemental information that goes along with each podcast like related images related audio related documents related video etc so that's about all the time we have here on what on earth is happening once again I want to thank all the callers who call in and bring up just not only valid points but really thought-provoking points and issues that again as I've said I myself may not have even looked at our scene and just always always phenomenal the calls I get and I hope that that continues into the future so it was a pretty refreshing change of pace today to take some calls and take a break from the a hardcore progression of topical information we will get back into that next week beginning with esoteric symbolism in architecture and tree plants that's all for today I'll see you all here next Sunday 5:00 to 7:00 Eastern 4:00 to 6:00 central on what on earth is happening thanks for listening folks what on earth is happening calm Oracle broadcasting calm up next the vantage point with Michael Vale stick around

What On Earth Is Happening Show #063

Topics: *Occult Symbolism in Architecture, Monuments and Street Plans, Geomancy*

freedom man that's what it's all about welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host Marc Pascoe welcome one and all you're listening to what on earth is happening here on the Oracle Broadcasting Network I'm your host mark passio my website what on earth is happening dot-com the network's website Oracle broadcasting comm this show is live every Sunday from 5 to 7 p.m. Eastern Time that's 4 to 6 p.m. central we have a good show lined up for you here today we're going to be talking about occult symbolism in architecture and Street plans that's coming up in just a little bit in this first segment I have one event announcement for everyone about a great event coming up in the Philadelphia area as they hold every summer around Tesla's birthday the Nikola Tesla energy independence celebrations will be happening this year in Philadelphia on July 7th 8th 9th and 10th this is held by the Tesla Science Foundation a group that I work with here in Philadelphia there are 4 separate events as part of the energy independence celebrations this year the first is the Tesla science conference happening all four days the 7th through the 10th that's Thursday July 7th through Sunday July 10th from 8:30 a.m. to 5 p.m. at 2:00 Liberty Place to Liberty Place is at 50 South 16th Street here in Philadelphia registration for all 4 days for about 25 to 30 speakers will be only 100 dollars and for students with a valid student ID they get a 50% discount so $50 for all four days for students with valid student ID the second event as part of the energy independence celebrations this summer the Tesla Science Foundation social featuring the divine hand ensemble July 9th 5:30 p.m. to 10:30 p.m. at the ethical Society of Philadelphia 1906 south Rittenhouse Square tickets to attend the social and concert are only 20 dollars in advance and $24 at the door the Tesla birthday celebration featuring a Tesla coil exhibition Saturday evening July 9th from 11 p.m. to 1 a.m. on the lawn at the independence visitor center at fifth and Market Streets this event is free to attend finally Tesla Fest featuring exhibitions and open discussions July 9th from 10:00 a.m. to 11:00 p.m. July 10th from 11 a.m. to 3 p.m. at Independence Visitor Center lawn at 5th and Market Streets in Philadelphia this event is also free to attend for more information about all of the activities of the Tesla Science Foundation visit their website at wwlp.com of activists here in Philadelphia check out their website and get involved because more people need to know about the life and the works and the aspirations of Nikola Tesla because the control of energy is ultimately the control of human beings ladies and gentlemen and that's what it's all about so that having been said we're coming up to our first break here don't go anywhere stick around you're listening - what on earth is happening I'm your host mark passio we'll be right here all right back here on Oracle broadcasting I was born a shot garden behind the girl I'll make my all day that's why they call me alright folks we're back on what on earth is happening I'd like to direct everybody up to my website wwlp.com because they're on the radio show tab I've added a new tab to the user interface on the homepage you can click radio show the tab that says radio show be taken to the radio listen page and there you will see a host of images image links underneath the player where it says images for today's show these are the images that we'll be working with to see the concepts that will be being talked about here today and again the topic for discussion is occult symbolism in architecture and street plans this is how dark occultists in particular hide things in plain sight the the energy that they are creating through the symbols that they use is all around us and it does affect human consciousness simply by being present whether we are aware of it or not it actually has a more profound effect when people are not aware of how this architecture is being used subversively against consciousness when you become aware of it you understand their hidden language which is a symbolic language it is a wordless language it is a language of archetype it is a language of form and shape and color and vibration when you become aware of it you can begin to mitigate the power that it has over your consciousness and understand how this is being used and has been being used for centuries millennia so we're going to look at different architectural forms and different symbolism in architecture here tonight I don't think I'm going to take any calls here tonight because we took a whole lot of calls last week and I kind of took a break in going through the the curriculum on the show so to speak today I'm gonna gun through some of this material and hope really uh give people a a firm grasp of what these occultists are actually doing when it comes to building projects and the energy that is contained within street plans and uh we'll do that the whole show here today so let's look at image number two on the the list of images the series of images posted to the radio show page on what on earth is happening image number one was simply the flyer for the Tesla energy independence celebration so we're starting at image number two on the website and this shows a couple of views of the Arc de Triomphe in Paris okay so the Arc de Triomphe lies at the end of the champs elysées okay the main thoroughfare in the city of Paris and Napoleon built this arc okay the arc of triumph okay so ocultist use arches constantly in their architecture all doorways you'll very rarely see in their architecture a straight archway for a door this is directly related to how energy flows okay curved archways are always better than straight ones okay this is a general principle in building so you will see arches used throughout occult buildings okay buildings that have some form of a connection with the occult with the power structure with the controller's archways okay we talked about when we looked in into the tradition of Freemasonry how powerful the symbolism of the arch is that it represents higher awareness that it represents the coming together of the left and right brain hemispheres that it represents being awakened or illuminated okay so connected with that concept of illumination we can see in the second image on this slide that the symbolism of the Sun is used in conjunction this arch symbolism okay and Napoleon was definitely an occultist he was definitely one of these so-called elitist these power mongers all right these Psychopaths that just want to control other people's lives okay so in conjunction with this arch symbol okay built into architecture which is based on the word arch okay we look at the symbol of the Sun that it lies smack-dab in the center of as far as the floor plan the street plan of the city of Paris and it has radiating outward from the Arc de Triomphe 12 rays okay and the twelve streets that come off of the circle where the Arc de Triomphe is located in Paris represent the twelve houses of the zodiac the sun's 12 helpers as we saw when we looked into Astro theology on this program many many weeks ago so connecting the idea of illumination and an arch okay with their architecture that they build and put there they're not telling the people that their illuminator is this is a symbol of light for them they're telling you that this is their symbol of light that they are the solar cult and that they are the illuminated ones that they consider that they have their eye wide open the one eye which is open by the arching okay or the bridging between the left and right brain hemispheres but when that's done without real care when that's done without actual compassion you have a psychopath as a Napoleon was and as all so-called leaders of the modern era are okay these are people that don't care about anything but themselves and their own means to power and that's it now let's look at slide number three this is also in Paris this is outside of the Louvre Museum the largest Art Museum in Paris and probably the largest Art Museum in the world if I'm not mistaken this is a pyramidal structure of glass erected outside the building about a decade ago I believe and there are 666 panes of glass that make up this pyramid structure now we looked at what the pyramid represents over the last several shows okay and the pyramid as far as the base of the pyramid like we saw on the reverse side of the Great Seal of the United States on the back of the one dollar bill generally represents not being aware or enlightened okay it represents remaining in base consciousness the bricks that make up that pyramid from that that's Eagle on the back of the one dollar bill represent base awareness represent unconsciousness they represent being weighted down not being enlightened okay with the capstone on we also saw with that represented with the capstone of brick so in this case this pyramid is completed but in another numerological significant way with 666 panes of glass and we saw with that number represented in a couple of weeks back on this show and we looked at gematria an occult numerology 666 being the number of unconsciousness beast consciousness in completion in thought emotion and action will pick it up right there after we come back from this break don't go anywhere folks are listening to what on earth is happening when the oracle Broadcasting Network we're back folks you're listening - what on earth is happening I'm your host mark Cassio my website what on earth is happening calm before the break we were starting to look at occult symbolism and architecture we were talking about the glass pyramid outside of the Louvre museum in Paris and how it is comprised of 666 panes of glass the number of beasts consciousness the number of incompletion in thought emotion and action a lot of people protested when this went up and thought it was a hideous structure and didn't want it there but it went up anyway because the so-called elites wanted it there and they're basically running the show as it stands right now if we look at slide number four on the radio show tab of the what on earth is happening website where there are twenty nine images listed that I'm going to try to make my way through on tonight's show we can see again light is connected with this structure and you'll will see this as a repeating theme these structures are always lit up illuminated okay in a very bright way okay so to connect with the idea of light the Sun knowledge awareness okay they're telling you we have the light in our completed male dominate or structure right and you exist in ignorance and darkness underneath the Louvre okay if you go down below this glass pyramidal structure you see that underneath there is a descending pyramid underneath the large one that is a that is above ground and then below that there is a small pyramid that is upright and they almost touch but they don't quite touch now this is the concept of the physical world not quite meeting up with the spiritual world they are in a state of disconnection see the spiritual world is the chalice as we talked about the inverted triangle alright and the upright triangle or pyramid represents the physical world okay so male and mail are not actually in unison the spiritual and the physical are not actually overlapping or touching they're in a state of disconnection very powerful yet very subtle subversive symbolism used here underneath the Louvre more Paris symbolism in slide number five and this is probably the most famous phallic symbol or obelisk in the world the Eiffel Tower so if we look at this structure we see that it is basically two arms actually it's four when you look at it head-on it looks like two coming together okay the bases form a square and then they come up to one common point at the top as they pass through three levels now we saw that masonry is basically built on three levels okay the first three levels are basically a a fractal of which all the levels or degrees of Freemasonry are built upon but the first three levels form what is known as the Blue Lodge degrees and this number three is repeated throughout okay and it's a held as a sacred number in all forms of mysticism and ocultism so we see that the largest or the very base is the first level then it gets smaller as you go up until you come up to the very top which has a small level at the very top and I want to point out two things to people not only is this a phallic symbol okay it's the shape of a penis in general all right and we'll see that repeated throughout this presentation here today on what on earth is happening but we see it lit up again okay which they actually added I believe in the last 15 years or so the lighting and they call this light show that they do each night at the eiffel tower illumination that is the name of the light show that they do at the eiffel tower on a nightly basis now what I want to point out here is simply look at the lighting structure and the way that the the rigging of the eiffel tower looks when lit up this way and you can clearly see that this is meant to look like a serpent okay this is meant to look like a snake you can even see the two lights that are there ostensibly so that planes won't run into the eiffel tower actually form eyes on this structure and you see the scales of the snake now some people can argue that that's accidental and I will say that nothing is accidental when it comes to the occultists that are in control of the world they love their symbolism they love telling you who's running the show they love putting their symbols in plain sight so that you think it's just the everyday and the mundane when in fact they're continuously letting you know who owns you but again there will be people who will just dismiss things like that and everything else that is said here and feel free to do that because ultimately it's you who isn't free you know I'm I'm free of their mind control I understand exactly what they're doing and how they do it I just happen to be embedded in a world where my physical freedoms are limited by other people who are still under their mind-control which is why I try to liberate Minds because I don't want my freedom just in mind I I will always have my freedom in spirit I have my freedom in mind and I want my freedom in body as well not good enough to just have two of the three people who really understand what freedom is one at all no compromise so let's move on to image number six image number six shows again the principles of this the masculine and the feminine in conjunction with each other first through the obelisk or the phallic symbol and then through the dome representative of the feminine breast okay so we see here symbolism from Washington DC we have the Washington Monument another phallic symbol 555 feet above ground 111 feet below ground for a total of 666 feet there's that number again okay and putting 1 1 1 below ground is like putting 7 7 7 below ground we talked about the significance of this occult numerology in the last few shows 1 1 1 and 777 are interchangeable it represents Evan represents completion in thought emotion in action true illumination in the physical world ok being like that the creator being like the divine imbuing that the spark the sacred spark of the divine within oneself being in the world but not of it ok so that number is actually being buried here underneath a male dominator symbol shaped like a penis okay and it's in conjunction used in conjunction with the feminine shape that is above the Capitol building the dome of the Capitol building of Congress Congress a word meaning Union okay coming together once again you see how light plays with this you see how the the Capitol building is lit or illuminated and then we'll see another theme here used by the occultists and that's reflecting pools representing once again this principle of as above so below or the correspondence principle okay representing that the physical reality that we live in is merely a reflection of the mental and spiritual realms okay the concept of how do we create our reality they know this very well but the ignorant public is completely unaware of how their reality is created and how they're the actual generators of their reality through their thoughts emotions and actions and I don't mean just one person I'm talking about in a collective sense because this is another bunch of new-age propaganda that one person is creating the reality that they witness in front of them nothing could be further from the truth it's a quantum effect Oh it requires an amount put together the collective thought emotion and action of the people create the reality that we all share we'll get deeper into this occult architecture when we come back don't go anywhere you're listening - what on earth is happening we'll be right back folks welcome back folks listening to what on earth is happening here on Oracle broadcasting we were looking at occult symbolism in architecture and we were looking at the Washington Monument as a phallic symbol and the Capitol building or Congress building as the Sacred Feminine dome which represents the breasts which is the symbol of fertility and the symbol generally of femininity and we see the reflecting pool being used in conjunction with the Capitol building and with the Washington Monument as well as we will see in a future slide now the obelisk or a phallic symbol in general is a powerful symbol in the occult again this represents the phallus of Osiris in the ancient Egyptian mystery traditions which basically was the only part of Osiris that was not found by Isis after Osiris was murdered by set and Isis was able to reintegrate the other fourteen components of Osiris but not this last one the 15th part and again you have the number 15 connected with the height of the Washington Monument because it is 555 feet above ground now if we look at image number 7 we will see Saint Peter's Square and yes it is an oval shape but they call it a square in the Vatican and we see in the middle an Egyptian obelisk right dead center in the middle of Saint Peter's Square which is the heart of Christianity modern Christianity in as it as it comes down to us in the modern day through the ancient astro theological mystery religions namely the solar cult so this represents as we saw before in the section on Astro theology not only the phallus of Osiris which was an Egyptian Sun God and the father of Horus the main Sun Savior figure that entire story of Jesus and the New Testament is based upon but we see there's an 8 sectioned geometry here in the oval of st. Peter's Square and this is comprised of two crosses okay one that looks like a + up and down right and one that is shaped like an X that goes on diagonals this eight-armed cross is the cross of the zodiac okay it is the solstices and equinoxes that's the cross shaped like a plus sign okay vertical and horizontal bars this is known as the cross of st. George and it represents the solar cross the solstices and the equinoxes the X represents the cross of st. Andrew okay and this represents the Galactic cross or the orientation of our solar system with respect to the center of the galaxy and this cross represents the four fixed signs of the zodiac which is Aquarius Taurus Leo and Scorpio and these correspond to earth air water and fire these correspond to the four angels of the corners as they are known in Solomonic magic and go Asia and other ritual magical systems that they also correspond to the Gospel writers Matthew Mark Luke and John they correspond in the four cardinal directions etc etc etc this eight-armed cross again connected with astrology connected with the zodiac connected with the solar cult of Astro theology used in conjunction here in the modern-day solar cult once again letting you know we are the ones with the light we represent the Sun the light okay we are the go-betweens between you and the divine the intercessors between you and the divine that's what this institution would claim okay this is the spiritual control center of Earth among other religious institution institutions places of Maine places of worship okay that basically gather for the flocks of these mind control agencies flock to alright we saw in the Astro theology section the Kaaba at Mecca being one of these centers representing the center of the galaxy in this case we see once again architecture being used to represent concepts that most people are completely unaware of because they are unstudied of the history of these institutions and where their real origin lies so the phallic symbol once again used in the Vatican in in slide number eight if we move to slide number eight we will see three control centers of the earth and very prominently displayed in these three control centers as a matter of fact basically in the very center of them all we see an Egyptian obelisk representing the male dominator solar power being raised above everything else being put in a central position in the most prominent position Vatican City a square independent of the state that surrounds it okay a sovereign state inside of another sovereign state okay of Rome the city inside the sovereign state of Italy but the Vatican Vatican City is basically its own sovereign state within Rome and this is the spiritual control center of the world ultimately the occultists that are really running the show are running it out of the Vatican okay this is really the highest level of control if you want to know where the darkest the cultists of the world are at the Vatican is a good place to start looking in addition we see Washington DC and the reflecting pool once again conveying that concept of as above so below we will bring the male energy you the misuse of the male energy down to the earth and use it here as a form of control alright Washington DC no better example of that because this is the military control center and again it's a square it's a district in between two states actually in between Maryland and Virginia and these are also concepts related to the goddess Mary and virgin and the male Dominator control center is placed right in between these two concepts the states named after the goddess okay and that's an act of rape symbolically okay you're you're putting them the most male power the military power of the earth in between the places named after the Sacred Feminine this is not accidental this is deliberately planned very painstakingly planned okay the City of London this is the financial control district again another district within a city okay this is where the Bank of London operates all of the financial machination is that take place are ultimately coordinated from here so this is monetary control control of energy we have military control in Washington DC basically the total misuse of male dominate or power waging wars of aggression on other sovereign nations throughout the globe and finally the spiritual control center run from the Vatican we see here the obelisks as it as a central architectural motif in all three of these places all three of them are squares as well laid out in a square okay now I'm from Philadelphia and the very heart of the city we see a phallic symbol in image number nine this is City Hall in Philadelphia and it's a huge phallic symbol placed right in the middle of Center City Philadelphia if we look at it from overhead which image number ten is a shot of this is from right from Google Earth and if anybody wants to go into the middle of City Hall just walk straight through it if you're walking straight along Broad Street you'll come to the entrances of City Hall and you can walk right through it to the other side right in the middle of the courtyard at City Hall is a gigantic zodiac okay that's what that circular image with the rays of light coming off of it at the middle I know it's a little bit difficult to see here in this image but I have stood right in the middle of that zodiac myself and you would ask yourself why er why are they so into zodiacal symbolism because ultimately the people that control everything that's going on in the world are cultists they study the occult they use the occult to their benefit they use this hidden knowledge to their benefit and wield it as a weapon against people who have no idea what this knowledge is all about in image number 11 let's start looking at the example of the pentagram okay which we looked at what that represented in previous sections but here we see the inverted pentagram of Satanism this is the emblem at the Church of Satan in course we'll leave it right there until we come back after the break and get into what the pentagram ultimately represents the inverted pentagram and how this is used particularly in Washington DC state with us folks don't go anywhere you're listening - what on earth is happening on the Oracle Broadcasting Network welcome back everyone you're listening - what on earth is happening I'm your host mark passio my website what on earth is happening calm we're going through some imagery from the website on the radio show tab which takes a look at occult symbolism in architecture that is placed all around us it is indeed hidden in plain sight but if we don't know the secret language of symbolism that the occultists use we cannot understand what is being said to us wordlessly in a symbolic way we're looking at image number 11 on the slides that I have posted to the radio show page on my site and this shows the inverted pentagram of Satanism and this particular variant of that symbol which is very ancient is the modern sigil the modern emblem of the Church of Satan and it shows an inverted five pointed star with a goat head in the middle of it and some Hebrew characters at each point of the pentagram when the pentagram is in this arrangement it represents raising duality above unity consciousness okay so raising us versus them thinking above the idea that we are all one ultimately it also puts down the three points which represents thought emotion and action the true divine Trinity this is what all occult - this one to do raised duality and put down consciousness I read in my presentation at the free your mind conference a quote from Anton LaVey about the inverted pentagram and what it actually represents right from the horse's mouth okay the goat is a symbol of fertility once again combining this mail Dominator ideology with a symbol that ultimately represented fertility in the ancient world hey this is their chemical wedding this is their divine union all right the Hebrew characters around the outside starting at the base point which represents spirit being thrust downward into the ground okay because the five points ultimately represent earth air water fire and spirit were ether and that fifth element okay is being put down and raised above it are the material elements of the material world so materialism raised above spirituality duality raised above consciousness unity consciousness okay that bottom point is the Hebrew character la med if we move to the right that is evolved the upper right point is Yoda the upper left point is Tov and the far left point is none so this spells if we transliterated into English L V Y TN or Leviathan and this is an invocation to one of the dark angels of the corners where the beasts of the corners in Satanism Leviathan Satan Lucifer and Belial okay so clearly a dark occult symbol I don't think anyone would even contest that in image number 12 we see that the shape of the Pentagon the center of intelligence and military deployment here in the United States is the exact shape of the heart of the inverted pentagram and as we'll see this is actually aligned with a phallic symbol that is found in the street plan of Washington DC but the shape itself the military intelligence headquarters could have been any shape but they chose the pentagram because this is the heart they chose the Pentagon because this is the heart of the end - pentagram not an accident image number 13 shows an overhead view an overhead satellite view taken from Google Earth of the White House the White House is the building that I have circled in image number 14 so if we look at image number 14 there's a red circle around the building that is the White House okay now an image number 59 outline an inverted pentagram that points directly at the White House a the the the fifth point which is thrust thrust downward okay points directly at the White House now people will immediately say and many researchers have pointed this out and people have refuted this on one basic piece of evidence the pentagram is not complete and that is true this pentagram is not complete one of the arms is completely broken and not connected so that the pentagram is wide open there on the left hand side this is also not deliberate and it does not mean that this is just pure coincidence that the street system was built like this but for those who are not initiated into the dark occult and it's ideologies and its symbols this would be completely perplexing until you understand what a pentagram with one arm broken actually means when it comes to the occult okay so I am going to read a quote and this isn't me saying that I have taken this understanding simply because this was printed in a book by someone who I happen to agree with his assessment of I understand this from my dealings in the occult as a pentagram of pacts PA cts pacts an agreement okay a vow that is made a deal that is struck okay I'm going to read from the book secret teachings of all ages by Manley P Hall and this is from his chapter within that book called ceremonial magic and sorcery that's the chapter that this quote is taken from in the secret teachings of all ages by Manley P hall the chapter is called ceremonial magic and sorcery in this chapter Manley P Hall says the pentagram is used extensively in black magic but when so used its form always differs in one of three ways the star may be broken at one point by not permitting the converging lines to touch it may be inverted by having one point down and to up or it may be distorted by having the points of varying lengths so the black magic pentagram according to Manley P Hall someone who was also involved in the dark occult and then also turned around his ways he is saying there are three specific properties when the pentagram is being used in the dark occult it is has one point broken one aspect of it is broken or left unattached okay it is inverted or it is skewed meaning that the the lengths are out of proportion with each other and are not equal well we have every one of these scenarios when we look at the pentagram that is above the white house when we look at the northern northern orientation of the map of the white house okay every one of these three aspects of a black magic pentagram is in place the pentagram is inverted it is skewed and one arm is broken let me continue reading Hall says when used in black magic the pentagram is called the sign of the cloven hoof or the footprint of the devil the star with two points upward is also called the goat of Mendes because the inverted star is the same shape as a goat's head which we just saw in previous slides okay when the upright star turns and the upper point falls to the bottom this signifies the fall of the morning star and the morning star as we know is Lucifer it is the planet Venus the morning star that heralds the coming of the son hence it is known as Lucifer looks fair a the light bringer again light associated with these dark occultists okay the fall of the light the fall of the morning star the fall of looks fairy the light bringer which is the Sun that ultimately brings the light and life and energy and this is a symbol that the light is what actually we need to aspire to and bran bring ourselves toward because that's what brings real change and that's what brings real life don't go anywhere folks we'll continue with our assessment of dark occult symbolism in architecture after these messages you're listening to what on earth is happening I'm on the radio show tab of the website just click the tab that says radio show you'll see images for today's show listed underneath the player also there in case anyone hasn't noticed it that happened to be going to the radio listen page of my site there is a chat room that I just put there today and hopefully things will go smoothly in there if I hear a bad things about what's going on in the chat I'll have to take it off of the page it's really the first piece of interaction for users of the website that I put on there because I see what these things devolve into on other websites so I'm putting it up there on a trial basis and hopefully people will make good use of it and share information in a respectful way and point people in the directions that they need to be pointed instead of using it as a a seat for posturing and other juvenile behavior which you see all too often on in chat rooms and forums so please use that space respectfully or I will remove it that's all I have to say about the chatroom hopefully people will enjoy that and like I said use it respectfully but let's get back into image number 15 which was the overhead aerial view of the White House with the inverted pentagram in the northern direction now the north is considered in Freemasonry the place of darkness it is a place of war in Satanism it represents the house of Belial each Crown Prince as they are known in Satanism as they would be known in more positive schools of mysticism or occultism angels of the corners okay in the more positive versions they're referred to as Michael Gabriel Michael Gabriel Arielle and Raphael in dark ocultism and satanism there are four crown princes and one is given to each direction okay so in the West you have

Leviathan in the south is Satan in the east is Lucifer and in the north is Belial again named after Bell the ancient Sun God and this name comes up over and over and over again when you study the dark occult Bill we looked at how we are basically worshipping the bills dollar bills and we're using them to send energy back into a cyclical loop because we're paying bills with those bills okay the most powerful secret society of the modern day is the Bilderberg Group one of the most powerful okay we have Belial here represented as the enthroned in the north okay the place of darkness and the place of war when it comes to Satanism we have an inverted pentagram in the place of the north and look at what it is connected to what what is resting upon the place where war is directed from the executive branch of the United States government the White House the commander-in-chief of the Armed Forces at least ostensibly no accident folks these occultists are putting it right in our face and we can't see it we'll be right back welcome back folks - what on earth is happening right here on Oracle broadcasting I'm your host mark passio my website what on earth is happening calm we're looking at a cult symbolism in architecture and Street plans today and from now until the end of the show I want to lay out what could be considered a rather complex arrangement of symbolism in the Washington DC Street plan many people will have who are listening will have looked into some of this in their own studies I'm going to attempt to connect all of this and talk about some of its esoteric meanings so we're looking at image number 16 on the radio show page under images for today's show and this is an overhead view of the area just to the south of the White House which contains the Washington Monument and the Lincoln Memorial so if we look at image number 17 I have circled in red the Washington Monument at the top and the Lincoln Memorial there at the bottom of the image the White House would be to the left-hand side of the oval that you see in the upper left hand corner of this image that oval is simply known as the ellipse okay so if we look at image number 18 and you can go back and forth with these images to to compare and contrast them I have outlined the oval or ellipse and I have outlined the road system okay the pathway system that connects the Washington Monument to the Lincoln Memorial and if you look at that system of interlinked roads okay on the ground there in Washington DC in this historic section you will see that it forms a gigantic phallic symbol okay and I think it's very unmistakable and you can go and look at this yourself on Google Maps it's there it is not extrapolated or interpreted all I did was create an outline based on the existing roads and and pathways that exist in this vicinity and it's very very clearly a gigantic phallic symbol again people may think that this is accidental or it just happened to work out that way and I would beg to differ with that the people who designed the street system of Washington DC and the place where these monuments and memorials would be placed did so very painstakingly and deliberately with an intention in mind okay this is a channel of male energy and it is starting in the West and it is directed east okay so we're looking the bottom of this image for the right orientation is West and eastward toward the direction of the Rising Sun is the top of this image okay so this is a symbol of male energy directed east toward the Sun again solar cultists are actually in control as it stands right now they are ocultist they use symbol to imbue places with energy they put these symbols on the earth because they know that energy flows on the surface of the earth and that people are affected by that energy their consciousness is affected if the energy is strong enough even their behavior can be affected okay and we're seeing in conjunction here a Sacred Feminine symbol and a masculine symbol the phallus and the egg okay with the energy coming out of the phallic symbol portrayed as the Washington Monument so this would be the seed okay and then you have the egg right neck to the very top of that phallic symbol again symbols of sexual union this isn't accidental these are archetypes these are deeply held symbols that we recognize that a subconscious level even if we don't pick them up at a conscious level now what I want to get into is what the entire arrangement that we're going to see along this line okay this west-to-east line starting with this phallic symbol and going all the way to the eastern side of the square of Washington DC the east part of the district okay so if we look at the Washington Monument and its arrangement along this line okay and the Washington Monument is in alignment with the White House to the left there as well we come down at the very base of this phallic symbol we have the Lincoln Memorial and Lincoln is seated so that he is looking to the east but those who come to his up his steps and face him are facing to the west okay the place of the Setting Sun okay he is enthroned as you can see in image number 19 on a throne and he is robed like a king or an emperor with a stern countenance and he is seated on this throne with an open hand on the right hand pillar of the throne the right hand arm okay and a closed fist on the left hand side if you are him seated as him your left hand would be closed and your right hand is open he is holding two sashes we looked in the symbolism section when we went through symbolism the symbol of the fasces is a Roman Empire symbol word is ultimately derived from it represents centralization of power the idea of the axe is much older especially the double-headed axe this goes way back into the ancient world the fashions itself as a symbol rods bundled around a central acts as a symbol of authoritarian control of satellite nations bringing together 50 what we're supposed to be sovereign states or nations under one authoritarian centralized control this is a roman concept of conquering satellite nations and unifying them under a centralized authority centralization of powers what the fasces represents and this king is who in the old religion the ancient Babylonian priests class dark occult mystery tradition this king that they have symbolically represented here with Lincoln's image is what they want to get back to they want to get back to the one ruler of church and state they want to get back to the one centralized authority that rules the military powers the financial powers and the spiritual powers of the earth in other words man as God the left hand of Lincoln in the fist represents the military arm or government as a form of control specifically mind control the right hand which is open represents the spiritual or religious power that they want to enthrone in one king one Emperor of their new world order don't go anywhere folks we'll be right back you're listening - what on earth is happening back after these messages welcome back folks listening to what on earth is happening I'm your host mark pashia we're looking today at occult symbolism in architecture monuments and Street plans and we are on image number 19 of the images for discussion on today's show you can find these images on the radio show tab of my website what on earth is happening dot-com image number 19 of course shows Abraham Lincoln in his aspect as an emperor king a priest king seated with the two fasci in hand one representing the control of government one representing the control of religion with a unified controlling body bridging both of these two institutions of control of mind control I might add and he is the priest king that represents their new world order okay bringing together government and religion as God on earth because that's what the occultists ultimately want to be they want to be God here they want to have their authority unchallenged and unquestioned and they want to control not only the physical but the spiritual destiny of everyone on this world if we look at image number 20 here's another example of how occult symbolism is hidden in plain sight and this image is from right here in Philadelphia I actually took this shot and it'll take a little bit to load because I uploaded it at the resolution I took it at so be patient with that hopefully the server will handle that but image number 20 shows outside of an old court building which is now converted to a post office we see the image of the enthroned figure looking like a Babylonian priest King okay holding the fash I okay holding the fasces the bundle of rods with the ax in it okay and behind him is the Eagle representative again of royal bloodline power goes way back into the ancient world you can connect it with dynastic crests of all kinds the Eagle connected with royalty okay as well as the the Phoenix also a symbol often used interchangeably as well but look at underneath the eagle's feet okay right behind this God figure holding the fash ease on this court building that was built here in the nineteen late 1940s in the United States right here in Philadelphia this symbol of the SS the two sieg ruins this is the exact same symbolism that the Schutzstaffel of germany used the secret police SS right there in relief on this court building out in the open in conjunction with the fash 'yes it's all right there in front of us if only we open our eyes and see it these are occultists were dealing with they use their own language their language is telling us things that we don't understand until we become conscious of their language anybody being kept held as a slave if they are going to eventually throw off their chains and come away from the control of their oppressors we'll have to learn the language of their oppressors this is just common sense and and any even a cursory study of history will tell you this we don't understand their language as a people and that's why it's a piece of cake for them to continue to control us image 21 shows this language further we're going to look at the dove I'm sorry the owl used in conjunction with architecture and symbolism we saw this in the section of symbolism when we were looking at Owl symbolism as one of the favorite forms of symbolism that the dark occultists use the owl is a symbol of their cult is the symbol of dark care because the true form of care is represented by the Dove the bird of peace the owl on the other hand is a bird of prey who can see its prey at night when its prey cannot see it superior vision in the darkness whereas its prey does not have vision in the darkness you see how that symbolically works there's a symbolic understanding to this that we have to arrive at this is why they use specific symbols they're telling us a story wordlessly the owl is the bird of prey who chases its prey from a higher position meaning they have a higher level of consciousness than us and that's why they can continue to prey upon us the owl has superior night vision that's why they can see in their world of darkness whereas we don't have the same vision to see in the dark to understand their darkness that they have perpetuated and that is all around us we have to develop true night vision we have to become as the researcher Michael - sorry on says walking encyclopedias of evil to understand these occultists sick demented evil vile psychopathic mindset their psychology we need to understand if we're going to beat them in this war of consciousness image number 22 here's the principle of illumination again they not only make the building that you see an image number 21 the frost bank building okay shaped like an owl with the crest okay an image number 22 you see it lit up and you can clearly see the the face of an owl from the side of that building specifically when it is lit up in Philadelphia once again I like to put some of the symbolism that is around here into my presentations so we see the two owl buildings on the skyline of Philadelphia with the the the horns okay this is the Commerce Square it is known as where the banks and Finance ears of Philadelphia all have offices so the this block that these two buildings are built upon is called Commerce Square because they are the merchants they are the people who control commerce okay now connected once again as I said with the concept of care is the Dove and the Dove is connected with the idea of Columbia that's why the capital city of the United States is Washington DC the District of Columbia this is the goddess's name it comes from the French word Kalume which means dove and above the Capitol building there's a statue that represents this goddess Columbia and it represents real freedom and real care okay how it is being used is an an entirely different story they are putting this on the place where the the trusted power has been completely abused in this nation and in image number 24 we see the Congress building okay Congress again meaning Union coming together it's supposed to be the place where people who have brought themselves together within meaning have met have a a balanced brain a left and right brain hemispheres and therefore can properly guide not act as tyrants and as gods over the people that's the original intent anyway I'm not a person who subscribes to the idea of government at all I think it's all mind control I think it was a bad idea from the start I think it's something that we have to get past evolutionarily as a species to understand that it is all simply a form of mind control it's right in the word the word government means mind control from the Latin even RA and men take to control the mind we're going to look at the street plan of Washington DC and depth when we come back after this break starting with the Capitol building where the Congress building be right back folks okay folks who are back on what on earth is happening we want to jump right back into the explanation of some esoteric symbolism in the street plan of Washington DC we're looking at image number 24 on the what on earth is happening radio listen page on my website and this is an overhead aerial view a satellite view of the Congress building in Washington DC this sits much farther east from the Washington Monument and in image number 25 once again like I did in the region around the Washington Monument between the Washington Monument and the Lincoln Memorial which I explained what Lincoln symbolically represents inside of that Memorial and I'm doing the same procedure here I'm simply outlining the actual streets the roads around the Congress building and you could see clearly that it forms the image of an owl completely surrounding completely symbolically eating the entire Congress building the Congress building sits within the belly of the owl in other words since the owl represents in the dark occult the form of dark care that the dark occultists practice meaning they have a form of unification within them and amongst them what they care about and the ways that they think about people and about the world they act upon so therefore they exist in a form of unity consciousness albeit evil albeit extrude extraordinarily dark and twisted but nature as a whole will respect unity over division and I've said this before many times and people can stand to hear it they hate it they don't want to hear it it's true the reason we're getting our rear ends handed to us in this battle is because we're not unified most of all not only are we not unified with each other and we're not on the same page as far as our knowledge goes and our will to act goes we're not even unified within ourselves we think one thing and feel a certain way and then we act in complete contradiction or opposition to that as individuals oh I hate what's being done with the tax money that people spend it's going off to war but I'm going to continue to pay taxes pay into the tax system because I'm afraid of the twisted Psychopaths who may come after me if I don't do it until people stop supporting the system it will continue to enslave them the end the end we have to find the will not to comply and that's what real care is that's what real enlightenment is that's what wisdom is image number 26 shows that even the wings of this owl are shown in the street system just tracing some of the streets in the immediate vicinity around the Capitol building we'll get you the owl with its wings outstretched image 27 shows you the overall position of this owl it is seated atop a 13 level pyramid there are 13 streets in this pyramid system that extends below the Capitol building that I have outlined verify this for yourself just go on Google Earth and verify it for yourself okay now inside that pyramid in the middle got running vertically down the middle of it is known as the National Mall now beneath this I don't have a wider angle shot of that actually I do but it's in the last slide which we'll get to but if you looked at a wider angle shot of this this pyramid okay you would see that directly below that pyramid is the Washington Monument area and that is the where the the male energy is being directed again from that phallic symbol that we saw starting at the the Lincoln

Memorial now when people gather in Washington DC they gather in front of that phallic symbol and the Washington Monument representing the ejection of male energy were seed from that phallic symbol okay so what they are symbolically representing is the semen okay they're symbolically representing sperm in that mall okay and that mall is like the fallopian tubes or it is not the fallopian tubes it is like the vaginal canal okay making their way to the place where the egg is at for Union or Congress between the masculine and feminine which produces birth or creation so this L is the feminine symbol now which one is being served is it the dark feminine force represented by the owl or is it that positive feminine force represented by the Dove which is symbolically represented by the statue atop the feminine symbol of the breasts the Congress building the Capitol building okay I think we all know how the symbolism is being used it's not in a positive way what happens to most of the sperm actually all of them except one they die they don't make it to their destination the people who are petitioning their so-called leaders begging them which is what petition means comes from Latin okay our lambs to the slaughter they don't understand their sovereignty that no one has authority over them that there is no one between them and the divine creator you don't need to ask anybody permission you don't need fill out any paperwork you need to claim your sovereignty and then be willing to defend it and that's it period I don't need to fill out any forms I don't need to abide by the laws of man I only need abide by the laws of nature of natural law that's it the laws of man are indeed beneath me I do not understand them I / stand them because I'm sovereign under the Creator and no man is above me therefore no laws made by man or above me only God's laws above me and I'm ok with using that name that word people don't like that word oh well get over it explain to me how the universe got here when you want to tell me that there is not no force of creation that's higher than man when you could do that and then maybe you can reproduce it then we'll talk about your uncomfortableness with the word god so we're seeing an act a sex act here played out where all of the energy is actually wasted ok nobody's really making it to the destination they're simply burning out their energy all of the seeds that are there in the National Mall begging their owners please owner please master don't beat me seven days a week beat me two days a week instead that's what people who believe in the petitioning of government are like and I'm sorry if you think those words are harsh that's the truth if we continue to look at the imagery above the symbolism that is embedded in the Shrieve system above the Congress building it becomes even more interesting so directly in line in this West East line this power line that we're talking about here in Washington DC which we're going to see a wide-angle view of in the next slide we see the chalice and the blade United the Seal of Solomon some know it as the Star of David okay but this ultimately represents the masculine energy and the feminine energy United and it's pointing directly at the Congress building again the sacred marriage the chemical wedding the divine union it's been called many many things but it represents action being united with emotion in an act of will and that's what's supposed to be occurring at that Congress building but in fact there is no political will there there is only corruption and machination is being plotted and people who are on the take people who only care about themselves even in a cursory way not in a real genuine way they just worshipped the dollar bill that's it they worship bill that's their God that's the God of all the people who have fallen into the Holman trap of materialism in the modern world that's their God money a fake form of it no less which isn't even worth the paper it's printed on and yet it has become their God and ruled every aspect of their lives and they don't think that they themselves are slaves you have to laugh because if you don't it's so sad it'll make you cry we'll be right back on wall on earth has happened folks don't go anywhere last segment here on on earth is happening on this June 5th 2011 edition I'm your host mark passio my website what on earth is happening calm we're gonna wrap up cult symbolism in architecture and Street plans I could go on and on and on and on about this this is a cursory examination of this principle of Geo Mansi there is so much more to it this is a very abbreviated version of how these occultists use these principles in architecture I encourage people to look at this on their own to find resources that look into Geo Mansi I'll try to post a few with the podcast to understand how this form of energy flow works and I'm going to lay out the big tree plan of DC here in the last slide and slide number 29 on the radio show page of what on earth is happening calm here we see again what looks to be a complex arrangement of imagery NASA nested within the street plan of Washington DC but if we know how to decode it we know what's being said here the Lincoln Memorial lies at the base of the phallic symbol at the westernmost section of this image which would be at the bottom to the left side of the Potomac across from the Pentagon there on the right-hand side ok this is the symbolic New World Order priest king seated on his throne having power over church and state over the physical and spiritual worlds through mind control he rules government he rules religion and has formed this new world order based on the mechanisms of control of both of these forms of mind control ok the phallic symbol is above that ending in the male energy coming out of that phallus at the Washington Monument okay which itself is a variant on the phallus the phallic symbol okay the very bottom of that image is the base chakra okay at the very base of the spine the sexual or sacrum chakra the genital chakra is where the Washington Monument and the ellipse were feminine egg is at we move farther east meaning higher in the chakra system okay we come to the Congress building after we get out of that pyramid the climb of the pyramid represents willpower to climb the pyramid okay it represents the solar plexus chakra at the will Center okay when we get to the Congress building that's the place of Union this would be the heart chakra it's the center and you see this the physical world of that pyramid and then the divine world of the inverted pyramid or inverted triangle the spirit world coming down into the being and uniting in the heart chakra okay the true heart chakra or true Congress depicted by the Dove were Columbia which is at the top of the Capitol building instead we see the dark form of care the predatory bird that each crew care keeps us identified only with the lower self this is the owl and it surrounds the Congress building above that symbols of the all-seeing eye the unification of left and right brain hemisphere and the opening of the third eye represented by the Seal of Solomon the chalice and blade United above the Congress building culminating in a place that I've outlined in yellow they're called Lincoln Park now this is a resonator with Lincoln and it is in direct line alignment on this line of power which incidentally is the 30 viii parallel and again in Jamaa tree you put those together that's the number 11 another favorite number of the occultist this is on the 38th parallel okay this is definitely a geomantic power line and this is why this is the place of activity with all of this symbolism in Washington DC now that chamber ok symbolically it's a chamber of the pyramid the larger pyramid that you see above this would be representative of the King's Chamber the place of resurrection and rebirth in the Great Pyramid and it's connected with Lincoln Park again we saw how Lincoln is symbolically through the statue in the Lincoln Memorial there King but now you're going up from a place of base consciousness the base chakra see if people are bowing to that King they're facing West if they're before the Lincoln Memorial they're facing West which means they're in the lowest form of consciousness the base chakra they're appealing to the authority of man if we're moving in the other direction we're going more toward the spiritual realm when we have United ourselves in an act of Congress and we have opened the third eye through the balancing of the brain hemispheres and this is what spiritual rise resurrection is all about hence the King's Chamber of that pyramid being Lincoln Park again resonator with the King and Lincoln was assassinated as was John F Kennedy you have heard all about the correspondences between those assassinations these were too ritualistic killings of kings by the dark occultists that's what these rituals were actually referred to as the killing of the King it's symbolic of the death of Osiris once again okay the phallic symbol being a symbol of Osiris not having the will integrating the will power to ascend in consciousness to the light now we finally come at the very top of this inverted triangle representing the spiritual domain uniting with the physical domain that bottom pyramid okay at the very top of this chalice the Sacred Feminine chalice the Holy Grail is the lamp of illumination the torch with the ring of power in it or the all-seeing eye inside of it this is a sports stadium but if you look at the actual street plan directly around it I've simply outlined it okay it is in the shape indeed of a torch now this is the crown chakra this is the end of the spiritual journey the Kundalini energy has risen from the base chakra to the crown the person is fully illuminated they understand that they are sovereign they understand that there's no one above them except the true divine creator of the universe and until anybody can prove to me to sufficient satisfaction that that's who they are I bow to no one in this realm no one owns me I own this vehicle through which I am experiencing consciousness and the physical domain and all you can do is destroy that vehicle you'll never destroy me and you'll never own me you'll never control me because I understand my sovereignty under the Creator incidentally you can see the serpentine energy of the water flow to the right hand side of the city and at the very top that little lake that is out the out that outlets at the very top of that this whole alignment along this 38th parallel that lake there above the torch of illumination is called Kingman lake King man when we get to that level of illumination then we are granted access to the waters and are no longer confined to the prison planet on the land and the waters is a metaphor for space real freedom being able to go out into the Stars explore meet other civilizations because we have come together and recognize our sovereignty and aren't a species that's going to do harm out there in the waters the heavens oh this the the gates that are slammed shut on this prison planet are not going to open one second before we recognize that level of sovereignty in each and every one of us and are willing to respect it in all others there is no authority in man ladies and gentlemen does not exist now never has existed never will exist no man is God no group of men is God there is only one creator and man is not it we can create in the image in the in the type of power that were given here to actually create and be like the true divine creator but we're not it some of us unfortunately think that we're in and that's why we've gone horribly astray understand this symbolism it's all around us in plain sight that's all we have time for here today folks we're out of time see you next Sunday right here on what on earth is happening

What On Earth Is Happening Show #064

Topics: *Mind Control Methodologies, Occult Symbolism, The Hypercube, The Tesseract, Dark Occult Worldview, Mockery Of Police & Military*

freedom man that's what it's all about welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host Marc Pascoe welcome ladies and gentlemen you are listening to what on earth is happening right here on the Oracle Broadcasting Network I'm your host mark passio today is Sunday June 12 2011 this show is live every Sunday from 5 to 7 p.m. Eastern Time that's 4 to 6 p.m. Central Time my website is what on earth is happening dot-com the network's website of course Oracle broadcasting calm today we have a good show lined up for you we are going to transition back into talking about subversive symbolism which we outlined as part of our methodologies of mind control which we have been covering basically since I began this radio program as the 13th method out of 14 general methodologies that I'll be covering during the course of this show after this we'll be moving into what I term chaos sorcery which should be a very interesting series of programs coming up in the future here on what on earth is happening today we are going to be look looking at the symbolism of the hypercube this is a very deep occult symbol it is generally only revealed to higher-level initiates in the occult and it is a not a very well known symbol and there's not a whole lot of information out there on the hypercube or what it actually represents and means so we'll be looking at this very subtle and very subversive symbol on the show today before we do that I want to just make one brief event announcement the Nikola Tesla energy independence celebrations a four-day conference about Nikola Tesla and his technologies is coming up right here in Philadelphia my hometown on July 7th 8th 9th and 10th there's a whole bunch of events that are going to be happening as part of this four-day conference including a science conference a social gathering a Tesla birthday celebration and open discussions and exhibitions right on the lawn outside of the independence Visitor Center on Independence Mall here in Philadelphia so for more information about this great event coming up here in the city of Philadelphia and more information about the hosts of this event the Tesla Science Foundation please visit the Tesla Science Foundation's website at Tesla Science Foundation org that's Tesla Science Foundation o RG I'm honored to be working with this group and I will actually be one of the co master of ceremonies at the Tesla Science Foundation social on July 9th there will also be a classical conference featuring the divine hand ensemble a great theremin ensemble from from Philadelphia so check out the Tesla Science Foundation and the Tesla energy independence celebrations coming up in July to be right back after these breaks folks stay with us okay folks who are back in listening to what on earth is happening under host mark passio my website what on earth is happening calm before we get started with the material for today's show I want to make another couple of quick announcements about things that I just basically completed this week and posted to one of the websites that I run I was one of the co-hosts of the free year mine conference here in Philadelphia back in April and we shot over 17 hours of video for that conference in hd-quality and all 16 speakers plus the panel discussion were filmed and I am very pleased to announce that we have finally completed all of the editing of that footage and it is now all online on the official conference website for free so you could check out all of the speakers from the free your mind conference by just going to the conference website WWF or your mind conference calm and if you go to each speakers biography page on the site right there featured prominently will be an HD video of the speakers presentation from the free your mind conference 2011 so enjoy them I hope you learn a lot and please spread the word and get them out to everybody that's what this conference was all about this conference was about speaking out taking action coming together for a common cause and getting the word out so the information is up there the organizers have done their job and the information is now public and as they say since it's been put on the Internet technically it has now been immortalized because unless you destroy this planet you're not going to destroy information once it hits the Internet it's in the public domain it's shared at the speed of light and that's the way to get information out there and preserved so I want to thank all the organizers once again they did a phenomenal job I want to thank Tim Smith for the recording of all of the speaker's presentations and I want to thank all the speakers for being a part of the event and sharing their profound knowledge so that's the first announcement the second announcement is related to this on my website I posted my presentation from the free your mind conference that can be found on the news section of what on earth is happening and also in the video section so it was on the use of subversive symbolism a topic we're going to continue to discuss tonight when when it is applied against the police and military institutions and their personnel people think that the police and military are technically on the side of the quote new world order or the the occultists that are really running things and in all honesty they may be doing their bidding but nothing could be farther from the truth the occultists do not consider the military and the police as on their side the occultists have take no sides except their own and they don't consider anyone from the general population nor anyone from even the minions who do their bidding as among them so as I've said before on this show they call people the dead that's what they call the average ordinary person who has no idea what's really going on around them this is their term for the average Joe who doesn't really have an expanded awakened consciousness who doesn't really understand what's taking place within them or in the world around them can't put the pieces of the puzzle together they call people the dead because their rationale for that is if you're not using your intelligence if you're not if you don't really care about what's going on enough to find out and you're not taking any action based on what you know for all intents and purposes you have no consciousness and therefore you are considered dead to them that's one of the ways they absolve themselves from all personal responsibility by saying we're not doing this to any actual live dynamic living beings we're doing this to dead people and they really actually believe that in their own minds that if you are spiritually dead for all intents and purposes you are dead and therefore anything they do does not matter so they hate people even more than the people that they call the dead and these are the police and military yes the the d'arco cultists despise detest and loathe these people more than any other people on the earth and I heard this again as I've said before I've used the phrase from their lips to my ears I have heard them talk about the police and military and they call them our dogs that's their name for them and we're going to see when we look at the symbolism of the hypercube today how this is applied specifically targeted against police and military so for people that want that want to learn more about this and go even further in depth about the symbolism I encourage you to check out my video presentation from the free your mind conference entitled the occult mockery of police and military personnel I've also been discussing this on the Bob Tusken show he's had me as a guest on his show over the last couple of months and we've covered about half the presentation maybe he'll bring me back on in the future for us to wrap it up and you know we're really breaking it down and going in-depth and discussing things back and forth I like the pace the pace that we're doing it at at the free remind conference we all only had about an hour so it's kind of a hurried pace that I had to follow for the presentation there so that is available on YouTube on my website and on the free your mind conference website so let's get started with the material and before we do I'm gonna do two things I'm going to first let everybody be aware of where the images are who may be listening the images that we're going to discuss tonight because there's always visual representations of the ideas covered here on what on earth is happening you could find those on the radio show tab of my website and then you will see they're listed under the player images for today's show and I believe there are 22 images that we're going to be covering today when we discuss the symbolism of the hypercube and those are listed there as numerical links and you click them and a slideshow comes up and you could follow along with the imagery as I discuss it and second secondly I want to give the call-in number for the show because I will be taking calls later on if anyone wants to call in and there are never any taboo topics here on what on earth is happening feel free to call the toll free number eight six six eight four one one zero six five once again the calling number eight six six eight four one one zero six five no taboo topics here there never are I'd like to take calls so we'll get into the the material on the hypercube and then we'll take a few calls later in the show coming up to another break don't go anywhere folks should be an interesting show today you listen to what on earth is happening I'm your host mark passio my website what on earth is happening calm stay with us still on the oracle Broadcasting Network welcome back everyone you're listening to what on earth is happening I'm Mark passio my website what on earth is happening dot-com let's jump right into the topic material for today's show we're talking about the subversive symbolism of ocultism specifically the very well hidden and subtle symbol of the hypercube the hypercube if I had to pick one symbol is the symbol of the dark occult and I'll be explaining why that is on today's show let's look at image number two in the series of images that I've posted to the radio show page on what on earth is happening this shows a rendering of the hypercube now to understand what the hypercube is and you know what we're going to get a little bit abstract on this show with the symbols okay and you have to have a good visualization capability to look at this symbol and understand what it's saying symbolically if we look at image number two we see that what the hypercube actually looks like is simply a box within a box or a cube inside of a larger cube okay so it's a cube within a cube this is referred to as a 4d cube okay a four-dimensional cube as opposed to a three-dimensional cube if we look at image number three this is a very very simplistic explanation of dimensions or as they are known in the occult world or the mystical world densities so we are said to be living in the third density or the three dimensional realm if we look at a point or a singularity meaning there's actually no space it's just a location or a point within space within some coordinate system that's considered no dimensional because there's no length there's no whiff there's no depth it's just a point so that's zero D if we extrude that point in any given vector okay meaning any given axis of a coordinate system we now have one dimension so an extruded point meaning we have stretched it out along one vector okay one direction that's considered 1d or one dimensional we now have measure okay we can measure the length of that line if we then take the line and extrude it or stretch it out through another dimension of space we arrive at a plane okay it's depicted here as simply a square but if we look at the line as occupying all of the space within that to D square that's referred to as a plane it now has two dimensions length and width if then we continue this and we take a plane or in this example a square and we extrude it we now have a cube a simple three-dimensional object so what that's where people's visualization capability generally ends because we live in a three-dimensional continuum our minds basically perceive the three-dimensional world but since we don't live in a higher dimensional realm it's very difficult for us to perceive any higher dimensional space even mathematically or construct rly we're in an abstract way so what a hypercube technically is from a pure mathematics point of view is simply an extruded cube if you took a cube and then moved it so that you moved it in one direction okay along a straight line and basically took the entire substance of the cube through that dimensional space okay so you pulled it into a higher dimension if you simply look at the bottom right hand portion of that cube on the far right the 4d image there that's listed okay that is a two-dimensional projection of the hypercube but if you look at it if you attempt to look at it in a three-dimensional way stick with me here this will make sense imagine the 3d object that you're seeing the cube okay the third I'm sorry the fourth image on this site so zero D the point then one D the line 2d the square 3d the cube imagine that object in the bottom right hand side of the 4d object that's listed there looked at the bottom right and you could see the same object is there but just imagine that it has been pulled upward and to the left so you have another cube just above that okay this is what an extrusion of a three-dimensional body looks like and again now we're we're visually representing this only in two dimensions and this will become clear in a moment what it actually represents because we'll have some animations on the site and a couple of images so look at image number four and this makes it a little bit easier to envision the way a website that I found portrayed it again zero dimensions for the point one dimension for the line two dimensions your extruding the line okay then your extruding the plane to get the cube for the third dimension and then your extruding the cube to get the hypercube which is a simplified rendering of in in part number four they're representing four-dimensional space okay now this will become very important when we understand the occultists view of reality what their basic overarching worldview is and how this symbol fits in with that worldview this is why this is their ultimate symbol this is why this is a symbol that is only basically the meaning of which is only taught to higher level initiates with in occult orders because they're basically telling people through this symbol what they think of the world everyone in it and their position in it as well we'll see that as we proceed let's look at image number five which is an animated gif okay this is a simple animated web image that shows that a hypercube is basically a cube that has been rotated through another dimension of space and if we look at the image what we see happening in this animated image is that the object continuously expands and collapses in on itself to form what could be considered a vortex or a rotating self-contained box now in the occult this is considered a representation of our universe and I'll explain that in more depth when we come back after these messages don't go anywhere you're listening - what on earth is happening here on the Oracle Broadcasting Network we'll be right back folks I gotta keep my cool make them think I made up stop welcome back folks this is what on earth is happening on the Oracle Broadcasting Network I'm your host mark passio my website what on earth is happening comm we're looking at the subversive symbolism of the hypercube today what I termed the ultimate symbol of the dark occult for a very specific reason if we understand what the hypercube represents it epitomizes the worldview of the dark Oh cultists and the way that they see themselves in relation to the world the way they see the world at all okay so we're gonna get into this right now we were looking at the animation of the hypercube and image number five on the radio show a tab of my website we're gonna move on to image number six which is another animation showing the rotation of a hypercube a hypercube is also known as a tesseract te s ser AC T tesseract and this is a general mathematical construct you can look this up on any webpage that deals with higher dimensional math but this image will show you the rotation of the hypercube from a front angle so I thought this was a nice complementary to the original animation and included it here so you can see that the rotation is never-ending and if we looked at this in let's say circular terms or instead of straight lines you know smooth arcs it would look like a tube torus okay so if you're familiar with the shape of the tube torus that continuously rotates in on itself that's really what we're seeing here only with a little bit more it's a little bit more crudely drawn with straight lines okay so the hypercube the 4d cube representing a continuously rotating box now what does this mean in occult term well let's look at image number seven now what I've done here on this image is show people the three-dimensional representation of the four-dimensional object known as the hypercube or tesseract on the left in blue there okay on the right hand side you see in red a two-dimensional projection of the hyper cube of a four-dimensional object okay you'll notice on the left hand side that what the hypercube basically looks like all right is from every side a pyramid with its capstone missing or cut off and if we take each one of the six sides of that cube to be a pyramid with a square base we see that all of the apex is of the pyramid that happened to be cut off or missing form the small cube in the middle okay so the outer box is formed by the shape that it that represents the pyramid with the capstone cut off which we talked about extensively on this show and past shows all converging to form one solid cube in the middle now what does that mean what does it symbolically represent the hypercube as the symbol of the dark occult represents mind control it is the symbol of mind control as we will see on the show today it is heavily at work in every aspect of trying to shut down human consciousness and keep it in the limited state where it is at currently the occultists see the dark Oh cultists I should say see the entire physical universe as a never-ending prison for spirit for the soul in other words they see this place as a prison because it is governed by laws by natural law dark Oh cultists do not want to have any laws governing their conduct they want to be able to do whatever they want with no repercussions in the form of higher law in other words they wish to be the creator of the universe or quite simply they want to be God it's not they don't have an integral view that everything is one it is all governed by higher law that higher law is here for our evolutionary growth and development and so that we can always have the highest vision of ourselves and the world that we want to live in that we set forth at any given time provided we simply continue to observe the parameters and respect the boundaries of natural law we are bound by that higher law whether we want to be or not even the dark occultists they have methods for subtly subverting this and doing end runs around it because they get other people to do the things that they actually want done they you notice they never do it themselves a caller called in a couple of weeks ago and said how do they get around the karmic consequences of their actions and my answer was simple they don't take the actions they get someone else who's too stupid to see what they're being really asked to do to do it for them and we're going to talk a lot about those people here today unread people who understand one thing about what's really happening in the world following orders that are completely outside the bounds of natural law and thinking they have a right to do what they're doing when they don't they never have and they never will have those rights they're delusional people so going back to the dark occultists worldview as it relates with the symbol of the hypercube the inner cube represents the prison of mind because it is formed by the intersection of all pyramids with the capstone missing their symbol of the stone the pyramid made of stone and that the the stone the builders being the dark Oh cultists the dark creators of reality okay the stone that they reject is the all-seeing eye or the true capstone the true pyramid Eon the all-seeing eye the awakened self true knowledge of the higher self is what that represents the triangle with the eye in the middle of it with light radiating radiating out of it as we covered on the last couple of shows so the inner cube represents mind control the prison that the mind is held in through erroneous beliefs that can be continuously fed to it to the mind like a drug like a poison a slow drip poison the outer cube represents the physical universe hence the base matter because it forms the base of all the pyramids which they consider not to be part of then that we are not just one that the physical and the spiritual doesn't exist here simultaneously they consider everything separate from everything else I'm separate from you you're separate from me I'm separate from the military and police everybody is separate from each other we are all separate from the earth we are all separate from the physical world and from the universe that is their general worldview they know that there's a spiritual dimension and reality that underlies everything and they reject it hence the rejection of the capstone the stone the builders rejected the reality is the spiritual and physical worlds are intertwined there is no separation between them it's a product of diseased thinking and separation thinking to think that anything is separate including the physical world even religionists think this way they think God exists outside of the natural world and we are simply living in this other reality that is separate from God and an our goal is to reconnect to the true spiritual realm by rejecting the physical realm and this is just as diseased thinking it's duality thinking dual consciousness which will only ever get you more suffering they'll be picking this up on the other side the will go deeper into the symbolism of the hypercube and see some examples of how it's used in the modern world don't go anywhere folks we'll be right back on what on earth is happening the hypercube the subject of today's discussion on what on earth is happening the ultimate symbol of the dark Oh cultists and they use it in a lot of places in modern society as will be seen coming up shortly we're looking at image number seven on the radio show page of what on earth is happening calm showing the three-dimensional rendering of the hypercube alongside its 2d projection and I was explaining the worldview of the dark occult seeing everything is separate and in addition to that seeing the physical world as inferior to the spiritual dimension when in fact these things are one in the same everything is spiritual there is nothing that can exist outside of the one of the all it is all one thing experiencing itself we need to get out of the dualistic nature of thinking about us versus them and that is derived from thinking about everything in the universe as being separate from everything else when in fact again they are all entangled inextricably down to each other and affecting each other as a result of this poisonous worldview that the dark occultists hold they see the entire universe as a prison and that is the outer cube the cube of base matter imprisoning the soul or the spirit and in their rage about this because they do not wish to be bound by natural law they look at that as a prison not something that is there for the benefit of their evolutionary development which it is they take the approach that this is simply the realm of hell I'm eternally trapped here and because I loathe and detest that situation I'm going to take the approach of that it is better to reign in Hell than serve in heaven therefore I am going to become Lord and Master of this prison put everybody else into a deeper level of control than I am even at and become their owners rulers and ultimately their God that is their mindset to a tee and I could care less who believes that in all actuality I know that that's the case from having been around some of these individuals from having been at a very very low level exhibiting all of the qualities that they do myself in my past and it needing to take years of intensive suffering to the point of absolute hitting rock bottom in utter depression and isolation for me to say hey for me to say to myself hey you think this way of thinking isn't working for you you think just maybe because ultimately that's what these people feel like all the time that is what they feel like all the time and their life's goal is to make people feel as miserable and horrific as they do inside 24 hours a day seven days a week is their mission that is their life's goal and they're doing a great job on it I have to commend them I have to give them all the props that they so rightfully deserve they're doing their work very successfully I might add because morons among the human population are all too happy to help them do it because they have no self-respect and you think that's harsh I could really care less again as I said I don't do this show to make friends with people it's not a popularity contest I'm not worried about who I'm going to offend by speaking the truth I'm not here to be your friend I'm here to tell you what's actually taking place in the world hence the title of the show people want things sugar-coated and spoken in sweet and-and-and nice tones like like spoon-feeding a little baby or bottle feeding a baby well sometimes you just have to buck up and understand what's really going on around you and become an adult about it and employ some will some free will in relation to the nature of the situation so I make no apologies when I you know say things straightforwardly and if they need to be said harshly than their said harshly so going back to what the hypercube represents the inner cube represents the mind prison that the dark occultists want to create the world of mind-control so they're putting people in a smaller box than they are in and that's the only way that they can control people that's it they understand the higher nature of the reality that we're living in they loathe detest and despise it and therefore they want to keep people's consciousness in a smaller box than that so that it can be controlled and hence the box within the box the cube within the cube if we look at the two-dimensional projection in red in this image number seven again this is the extruded cube or the hypercube as seen in two-dimensional space okay what we are actually seeing here is an octagon if we just take the outline of this shape it forms an octagonal or eight sided figure the octagon is one of the ways the dark occultists employ the concept the symbolic concept of the hypercube in their usage of symbolism another way that they employ the usage of the hypercube okay because they're not going to represent it in the way that you see it there to the left as a cube inside of an another cube with the lines connecting the the corners of the cube people would immediately recognize that as a hypercube so they want to be a little bit more subtle than that you know you might start asking questions if you saw that image of a hypercube everywhere but you take away most of its lines and look at it from a 2d projection and take away most of the lines in that projection and then you use it as an octagon hardly anybody asks any questions another way that it is looked at is two boxes which are often depicted as being right on top of each other or sometimes depicted as turned at 90-degree angles to each other or I should say 45-degree angles to each other okay so two squares one rotated at a 45 degree angle on top of each other or boxes this is a representation of the hypercube okay two dimensional realities intertwined the third dimension intersecting into the fourth dimension okay now this is where a lot of the dark occultists say that they are connected to and derive some of their power from and I would say it's where they're being controlled by as well because you think that human beings are at the top of all of the control and the hierarchy and the mind control that's going on they are controlled puppets themselves doesn't matter how high you go into the hierarchy in human form there is something beyond it a caller called in and asked this question what I think is the highest level of this hierarchical control system that does it go beyond human I said yeah it goes beyond human it goes into the realm of principality and higher dimensions and just it comes to a point where it's all based on the same force one force called fear because you have to be in fear to be a puppet period so ultimately doesn't matter who's controlling it at the highest end no it does not the game is always played the same through fear that's the method to get into the mind in order to control it and ultimately all of these controllers no matter what level of the system they operate at are all fearful little children in their actual psychological and spiritual makeup we'll be right back folks the people who are currently in control of this planet wanting to reign as God in a world that they've turned into hell rather than live in harmony with natural law which would create heaven on earth they would rather reign in Hell than serve in heaven we were looking at image number seven over the last couple of segments and I'm going to transition now into from looking at what the hypercube represents to seeing how it's used in the world so let's move on to image number eight where we see the most ubiquitous place that we will see the hypercube in everyday life it is at every street intersection practically the stop sign now people will say okay it can't be that simple occult symbols can't be all around us just like that a stop sign as an occult symbol well the stop sign is based on the octagon the octagon is based upon the hypercube it is derived from the 2d projection of the hypercube any shape could be the shape of a sign a stop sign could have been made square it could have been made circular but it is octagonal and there is a reason for that this shape is an archetype it is the archetype of the prison and we're going to see how it's used in that capacity the command stop is not just saying that to the driver in the car as they approach the intersection it is saying that to anyone who looks at the sign it is immediately going into the subconscious mind you are being told to stop continuously at every corner every place you walk the frequency red the color red which is a frequency of a wavelength of light is being used in conjunction with this command inside of the Octagon or the hypercube and it is ultimately saying to you to stop your forward progress stop your development stop your seeking stop your striving for freedom for truth for answers it's saying stop to evolutionary development as a whole to everyone that looks at that sign there's a reason the colors are used as well as we saw when we looked at different frequencies and how they relate to the brain red is a predominantly left brain responding frequency this is where they want to hold people in the part of the brain that has no connection to intuition to creativity to the Sacred Feminine we'll pick this up on the other side and listening to what on earth is happening be right back folks welcome back everyone we were looking at the stop sign in the way as a octagonal projection of the hypercube it affects human consciousness being at just about every crossroads we come to let's continue to look at some of the places that the hypercube or its other forms the octagon and the double square is used in the modern world in this next section we'll be focusing on and this is a subset of some of the presentation that I did at the freer mine conference this next section will deal with how the symbolism of the hypercube is used in relationship to police and military again the the groups of people that the dark occult is referred to as our dogs and police and military really honestly it's not my business whether you want to accept that but I'm telling you that's what they call you I know that's what they call you I heard them refer to you as that from their lips so believe whatever you want that's how your owners think of you I know anybody that told me that they thought of me as has their dog you think I'm going to listen to anything else that you have to say in orders that you barked at me you're the dog not me and anything else that comes out out of your trap is going to sound like ruff rowf rowf rowf rowf to me because if you told me that you have such little respect for me that you consider me your pet you think I'm gonna do anything that you command me to do yet this is what goes on every single day every single day of these people's lives following orders of people who think of them as their pets I mean it boggles my imagination and you know in a way I understand how people might be hesitant to accept that because it's so uncomfortable and this is what some of the darker cultists that I work with basically said to me in so many words you think that you're going to go and tell the dead what we do and they're going to get it they're going to exploit your going to explain it to them in a way that they can understand see they look at people as not even animals as lower than animals with no intelligence factor at all and they would say to me when when they knew I was uncomfortable with what was going on and you know they were gonna lose one the idea was you're gonna go and throw cast pearls before swine and they're gonna hate you for it and honestly I don't care whether that's true maybe it is true then so be it again as I've said many times on the show I'm not doing this for people I'm doing this because I served the truth herself and no other that's who my val has been taken to no earthly institution no no no person or group of people truth herself the Sacred Feminine the goddess if you will so they said to me you're going to go and tell and expose to these people that we own them and expect them to understand and accept that they said to me if we came with you and told people this they wouldn't believe us and we could tell him exactly what we did and how we did it they said they would choose not to believe their own owners that are telling them how they're owned because they're in such psychological denial that's what was said to me before I completely got out of the institutions that I was involved with so let's let's move on and look at some of this symbolism in relationship to police and military slide number nine is a quote from the researcher David Icke who have profound respect for for speaking his truth without being afraid of any repercussions or what anyone thinks about him one of the most courageous people I know if everybody had his courage the world would be free tomorrow in his book the biggest secret he talks about the symbolism of the hypercube without actually naming it as such he says the double square now double square you could substitute hypercube it is the same thing essentially the double square one square on top of another in any form is more secret society symbolism he calls it secret society symbolism I refer to it as occult symbolism in the secret language of symbolism one square on top of another means control of all that is right and all that is wrong all that is just and all that is unjust all that is positive and all that is negative in other words the double square means quote we control everything now for the police or military personnel that might happen to be listening to this radio show or podcast this does not mean that you control everything it means that dark oak cultists who put this symbolism there control everything including you including your mind including your actions they own you you're owned wholly owned lock stock and barrel so let's look at the symbol itself here we see the Sussex Police logo with the double square one square and then another square rotated 45 degrees and put on top of it we're intertwined with it you'll see the crown of Great Britain on top of the double square because this is the what they're upholding the rights that they're upholding or not the people's rights it's the divine right to rule that the dark occultists claim and the Royal Family's claim to own and rule over the people because of their bloodline that is being upheld by the police in any country let's look at the doves that are on the symbol briefly and the configuration there and we'll do that when we come back after this break don't go anywhere folks will continue to break down the occult symbolism of the hypercube here on this edition of what on earth is happening we'll be right back welcome back everyone this is what on earth is happening I'm your host mark passio my website what on earth is happening calm today on the show we're talking about the occult symbolism of the hypercube what I referred to as as the ultimate dark occult symbol and the symbol of mind-control so we're looking at image number 9 on the what on earth is happening website on the radio show page click the radio show tab from what on earth is happening calm you'll see images for today's show listed we were looking at the quote from David Icke about the hypercube or the double square in image number 10 you see an animation of this police emblem and it shows the two squares outlined in red and then in the intersection of the two squares then I have outlined the octagon or the hypercube showing that these symbols are indeed one and the same before the break I mentioned the configuration of doves on this image again often used in conjunction with the British crown you see the equal armed cross atop the crown along with the fleur-de-lis the lily flower representative representative of the royal bloodline from which the crown of England claims its right to rule the doves are in the configuration of four up one down or you can look at it as two up three down and we've seen that symbolism before when we looked at the inverted pentagram simply connect them and you will have the inverted pentagram on that shield consider each dove as one of the points of the pentagram duality raised the Trinity put down or if you look at it as four up one down the material elements earth air water fire of the physical realm raised up above the fifth element of the spirit which is buried what do they do with this symbol well that's even more interesting than the symbol itself let's look at image number 11 here we see it used it is placed on the head of the police specifically in the location of the forehead the prefrontal neocortex which is supposed to be the most rational area of the brain and containing all of the highest brain functions instead the symbol of mind control is placed there on the third eye chakra in conjunction with this subversive symbol of the hypercube which represents mind control being placed right on one of their mind controlled minions they have another incredibly subversive symbol the checkerboard floor of the house which we saw from the first degree tracing board of Freemasonry this symbol which we saw represents low consciousness base consciousness the chequered life of the person who knows nothing of natural law wanderer on the floor of the house wandering between light and darkness never know with knowing which is which the pawn that can be controlled in the game of chess which is fashioned upon this pattern that can be moved by the chess master at whim because this person doesn't know themself because they are under mind control because the chess master is at a higher level of awareness looking at the game board floor from overhead whereas the pawn on the game board cannot barely see two squares ahead of him he can only see the one square that's immediately around him if that so you can see how subversive this symbolism is and what they're saying to a member of the police and cops in America if you think this just applies to British police you're kidding yourself because wait until we see what one of the usages of the hypercube is in relationship to you the floor of the house wrapped around the brain itself wrapped around the temple of Solomon the human neocortex the left and right brain hemispheres the hemisphere of the Sun and the moon wrapped around the temple in man the human brain and then upon the prefrontal cortex or third eye is placed the symbol of mind control and I mean people don't see this because they know nothing of the occult and they think you're just seeing things in patterns that you want to see no I'm explaining very specific occult symbols there were actually conveyed to me when I was a member of the occult and then further studied in in on my own time because I pursue knowledge voraciously and these are known symbols of occultism being used for a very specific purpose and that purpose is what the stated intent of this symbol is all about which is mind control so this has nothing to do with my interpretation of something I'm telling you what these symbols represent according to the people who made them and there you see them being used for that very purpose and what they're saying to the person is you're so clueless you're so dumb you're so painfully dumb that we can put a symbol right on your body that is mocking you in the open and telling you that you're a slave a pawn and a mind-controlled minion that we own and you are too dumb to be able to see it and get as offended as you like folks police and military out there who may be listening take a total offense if you want you're the one who is being completely mocked and ridiculed not me they're not mocking and ridiculing me they know I know what they know see so they're not gonna mock and ridicule me in knowledge I'm their equal the place where it differs in is heart and care and what course of action we're going to take and how we're going to attempt to correct the situation that we're in that's where I disagree with the dark occultists we have we share the same knowledge but for the people who are involved in an institution like this you're clueless and you're being told you're clueless openly you're being laughed at my I can't even tell you that the demonic laughter that I heard when police and military would be brought up in in places of meeting when I when I would attend dark occult rituals meetings etc the the way that they look at the police and military I'm telling you they they honor and respect their animals they honor and respect animals forget dogs that they might keep as pets or cats of they have high respect for them in relation to people they have more respect for cattle that they would be getting ready to butcher to eat than they do you and I'm telling you that their view of the police and military is a thousand times lower than the average public who just happened happened to be buying their lies in the media a thousand times lower a thousand times less respect than who they call the dead because they look at it like they're so stupid they'll do it to their own kind they'll enslave their own kind for a paycheck that's how they think of these people and could I could I openly announced on the air that I think the dark occultists are wrong or incorrect I wish I could thanks but I couldn't do it because they have it exactly right that's exactly as it is sadly we'll be right back we're back on what on earth is happening talking about the mockery of the police and military through the symbolism of the hypercube the symbol of mind-control in the dark occult we were looking at image number 11 an animated gif showing the hypercube on the head of a mind-controlled minion of the Darko cultists a police officer from Sussex England let's look at the next image image number 12 and what I want you to keep in mind when looking at these images of the police take a look in their faces the the camera really captures the essence of the being in these cases look at the eyes which they say are windows to the soul these are some of the most fear filled individuals that you will ever see in your life you could just intuitively sense it you can just see that these people are just totally fearful I mean look at image number 12 and 13 where we see the further usage of the hypercube the double square and the octagon in conjunction in image number 13 with the floor of the house wrapped around the brain and just take a look at the expressions on the faces of these police it's it's like children it's these are these are beings who never psychologically grew up they never emotionally grew up and they certainly never spiritually grew up and you know what I feel that I do have the right to say that I know what being grown up or raised is in those capacities and when people are being used to usurp my rights and other people's rights yeah I do have the right to say that they are spiritually psychologically and mentally broken and let's look at the word broken as an example what does it mean to be broken while something doesn't really work right anymore it means it's in fragmented in pieces it's not whole it is no longer one but more than that the word broken is what we use when we refer to breaking an animal breaking the will of an animal so that it obeys unquestioningly these people are broken in every one of these aspects their will to resist is broken they obey unquestioningly they're broken people the mind is broken to fear and trauma and they're definitely not whole individuals and that's why the symbol their mark is being put on them the mark of the dark occultus is being placed on the head on the head does this sound familiar to any people who may be familiar with some of the prophecies in Revelation they'll put their mark upon you the mark of the beast of the dark occult of mind-control these are the beast men who are undeveloped and thought emotion and action though they're developed an action all right just not right action back to image number 12 quickly we see the hypercube used in conjunction with the Sussex Police logo once again again right on the forehead of this British cop image 13 showing it in conjunction on the forehead on the Hat of Sussex police with the checkerboard floor of the house wrapped around the brain image 14 shows American police more usage of the hypercube their hats are eight cornered hats and on top of the crown chakra is being placed the black octagon this is an actual photo of a police hat from the front and from the top and there you see it the Octagon the hypercube the tesseract the symbol of mind-control and where is it placed right on top of the crown chakra the highest point of energy at the top of the head which is supposed to represent unity consciousness the coming together of the left and right brain hemispheres where the Kundalini energy rises and eventually out pours and outflows to make a deeper connection to the oneness of the universe but instead it's blocked see this is this is Stargate symbolism but it's closed Stargate symbolism the third eye the real Stargate that opens up the crown chakra eventually is closed it's it's closed by a black door a gate gated shut and locked and sealed with the symbol of mind control the occultists know exactly what they're doing ladies and gentlemen exactly what they're doing and it's targeted and it's directed toward people who are know-nothings Know Nothings and I'm not afraid to say openly like that these people know nothing of who owns them zero and like I've said on previous shows they have what I call negative knowledge the concept of negative knowledge not only are you a complete no nothing you're attached to all kinds of erroneous beliefs and ideas that you've been that you've been sold and that you've bought you've bought it wholesale the double square and image number 15 in the commando unit second commando unit of the Armed Forces with the blade another phallic symbol and they're the the double square the patch of US Army Special Forces shown an image number 16 is octagonal as are many military badges and patches image 17 is one of the darkest occult symbols that I know of have combined so many different dark occult symbols into one emblem the Military Medal of Valor which is given ostensibly to the people that that show and display bravery above and beyond the call of duty however this symbol has so many occult symbols I don't know where to begin the inverted pentagram inside of which is the goddess of care inside the inverted pentagram which we talked about these symbols the symbol of the goddess representing the Sacred Feminine named after the Dove Columbia it is Isis it is Mary it is Semiramis it is it is the Dove of the this the symbol of the Sacred Feminine of true care placed inside the inverted pentagram with again the four points upward representing earth air water and fire the material world and then the fifth element thrust downward the spiritual nature of men - up two points upward representing the horns of the goat and duality us versus them thinking dual consciousness divided consciousness raised above the three the Trinity thought emotion and action father mother and child but above on the ribbon we see the thirteen stars in the configuration of surprise the double square one on top of another inside of which it is inside the Octagon that forms the backing of the metal were the ribbon is at and the ribbon is folded into a pyramid with the capstone missing or the symbol of Satanism which is the trapezoid yes the inverted pentagram with the goat's head is one of these sigils were emblems of Satanism but it's actual archetypal form which if you read into the works of Satanism you will discover is the case their actual or more shape that represents the whole ideology of Satanism the Satanic ideology and way of being in the world is represented by the trapezoid so this symbol is Laden the Military Medal of Valor is Laden throughout with occult symbolism dark occult symbolism at that look at the cage fighting sport okay inside the Octagon the cage the prison and we put two prisoners inside the prison and let them go to work murdering each other one of the sports that damages the human brain far beyond any other you think you have a working a fully working healthy neocortex participating in stuff like this you clearly can't care too much about your brain believe me I don't want any physical altercation unless I need to defend my life and then it's going to be done in a way that is as precision as possible if you know what I mean but getting in a cage and fighting another slave in the world for some sick notion of glory is just out of control male ego and yeah I understand there's a strategy to it and everything I get all of that but it's really just trying to say I'm in control of you inside the symbol of control the Octagon we look at the last couple of symbols and then we'll go to the phones after we come back we'll be right back folks you're listening to what on earth is happening okay folks we're back on what on earth is happening this is the last segment I'm going to quickly go through the last four images on the radio show page images for today's show and what on earth is happening calm and then I'm going to take a couple of calls to take us out image number 19 security systems constantly use the symbol of the Octagon again representing lockdown or control and again it's connected with the dynamic of fear be fearful you need this you need our protection it says it all in the first image in the upper left hand corner I like that one the best it's a little image of a prisoner behind bars in the middle of the Octagon because that's what the symbol ultimately is all about keeping us contained and of course it's used in conjunction with the concept of security or safety over freedom image number 20 shows Salvador Dali the famous artist his rendering of the hypercube the crucifixion scene depicting Jesus crucified on the hypercube cross this is yet another way of looking at the hypercube it is actually a cube that is extracted into a higher dimensional space so it is actually eight cubes or what they call cells in mathematics arranged in a cross configuration and you see the checkerboard floor there below representing lower consciousness and you see the way that higher consciousness is crucified is through mind control Christ consciousness put to death through the hypercube and the Sacred Feminine waits for that Christ consciousness to be restored or awakened or resurrected image number 21 the totalitarian society depicted by the ink soaked regime in George Orwell's dystopian novel 1984 this from one of the movie depictions of 1984 Big Brother inside the Octagon total control and when it comes to total control we think of Fort Knox in image number 22 locked down they've stolen all of our gold and they have it under lock and key mind control think about it from a symbolic perspective the dark occultists have stolen all of our alchemical gold our real money our real Mon eye the one eye the all-seeing eye within us all the connection to higher self and that's the only way they can build their totalitarian police state with people who don't understand the connection to higher self because they are under mind control and all of their gold has been taken let's go to the phones Larry in Louisiana Larry in Louisiana you are on what on earth is happening are you there ray hello Larry yes can you hear me okay there you go I can hear you no okay good and your dealings with the occult did you get an offer to for whatever wish that you would have to sell your soul and did you get a image of an aberration or a spirit or an angel who came to you with a hooded cloak robe with a papyrus paper in one hand rolled up and a quill pen in the other and all you had to do was catch yourself with the quill pen and ink it would blood and sign that paper and handed back no I did not no on both accounts I came to the occult willingly as most of the people who come in from the outside do they're put through a rigorous psychological profiling to see if they are if they have an underlying psychopathic tendency not necessarily being genetic psychopaths but have a tendency toward psychopathy I believe that once you display of psychopathic tendencies they begin to take you up into higher levels for grooming to further their agenda and when you're of no longer any use to them they either just marginalize you or if you are in if you are in possession of some of their knowledge of their crimes sometimes then they may decide to eliminate you this not being the case in my instance they just said go and do whatever you want and we're going to ignore what you do because you think you're going like I said it was it was the attitude was you couldn't possibly hurt us by just divulging this to people who are dumber than a brick in all honesty they think they have this place on such total lockdown that they have nothing to worry about and you know maybe it's just my innate negativity but I don't really see any signs of their grip of control changing I mean I I want to I want to hear a cop call in and tell me he's quit his job and done something else and Right Livelihood or a soldier who is said I saw all of this and I quit now soldiers definitely there are signs of them some of them waking up and leaving the military because of things that they have seen I want to see a cop who is getting paid on a regular basis maybe had a pension coming and said I'm up and out of here because I know who ultimately owns this institution I haven't seen it as a matter of fact there are ten times more gung-ho than any military but no I've never I've never seen apparitions or conjured demons myself again my involvement was more in an ideological nature in the occult here we go caller from eureka california you're on what on earth is happening what do you have for us caller are you over yes yeah hi I'm mark love your show thanks for speaking the truth man thank you all right I also uh I think he glossed over a real important point and some I think yeah it elaborates on a little bit more maybe and I can't remember exactly how you put it the you know you look around and what's going on in this world and if it wasn't for the fact that we bought into all these lies we really would be living in the Garden of Eden here as I absolutely right yeah we further lie to be sold there has to be a buyer think about it for us we're the one ultimately doing this to ourselves because we refuse to desist in the actions that we are continuing to take there in blatant violation of natural law that's what natural laws here in place to do to create a paradise around us if we will simply follow its unbreakable boundaries really I mean we are bound by natural law whether we want to be or not that's the control system that is put in place for our evolutionary development not not to put us in a prison not to bind us so that we don't grow it's it's the thing that creates growth and spiritual development we're actually stunting our own evolution by refusing to go along with it and by buying all of these nonsensical lies that the dominator culture continuously puts out there great point caller here we go another caller your own live on what on earth is happening what do you have for us caller are you there yes your own life wasn't sure which very quickly I started listen to you after you after your first interview on nastic media yeah and I finally worked my way through all the former podcast in talking about like Sabbath's and things like that and how the dark occult uses ordinary celebration and converts that energy to their purpose is their possibility with intent of us taking that back or like say animate a is it most beneficial to just try and expose to people what the ultimate youth behind that is there's always power in numbers the universe is based the law of attraction is based on a quantum effect quantum means an amount so the more people that come together to any for any purpose the stronger the intent that goes out to create that manifestation is going to be and the occultists know this which is why they gather in numbers so absolutely coming together in larger and larger numbers is definitely one of the ways that we can start to reverse the flow of that energy and pretend it in the positive direction so that's a great point let's see if we can get one more call in here we go caller you're live on what on earth is happening you can take us out what do you have checking in from checking in from Cincinnati Ohio it is Bob from Cincinnati Marc how are you great to hear from you my friend oh it's always a pleasure and I'm so happy to talk to you quickly Marc I know we're running out of time the chemtrails are still going on they're flying much higher than they used to the planes are still out there I'm gonna check in from the Midwest that they are still flying number two octagon the President of the United States is sworn in on a giant octagon and a cold January morning on the 20th he stands on an octagon while his overseers and a cultists agree they're gleeful that the president is also mind controlled number two Kubrick as we discussed before he used make pointed star an Eyes Wide Shut to denote the mind control of the monarch play prism all the way up time for Bob we'll see you next week on what on earth is happening - bye folks

What On Earth Is Happening Show #065

Topics: *Mind Control Methodologies, Chaos Sorcery, Hegelian Dialectic, Problem-Reaction-Solution, 9/11 Inside Job*

freedom man that's what it's all about [Music] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host mark pasta dough freedom for the people humanity and all mankind liberate your soul and mind it's waiting for you all to find that's what this show is all about the liberation of your soul and mind welcome one and all you are listening to what on earth is happening right here on the Oracle broadcasting radio network I'm your host mark passio today is Sunday June 19 2011 my website what on earth is happening calm of course the network's website Oracle broadcasting calm I've got a great show lined up for you here today we are going to be introducing the 14th and final methodology of mind control I started talking about the techniques the methodologies of mind control about a year ago on this show and we went through extensive breakdowns of 13 different mind control techniques today we're going to begin the wrap-up of the 14th and final methodology which I cover in general and start to go into the concept of chaos sorcery as I refer to it this other researchers have referred to as the Hegelian dialectic or simply problem reaction solution as coined by David Icke and others we're going to be talking specifically about the 911 event and in a few moments we'll be joined by the Philadelphia 911 truth activist Darrell Rowland's who is going to discuss with me and with you as well because we'll also be taking calls some of the inside job aspects of the 911 event and next week I will be going into the physics a breakdown of the physics of 911 next week right here on the air after that I'll be delving into the dark occult symbolic aspects of this horrid event which was indeed a human sacrifice ritual more of which we'll be talking about later I do have one event announcement before we go to the break coming up right here this summer in Philadelphia the Tesla Science Foundation presents the third annual Nikola Tesla energy independence celebrations for 2011 July 7th through 10th here's the four events that it's going to be comprised of the the Tesla science conference all four days July 7th through 10th 8:30 a.m. to 5 p.m. at - Liberty Place that's at 50 South 16th Street here in Philadelphia registration only $100 for all four days 50% discount for students with a valid student ID the Tesla Science Foundation social featuring the divine hand ensemble Orchestra July 9th at the ethical Society of Philadelphia 5:30 p.m. 1906 south Rittenhouse Square $20 in advance 24 dollars at the door we'll continue with the breakdown of the events as part of the Nikola Tesla energy independence celebration this year on the other side of the break be right back folks [Music] [Music] we're back folks you're listening - what on earth is happening I'm your host mark passio my website what on earth is happening calm let me just finish reading that last event announcement the Nikola Tesla energy independence celebrations for 2011 I read the first two parts of the event the second two parts are going to consist of a Tesla birthday celebration featuring a Tesla coil exhibition on the night of July 9th 11 p.m. to 1:00 a.m. Tesla was born on midnight between July 9th and 10th 1856 that's going to be taking place the Tesla birthday celebration at Independence Visitor Center on Independence Mall fifth and Market Streets here in Philadelphia and that is free to attend finally the Tesla Fest featuring exhibitions and open discussions will be taking place July 9th and 10th on the 9th there all day from 10 a.m. to 11 p.m. and on the 10th from 11 a.m. to 3 p.m. also at the independence Visitor Center at 5th and Market Streets and that event is also free to attend so if you're in the area of Philadelphia and you want to come on out learn more about Nikola Tesla what this great man tried to do what he did in his life and what he tried to do for us but didn't wasn't quite successful at it which is why we have to make his dream for a free energy paradigm come to fruition by getting involved and spreading the the knowledge and information and the covert science the the deep blacklisted and suppressed science that Tesla was all about we have to bring that out to people who really don't know otherwise and think that this stuff isn't possible or that you know it just wasn't practical this stuff has been being suppressed for over a hundred years and there's no reason for us to be stuck in the energy paradigm that we are for even a moment longer so for more information about the Nikola Tesla energy independence celebrations coming up this July in Philadelphia check out their website at Tesla Science Foundation org a great group of active that I'm honored to be working with here in Philadelphia so our topic for today before we get into that let's give the calling numbers calling number for the show eight six six eight four one one zero six five once again the call in number eight six six eight four one one zero six five calling at any time we want to hear from you on this topic I know that most of the listeners who listen to this radio station have an inkling about what 9/11 was about they know that it wasn't didn't go according to the official story as we're told by the so-called mainstream media which are just completely compliant complicit in these crimes and not many people really know about the occult aspects of 9/11 that's something I'll be getting into on a future show however today we're going to focus strictly on the inside job aspects of this sacrifice ritual let's call it what it really was and I this is something I did not do in my presentations so this is a divergence from what I normally do I'm gonna talk about this for one show and then next week as I said I'll be getting into an actual breakdown of the physics and this is going to be about as left-brained as it will ever get on what on earth is happening so for the super scientifically oriented left-brained individuals among us you might want to tune in next week because my background is in mechanical engineering and I will be taking people through all of the physics equations necessary to understand that this event had more going on to it than met the eye okay I'll be actually going into the physics equations breaking them down solving them so that people can understand that the laws of physics could not possibly have been suspended three times in one day the laws of nature do not work like that ladies and gentlemen and if you have even a slightly capable mind you can understand very simple laws of dynamics it's a very simple arithmetic that needs to be done to solve some of these equations to understand what really did not happen on that day and what did not happen was a collapse of three buildings something much farther beyond that went down okay so next week the physics breakdown of the 911 event and like I said that's about as left-brained as it will ever get on this show and some may even find that boring but we're going to do it just to document it okay so today we're going to be talking with the Philadelphia based 9/11 truth activist mr. Darrell Rowland's a good friend of mine he's been on the show before a little over a year ago when we talked about cognitive dissonance which is a huge aspect of the 9/11 event and why more people will not willingly look into the darkness that this event represents because of the responsibility that that carries once you understand that this event is far more than what the mainstream media is telling us so welcome to the show Darrell Rowland's everybody Darrell great to be here always a pleasure to speak with you and I'll tell you what in this area I think there's nobody else that knows more about the inside job aspects of 9/11 than you you have put together a massive massive research database on just about every aspect of this horrible event that of anyone that I've ever seen why don't you tell people to begin with how you got into looking into 9/11 as an inside job and a little bit about the the kind of information that you have amassed over the years oh sure definitely I always had questions when it happened it just didn't really make sense to me when it was going on and so I just kept looking about you know with some of the what do you call the the left you know so called left-wing sites like you know at the time because I was still under the left-right paradigm at the time so I was reading things like all Trinette and they weren't you know telling the story very well at all they weren't really getting into you know the things that I had questions on and then one day it was a no to is knocked over of o2 and I have this on my channel my youtube channel youtube.com slash Winston Smith 911 there's a fantastic little break in the matrix which allowed me to see and it was Connie Chung interviewing a guy named Amiri Baraka who was the poet laureate of New Jersey and he had written a poem about Israeli involvement in 9/11 Israeli spies being involved in the operation and Connie Chung was you know basically doing her best to try to paint him as an anti-semite and she you know she grilled him but he showed very very you know clearly that even Israeli media at the time in Haaretz had documented that there was Israeli spies that had been in the country and had the capability of documenting phone calls through kaalia the wiretapping and this was even exposed on Fox News a a year ago are you earlier in December of 2001 and it all clicked to me and and Darrell I just like to mention the great documentary film fabled enemies covers a lot of the aspects of that event I'll be providing a link for that in the podcast I think that's something that people should definitely check out because it clearly establishes the Intelligence connections for the 9/11 event which people absolutely must look into if they're going to understand the huge massive SIOP took place on that day so we're coming up for another break on the other side we'll be continuing to talk to Philadelphia 9/11 truth activist Darryl Owens and we'll be getting in much deeper into the inside job aspects of the 9/11 event and we come back here on what on earth is happening don't go anywhere folks [Music] [Music] welcome back folks I'm mark passio my website what on earth is happening calm today we're talking with Daryl Roland's Philadelphia 9/11 truth activist about the inside job aspects of the 9/11 event Daryl won't you tell everybody about the connections of 9/11 with the think tank organization known as P knack that's P NAC which stands for the project for the new

American Century yes the project for a new American Century was a like you said a think tank of elite Zionists and neo-cons who were involved in planning of foreign policy and war you know scenarios and it's amazing when you look at these the list of people there's there was a letter actually that they wrote in 1998 to Bill Clinton asking him to invade Iraq and this letter was signed by Rumsfeld and Pearl and Wolfowitz and Cheney and doves a crime and dumb sack I'm he's a real real interesting character he's a rabbi Zionist rabbi Dov Zakheim he was also a high executive for a company called Booz Allen Hamilton which was a client for blessed relief which was the charity said to be a front for Osama bin Laden so you had these massive connections with the the 9/11 event and dogs a crimes company systems planning Corp was their chief product was remote control systems for aircraft and missiles so and and Sackheim was also on c-span with Rumsfeld the day before 9/11 and they mentioned that oh two point six trillion dollars was missing unaccounted for the day before September September 10th 9:00 to 2001 two point six trillion dollars of the American taxpayers money missing and that that whole story went away the next day we find out about that on September 10th publicly and then September 11th as they say the rest was history I want to point people in the direction of a document that was written by the project for the new American Century many listeners will be familiar with this some may not it's called rebuilding America's defenses strategy forces and resources for a new century by the project for the new American Century think-tank this was written in September of 2000 and I want to read a few excerpts from it this will take a little bit but I think it's well worth doing on the air this is from section 5 called creating tomorrow's dominant force tomorrow's dominant force and here's what the project for the new American Century has to say about maintaining America's dominance of the world quote to preserve American military preeminence in the coming decades the Department of Defense must move more aggressively to experiment with new technologies and operational concepts and seek to exploit the emerging revolution in military affairs information technologies in particular are becoming more prevalent and significant components of modern military systems these information technologies are having the same kind of transforming effects on military affairs as they are having in the larger world the effects of this military transformation will have profound implications for how wars are fought what kind of weapons will dominate the battlefield and inevitably which nations enjoy military preeminence the United States enjoys every prospect of leading this transformation indeed it was the improvements in capabilities acquired during the American defense buildup of the 1980s that hinted at and then confirmed during Operation Desert Storm that a revolution in military affairs was at hand at the same time the process of military transformation will present opportune for America's adversaries to develop new capabilities that in turn will create new challenges for US military preeminence moreover the Pentagon constrained by limited budgets and pressing current missions has seen funding for experimentation and transformation crowded out in recent years spending on military research and development has been reduced dramatically over the past decade indeed during the mid-1980s when the Defense Department was in the midst of the Reagan buildup which was primarily an effort to expand existing forces and field traditional weapon systems research spending represented 20% of total pentagon budgets by contrast today's research and development accounts total only 8% of defense spending even this reduced total is primarily for upgrades of current weapons without increased spending on basic research and development the United States will be unable to exploit the RMA and preserve its technological edge on future battlefields any serious effort at transformation must occur within the larger framework of US national security strategy military missions and defense budgets the United States cannot simply declare a strategic pause while experimenting with new technologies and operational concepts nor can it choose to pursue a transformation strategy that would d couple American and allied interests a transformation strategy that solely pursued capabilities for projecting force from the United States for example and sacrificed forward basing forward basing and presence would be at odds with larger American policy goals and would trouble American allies further the process of transformation even if it brings revolutionary change is likely to be a long one absent some catastrophic and catalyzing event like a new Pearl Harbor you get that everyone domestic politics an industrial policy will shape the pace and content of transformation as much as the requirements of current missions this report advocates a two-stage process of change transition and transformation over the coming decades in general to maintain American military preeminence that is consistent with the requirements of a strategy of American global leadership tomorrow's US Armed Forces must meet three new missions one global missile defenses to control of space and cyber space and three pursuing a two-stage strategy of transforming conventional forces this process will have two stages transition featuring a mix of current and new systems and to true transformation featuring new systems organizations and operational concepts those are excerpts from chapter 5 or section 5 of the document entitled rebuilding America's defenses by the project for the new American Century and you can hear right in the document essentially telling the Defense Department that unless there is a new Pearl Harbor we will not be able to garner the funds that we need to create this transformation in American armed forces so that we can maintain military preeminence throughout the world in other words global Empire yes / they were calling basically for a global Pax Americana of world hegemony and so thus Zak I'm dove Zak I'm who was a key member of this organization along with William Kristol the SATCOM had to demonstrate an intellectual Israeli and twisted moral motive for that catalyzing event of 9/11 now he had a tremendous opportunity to affect this change this revolutionary change that he talked about he was comptroller of the Pentagon's budget he had access as an undersecretary directly with Rumsfeld Douglas Feith and the Joint Chiefs and the Israeli spies the the FBI arrested in but Douglas lights office as well as financial power to obfuscate redirect and/or cover-up previous diversions of funds fun secret operations and even bribe leaders of other countries Darryl that's an excellent analysis and a lot of this begins to answer people's questions of why with the United States do such a thing behind the scenes why would four elements covert black operations within the military intelligence agencies carry out such an event and that back it is is an Oracle broadcast [Music] welcome back everyone - what on earth is happening I'm your host mark passio my website what on earth is happening com we are discussing 911 as an inside job as a covert black op of intelligence agencies for the purpose of maintaining worldwide military hegemony of the

United States and as an excuse to increasingly usurp the freedom of American citizens here at home these are the answers to the questions why people say well why would they have done such a horrid thing why would they murder their own people well these are part of the reasons when you go even deeper into it and you start to understand that Darko cultists are at the highest levels of these intelligence networks and ultimately what they're doing is saying to other elites that may not want to play ball in the regional areas that they these other lower-level elites control this is ultimately a sacrifice ritual of one's own people for the purpose of saying to other puppets look what we're willing to do to our own now imagine what we would be willing to do to you if you don't play ball with us that's ultimately what this is all about ladies and gentlemen and I'll be getting into the deep dark occult aspects and the symbolic aspects of the 9/11 event which when you understand in conjunction with some of the traditions that we have already broke down and discussed on this show you understand there's no way that stuff is coincidental and it is very intricately planned out so that's coming up in the future and like I said next week get ready for it an actual breakdown a scientific analysis a breakdown of the physics of the 9/11 event from a perspective that the layman can understand simple physics equations solved to show people unequivocally that the laws of physics absolutely were not suspended three times in one day on 911 so let's get back to Daryl Roland's Daryl I want to talk about the stand down on the day of 9/11 of NORAD the North American Air Defense Command and I want to talk about how the covert black ops aspects of the military intelligence projects how they basically needed to run counterintelligence they needed to run wargames exercises on these days to confuse the actual good people that are involved in really protecting America's airspace okay and how these wargames serve as a distraction and a confusion mechanism to prevent them from those people from really effectively doing their jobs so can you speak to the stand down of NORAD which certainly 19 is a fundamental Islamist a radical Islam members with box cutters could not have accomplished the stand down of NORAD okay and can you speak to the wargames exercises that were being run simultaneously with the real world events that were happening on on the day of 9/11 well sure whenever a commercial jet deviates from its approved flight path it creates a potentially deadly hazard it could collide with another jet so the military is supposed to respond very quickly and they have always done they have there's some 67 incidents of them responding very quickly to to an aircraft that had you know that had trouble and you know Payne Stewart the golfer his plane was immediately intercepted by fighter jets and let you know let down but on 9/11 you had wargames deliberately made to to confuse the military the pilots they they even reported that they questions they were like is this real or fake you know or drill because there was there was a war game called Operation Northern Guardian operation northern vigilance all time for that very day and these were all being run by Dick Cheney and so in the presidential Operations Command emergency operation command you had Norman Etta the the NT what was he the the NTSB yeah secretary yeah he he witnessed Cheney you know coming in and at the at the at the special bunker and there was a another military man coming in and giving Cheney briefings right before the supposed crash of the plane into the Pentagon yes they were in the what is known as the PEO see the presidential Emergency

Operations Center beneath the the Pentagon yeah and he said I was made aware of it during the time that the airplane coming into the Pentagon there was a young man who had come in and said to the vice president to plane his 50 miles out and came back and said the plane is 30 miles out and then he came back again and said the plane is ten miles out and he said do the orders still stand and the Vice President turns around and says of course the order stall Stan have you heard anything to the contrary so essentially Minetta who was in this special bunker for when events like this happen he was there with Cheney who was basically running the the operation okay and he was asking an aide to Cheney well whether or he heard overheard an aide to Cheney coming into the room and saying that the plane was 50 miles out then 30 then 10 and asking Cheney if the orders still stood now people have talked all about the timeline about this and you know that the White House was being evacuated or not being evacuated at the time that Minetta gave this testimony okay or heard these overheard these comments was censored from the come but essentially this was going on before the strike of the Pentagon which was allegedly flight 77 okay allegedly and and what Minetta was showing was that they had foreknowledge of the flight that was coming into the pentagram before it actually hit and they did nothing to stop it just like NORAD did nothing to stop these planes on 9/11 from reaching their targets because they were confused by the intelligence operations the drills that were being run these war games as Darryl said like vigilant Guardian vigilant warrior etc that essentially were put in place to confuse the people in those positions okay so that they would not understand whether the events that they were being told about happening in real time were real-world events or were exercise events this is how you basically run a covert operation when you need to pull your people who ordinarily would have this situation in hand off of the event when you need them to basically be looking in the other direction or be confused and the people that need to be looked into the people that you really need to go to to find out who is at the highest level of the orchestration of this event are the people that put those wargames exercises into place on those days that's the key to understanding this whoever orchestrated those events on those days knew what was really going to be happening on those days and that's why they scheduled those drills and it's so unconscionable how they get away with saying oh we were incompetent oh we've we dropped the ball oh we failed no this was absolutely planned 45 minutes where no fighter jets came to in to intercept the hijacked jets and you know of course then if you go into the the actual of logistics of this hijacking all right well you'll find that there's no what you were told about hijacking on 911 it comes from these these so-called cellphone calls from the passengers on the plane but then you find that the cellphone calls would never would would never work and altitudes that high and in fact it has been proved conclusively that the at that time the technology at the time in 2001 you couldn't make a cell phone call from above 5000 feet it wouldn't go through you'd be hitting too many cell towers and the signal would be lost there's also some evidence that there may have been some voice when working a minute ago technology used because of the types of phrases being said to people's parents or mothers that would they would never have spoken of in that way using their first and last name when talking to their mother and asking questions like you believe me right yes we'll post some documents or to the podcast about that that people should look into Darryl I want to talk about the Opera the operation known as able danger which was basically an investigation into bin Laden that was a stonewalled is that correct yes there was many people who were working with the FBI who had heard of supposed threats from you know bin Laden etc of course this was fake and well you have a guy named John O'Neill who tried to investigate bin Laden in Yemen prior to 9/11 and he was prohibited from doing so by his boss we're going to talk about why that was on the other side of this break you're listening to what on earth is happening we're getting into the 911 inside job aspects today we'll be right back after these messages folks stay with us [Music] 9:11 an inside job most definitely and most definitely much much more than that including a human sacrifice ritual among other things people think human sacrifice stopped hundreds of years ago it's still going on ladies and gentlemen except in the modern day they don't take people up to the top of pyramids and cut their hearts out with obsidian blades they fly planes into office buildings but we're here with Daryl Roland's Philadelphia 9/11 truth activist on the other side of the break we were talking about operation able danger and uh you're gonna wrap up that and then you're going to transition it into some other aspects oh great yes continue I will read from briefly from a times-herald Norristown newspaper in Norristown Pennsylvania from August 17th of 2005 this is absolute mainstream media here and it says a pentagon review of a defunct defense operation said to have linked a September 11th hijacker to a terrorist cell in New York City could shed light on why Defense Department officials shut down the secret program able danger more than a year before there's not the 9/11 attacks on defense intelligence analyst Lieutenant Colonel Anthony Shaffer who worked on the high-tech operation said Tuesday that the battle lines are being drawn in the Pentagon as the old program comes under renewed security scrutiny in I'm sorry right now he says the Department of Defense has a great deal of interest in this matter and some elements in Defense Department are attempting to go dirty in June Schaffer revealed to The Times Herald that Pentagon officials rejected a plan to have the FBI and special ops command collaborate to track Mohamed Atta and the other suspected 9/11 terrorists at the effect at the time the Defense Intelligence Agency analysts asked not to be identified even after the 9/11 Commission's recommended changes in intelligence committee practices Schaffer said little has changed each he charges that some defense officials responsible for counterterrorism before 9/11 have returned to their old intelligence gathering habits and don't want to revisit past feelings that an April danger probe might highlight and guys that had a role in this intelligence quote-unquote failure got promoted they have not changed the way they do business the object was to identify and target these supposed al-qaeda al CI ADA and other terrorists they use data mining and parallel processing and other cutting-edge computer technology from 1999 through early 2001 and then the program was improperly shut down right as they were gathering all their important data so not only are were they setting up bin Laden to take the fall as their Patsy for this event but then they actually blocked the FBI investigation that was going to take place in to bin Laden's role in the event yeah most likely because it would have found out that there was no connection with him in the event yeah John O'Neil FBI agent who was trying to investigate bin Laden in Yemen was prohibited by his boss

Barbara Bodine I think her name was she prohibited him from even going into there and investigating he was so frustrated and upset and angry that he quit his job and they offered him a new job as chief of security in the World Trade Center and he died in that 9/11 attack that day let's let's mention before I know you have some other aspects you want to go into but let's briefly mention bin Laden himself his background as one of the Mujahideen fighters that were trained by the CIA people don't understand a lot of people who look into bin Laden don't understand that this is a creation of our military intelligence because the the Soviet Union was invading Afghanistan in the 1970s we went in gave the Afghan Eze weapons trained them and radicalize them to a radical faction of Islam and this is actually the the group called al Qaeda is an actual name that the CIA gave to these radicalized Mujahideen Hadean freedom so-called freedom fighters that were trained to fight the Soviet Union because they were they were our enemies at the time and we wanted to give all the assistance to the Afghan Eze that we could in fact at the time bin Laden had a code name Tim Osman for his CIA asset role he you can find a 1979 photograph of bin Laden shaking hands with mr. big no Brzezinski one of the top neo-cons in the administration and he there he is you know shaking hands with him and he's carrying an ak-47 and telling him you know good job you know for carrying out our mission here in Pakistan in Afghanistan Darryl can you speak to some of the illicit funding that went on behind the scenes by some of the members of the Pakistani ISI specifically a general named Mahmoud Ahmed who allegedly wired some of the money to carry out aspects of the operation to Mohammad Atta who was allegedly the mastermind of the actual you know hijacking our aspects of the event yeah I I recommend you you know people read into Daniel hop singers books he has a tremendous amount of information on the the fraud of of Mohammed Atta's supposed leadership abilities of this operation and I don't know what did you you wanted to get into just yet do you know anything about this Pakistani general who wired money to auto before the event well he worked for the ISI in the ISI worked closely with the CIA so there you gun and you have another connection I think what was her name benazir bhutto ayah saya is Pakistan's equivalent of our CIA yeah yeah an intelligence agency that works closely with no not another intelligence agency that had deep connections with this event is the Israeli Mossad yes and the Mossad allegedly sent some people into the United States to quote document the event mhm yeah there was a white van in Liberty State Park in Weehawken that had set up cameras taking they were there was four Israelis in the van celebrating jumping up and down and taping the World Trade Center on fire after it hit and they you know they were seen by a keen observer who then called the FBI and the FBI came and arrested them and found forty seven hundred dollars in cash in a sock in their van and also the the bomb sniffing dogs found traces of explosives in their van and they said we are not Arabs we are Israelis you know and and they they were deported back to Israel without being charged with a crime and the guy who deported them back to Israel was a guy named Michael Chertoff who became the director of homeland security one hand washed the other interesting so let's look at some of the physical aspects of the event okay people perceive this as because this is what they were told immediately after the event they pin it on somebody immediately who you know looks scary and who they are distrustful of because they know little about their culture you know is blame it on radical Islamic fundamentalists and some of the physical aspects of the event that simply don't even make any sense whatsoever first we can talk about that one buildings don't collapse symmetrically into their own footprint which is the greatest path path of resistance if it's going to clap collapse it's going to collapse around a weakened part of the structure and probably topple over but what you saw on 9/11 was all the support columns failing all at once and the building coming down straight down into its own footprint you know and and this was really visible with building seven really exploding wallets doing it really something nationally yeah crumbling to dust as it's coming straight down into the path of greatest resistance which physical structures simply do not do according to the laws of physics what about the temperatures at which jet fuel burns and steel weakens can we uh can we address some of those aspects oh definitely uh the the jet fuel is kerosene kerosene can't get any hotter than 1400 F and that's a really really conservative estimate of temperature of a cold burn mostly closing in under in the real world jet fuel is a approximately I believe about 90 percent kerosene and kerosene in an air burn burns just over 600 degrees Fahrenheit if you add that added that to something that could really take the temperature burn higher in the real world the absolute most you're going to achieve is around 800 degrees Fahrenheit and the the fires burning at the World Trade Center definitely did not get any hotter than around 8 to 900 degrees and that's like I said that's a high conservative estimate and we know that melting temperature of steel is well over 2,750 F and there's no way a jet fuel fire can make a temperature that high right that the melting point of Steel is 2,750 degrees Fahrenheit but there is a temp now people will debate and say well steel weakens it loses half of its strength and it begins to deform below that but the temperature at which steel deforms is 1,100 degrees Fahrenheit and that's a again high-end concern a low-end conservative estimate so there is no way these fires could've even possibly reach that number so that's just to touch on some of the physical aspects of 911 from a material science point of view we'll get more into this on the other side of this break you're listening to what on earth is happening here on the Oracle broadcasting radio network don't [Music] [Music] [Music] fear is the force that closes down human consciousness so that it cannot understand what is being done around it and that's what we saw on 9/11 oh one so we're talking with Daryl Roland's 9/11 truth activists we're going to be going to the phones soon in this hour okay I'm gonna give the phone number to call in once again eight six six eight four one one zero six five once again the calling number is eight six six eight four one one zero six five halt into what on earth is happening and give us your thoughts Daryl let's uh we were talking about the melting point of Steel we were talking about how the the the building simply could not have fallen in the way that we see on that day I'm gonna be going into that in depth next week but let's look at an even more ridiculous aspect of some of the physical details that we were told how could the force of these massive planes that we say that we're saying they were incinerated we're told okay as they went into these buildings yet we find the Islamic red bandanas that the hijackers tied to their head prior to committing this act of suicide in their jihad and we find passports completely intact that survived the raging fires that melted steel beams and columns in the buildings some of the thickest steel beams ever constructed in the

United States I mean child you'd have to be a child to believe a tale like this absolutely they are not above planting false evidence at the crime scene to you know make it really ridiculous cover-up and there you have in flight 93 there's like nothing there is it there's a hole in the ground that's all there's there but but there's they claim they find a red bandana planes incinerate when they hit the ground Darrell didn't you know that you know the contact with the ground makes all of the steel and the other construction materials the planes are made out of just vanish into nothingness and then you know and the intact passport found on the street for you know Muhammad odd sour Marwan al-shehhi and is on the ground what also laminated plastic will survive but but steel and concrete would not we're gonna get into a a lesser-known aspect of 911 at least by the general public our listening audience will probably be aware of building seven but before we do that you had a connection that you wanted to bring up regarding yes Omaha Omaha connection go right ahead there is an Omaha Nebraska connection with 911 so George Bush okay he first when when 911 happens he's in Florida at a school now this in itself is egregious you know violation of you know logic where Bush is should have been whisked out of there for his safety he was allowed to stay there after they knew that this has been going on his location was publicly known how was he to assume that he would be safe unless he knew all of the heights it's quite symbolic as well from a PSYOP perspective he's there with the innocent school children on that day and he's also reading the story my pet goat that hasn't pulled over Tony's we'd get back into that and I want to hear more about this Omaha connection that you have researched in depth on the other side of this break don't go anywhere folks you're listening to what on earth is happening [Music] welcome back folks you're listening - what on earth is happening I'm mark passio my website what on earth is happening calm we're talking about 9/11 as an inside job an example of chaos sorcery the 14th and final methodology of mind control and probably the heaviest gun that the mind controllers use to go to work on people through an injection of fear I'm here in studio with 9/11 truth activists from Philadelphia Darrell Rowland's and we're talking about a lot of different aspects of 9/11 we could do 20 shows on this topic there is so much data and details to be looked into however I'm not gonna spend too much time on this aspect of it because as everyone is well aware my forte is in looking at the occult aspects behind the scenes and the symbolism so I'm gonna do a lot of focus on that next week for the left-brained among us I will be presenting the physics equations necessary to understand that this event as we have told that it happened as we have been told that it happened is physically impossible against the laws of nature so for scientists architects engineers anybody who's extremely left brained I will be presenting for the layman even so that the layman can understand it with plenty of slides that go along with it the physics equations of dynamics that are necessary to solve to know that the official story is complete bunk that's coming up next week so Daryl let's go back to some elements of let's let's look at this Omaha connection that you have researched and then let's talk about building seven and then we're gonna go to the phones cool yeah I know it's folks so it's it's like all over the place because there is just so many aspects of this of this SIOP this inside job that to cover it it's but I'm gonna try to really speak I'm gonna try to really summarize up this this Omaha connection all right so George he when once he left the Booker

Elementary School in Florida he went to Omaha he flew to Omaha to meet with Warren Buffett the second richest man on earth at a charity event that he scheduled for that day at Offutt Air Force Base now the odd thing about this is that an Tatlock was the CEO of fiduciary trust and she was flown to this meeting in advance also and this is a quote from Forbes magazine from October 15th of 2001 and quote and Tatlock found out about the collision of a plane with the North Tower of the World Trade Center while enroute to the US Strategic Command headquarters in Omaha the 62 year old chief executive of fiduciary trust company International was one of a small group of business leaders at a charity event hosted by Warren Buffett military officers boarded the bus she was on and escorted her to an officer's lounge and a television just in time to see the second plane hit the South Tower between the 87th and 93rd floors right where 650 of her employees worked fiduciary trusts which today manages 44 billion dollars of securities for pension plans endowments and wealthy individuals unquote so she was on the board also of Merck Sharp and dome and Howard Hughes Medical Center and also on the board of directors of Franklin Franklin resources based in San Mateo owned the company fiduciary trust which had offices where flight 175 hit the South Tower so again you have Thomas Kane involved in this also he was the one of the chief 9/11 commissioners he has long served as director of Fredette fiduciary trust and Franklin resources and Franklin acquired fiduciary trust five months before the World Trade Center was destroyed and they profited handsomely from the tragedy only five months before the attacks mutual fund firm Franklin bought fiduciary a seventy-year-old asset manager catering to high net worth clients and institutional investors for 825 million dollars so right there I mean you have George Bush showing up at this meeting where an Tatlock is is going oh my goodness 650 of my employees are dead and here's Warren Buffett and here's George Bush and it's at a military base at a secret location you know away from the public and I would love to know what went on in that meeting wouldn't you folks now mark what did you what else did you want to talk about well I want to get into the whole building 7 scenario because a lot of people still don't aren't aware that a third building came down into its own footprint in New York City on the day of 9/11 at 5:20 in the afternoon it was struck by no plane it had very little damage that was done to it by debris from the collapsing towers although people debate that and say that's what caused this perfectly symmetrical collapse which I will link footage to in the podcast for this for this show and I want to look at the owner of the World Trade Center in his comments on wives over 7 was so was allegedly pulled his words not mine a demolition term I want to look at you know how he cleaned up in insurance claims as part of the the the fallout from the 9/11 event and let's look at how the the BBC announced that the building had come down before it even came down they said that it already happened so tell people about building 7 what was housed in that building how it came down and some of the aspects of that that people need to be made aware of sorry in building seven was housed SEC records of the Enron scandal which were conveniently destroyed that day so what is the SEC the Securities and Exchange Commission okay and you you also had offices of the CIA in that building lots of you know damning information was destroyed during that operation in the control center which was housed in the Midwest on the 23rd floor was Rudy Giuliani's special counterterrorism floor it was hermetically sealed another occult number folks the number 23 which we'll get into will get into all of the numerology of the event on the future of future show where we talk about the occult aspects but continue about building seven yeah and so at 5:15 or 5:20 p.m. that day at nine eleven this building suddenly collapsed a straight down in 6.5 seconds into its own footprint and you even see the penthouse of the building sink down into the top of the building as it's coming down and you see the floors staying in the same the same proportion the same distance from each other as it comes down you get the idea that flight 93 was supposed to hit building seven but it crashed or was shot down it looks like it was shot down anyway they had to go along they had to go forward with it because they had so much evidence they had to destroy so anyway they they had a script you know and so one of those script readers was this reporter for BBC world her name was Jane Standley and there you see at around 450 p.m. you know about half an hour before the collapse of building 7 she's on BBC world announcing that the building 7 had collapsed and it's behind her in the shot and it's a live shot it's not a pre-recorded or it's not a blue-screen or green-screen shot it's a live shot the building is there behind her in the background still standing clearly in the shot and she's announcing in advance that it had already collapsed the words that they actually used she wasn't the only one that did it there was another CNN reporter that did the same thing I'll be posting some of these videos to the website with this podcast as always all shows of what on earth is happening are archived on the podcast page of what on earth is happening calm down will stay with us folks stay with us we'll be right back after these messages you're listening - what on earth is happening on Oracle Broadcasting Network [Music] [Music] 9:11 an inside job an example of a human sacrifice ritual in the modern day an act of chaos sorcery the defining occult event of our times and so much more we were talking about the advanced knowledge that so many people had of these events on this day how they were even reading scripts with the buildings that they're talking about had already collapsed still standing in the background of the shot not even bothering to take a look at the skyline behind them and realize that the building that they're telling people had already come down was still standing unbelievable and people can still believe that this is just a coincidence speaking of knowledge in advance the Patriot Act was written well in advance of 9/11 this is a thousand pages of intensive legislation that was already on board already being tried to be put through right on bush's death prior to 9/11 that's right trying to put it through through the Congress than through the House and Senate and it was was not being accepted people did not want to vote for this but after 9/11 they all voted for it with the exception of one individual on a single day without reven reading the bill okay so advanced knowledge how about advanced planning look at how the wars in Afghanistan and Iraq were already on board well in advance of 9/11 Daughtery want to speak to that sure actually on September 4th of 2002 there was an article right in CBS news mainstream news again but you know of course the truth is only told once in mainstream media then it's buried ins covered but here it is CBS News has learned this is September 4th of O 2 CBS News has learned that barely 5 hours after American Airlines flight 77 plows into the Pentagon defense secretary Donald Rumsfeld was telling his aides to come up with plans for striking Iraq even though there was no evidence linking saddam hussein to the attacks that's according to notes taken by aides who were with rumsfeld in the National Military Command Center on 911 notes that show exactly where the road toward war with Iraq began reports CBS News national security correspondent David Martin at 9:53 a.m. just 15 minutes after the plane and hit the Pentagon of course was you uh and and while Rumsfeld was still outside helping with the injured the National Security Agency which monitors communications worldwide intercepted a phone call from one of us AMA bin Laden's operatives in Afghanistan to a phone number in the former Soviet republic of Georgia the caller said he had heard good news and that another target was still to come an indication he knew another airliner one that eventually crashed in Pennsylvania was at the very moment zeroing in on Washington this says now it says it was 12:05 p.m. when the director of Central Intelligence told Rumsfeld about the intercepted conversation Rumsfeld felt it was vague that it might not mean something and that it was no good basis for hanging hat in other words the evidence was not clear-cut enough to justify military action to against bin Laden but later that afternoon the CIA reported the passenger manifest for the Hydra hijacked airliners showed three of the hijackers were suspected al-qaeda operatives and with the intelligence all pointing toward bin Laden Rumsfeld ordered the military to begin working on strike plans and at 2:40 p.m. the notes quote Rumsfeld as saying he wanted to he wanted the best info fast judge weather good enough to hit SH the meaning Saddam Hussein at the same time not only you BL which was the initials used to identify who sama bin Laden now of one year later there is very little evidence Iraq was involved in September 11th attacks it was none there was none he had it all planned out just like in the pea neck where they they said they wanted to have a massive change in a very new Pearl Harbor and they went on this campaign in cahoots with the mainstream media the Bush administration to remember this whole build-up to the Iraq invasion that The Smoking Gun would come in the form of a mushroom cloud that he had of mass destruction and hinting always hinting that it had to do with the form of Islamic terrorism that had to do with the 9/11 event without actually coming out in the open and saying it but then after the invasion openly admitting that Iraq had nothing to do with the events of 9/11 and we have George Bush's quote where he said let us never tolerate outrageous conspiracy theories concerning the attacks of September the 11th malicious lies they attempt to shift the blame away from the terrorists themselves away from the guilty pretty good likeness there Daryl so folks I know we've covered so much in such a short amount of time and again this is for a reason the research is all out there for you to do we're going to be talking about a couple other aspects of the event some of the types of explosives that may have been used to bring these buildings down nano-thermite residue found in the World Trade Center dust some connections to potential exotic weaponry that may have been used at perverted applications of Tesla technology that may have been employed on as part of this event with that first two buildings with the North Tower so that's coming up but let's go to the phones and take take a couple of phone calls so here we go caller you're live on what on earth is happening on this 9/11 inside job show what do you have for us today hi Gerald mark is it me yes you're on yes all right hey this has been a great show keep up the good work as you were saying though I wanted to bring an important point on this is that we do have them dead to rights and like you said earlier mark you know if we find out who said be finding out who specifically was responsible for scheduling those drills that can confuse the military because we can see that that's clearly what their intention was I and you know we can definitely serve public warrants as accessories seized information for evidence and continue on a way to get the masterminds also but that relationship of prior knowledge and setting us up to be conned is also present in evil danger also I mean Anthony Shaffer claims was following otter around and had terabytes of video of him and he and Anthony Shaffer doesn't claim Bush needs to be arrested arrested for mass murder because he was directly complicit in closing investigations no he gives you a cover that yeah Mohammed Ali is a Muslim fundamentalist and yet we know he was a partier and been on Abramoff's casino cruise ships many times and we have interviews with his girlfriend similarly to Peter B Collins yesterday or the day before in an outstanding report on an individual who calls himself iron man who notified the CIA's a military intelligence officer who notified the CIA the FBI the Bush administration everybody just prior to 9/11 because he would he had inside source knowledge that the Pentagon was going to be attacked and so were the two towers but then he claims then we goofed up we're too stupid and that's why they had to attack them I would a demand the arrest of iron and an Anthony shoe store Anthony Shaffer is a traitor because we can clearly see with your eyes you were talking about Mineta giving his report to the Commission they censored that from the report generally like General Ahmed Condoleezza Rice at a press conference and during the press conference a reporter I was terrible what's this de story about general mad finance or in some weird financing this operation and she says that she didn't have any meetings with him and yet we know he met with many of the commissioners 9/11 commissioners who ended up ignoring them altogether later but they censored that from the White House transcripts off their on the internet and that's of available in nice change final cuts so that we know that they and also you know if we believe they're nonsenses Anthony chauffeurs then then bin Laden would have had to have had an accessory to plant the explosives in the towers because we have video of liquefied iron flowing from the towers car you bring so many great points that need to be looked into and like I said I've said to people in the past do not underestimate the intelligence of the people who were running this event these are highly trained experts in how the human mind works this is definitely a psychological warfare operation magic and magic yeah these people know how to create certain effects in the subconscious in the conscious mind so that people react in certain ways and then they will go for things that they ordinarily would have wouldn't want to have absolutely nothing to do it polar stay on the line we'll come back with you after this next break you're listening to what on earth is happening ladies and gentlemen right here on the auricle Broadcasting Network don't go anywhere the man on the street with the Harley show remember that who is telling people what to think about what the Bo yeah [Music] [Applause] [Music] we're back on this happening inside aspects for the break you were the backbone and Darrell hi are going to go couple for elements of 911 and then we'll go back to the phones to round out the show so here we go Paul are you still with us yep great am i thrown yet just take another point and then we're going to get it caller yes sure you know we gotta remember you know they are calling the American tea soldiers for death and we see if we hear the interviews they give and they don't have their very strong minds to find a way in this world and go and follow black family in fact by not upholding the oath that they gave to God and country but they have minds of like 12 year olds in some cases we are affected by let's call it magic and it needs a really poor magic tricks but I know some of them are a little more complicated but some of the easiest ones to defeat as a trick is well they lost the Enron documents so we can't continue investigations that's a magic trick it works on people who don't know anything about it but if you pursue knowledge on Enron we know how they quadrupled the cost of energy in California we know that they moved the assets from the company to the Cayman Islands and had fictitious numbers on those on the stock market total board and people who else stock had a contractual agreement not to be able to touch it while the numbers fictitiously down they said all your money's lost but they really moved it to the Cayman Islands so that's where the investigations halted similarly in the Pentagon where they murdered those auditors who were investigating Ranas fields mysterious lost again or losing ten point seven trillion dollars and they said well those guys were murdered so now we have no interest in tracking that money down all the paperwork was destroyed when we know it's got to do with run slow we got to know it's got to do with today there's spent eighty percent of the monthly expenditures and both of these wars is completely unordered it's black they say it's black ops and military soldiers these guys need to be taken in by the military and and and serve the rest of their lives behind bars or be finally executed under American standing officers reason and for torture torture warrants death 100 percent of the time it's only an enemy of God and men who claims they can't hear me see say these words unchallenged world right that's right that's wine and and the military military should do their job of protecting this country against enemies foreign and domestic and that's what this was all about domestic enemies carrying out this job caller great points that you raised Daryl let's get into quickly a couple other of the physical aspects of 9/11 let's talk about the nano-thermite residue that has been discovered in the World Trade Center dust and then transition into talking about the Lajas ability of even more exotic weaponry being used on that day well very first also Thank You caller um for mentioning that people were told what to think about the operation as was happening they even had a man on the street in New York addressed in a Harley shirt you can find this on YouTube where he's like you know being interviewed by the media and he's a plant he's he looks like he's a eyewitness but he's a plant and he's telling people about oh yeah of course the the the the floors just pancaked onto themselves and it was just obviously a pancaking collapse right you know and he was telling the fires weakening the steel we okay yeah yeah telling people what to think about it so that they don't actually think for themselves that's right that's right and in a state of fear that becomes a piece of cake people are willing to readily accept what is being told to them by someone who seems assured of themselves so what about the possibility of some of the more exotic weapon oh let's look at the nano-thermite residue do you have anything to say about that I believe that's just even Jones's work yeah mostly Stephen Jones did some fantastic work on you know finding the red and gray chips of nano-thermite in the World Trade Center dust you know and and of course what are you quick if this building had collapsed in a pancake format you know as they've told us you wouldn't have a thermite or thermate which is thermae plus us of sulfur which acts as a eutectic to to make the the the explosives even hotter to cut and you yes and you even see in the residue of the buildings the in the wreckage you'll see like steel beams cut at an angle which is exactly how they do the the preliminary cutting of the of the support columns certainly this would have had been done well in advance these explosives in the buildings and if you look at who owned the security who run the security of the World Trade Center its George Bush's brother his company stratesec that's right Stratus ran security for the towers yeah mmm yep and you even have a guy named Scott Forbes and fiduciary trust comes up again remember I mentioned fiduciary trust with an Tatlock coming to the world coming to that meeting with Warren Buffett well another fiduciary trust employee Scott Forbes was an IT guy and he noted that there was a power down of both the North and the South Tower on the weekend before the attacks which gave a ample opportunity for continuity test to make sure the explosives ordnance would work that's right and folks I'd like to bring up something now that is pretty controversial but I believe that not this event would not even be possible or doable just with conventional explosives even with with micro explosives like nano thermite yeah there was only part of it I think that there is something even bigger that went down that was a display of new weaponry first of all you had to concrete pulverizing the dust now what can do that exploding outward and they're being absolutely not even anything larger than like you know a small tiny bit of debris no bigger than like you know no bigger than like an ashtray left in the rubble I mean like literally this this material the amount of material we're talking about in these massive structures of steel and concrete the amount is unfathomable as David Ray Griffin said take a block of concrete and drop it all about a thousand feet now will it turn into pulverized dust no it'll break into chunks right we had those just was all over the entire area of southern Manhattan and going across the river into New Jersey I mean this is unbelievable how much material completely disintegrated that's the only word that can really be used to describe it it dis integrated it came apart completely now explosives do blow things apart but not in - fine fine particles like this and you know there was some first responders David his name is though he was one of the New York police officers who was affected by the operation and he he had you know massive amounts of pulverized concrete in his lungs so many responders are sick dying and all already dead as a result of the toxins that they breathe directly into their lung linings on this day and you don't live very long when you have a lung lining full of concrete and other debris like asbestos and any of the other toxins that were in the the construction materials of those buildings and you know my heart goes out to these first responders for trying to do the right thing but they should not have listened to the assurances of people who did not have their interest in mind that you know it was okay to be out there without adequate professional protection in the form of breathing apparatuses oh yeah and then you had christine Todd Whitman telling them that the air was safe to breathe right I believe going back to the possibility of more exotic energy based weaponry being used on that day I mean if you see the way this building came down and watch it again some force from above seems to have been at work not you know from below or in the buildings but from above literally pushing the the buildings downward and breaking them apart as it as it's doing it and this could be some type of beam weaponry and this could be some type of application a perverted application of Tesla's standing wave technology that we know very little about I'm very open to the possibility of it being some sort of directed-energy weapon dr. judy wood has done an immense of amount of work in this area I highly recommend people take a look at her website and uh where the towers go her new book yeah so I think that there is something to that that it should be looked into I think people should look into all of the aspects of this event they should look into the conventional explosive theory they should look into the the reasons for it the why behind it mainly wanting to take away more freedoms from the American public inject more fear into the consciousness they should look at the possibility of exotic weaponry being used they should certainly most definitely look into the occult aspects and the symbolic aspects of this event and that's what I will spend a lot of time covering on this show all of it needs to be understood and we need to get down to the people who had access to doing all of these things as the caller said we need to look at who made these intelligence drills for these days we need to look at who gave these reports in advance of buildings collapsing before they did because that's gonna send us in the direction of the actual perpetrators of these horrid events that were mass murder it was a mass murder ritual is what we witnessed on that day make no mistake this was a human sacrifice ritual of the modern day nothing less so with that in mind I think that'll take us out for this segment on the other end of this break we're going to take callers until the end of the show your calls coming up next on what on earth is happening me and my special guest Dowell Rowling's we'll be right back after these messages folks don't go anywhere [Music] [Music] [Music] you can't stop the truth ladies and gentlemen from coming out truth and never be destroyed no matter what the globalists want us to believe and we will eventually uncover the truth about the series of events that took place on 9/11 2001 in New York City and Washington DC and Pennsylvania chaos sorcery is what this is ultimately about creating through fear a synthesis that which controllers want to put into place and in doing so getting people to give up their natural law inherent rights because they were in so much fear and in that state they'll always run to a protector promising to save them from the chaotic events that are happening oh but there's a catch you have to give up all your rights to receive that protection don't you that's what we've seen after these events so in this segment see we can go on and on talking about the ins and outs of this as I said we could do 20 shows and a darrell is an expert on all of the aspects of this he's looked into it more than anybody else I know but we'll bring Darrell back on in the future in a future show to talk about 9/11 activism as part of solutions how can we get this information out to the public because he's doing great work in that regard as are many others in the Philadelphia area so with that in mind I think that's uh we've bombarded enough people with information let's go to your calls now and see what the listeners have to say here we go Jayne in Baltimore you are live on what on earth is happening what do you have for us well just to get a name and a face to the Harley guy the guy wearing the black Harley shirt your guest mentioned earlier yes he has been identified as mark Adrian Humphrey spelled just as you would expect it mark Adrian Humphrey he's the actor in the Harley shirt featured in an interview by Fox broadcast by Fox that's Rick Lowenthal interviewing him is a long time anchor on Fox and subsequent to that there's another video where you see another professional actor a professional Hollywood stuntman by the name of Roger Cross right right behind Humphrey and there so you've got the situation York City were apparently in order to complete this simulation they employed a number of professional actors but I I could stated that the figure is tentatively been identified some pre accepted apparently mark Adrian Humphrey successfully claimed copyright infringement on this fox news footage that is out there on YouTube for everybody to go and see in which he denies playing any role how's that possible how could he have any any copyright if it if it was in him why would he know that now apparently he wants the clip to go away once it's good that the range operator bring it will be posted to this website and it will not be down so don't worry about of course what's interesting and I think what Mark points out frequently is that it's what's it's the messenger is just packaging the message they trotted him out there within minutes of these powers of one of these powers erupting like volcanoes and where and he uses words like collapsed when of quarters we saw them explode but see the problem is and of course the initial explosions that are a trip allegedly attributed to airplane crashes remember those occurred the first one which would have been the the North Tower allegedly received a quarter to nine and the second one the South Tower was hit at about 905 but the first one didn't go down and the first one to go down was the second one to be allegedly hit and I went down like maybe about 45 minutes later there's things sat and quietly smoked no one expected them to go down that was a ridiculous idea but when they finally did it they stay shut and they smoked quietly and then they erupted like volcanoes into clouds of dust at least from the videos we can see of course I don't know I don't know how much credence to Accord much of the video and photographic material that has been released by the mainstream media I think that's going take a lot of sifting mark I think there's a lot of I'll be perfectly honest with you I think there's a lot of transparent TV fakery some some of it easily discernible others may be more difficult and all kinds of media simulation if you look at full spectrum dominance and one of the key features of Future Combat Systems and full spectrum dominance is the ability to simulate to create simulations that are so real that you convince the participants and any viewers that they're real as well but and the use of the meeting is central to this and of course this is the occult this is at the core of the occult trickery I would say the method that you guys are that Mark at least is taking on this is that instead of getting caught up in these arguments about lie hop verses might like lie hop would assume there were real planes and real hijackers but they had foreknowledge and they let it happen my hop made it happen on purpose at least acknowledges they blew something up but I would say mark is making the case for what I would call my top which is to say made it transparent on purpose at various different levels and isn't isn't this really at what part of the key to a cult methodology to be able to package within these visual representations whether simulated or real multiple messages at multiple different levels of the pyramid to anyone as you say to intelligence agencies and foreign intelligence agencies and military organizations about the kind of technical capabilities that these guys have with respect to exotic weapons or the respect to the ability to control media and brainwash a whole population but I say many of us more of us were meant to see that they did it it was made transparent on purpose and to me that's what the core of a cult sure when I met Mark he showed me three basic tarot cards that are very symbolic of the 9/11 operation one is the tower and you know where you you what you see like it being struck by lightning and people falling and jumping and you even see the people on 9/11 falling out of the windows of the North and South Tower just like the tarot card and then you have the the High Priestess was another card he showed with the two towers of Jachin and Boaz right and the the third one was the the the death card which has the Pentagon on the flag and the you know and also the two towers in the background that Garcon setting between them yes yeah so I mean yeah it was and and there was even an Illuminati card game from 1995 that even insinuated that this type of attack would happen an example of synchro mysticism or what some people call predictive programming I look at it more as synchro mystical in nature yes okay there's so many important aspects and they are embedding things at a deep subconscious level and it's all fear-based and it goes so deep cognitive dissonance about this event goes so deep in some people I've said this before on the show and I'll repeat it a friend of mine told me that I believe it was his sister said even if even if now listen to this statement listeners she said even if it were proven to me beyond a shadow of a doubt unequivocally that this was an inside job that elements within our government carried out this covert operation for whatever nefarious purposes and even if they told me themselves if people who were involved told me themselves what they did and how they did it I would still choose choose to ignore that and to believe the official story because I don't want to live in the world that it would mean to live in if that other if that other those other aspects of this event were true and imagine the psychosis that you have to dwell in imagine the dissonant mindset that you have to dwell in to say even if reality proves to me beyond the shadow of a doubt that events are perfect I will still still tell myself that a fantasy is reality as opposed to deal with reality because she knows deep in her heart deep in her soul the the responsibility that goes with understanding that as being true and what our situation really is as a people if indeed it went down when Allah not alone in she's only being actually very honest with you in saying that because there's a lot of people who do think that but are so scared to even say that so even admit that to you or to anyone right that's their thought process that they can't deal with reality as you know they must rather live in a comfortable fiction living in a bubble welling in a bubble moving throughout their lives completely in a sheltered state of awareness from the real world that's why yeah that's the definition of a completely destroyed human being yes psychologically mentally emotionally spiritually that person is on the floor of the house as they say in Freemasonry their dwelling in total darkness and the idea here is exercise your will and courage to come to a confrontation and a face-to-face confrontation with reality with the reality of this no matter how deep dark and scary it is and deal with the problem at hand as that's the way we solve any of the problems of life oh I want to read a real quick quote that I've members I'm thirty second from Orwell he said in a way the worldview of the party imposed itself most successfully on those who were not capable of understanding it they could be made to accept the most flagrant violations of reality because their minds couldn't fully process the enormity of what that was what was being demanded of the by the telescreen and we're not sufficiently interested in public events to notice what was happening by lack of understanding they remain narrow that's all we have time for [Music]

What On Earth Is Happening Show #066

Topics: *9/11 Physics Analysis, 9/11 Event As An Inside Job, "Chaos Sorcery"*

welcome ladies and gentlemen welcome one and all you're listening to what on earth is happening right here on the oracle broadcasting radio network i am your host mark pacio my website what on earth is happening.com the network's website oraclebroadcasting.com today is sunday june 26 2011. we have a good show lined up for you here today today on what on earth is happening we are going to be conducting an analysis of the physics of the 911 event specifically the so-called collapse of the twin towers buildings one and two of the world trade center complex i'm going to take people through three basic physics equations to prove unequivocally that there were other forces at work in those buildings on that day many of the listeners on this network will of course know that but for the extremely left-brained among us and for the psychologically resistant those still in cognitive dissonance about this event being an inside job an example of the hegelian dialectic gone awry or what i call chaos sorcery and also a human sacrifice ritual we will take them through the physics of the event first hand and show it to them in a way that is undeniable according to the laws of nature before we do that i have one quick event announcement coming up here in philadelphia in a couple of weeks the nikola tesla energy independence celebrations the yearly energy independence celebrations hosted by the tesla science foundation july 7th 8th 9th and 10th there's four events that comprise the energy independence celebrations this year the first is the is the tesla science conference all four days of the event from 8 30 a.m to 5 p.m at 2 liberty place 16th in chestnut streets here in philadelphia registration only one hundred dollars fifty percent discount for students with a valid student id the tesla science foundation social featuring a concert by the divine hand ensemble saturday july 9th 5 30 p.m to 10 30 p.m at the ethical society building 1906 south ritton house square tickets are 20 in advance 24 at the door the tesla birthday celebration featuring a tesla coil exhibition saturday july 9th 11 p.m to 1 a.m at independence visitors center 5th and market streets this event is free to attend and finally tesla fest exhibitions and open discussions about nikola tesla his technologies and alternative energy energy in general saturday july 9th 10 a.m to 11 p.m sunday july 10th 11 a.m to 3 p.m independence visitor center fifth and market streets also free to attend for more information on this great event coming up here in the city of philadelphia check out the tesla science foundation's website at teslasciencefoundation.org we'll get into the physics of 911 on the other side of this break stay with us folks welcome back folks you're listening to what on earth is happening i'm your host mark pacio last week we began to introduce on this show the concept of chaos sorcery this is kind of a term that i've coined in reference to problem reaction solution it's kind of a different uh twist or spin that i put on that uh dynamic it is a method of mind control it is probably the most effective methodology of mind control when all others fail 911 was an example of chaos sorcery it was also a human sacrifice ritual conducted in broad daylight but there's still a lot of people who believe the official fairy tale and they do this because they are in total ignorance of the laws of nature and as i said last week i have a background in mechanical engineering i studied in college i attended the university of pennsylvania and i understand the physics equations that would be required to model in a very simple way what we're told happened on that day and that's what i'm going to attempt to do here today now as i said last week also this will probably be the most left-brained what on earth is happening show that you will ever hear because it's going to conduct it's going to have within it a lot of math and physics equations and that shouldn't scare people off because i'll try to convey the ideas behind these equations while i run through them through them some people may find this boring personally i think it's enlightening to understand that if you understand how dynamics in the real world work you can tell when you're being lied to you don't have to take anyone's word for it you can take the weights and measures plug in those variables into known laws of nature and solve them for yourself that's what i'm going to show people here today i want to direct everyone up to my website what on earth is happening dot com and there on the radio show page you click the tab that says radio show you will see a few images there's ten images there the last one is the flyer for the tesla um energy independence celebration so the first nine images are what we're going to be working with here today on the show um this is a basic presentation on the physics of 911 with some visual aids put there for people and all the equations necessary to understand that what we were told happened on that day cannot be true underneath the images there's a document that is the same thing only in pdf format if people prefer uh for all the all the images to be in one document you could download that it's a small file and open it up in a pdf reader on your computer and follow along that way so the presentation for today is entitled the physics of 911 or why the world trade center towers could not according to the basic laws of dynamics have fallen at the speeds at which they were observed to fall unless forces other than weight and gravity were at work we're going to prove that unequivocally today now when i say forces other than weight and gravity were at work what i mean by that is that they there had to be something that went to work on the floors that were below the points of impact all right there had to be other forces at work because the upper floors fall at a speed and a time that is impossible according to the laws of motion and these are simple dynamics equations three equations are needed to understand this that's it two basic dynamics equations that describe the relationships between position velocity and acceleration under conditions of uniform acceleration that's what we're looking at this is dynamics in one dimension that's all it is and the the forces at work are weight and gravity so this isn't complicated physics this is junior year high school physics and as a matter of fact i actually used a junior year high school textbook with its physics equations and plugged in the variables that's all i did and what i would also like to emphasize that i did in modeling this is that i made extreme assumptions in favor of the official story extreme assumptions that no engineer or physicist would ever make when really attempting to model this in a re in a way that's you know truly accurate so don't get me wrong and think that thinking that this is a highly accurate modeling okay of what actually took place this is an approximation that completely makes allowances in total favor of the official story and i'll explain that as i take you through the uh the pages okay so page one was simply the explanation of what we're going to be looking at today if we look at image number two or page two whether you're looking at the images or the pdf document we see a graphical representation of the north tower this is world trade center one building one it was the building with the radio antenna on top and i have i'm showing here that the building was comprised of 110 stories 110 floors and it was 417 meters in height from its base to the top of the top floor the dotted arrowed line there shows the approximate impact height of flight 11 the flight that hit the north tower and it strikes floor 93 approximately now first of all for those who have any background in the occult at all they'll recognize these immediately as occult significant numbers these are significant numbers in the occult we won't get into that today we will be beginning the journey of going down that rabbit hole next week the occult significances of the 911 event okay so i've put a chart here on the right hand side of the image of the north tower with a few of its um weights and measures basically okay the loaded weight of world trade center one was approximately 450 million kilograms [Music] there's the music for this next break we'll be right back after these messages folks don't go anywhere we will be analyzing the physics of the 911 event and showing how we what we are told happened was impossible on that day i'm your host mark pacio you're listening to what on earth is happening we'll be right back ladies and gentlemen welcome back everyone this is what on earth is happening on the oracle broadcasting network i'm your host mark pacio my website what on earth is happening.com we're looking at the physics of 911 today proving according to the laws of nature that the official story is a fairy tale and could not have happened the way that we were told we're looking at image number two on the radio listen page of what on earth is happening.com where all of the related images for today's show can be found and we are looking at basic weights and measures basic numbers related to the world trade center north tower the loaded weight of the entire building was 450 million kilograms one of the loaded floors because there were 110 stories is approximately 4 million 100 000 kilograms the height of each floor is approximately 3.8 meters now here in the next section of this table i put the height of five impacted floors now approximately three floors or so maybe four are damaged by the direct impact i'm assuming five and here's what i'm doing i am actually removing those floors to basically allow for the top portion to crash down into the bottom portion because as we're told this is a progressive collapse or a pancaking collapse even if you have buckling of steel that may have been weakened as the the official fairy tale goes okay no one would model something completely removing floors entirely as if they don't exist now not only am i going to remove these five impacted floors and let the building the top portion of the building drop onto the bottom portion of the building i am also going to keep the impacted floors intact for weight purposes so in other words what we're going to be doing is let's say the the next um the next uh part of this table will explain this so i'll just continue the height of the five impacted floors we're going to be looking at is 19 meters that's five times 3.8 meters the plane is said to have hit at the 93rd floor okay so and that's the lowest estimate given of the plane's impact flight 11 okay so the height of the lowest damaged floor or floor 93 is 354.4 meters what i am doing is taking the portion of the building the number of floors at or above impact which is the last part of this table which is 18 floors and i'm actually raising them up by 19 meters or the size of five impacted floors and then allowing them to drop with no resistance whatsoever onto the floors below now this is a radical assumption in favor of the official story okay this is saying all of the weight above is falling at the acceleration due to gravity with no resistance until it impacts on the floors below the impact point okay hopefully people will will grasp that concept and understand how i'm modeling this in a sort of an unrealistic way to give more credence to the official story okay i'm i'm making radical assumptions in favor of the official story and even with those assumptions in place we will find when we come to the conclusion that the official story cannot be true okay so in the next slide or page we go to your page three in the pdf document okay i am showing the eighteen floors disconnected now however they are now raised up the height of five impacted floors and the undamaged structure beneath the 93 floors that remain in tower one are approximately 354.4 out of the 417 meters okay we are now going to take the knowns and put them into dynamics equations of physics and again the book that i used was principles of physics where these basic equations of dynamics and newton's laws of motion can be found among many other physics equations principles of physics this is a high school physics textbook fit principles of physics third edition by blatt b-l-a-t-t and this was published by alan and bacon publishing a-l-l-y-n and bacon b-a-c-o-n okay that's the textbook used to basically solve this these equations so this first equation v squared equals v zero squared plus two a d i'll explain what this means this is a dynamics equation describing relationship between position velocity and acceleration under conditions of uniform acceleration or the acceleration due to gravity okay so v is the final velocity that we are going to attempt to calculate by plugging in the knowns of the world trade center weights and measures v zero squared the term v zero means the initial velocity of the upper block the upper portion or the 18 floors above and we know that that is zero because they start from rest and then we are allowing gravity to take take over and let those portions those floors smash down into the remaining floors okay two now a okay a is the acceleration due to gravity which is 9.81 meters per second squared okay and d is the displacement or the height that the block is falling and we know that we calculated that it's we're removing five floors completely which is a pretty radical assumption no resistance over five entire floors okay assuming steel disappeared instantly the whole structure on those five floors disappears completely but we're still keeping all of the mass of the building in those 18 floors we're not actually removing them we're just letting them fall through that distance of 19 meters or five floors okay again a radical assumption that no one would actually model it that way in real life okay because i'm making i'm making again ridiculous assumptions in favor of the official story to put it bluntly okay and uh that's what d represents here okay so we're we're attempting to solve now since we have all knowns on the right hand side of the equation we simply plug in the numbers and do the arithmetic okay v zero is zero so zero squared is zero okay then we have plus and then two times a which is nine point eight meters per second squared times d which is 19 meters the result that we get is that the final velocity when we calculate this we add those together then we take the the square root we do the multiplication add it to times zero add it to zero and then we take the square square root of that okay and we would get 19.3 meters per second that is the approximate velocity at which the top block is moving when it meets the bottom floors okay the next equation that we need to understand is newton's second law of motion force is equal to the mass of an object times it its acceleration [Music] the equations i'm going to take people through will pretty much solidify that position if you think the official story is true i would say you're pretty much in cognitive dissonance because what we are told happened could not actually be the case according to laws of nature so we were looking at image number three on the radio show page of what on earth is happening dot com where i have presentation slides posted with basic physics equations we're up the middle of the page the law of motion newton's second law of motion f equals m a many people may be familiar with or have heard this law stated in this way we are going to calculate forces 1 and 2 which are labeled on the tower itself there and i've drawn vector arrows to show the direction that these forces go in i'm taking down as the positive and up as the negative okay because the direction of motion is downward so force one let's calculate it it is equal to the mass of the upper floors times the acceleration due to gravity or mg so we have 18 floors times 4 million 100 000 kilograms times the acceleration due to gravity which is 9.81 meters per second squared and we get the result of approximately 724 million newtons 723 million 978 000 newtons newtons uh is the constant that represents kilograms times meters per second squared which is what we're working with in the uh equation above okay so that's the force carried by the upper portions of the building above the point of impact force number two is the resistance force offered by the floors below that carried that upper portion for the lifetime of the building and they are built with safety factors in mind not just on the edge of the the weight carried by those floors because if that were the case as soon as you started to load those floors the building would collapse so they're built with a significant safety factor in mind and i'm sure what they were act the safety factor is actually larger than what i'm calculating so we're taking the mass of the upper floors plus this the safety factor mass which i've labeled there m sub s times the acceleration due to gravity when we solve for this we get a greater number but it's in the other direction because it's the resistance force and of course that makes sense it would have to be greater because it held the upper portion of those floors there of course we wouldn't see it right on the edge or equal to it so that force when you plug in the numbers and do the calculation is approximately seven hundred ninety four million six hundred ten thousand newtons okay so far so good we've calculated the two basic forces that are at work when this block comes crashing down in this so-called progressive collapse and again this is more radical okay than anyone would actually calculate it again in favor of the official fairy tale and of course there'll be there'll be all kinds of people debunking everything and saying no there's it's too simplistic actually this is a closer understanding then modeling it in a an even more complicated way to understand that it could not have happened the way we were told because even with these assumptions in place as we'll see when we calculate the time required for that mass at the top to come through all that other mass even if you had buckling involved okay is impossible it could not no matter what you do you're not going to get it down to the 11 seconds that are observed with your own eyes but people will continue to insist that that's the case that magically that much steel can bend buckle and collapse and pancake down on top of itself when you don't even see all of that material at the bottom in the debris pile and i'll tell you why you don't and this is getting ahead of ourselves but you don't see that because it blew away as dust ladies and gentlemen that's why it blew away powderized it was completely pulverized into dust steel concrete office furniture everything in the building blew away across southern manhattan and across the river so keep keep enjoying your cognitive dissonance and uh and living in the in the cage that you live in because you don't want to take the responsibility to actually do anything about what these psychopaths have done but going back to the the equations i i just had to interject a little bit of vitriol to all of the people in cognitive dissonance out there but let's go back to the equations which don't lie but like i said people will still ignore them they'll ignore what's right in front of their own face like i said the occultist told me when i was working with them if they told the people that they're their owners they wouldn't believe them what makes what made me think that they're they're gonna believe me but believe whatever you want folks it's uh it's your freedom that's being destroyed so um let's look at image number four okay which we're going to now use the two forces we just calculated and we're going to plug them into newton's second law again to find the acceleration at which the top block strikes the bottom block with so the sum of the forces equals the sum of the masses times the sum of the acceleration we're solving for acceleration that's the unknown that we're looking for okay when we do this we plug in these numbers so the sum of the forces is these two uh calculations of f1 and f2 that we did in the previous page we add those together so in other words we're adding a negative so that's like subtracting we'll get a negative number at the top part of this equation and then at the bottom we have the 18 floors okay and on the one side we have the the 18 floors above without their safety factor and then with the safety factor okay so this is the sum of the masses at work all right we get the number negative 0.456 meters per second squared that means you have a deceleration when the upper block strikes the lower block it's in the negative direction okay the initial acceleration is zero so when we're solving for the sum of the accelerations the initial acceleration is zero the final acceleration is in the negative direction that means and this is common sense when the block the top lock hits the bottom one it will slow down somewhat okay and this is the amount that it will slow down 0.456 meters per second squared okay and again this is a an approximation i'm not a claiming that these numbers will be exact but we know that a deceleration will take place and this is actually i've seen this calculated in other places and this is actually not as radical as other people calculated i'm saying that the block is still moving at a pretty decent pace okay as it collides with that bottom portion of the building now we have several knowns now from our calculations we have the if we look at image number five slide number five we have the distance of the floors that are remaining intact below the point of impact 354.4 meters or 93 floors we know the velocity at which the two portions of the building strike each other approximately and we know the acceleration at which the upper portion of floors is moving when it strikes the lower portion of floors we are now going to plug those into another dynamics equation d or displacement okay which that block upper block needs to travel is equal to the initial velocity times time plus one half the acceleration times time squared we'll get into this last dynamics equation the 911 event after these messages you're listening to what on earth is happening don't go anywhere folks we'll be right back hopefully everybody has their sunglasses on [Music] this is what on earth is happening we're looking at the physics of 911 today the images for today's presentation can be found on what on earth is happening.com in the re on the radio show tab hopefully i'll get to some calls in the next hour after this next segment i guess i'll give the call in numbers so we could take some calls we're on image number five and we're about halfway down the page at the green equation which is another dynamics equation displacement equals initial velocity times time plus one-half acceleration times time squared okay we have all of the knowns except for time everything in this equation we have solved for and we have knowns except for time so we are going to now solve for time this is the key factor to understand that the official version is impossible they're telling us that due to any kind of collapse okay which implies structural deformation structural collisions happening that we could have had a collapse in the amount of time the buildings are observed to fall in and when you solve this equation you understand that's impossible all supporting structural mass had to be removed by some unknown forces at work in order for the building to come down in the time observed that's it and i you know to get into the whole uh debating and infighting that goes on on how this was done or that was done i honestly don't care the proof is the proof lies in solving for the time aspect and i don't care what you do you will not get it down to even close to 11 seconds i don't care what you do okay and this is a insanely conservative estimate of how long it would take according to this model that i've set up that doesn't even approximate reality in real life okay so let's just ex i'll explain what i've done here the displacement is 354 353.4 meters the height of 93 floors v zero is the velocity that the top portion of floor strikes the bottom portion with we calculated that a couple of slides back 19.3 meters per second times time plus one-half or 0.5 times the acceleration which we calculated which we see was a deceleration or an acceleration in the negative direction okay 0.456 meters per second squared times time squared now all i've done is i've kept on the left i've kept 3 3 53.4 equals 19.3 t okay and then on the right i solved the one-half a t portion and kept t squared in so it's minus 0.228 t squared now in the next line all i'm doing is putting these in a different order okay so i'm taking the t squared variable and i'm putting it first okay so it's negative 0.228 t squared plus 19.3 t okay so i'm taking what was on the right hand side i'm rearranging the terms to put it in terms of t squared and t okay and then on the uh i'm bringing 353.4 to the same side of the equation you bring it over as a negative setting that equal to zero just to show that this is indeed a simple quadratic equation it's a simple second order polynomial this is no more advanced than high school algebra okay okay so we are we get the result is a quadratic equation in the form of ax squared plus bx plus c equals zero and in doing that we know that the formula to solve the variable in a second degree polynomial or a quadratic equation is this formula that i present below which is x equals minus b plus or minus the square root of b squared minus 4ac all of that over 2a and that is we're not referring to acceleration with a here we're referring to the the um uh the coefficient in ax squared okay and that's what these a and b rep a b and c represent here okay so a is the coefficient before t squared b is the coefficient before t and c is the the final term 354.4 when you plug in all of these numbers into this equation i did not put that on here to belab be labor things because let's be honest this is boring enough without going through all the arithmetic involved to do the calculations you can plug in the numbers yourself and i think i did a fairly decent job not having dusted off these skills not even looking at any of this stuff like you know for the past almost 20 years okay um 18 years whatever it is and you know the other thing is if people think this is what i want to be doing with my personal time you have to be madly out of your mind madly ridiculously insane if you think this is what i like to do or want to do this i'm doing this to try to present people with somewhat sensible evidence and proof that what we're told about this event is a complete fabrication but again believe whatever you want um and the result that i get i got here is the time in seconds required for that block to fall through its greatest path of resistance even making these crazy assumptions would be 26.79 seconds almost 27 seconds and we witness it happening at almost one third of that speed impossible impossible okay let's go to image six and this does the same thing with the south tower i'll take it through even faster okay so the south tower was 415 floors 415 meters i'm sorry 110 floors we see here the approximate impact height of flight 175 which as we'll see next week is also an occult number and it strikes floor 77 also a significant occult number okay you think these are coincidences i would say you're crazy if you think that all of these numbers are coincidences if you have any study or understanding of the occult at all you understand every one of these numbers is an extraordinarily significant occult numerological number but let's get back to the physics world trade center two loaded weight and you know um i probably should not even be using the word weight technically here it's mass but you know it's it's close enough you understand what's meant here you know it's the kilograms is actually a measure of mass so it's 450 i'll probably correct that in the slides for posterity but we understand what we're talking about here the loaded weight of the tower is approximately 450 million kilograms the mass of the tower i should have said okay um the uh loaded mass of each floor is approximately uh 4.1 million kilograms okay the floor height 3.8 meters approximately again 3.75 something i rounded it off to 3.8 i did that even to just make it have more impact when it comes down you know to just round it off to that the height of five impacted floors again we'll be doing the same thing is also 19 meters the height of the lowest damage floor was floor 77 292.6 meters and the number of floors above impact 34 floors okay those are the basic um measures that are needed to understand the uh dynamics so let's move on to slide number seven where we do the same thing our same dynamics equation v squared equals v zero squared plus two a d okay so we're solving for for v okay the initial velocity is zero acceleration is due to gravity 9.81 meters per second squared the displacement is 19 meters or the height of five floors we get 19.3 meters per second the same as the north tower result force equals mass times acceleration newton's second law of motion we're calculating force one and two the vectors are shown applied to the building on the left there when we calculate these forces we get results of 1.3 1 367 million newtons and 1 billion 500 million newtons we'll pick this up on the other side of the break folks stay with us equation of newton's second law of motion f equals m a or in other words mass times the acceleration due to gravity we have 34 floors times 4.1 million kilograms of mass per floor times 9.81 meters per second squared the acceleration due to gravity we get approximately 1.3 billion newtons the second force which is in the resistance force in the upward direction or the negative direction again the floors are built with safety factors in mind to account for the mass of the floors above being loaded with people equipment etc i've calculated that actually pretty low so you get 34 floors times 4.5 million kilograms times 9.81 meters per second and you get an approximation of 1.5 billion newtons in the upward direction or negative on page 8 plugging these numbers into newton's second law again to solve for acceleration the sum of the accelerations equals the sum of the forces divided by the sum of the masses so we plug in the numbers of of the forces and then we plug in the masses we get an acceleration that is the same deceleration rate as we do for the north tower negative 0.456 meters per second squared the initial acceleration is zero so the final acceleration when the blocks collide would be 0.456 meters per second squared in the negative direction or in other words a deceleration on the final slide or image number nine i'm taking the knowns that we have solved for which is the displacement over the 77 floors the initial velocity that the two that the top block comes down onto the lower portions of floors with and the acceleration at which that top portion of floors meets the bottom portion of floors we are those are knowns now and we are plugging those into the dynamics equation displacement equals v zero which is initial velocity times time plus one-half or 0.5 acceleration times time squared 0.5 a t squared so the displacement is 292.52 meters or 77 floors equals the initial acceleration at which the blocks collide the top portion collides with the bottom which is 19.3 meters per second times time plus 0.5 times the acceleration which we saw was a deceleration minus 0.456 meters per second squared times time squared i rearranged the terms to get a quadratic equation in the form of ax squared plus bx plus c equals zero and i'll give you the result of that on the other side of this break i'll also call it bumpers when we come back don't go anywhere you're listening to what on earth is happening ladies and gentlemen we're back on what on earth is happening we're looking at the physics of the 911 event today on the show and uh we'll open up the phone two calls hopefully this segment the call-in number 866-841-1065 once again the call-in number is 866-841-1065 i'll be wrapping up the physics hopefully in this segment and then we'll get to the phones we are looking at image number nine or page nine of the pdf document on the radio show page for what on earth is happening dot com and we were solving for the amount of time that would be required if these top portions of floors were have to if the building were to have let's say buckled and then these floors crashed into the floors below and we're doing this in a very very um a way that allows that grants huge allowances in favor of the official story uh and this method of calculating this don't get me wrong uh would not be any way that an actual engineer or physicist would would do this because they would never make these radical assumptions in favor of the official story they would actually try as much as possible to calculate these forces and vectors as close to as accurate accurately to reality as they possibly could and that would involve plugging in a lot of numbers into computers and then modeling everything and even if you did that you would still not get down to 10 or 11 seconds at which we see this building collapse because all it ultimately comes down to is the mass of those lower floors were removed period that's that this is the inescapable conclusion that you ultimately arrive at if you have half a brain capable of coming to conclusions based on laws of nature even if you have half a brain okay if you have if you have even a remainder or a remnant of an ability to trust your own senses and use apply even the smallest modicum of common sense you realize that that of those upper portion of floors fell with basically the speed due to gravity the acceleration due to gravity they felt with the acceleration due to gravity meaning there was no resistant force opposing them and that you you need to come to an inescapable conclusion about that and this is where i'm i'm not i'm throwing out the whole idea of even controlled demolitions there's something even beyond that at work what removes completely all resistant forces and doesn't leave that much debris there over 93 and 77 floors we'll look into that we'll speculate about that after i finish these equations but let's get back to the physics we were solving the dynamics equation d equals v zero plus one half a t squared which is in green on the last page page number nine when we plug in the numbers we get a quadratic equation which is point negative 0.228 t squared plus 19.3 t minus 292.6 equals zero this is a simple quadratic equation or a second order polynomial in the form of ax squared plus bx plus c equals zero solving for the variable we get and we use the formula presented in the white box there which is the formula to solve a quadratic equation we get t equals 19.78 seconds and that's an extremely conservative estimate no way it could have even happened that fast in reality okay and it's still twice approximately the amount of time in the first example we saw was three times the amount of time that we witnessed with our own eyes and on videotape okay and in this example it's almost twice the amount of time witnessed 20 seconds approximately impossible unless you are completely pulverizing to dust all the resistant forces in those lower floors now what can do that what could possibly do that and see i speculated a little bit last week when i had daryl on darryl rollins last week was my guest that maybe some weaponry that we don't yet know about may have been employed from above but the more and more i look at it i think that's not the case either the uh the inescapable conclusion that you come to is that this other force was applied from below and inescapably when you start to look at that possibility and you see the evidence of molten steel in the basements of the towers that burned for weeks afterward there was some kind of weapon we as yet still do not know about that was deployed on this day and i'll tell you my reasons for thinking that and what it really meant but this isn't a typical controlled demolition the mass isn't accounted for not even therma you would still have so much material so much substance alone that substance was disintegrated it was disintegrated it was taken apart and it was when when the mass of the top portion of floors fell into all of that disintegrated material it simply blew away across southern manhattan and across the the river over toward new jersey that's what happened with all of that mass that's what happened that's why it's not in the basements of the towers it was breathed in by tons of people and blanket in the entire island of manhattan the lower portion of it and the only thing i could think of that could possibly do that is some sort of a scalar weapon or a seismic weapon of some kind there are speculations that it may have been some kind of nuclear charge that we don't really understand or know about that created this this pulse of energy that traveled upward from the the base of the buildings up to these floors where the where the the planes impacted and basically disintegrated uh all of the lower portions and then the top portion had nothing resisting it so i think people should definitely look into that as a possibility that some kind of all alternative weaponry that we as yet still do not understand about and look into the possibilities that something like that was involved because nothing else that i understand or know about could possibly cause the pulverization of that much matter so is this tesla technology at work that's been perverted it's quite possibly we're back folks this is what on earth is happening on the oracle broadcasting network i'm your host mark pascio my website what on earth is happening dot com we're talking about a pretty hot push button topic 911 what really happened on that day i took people through a whole bunch of physics equations on this show you can find those equations on my site at what on earth is happening.com they'll be posted along with the podcast and uh i want to let people know that uh podcast for the the podcast for last week had a whole lot of 911 information attached to it this was podcast number 65 and uh that's all there on the podcast page of the website and it's just so much material to go through in drudging up all of this stuff again for me it's actually like a pretty painful process because you you start to look back on these events realize where your mindset was back then because i'll tell you the truth and i'm not even proud to admit it i accepted the official fairy fairy tale version on day one it took me a few months to understand this as something other than what it was claimed to be even with what i knew about the occult which makes me look back in hindsight and say how could i not have seen it from day one okay so you know even with a lot of knowledge people when they get into a fear-induced state don't think clearly forget about what they know or even witness with their own eyes and are willing to accept an explanation that makes no sense so let's uh take some calls in this segment we don't have anybody on the line right now i'll give the call-in number again 866-841-1065 if anyone wants to chime in the phones are open i'll go right to your calls once again the call-in number 866-841-1065 i want to get back into some speculation about the causal factors involved okay controlled demolition is all often brought up and it is quite possible there were many demolition charges set in the building to weaken the structure and make it come down even faster on the podcast for last week i posted a couple of things one was possible evidence of some sort of alternative weaponry being involved like judy wood proposes exotic weaponry possible particle beam weaponry okay that actually disintegrated the underlying structure possible absolutely seismic weaponry scale or weaponry is this tesla technology that's at work a perverted form of tesla technology is this a standing wave that's set up under the building possibly even through the earth who knows i don't have the answer of how exactly it was done is the how as important as the why though see the how is what's creating all the infighting over 911 truth oh it was controlled demolition no it was particle beam weaponry no it was thermi we have to get out of this whole dualistic mindset of fighting about the details and understand this was done it was a covert psyop operation a psychological warfare op it was conducted by occultists and you can call those secret societies you can call those intelligent agencies i don't care what you call it this was an occult ritual and i'm going i'm going to prove that and yes it can be proven that this was an occult ritual can be proven according to the laws of physics that this did not happen according to the official story there is proof in these equations the laws of nature work 100 of the time they don't waver that's why they're called laws they're not suggestions okay they're laws if you're in a one g environment in the three-dimensional space-time realm with the gravity of the earth the laws of nature work and physics and dynamics work the same way reliably 100 percent of the time never altering or failing that's why they are laws so the people still in cognitive dissonance over this thinking that it could have happened the way the official story went you're living in a dream world in a dream reality can i explain every aspect of it of course i can but understanding the amount that i understand about physics i can prove it to myself that it didn't happen the way they claimed that it happened and certainly understanding what i understand about the occult i can definitely prove that this was an occult ritual and i'm going to begin that process next week so you won't want to miss the shows coming up here on what on earth is happening as we go into the deep dark occult aspects of the 911 event let's go to the phones caller are you there you're on what on earth is happening welcome hi mark thank you for taking my call sure no problem mike from new york hey mike how are you excellent thank you i thank you for the amazing uh job you did on creating the pdf that goes into a lot of math that you know not a lot of people go into um i was calling on behalf of the you know i'm just saying that 9 11 itself and trying to explain to people that you know they say well what's the reason why they why would they do such a thing i said well there's a there's a million reasons why they would just none of them they just don't want you to believe any of them they just want the official story put out but another thing uh you could bring up is that you know even the plane you know supposed to play in hitting the pentagon you know how come in every single uh you know display of evidence that they don't even have you know scratch marks from the engines before the you know plane hit the uh wall of the pentagon you know everything is just a circle in a hole with all the videos that captured that event why don't we have we have four frames what is it four or five frames that they claim was the video of the plane hitting why don't we have videos from all other angles surely it would have been captured a multitude of times had that been a plane that struck the pentagon living in the nanny state you think that they would have such video all the time they have video of robberies in every single state of everything you know different stores but they can't get you know massive you know planes hitting different things and what happened on you know on certain things even with guidance systems you know uh you know the official plane of what uh story of what happened to the plane that was brought down over in pennsylvania it was never fully uh explained and look at the flight numbers that we're talking about once again the same numbers keep coming up and people think that this is accidental flight 11 hits floor 93 flight 175 hits floor 77 flight 93 crashes in pennsylvania and flight 77 allegedly hits the pentagon i mean these these are the same numbers coming up again and again because the occultists love their numerology they love it and these numbers are significant they have meanings attached to them we'll go into that next week so yeah you definitely raise a lot of good points where is all the evidence of of the uh uh the flight that's allegedly crashed in in shanksville pennsylvania flight 93 where is all the evidence of the flight that hit the uh the pentagon supposedly you know we don't even see that kind of debris yeah again the only the only way that they're just not trying to explain the black boxes are gone the only way i could or taken taken by supposed fbi or cia that day because they can be retrieved they can withstand any impact that was given to them on that day sure uh besides the possible basement uh you know cold nuke explosion right the uh the the amount of accuracy also as well you're saying how the plane hit a certain floor for for these would-be trained pilots that were trained here in the united states uh the accuracy of that was amazing even they said the uh the flight patterns and the angles you know were all so so matriculated almost almost to me to say it was done either through you know uh remote pilot remote controlling the plane itself as a test for what we have today as the small drones flying around with probably way more facilities great points mike we'll pick this up on the other side stay with us we're back on what on earth is happening i'm your host mark pacio my website what on earth is happening.com we've been talking about the physics of the 911 event some of the possible hows the how of what they did to pull this off we've been talking about some of the possible whys why would they have gone through so much trouble to conduct such an operation in broad daylight of the the general population and the main thing is to put people in fear that's first and foremost because people in fear are easily controlled and that's the name of the game and then you could use this as justifications for further encroachments into people's personal freedoms and if people are too psychologically immature to be able to handle that they're going to believe whatever they want and no amount of evidence is ever going to change their mind and the other part of it is once they really did empirically understand factually grasp the concept that this was created by people not the people we are told that made this happen but elements demented sick elements within the governmental structure and the intelligence agencies that we have built up all around us that implies responsibility something that very few human beings really want sad to say see i'm not an apologist for people most people don't want any personal responsibility they want to run a thousand miles an hour in the opposite direction from it and if some and if it comes down to you're responsible for actually doing something about this now that you know most people will say i don't want to know before the break we were talking with mike from new york let's go back to him and see if he has anything else mike are you still with us hey mark hey hi yes thanks um i was just uh also stating uh i'm trying to get to another point of the precision was the technological side but also this might lead up into maybe the occult side as well the the also precision accuracy that you would have to be in order maybe if maybe if some of those planes or some of the participants in the 911 uh you know uh plan itself would have would have been in sort of the mind controlled state i believe a case example would have uh would be diana where the the limo hit i believe the 13th pillar going over 60 miles an hour uh you know driving that fast and you know being you know trying to consciously count the 13 pillar and hit it would be really difficult but in a different sort of frame of mind or under mind control that's you're working with these uh unconscious subconscious level where you know that's almost like walking you know in terms of the speed it can really gather and you know see information you're accessing the deep computer components of the human brain which can uh determine things to that high level of inaccuracy in ways that we would perceive as almost superhuman in an ordinary state of consciousness but absolutely under trauma-based mind control things like that are certainly possible because when the mind fractures from enough torture you can actually access components or what they call alters of the brain that do have these capabilities how how much how much of our brain do we really use what what is what capabilities are in the other portions that lie dormant in our everyday waking state so absolutely that's a great point to bring up and you know the other part is does it have to be absolutely deliberate and planned or orchestrated can this be an example of what is known as synchromysticism which i bring up a lot of times as well in which the universe is actually telling us things through the organization of information and data uh in order to assist the process in awakening and i i believe that the the concept of synchromysticism is valid and real and i think more people should look into this and try to develop an understanding of what synchromysticism is and it's a deep rabbit hole to go down uh it can hurt your brain sometimes literally trying to see all these correspondences if you look yeah if you look at uh even if you go back and you search for old radio shows websites things things of that nature right before 9 11 and right after 9 11. even you know different people parents mckenna you know just one example of people that they there was a a a psychic way that all shocked that you know it could have went either way right now 911 could have you know some people could have said 911 could have been a positive you know maybe you might see that from like richard hoagland or something like that but it it could have went either way and somehow it was hijacked in a sense that you know 911 itself represents a shift or a time or a point in in in essence and that it's not just one thing it's you can't believe george bush if you want to do it was just thrown out there as the puppet forefront but you know if you wanna if you wanna you know learn about you know some of the just the basic people you know you can look at dick cheney as a as a a vile example of a human being that really you know did a lot of horrible things to orchestrate some of the things that have happened or that we're running into in this uh third dimensional reality mike great points man and i'll tell you we have to really look at the esoteric sides of this issue to understand what really went down and we'll start doing that next week and um mike brought up some good points this was like a shock wave in the human consciousness that happened around that time and you pick up the ripples of it on both sides of that timeline on both sides of that moment particularly before i would say where there was all kinds of synchro mystic elements that were trying to point us to the direction of this is coming this is coming this event is coming and uh those ripples are interacting with us they're they're winking to us and you know i i like the whole idea of it being possibly a positive okay yes a lot of death and destruction happen and that those are horrible things and people should be held accountable for those okay but in in a wider sense i like a phrase that michael tesarion often uses did 911 shake you up or did it wake you up did you go down the rabbit hole as a result of this event and was your consciousness transformed i know mine was i know this opened my eyes up to a whole lot of things that they had been closed to before and they had been open to a lot of things even before that but this radically accelerated my personal awakening for sure so um even in the dark cloud there is that silver lining okay what are we going to do about it that's the main question are we going to just let this stand are we going to just let it go or are we going to press for truth as they say are we going to actually get this exposed by raising our voice and not being silent about it until those who are truly responsible are brought to justice so here we go caller you're on what on earth is happening welcome but i'm kind of curious about something and like everybody else on that terrible day i was shocked i woke up with a terrible echo and i didn't know what was going on and i turned on the tv but i didn't turn the volume up and i i couldn't find my glasses as usual i can't find my way when i wake up so i see it smoke on the screen but i'm trying to sweat to see what's going on okay that volcano in the philippines acting up again and then i turn on the computer and listen to my internet radio uh show and i heard this talk show said well we got attacked but we don't know who what are they talking about but finally i found my glasses and stuff i told and turned the tv on and there was the trade towers and billowing smoke now make a long story short uh years later they were so quick for muhammad after them going to the boston logan airport right here check in yes right now i'm kind of curious about something why they show one allows a clip of otto and his boy going to the security check-in well that's just the finger somebody has the patsy that's all whether he was on that plane or not you know he wasn't the mastermind be behind the entire thing they need to present somebody to the public to complete the psyop that's why they're just showing him there you know and that's supposed to be proof that he was the mastermind who orchestrated the the so-called hijackings all right now i've been hit in the league with something okay you ready sure all right they had to check in uh go to the lounge right for the airline like going to the american airlines once you don't got passed security you go to the check-in lounge and sit for a while okay right how come that sometimes your family members you know go to the lounge with you while you wait for the flight and everybody kiss each other say bye on ella and take pictures and photographs and everything of you going to the departure gates what even now i just hit you what i hit you with i'm not really sure the point how come the family members of those that got on the flight that watched on emma go to the gates i couldn't have a photograph or videotape of air battles in lounge and how come the lounge security cameras wouldn't you know uh on and showing everybody sitting down yeah nobody has never addressed this issue not even aj that that mr megaphone in texas is it possible that they were just there on their own you know but but this this this uh brings to to the point that these were actually the people who were really involved and not just fingered patsies which is really all they really were on that day because the real perpetrator of the event needs someone to blame it on so that they can justify the actions they're then going to take in the future we'll be right back folks don't go anywhere i'm your host mark pascio my website what on earth is happening.com i want to address a couple of things on this last segment by the way if anybody still wants to call in the number is six 866-841-1065 again we have about ten minutes left on the show tonight um i want to talk about building seven very briefly i didn't prepare any physics equations regarding that building but of course as we know this was the third building to quote collapse or essentially fall into its own footprint and it did fall into its own footprint on 9 11 at about 5 20 in the afternoon 2001. building seven is a key to this entire truth movement it's a key to the ritual to the occult ritual that took place and i'm going to be getting into that next week and in coming weeks we need to understand that first and foremost no planes hit that building people say it was damaged by debris falling from the other towers and fires but that wouldn't have caused the type of simultaneous and symmetrical structural failure that we witnessed with building seven and it could certainly not have caused a free fall speed collapse which for all intents and purposes ik people don't want to say it was free fall 100 of the time ladies and gentlemen 6.5 seconds 47 stores do the math it's free fall speed you want to say it was exact free fall for a few seconds or a couple of seconds during that fall whatever 47 stories high 6.5 seconds that's a free fall collapse that's a free fall fall the word collapse being used in conjunction with that building is an oxymoron because it certainly was not a collapse so i mean for anybody to buy that structural grade steel can collapse in that way i don't i i i just you're not even an adult human being that's the only thing i could say to you you are a child period you are in cognitive dissonance you want to be your own particular arbiter of truth as opposed to looking at the laws of nature and understanding how they work because the alternative is too fearful to you for you to embrace the real you would rather live in fantasy world rather than embrace the real and those are strong harsh words and to be honest with you they're not as strong or as harsh as somebody who if they were standing in front of my face and were telling me that building seven was a structural collapse what i would say to them in person and that this brings me to the to a couple of points one we need to stop being silent about this as a people as a whole because a whole lot more people that are speaking on this topic know that the official story is ridiculous a whole lot more that are opening up their mouths because they're still in fear about opening up their mouths we need to shed the fear of opening your mouth and getting up in the face of people who are in denial about this the universe is spoken into existence history always goes the way of those with the strongest voice you could say it a million ways but that's the truth the voice is the creative principle in conjunction with our care what we are teaching people what we are are talking about what we put our attention on is what manifests the universe is spoken into existence we need to get out there and not let this topic drop speak it more definitively more forcefully if we are not going to see the truth destroyed and in reality the truth can never actually be destroyed the truth is what is you're not going to really destroy that but it can be covered up it can be glossed over it can be essentially rewritten in perception in the minds of people and we cannot afford to let that happen the other topic i want to address is briefly unless we have any other calls waiting that people who think that this is what i want to do i i don't understand what else to tell them i hear this is your interest you're interested in that all the time i'm not interested in this folks this is a personal responsibility that i'm responding to that's it because i don't want to see this generation and future generations grow up in an occultic prison state this isn't what i want to do with my time sitting there for hours on end making presentations with boring physic physics equation in them when i could be having uh enlightening conversations with friends or going out or hanging out with my girlfriend or any anything else that i happen to want to be involved with making art making music whatever that's what i want to be doing with my time i don't want to be doing this but until more people actually take up the reins and take this up as a personal responsibility and start showing people whether they want to hear it or not speak it doesn't matter whether anybody's listening speak it anyway that's my advice when it comes to 911 truth a seed will be planted you can't unhear something dawn in oregon you're live on what on earth is happening welcome and what do you have for us thank you mark you know i'm just i just thank my lucky stars that you came to the other side i guess you'd say and i just think you're awesome i really i learned so much when i listen to your podcast and uh i'll never stop talking about 911 or anything else the government's up to that's right you have to you know i appreciate get rid of me so uh it for me to shut me up so that's right um yeah you know and and it's the elites have tried so long to dumb us down and they're doing everything and they hate us because we're dumb and it's the true definition of a psychopath honestly i i mean they hate us because we're stupid and dumbed down but that's all they do to us is mistreat us and oh it just makes me so angry anyway yeah thank you for spending your time you know because honestly you could be doing so many so many other things but with your depth of knowledge you're you're so awesome it's oh anyway well don thanks so much i appreciate that and it's all about all of us collectively uh raising our voice collectively uh coming to the defense of the truth getting the word out there and when we do that nothing can stop us that's what it's going to take but in order for us to develop that voice in order for us to develop that generative principle that actually creates the change that we want to see we have to develop courage see if we don't have the courage we won't come forward and speak our truth the part the part of the big puzzle picture that we can bring to the table because the the actual reality that we're living in is like a big huge puzzle picture that's been scattered into the darkness and each of us may have a little bit of a piece and we need to bring that piece out into the light set it on the table put the pieces together and then the big picture will come into view for enough people you don't even have to have every single piece we can't get lost in the details folks we can't not see the forest for the trees too many people fall into this trap when it comes to 911. we need to understand the generalities before we want to get into involved and argue about the specifics okay i'm not saying specifics aren't important they can be but to let that be a source of infighting and division is not the way to go when it comes to this we need to stand united about this and stay focused on the generalities that we know went down the way uh that we know didn't go down the way that the official story said see this is an apophatic methodology of getting it the truth to go and say this is what did not happen see that's what i just basically went about in this presentation here today with the physics equations i said these are the laws of motion these are how they work when you plug in all the weights and measures you understand it could not have happened according to the official story we arrived at the truth apathetically

What On Earth Is Happening Show #067

Topics: *Mind Control Methodologies, Chaos Sorcery, 9/11 As A Dark Occult Ritual*

we are back and you are listening to what on earth is happening I'm your host mark Cassio my website what on earth is happening calm and I'd like to direct everyone to the website because as is often the case with many of the shows that we do here on this broadcast there are accompanying images that go along with the the presentation that I give and in order to fully understand the concepts that are being presented you need to take a look at the imagery and this will be particularly important for the show today because we are going to be looking at deep occult symbolism as related to the 9/11 event and if you go to what on earth is happening calm and you click on the radio show tab of that website you will see listed right underneath the player images for today's show and there are 21 for today also the calling number for the show I will attempt to get two calls after explaining some of the concepts of the 9/11 ritual and that is indeed what it was it was a ritual conducted in broad daylight by dark occultists the call-in numbers again I'll try to get two calls in the second hour of the show eight six six eight four one one zero six five once again the calling number eight six six eight four one one zero six five call in whether you agree or disagree no taboo topics here always glad to hear from callers to the network so here we go folks we are looking at an example ultimately what 9/11 was ultimately about is an example of what I refer to as chaos sorcery now we looked at the concepts of magic and sorcery very early on in the one on earth is happening broadcasts and we defined them both as the science and art of affecting change in accordance with the will essentially that's what both magic and sorcery are however magic the key difference between it and sorcery is magic is not attempting to do the selfish ego driven will of the practitioner it is doing the higher will the will of creation which is the Ascension in consciousness of all beings and it is not attempting to do something selfish that the sorcerer himself ones that is what sorcery is when you're using this power to affect change in accordance with your own will in disregard for what is good for anyone else in disregard for what the will of creation happens to be that is sorcery and what we are looking at here is what I call chaos sorcery chaos sorcery is when other methods have essentially failed the sorcerer will take this trick out of his bag so to speak and employ it because it uses fear to the Sorcerer's greatest advantage if you can create a chaotic situation that other people are unaware of the real causal factors the real perpetrators the the real agents of this chaos okay they will react in fear as long as they are unaware and then that's a perfect opportunity to step in with your control that you wanted to implement but that the other people who this act of sorcery is perpetrated upon would have never allowed you to implement in the first place unless there was this other chaotic event that they had so much fear about that they want a response to they're crying out for a response do something and that's what the 9/11 event was all about and that's exactly how it went down the chaotic event the response do something in a state of confusion and fear and then the perpetrator stepping in to exercise all sorts of controls on our freedoms this is an example of mind control and chaos sorcery is indeed the fourteenth example the fourteenth methodology of mind control that we have outlined for exploration on this radio show so if you're looking at the images up on the website I gave a brief overview of chaos sorcery image number one was just the flyer for the Tesla energy independence celebrations which I hope a lot of people will come out to this week there's going to be a whole lot of information and you'll learn a whole lot you'll meet a whole lot of great people so image number two is simply an example of chaos sorcery 9/11 being an example of chaos sorcery now what 9/11 also is is an example of the usage of the Hegelian dialectic so images three four and five explain in general broad terms what Hegel's dialectic is Hegel was a philosopher and he put forward this basic framework of opposer opposing forces okay so seeming opposites that that instead of truly opposing each other create a synthesis which is what the practitioner wanted all along which is basically what I have described now Hegel's example of the dialectic can be used for good or ill it isn't to say that Hegel himself was an evil person that's a trap I think a lot of people fall into this is just simply a construct in philosophy that Hegel basically is famous for having developed and it has been coined the Hegelian dialectic after him so what the dialectic is is a framework for guiding thoughts and actions into conflicts that lead to predetermined solutions okay so this is exactly what we saw on 9/11 a seeming conflict between two opposing forces they're not really the forces that we're told that they are you know we're told that oh the the vile radical islamists Islamic fundamentalists in the East attacked the god-fearing Christian peoples of the Western world and that isn't what happened at all ostensibly that's what what happened in a lot of people's minds that's what we're told happened by the mainstream media but there's a whole lot more to it than that as we saw over the last couple of weeks here on this show looking at the inside job aspects of 9/11 two weeks ago and then taking a look at the impossibility of the physics of the so-called progressive collapse last week so the Galleon dialectic it sets two sides against each other and then an artificial synthesis is created this is accomplished by manipulation of consciousness that's the main thing to keep in mind about what this dialectic does it is the manipulation of consciousness and the two aspects of consciousness that are manipulated our thought and action and they are manipulated into circular patterns from which it is very difficult to escape that's why there's so much cognitive dissonance about this event that's why so many people don't want to believe that 9/11 didn't happen the way the mainstream media tell them it happened because it would require too much responsibility and action on their part so they would rather stay in that cyclical pattern of cognitive dissonance we'll pick this up on the other side of the break don't go anywhere folks you're listening to what on earth is happening we'll be right back after these messages [Music] welcome back folks I'm mark Pascoe and this is what on earth is happening this show is live every Sunday from 5 to 7 p.m. East Coast time on the Oracle Broadcasting Network we were talking about the Hegelian dialectic and how 9/11 is an example of this before the last break you can see the images that we are looking at as part of the presentation for today 9/11 as an occult ritual these are at what on earth is happening on the radio show page listed under images for today's show we were talking about the Hegelian dialectic being a framework for consciousness manipulation and how it is accomplished by manipulating people into circular patterns of thought and action okay and this is done through fear there has to be an injection of fear in order to do this the synthetic solution to the conflicts that the dialectic creates cannot be introduced unless those being manipulated take aside that will advance the predetermined agenda so there needs to be a response to say something must be done we are polarized it is us versus them just like happened after 9/11 and off to war we go and this continues we continue to fight amongst each other while the real occult controllers behind the scenes keep getting away with everything they're getting away with while we are asleep because we continue to see things as US versus them military versus civilian police officer versus the general public the left versus the right the conservative versus the Republican conservative versus liberal Republican versus Democrat you name it male versus female young versus old it goes on and on and on and on Islam versus Christian Muslim versus Christian we need to shed this level of duality and realize we are all in the same situation together and we're all losing our freedoms as a result of this manipulation the researcher David Icke among others has coined this dialectic problem reaction solution we're looking at slide number six here and it's all based in fear create the problem wait for the the reaction on the part of the general public and then propose your predetermined solution exactly as put forward in the Hegelian dialectic I call it chaos confusion opportunity that's my name for it because the problem has to be chaotic in nature it has to be something that instills fear the reaction that you're looking for has to be one that is based in confusion which as we've said before on the show is the state of internal anarchy meaning the person who's experiencing this reaction of confusion is not in control of their own thoughts and emotions they are not ruling the kingdom of the self and in that state their behavior can be manipulated out from from the outside okay they're open to manipulation if they're in an internal state of confusion and this is what nine eleven produced with its huge injection of fear into the mass consciousness finally that is the opportunity in that state of low consciousness of reptilian brain consciousness that the the masses were held in they were held in that level of thrall by this event they are ripe for the opportunity of the dark ocultist to step in and propose all of their solutions for the usurpation of their freedoms which they never would have gone for had it not been for an event such as this a cultist international banker David Rockefeller said that we are on the verge of global transformation all we need is the right major crisis and the nations will accept the New World Order and that crisis he was referring to was the 9/11 event or something similar to it or something even beyond it which we should be vigilant against today and that new world order that he's referring to is not the light new world order that I described when we went into the pyramid an all-seeing eye symbolism it is the dark new world order of the world without light the completion of that dark pyramid so the traditions that we are going to look at today at the before we even start looking at them I want people to understand that none of these traditions if you have not listened to former episodes and you're not familiar with my work and you have not listened to the episodes that I have already done on these occult traditions deliberately in advance of this presentation today please go back and listen to the podcasts that explain the positive elements of these traditions which I'm going to now explain was a a perverted usage of 9/11 was a perverted twisted usage of the symbolism an underlying knowledge that is contained within these three occult traditions namely Kabbalah Tarot and of course Freemasonry but people should not have in the idea in their mind that these traditions are negative or dark in and of themselves they are knowledge they contain knowledge it is what we do with them with the knowledge that they contain that determines their result in the external reality in which we live okay so if you want to go back and listen to the podcasts on Kabbalah and Tarot they were episodes 41 through 44 41 through 44 okay and the episodes on Freemasonry were episodes 52 through I believe 60 I believe it was 60 and there was much contained about Freemasonry up through 62 because we looked at the symbolism of the pyramid and all-seeing eye in there as well also on the the the show about occult symbolism and architecture which was show show 60 three there was a Masonic concepts introduced there as well so really the shows basically from 52 to 63 contain knowledge about Freemasonry and I would encourage people to go back and listen to all of these shows if they're not familiar with the occult traditions of Kabbalah Tarot and Freemasonry and how they can be used for incredible good being brought to the world because they are all about knowledge of self they are about knowledge of our higher selves and how to get to that knowledge and how to balance our brain hemispheres and how to open our heart chakras that's what these traditions are actually all about they're also about natural law being discovered and understood at a deep foundational level in order to base our behavior in natural law principles okay if they this knowledge is known by people who want to use it who still remain in a level of ego okay they learned it but they did not come out of the ego state while they did it okay they did not really master themselves their own thoughts emotions and actions they just learned this knowledge and then decided well there's a whole lot of other people that don't understand this knowledge I can use this knowledge that I have now to manipulate those people in their ignorance since I hold a differential advantage a power differential has now been created through this knowledge being conveyed to me but yet it has not been conveyed to them and that's what dark ocultism is light ocultism is one who says wow look at how much I've become aware of and how much it has helped me to improve myself and to come into harmony with natural law so I don't create chaotic situations for myself and others and therefore we all benefit and and we suffer less and we experience a rich experience of life more and now I want to teach that tradition to others so that they may do the same thing and then put that energy into the world so that the entire reality that we live in becomes better and better that's light ocultism the distinguish ment between these two forms of the occult must be understood it must be understood we cannot fall into the trap that all occultism is one thing it is how it is being used ladies and gentlemen we have to keep that understanding in mind before we look into this ritual of 911 and understand it as a perversion of these occult traditions pick it up on the other side don't go anywhere sorry folks we are back on what on earth is happening we're looking at the occult the esoteric side of the 911 event and we are going to attend I'm going to attempt to convey the understanding of this ritual which is what it was a ritual conducted a mass ritual conducted in the light of day for all to see of dark occult ISM and what this ritual contains within it is the symbolism of three major occult traditions Kabbalah Tarot and Freemasonry we're going to be looking at this symbolism in connection with a 911 event today now some people will dismiss this and say you're drawing correspondences where there are none okay and what I will respond to with that is one everything is connected everything corresponds to everything else this is the law of Correspondence the the principle of correspondence of as above so below that it's that which is within will be reflected in that which is without it corresponds to everything and these are well-known occult symbols that any occultist who is studied in these traditions will be able to look at and immediately see the correspondences of the 9/11 event okay the second thing people will say is well I don't believe in any of that stuff therefore it can't have any effect in my life and this what I always respond to that is you don't need to believe in anything for something to have an effect in your life okay you don't need to believe in a religion that some crazed lunatic that does believe in that religion acts upon and is acting upon those belief and causes havoc and chaos that affects you you don't need to believe in that person's religion I don't even understand where this concept comes from where this phrase to me it's pure mind control of somebody to utter those words you know it's like saying oh I don't have to believe I need it's like saying I need to believe in greedy people for greedy people to affect my life I don't believe in human greed that's not part of my worldview so greedy people can't possibly affect anything that happens to me in my life it's it's nonsense it's utter nonsense for anybody to even think that way it's it's a it's a complete mind control meme that's all that is the whole idea that you need to believe in a set of beliefs that other people are willing to act upon for them to have any effect over your life and utter bull is what that is it's bunk and anybody that still thinks that quite frankly they're an idiot and that's the most direct and blunt way I can put it if you think you need to believe in something for other people to act upon their beliefs and for those actions that have effect in your life you're clearly a moron okay so that's all I'm gonna say about that let's jump into the actual traditions that were perverted and used as part of the symbolism of 9/11 and what that is saying to people what it's doing in consciousness okay on an unknown subconscious level we need to bring this up to the conscious or the known level before anything really deeply can be grasped about what this ritual was about and then to really know why we need to take action about it that's that's what has to happen first and most people have never even heard of any of these traditions let alone studied them let know that they were employed on 9/11 so image 10 shows the three basic traditions we're going to look into in conjunction with 9/11 Kabbalah there on the Left shown by its main symbol the Kabbalistic tree or what is generally referred to as the sefirot ik tree of life okay and we broke this down extensively in the Kabbalah section of this podcast okay you can go back and listen to that the Tarot tradition and I've I will relate the ritual to a few tarot cards but specifically the one that it really embodies is the high priestess card card number two of the Major Arcana or the major Trump's okay that's the middle image on this card on this slide slide 10 at what on earth is happening the radio show page on the right hand side we see the first degree tracing board of Freemasonry of the free Masonic tradition this is a symbolic depiction of the Temple of Solomon I also broke this down extensively in the section on Freemasonry which you can go back in the podcast archive and download and listen to we're going to look at how these traditions symbolically were completely perverted on the day of 9/11 and ultimately what these what this ritual was about is destroying these traditions destroying self-knowledge keeping people in a low state of consciousness so that they are disconnected from the knowledge of the higher divine aspects of the self okay that's ultimately what dark occultism wants to do and they're succeeding tremendously because the positive sides of these traditions are almost lost to the world it's slowly making a reamer gence but not nearly fast enough okay so let's look at 9/11 to understand the symbolic nature of this event we most of us know that three buildings came down on in New York City on 9/11 okay some are still unaware even to this day ten years later that a forty seven storey reinforced building came down steel steel structured building really ok came down into its own footprint at freefall speed people will argue and bicker oh it was near freefall speed it was freefall speed ladies and gentlemen ok that building seven came down and now building seven also known as the Salomon Brothers building all right is the key to the 911 ritual we need to understand why that building was brought down when no plane had hit it and contrary to what some people will say there was no major structural damage that could possibly have caused a symmetrical collapse through the path of greatest resistance buildings don't collapse in that way when structural damage happens they topple in the direction that the structural damage impacted they do not come straight down symmetrically and simultaneous failure doesn't happen all the steel beams at once which would have had to happen if we if building seven were to have actually collapsed in the way we witnessed it collapse on 9/11 at 5:20 p.m. in the afternoon so we're looking at slide 11 showing the three buildings in New York City that collapsed on that day now look at slide number 12 and we will start to understand the connections between the buildings and the tradition okay now I have arranged the buildings in the same pattern that we see the three pillars of Kabbalah in on the Tree of Life the the Kabbalistic Tree of Life depicted on the left here okay is said to have three paths or pillars and they are the vertical oriented columns so if you're looking at the image on the left here okay the three spheres on the left understanding severity and splendor form one of these paths or pillars okay on the right hand side we have the path of wisdom mercy and victory okay the spheres called wisdom mercy and victory that forms the right-hand path or the right-hand pillar and in the middle starting at the bottom and going all the way up to the top we have Kingdom Foundation beauty and crown okay this is called the middle pillar and it is the key to Kabbalah it is the synthesis there's this word I'm going to use the synthesis between the two seeming polar opposites of the path of severity on the left hand side and the path of Mercy on the right hand side named for their middle spheres respectively okay so what 9/11 was about is the destruction of not just the two pillars the left hand pillar of severity and the right hand pillar of Mercy it was also about the destruction of the middle pillar because what this symbol represents is the climb out of base consciousness this Kabbalistic tree symbol is often referred to in the Kabbalistic tradition as the ladder to God la dee dee er the ladder to God which we must climb to come out of base consciousness or lower level awareness physically identified awareness meaning that we think we are the physical body that our consciousness inhabits in life okay we think we are this base matter and that is our actual nature as opposed to simply a vehicle for experience and the goal needs to be to climb out of that state of low level awareness of self which is called kingdom up to the crown which is true self knowledge and true self awareness higher awareness of higher self we'll pick this up on the other side of this break don't go anywhere you're listening to what on earth is happening here on the Oracle Broadcasting Network we're back this is what on earth is happening under host mark passio today on the show we're talking about the occult aspects of the 911 ritual it was a human sacrifice ritual first and foremost but moreover it was a dark occult ritual that was symbolically representative of the destruction of human consciousness and the destruction of the ability to ascend in consciousness that is what the dark sorcerers of this world want so that they can continue to keep us in under their thrall under their control in a state of mind control which ultimately equates to spiritual control by them so we're looking at image number twelve on the radio show page of what on earth is happening calm where we see the comparison between the Kabbalistic Tree of Life and the buildings that were allegedly attacked quote-unquote on 9/11/2001 of course this attack was done by a cultists that have taken over the government and essentially the planet Earth if we run want to really come down to it they run the whole show because we let them in our state of ignorance in our state of ignorance of self and as long as we remain there they will continue to rule this place and their grip will not be broken a moment before there is an awakening to higher self on the part of the people of the earth and that is a spiritual awakening so we can see the correspondences here the path of Mercy in kabbalah is the active path okay it is the path on the right there victory mercy wisdom this equates to using your will and using your influence in the world in a way that is conducive to the higher will and that is what wisdom is that is wisdom which is why that's the highest level of the path or pillar of Mercy and why that cephiro sefirah the sefirot number two okay why that Sethi wrote is called wisdom Hoke MA it is known as okay and that's why it is right next to the crown chakra it is number two whereas crown is number one that's unity consciousness we need to apply wisdom to get to unity consciousness to get to the state where we don't cause self-inflicted suffering to the light okay so this pillar is has a correspondence in the mail pillar of the 911 event or in other words World Trade Center tower one that's the tower on the left hand side of the image okay it's an actual reversal this is the way that the Kabbalistic tree is usually depicted but I have depicted it the way I basically laid these buildings out here because the the North Tower is the one with the antenna okay it's the male phallic symbol on top the one that lacks the male phallic symbol is the feminine pillar tower - okay so you have a masculine and a feminine aspect and then you're bringing them together to create a synthesis now everything we've done on this show pretty much has emphasized the point and has made the point how powerful that the communion between masculine and feminine forces is that that's the key to everything okay and that's why building seven I've placed it in the middle here that's the synthesis that's why this part is so important that's why that building is so important to their plan that's why I could not remain standing it represents the Middle Pillar from Kingdom or mal couth as it is known as in Kabbalah - or cat terror as it is known in Kabbalah okay and that to do that you have to go through foundation which represents desire and beauty which represents care you have to want it badly enough and you have to care enough to actually take the actions to do it okay now the the feminine pillar of severity represents the internal aspects of consciousness that represents our courage that which we have innately okay severity represents also the ways that we might interact okay with others that some people need a more firm guiding hand and not to have too much leeway with people who want to remain ignorant put it out there whether they want to hear it or not alright the truth that is and then finally understanding this is our own journey into knowledge we have to come to a place of understanding but that's an internal quality it's what I happen to know what I happen to carry within me until that is acted upon it doesn't become wisdom which is why wisdom is on the active side of the Kabbalistic tree or the path of mercy okay so this middle pillar is what building seven represented and the center of knowledge of higher knowledge is represented by the Pentagon building itself and that was even attacked okay perhaps not by a plane but by something and this is a psychological manipulation tactic to show you that even the highest defenses are not impenetrable and they got even there so imagine how easy it would be to get to you this is what this puts into the mind of the viewer to put them in deeper fear well if they can't even defend this with what they're doing now they need to do something far beyond what they're doing now see that that's the psychological manipulation game that goes on don't underestimate these people they understand how the human psyche works they understand people's motivations are they understand their fears their deepest fears they understand how much we are in fear of what we perceive as chaos this is one of the primal fears that they continually exploit the fear of predation okay so the the buildings particularly the three buildings of the World Trade Center that were demolished I won't say how they were demolished but they'd indeed were demolished by some unknown mechanism these three buildings represent three paths on the Kabbalistic tree and they were brought down into their own base into their base their own footprints okay because they symbolically represent the climb in consciousness I'm not saying that's what these buildings really represented in the real world they were office buildings they were there as commerce venues basically okay that's what was done in these buildings business was done okay commerce was conducted it's the symbolic relationship the correspondence principle that we're looking at here and this is what occult thinking is and people need to stop being dismissive of it and realize that the people who are really controlling your life think this way it doesn't matter whether you believe that accept it think that it's it's correct or right they I'm telling you they do I work with them and this is how they think so again I say the same thing to other people who don't want to believe me about the occult dismiss all this information at your own peril these are how your owners think this is how your owners think period period they think at this kind of a level and they know that if they put something out into the world that reflects this correspondence principle they have a better chance of enacting what they really want getting what they really want and that's why ultimately what this ritual is known as in occult circles is the of manifestation this is an attraction ritual it's the it's what the cultists use when other methods have failed to ultimately get what they want because they've tried to take all these freedoms for a while and weren't making the headway that they wanted to make so they needed a catalyzing event as they called it in the project for the new American Century document that we read two weeks ago rebuilding America's defenses this was the catalyzing event that they needed and that's why this is a law of attraction ritual they're applying the law of attraction in a dark hideous way in a perverted way to get what they want it's called the

Rite of manifestation all right a law of attraction ritual done in a perverted and sick and twisted way by murdering people in an act of human sacrifice in order to create a chaotic and confused reaction in the masses on the upside we're going to look at the Tarot tradition and how this was employed and then finally the free Masonic tradition when we come back don't go anywhere folks this is what on earth is happening tradition that ultimately what that tree represents is us and the chakra centers or the types of energy that in dwells within our own bodies moreover it represents the climb from base consciousness to higher consciousness which is embodied correspondingly in these energy wheels known as chakras in Vedic tradition you can go back and listen to the podcasts that deal with these correspondences again Kabbalah and Tarot I dealt with in the early 40s of my podcasts 41 through 44 they're all free and archived at what on earth is happening calm we're now going to start looking at the Eero tradition the tradition of the tarot cards and how this was employed on 9/11 and this may be the most obvious when we look at the symbolism of the event tarot-card 15 is the thunderstruck Tower often simply known as the tower well we had towers involved on 9/11 that were struck and were burning and this is the imagery that we see on the card and unfortunately many people did jump from those burning towers rather than face the smoke inhalation death that they would have had to endure so we see we saw images of people falling from a thunderstruck burning Tower on 9/11 and indeed that is one of the cards of the Tarot tradition and what that card represents you look into any decent interpretation of the tarot cards what that card always represents is great change often great change in the face of some form of tribulation forced change in many instances that is the interpretation of the tower trump card and indeed what did we see on 9/11 the day that changed everything about American life and indeed life on the planet forced change that came about as a result of a Great Tribulation okay this is how they are manipulating consciousness they are using tools that lie in the occult that lie in the knowledge of the occult and knowledge of self in order to create the circumstances that they want to manifest that's why it's I don't call it chaos magic as some other researchers do I call it chaos sorcery because they are not trying to manifest the will with a capital W the will of creation they are trying to manifest their own ego centric hatred driven control driven will lower it's double what they want it's darker pulposus [Music] we'll pick it up from the other side of this break folks don't go in here welcome back folks this is what on earth is happening on your host mark passio today on the show we're looking at the symbolism of the 9/11 event 9/11 as an occult ritual of human sacrifice and the destruction of consciousness we were on image number 14 looking at the thunderstruck Tower card of the Tarot tradition and how this completely corresponds to imagery that we saw and that was burned into our collective memory on 9/11 2001 if we move forward to image 15 we will see once again this correspondence of three pillars and again with a sphere of knowledge or a center of knowledge above the middle pillar okay as we saw in image 12 with the Kabbalistic Tree of Life we have the two paths or pillars on both ends representing the feminine and masculine paths the internal or the Sacred Feminine and then the external or active or masculine and then the synthesis between them in the Kabbalistic tradition representing the Middle Pillar okay the path of mildness as it is called some refer to it as the path of the will okay going from the base all the way up to the crown okay from Malkuth to katare and the crown representing ultimately knowledge of higher self there is also that non Sapphira known as dot which we talked about in the Kabbalistic tradition which is between the Beauty spear or TIF eret and the crown sphere which is called Qatar this is one of the places that the tree is said to emerge from the realm of hidden knowledge okay so there the the pen - gun could also be representative of that okay and we will see on this image we have something that reflects the the veil of Isis or the the non Sapphira okay the the thing that is said to not be spoken of in Kabbalah as one of the actual spheres where emanations on the tree but it is something altogether aside from that and that is that the dot spear so this also takes us to the name of 911 again just before we proceed with the high priest this card 911 as I've mentioned before on this show the name of the ritual 911 comes from one of the prescriptions in the Zohar one of the books of the Kabbalistic tradition not to refer to the sefirot ik Tree of Life as containing any more or less than ten spheres or emanations this is considered blasphemy to refer to it as having nine spheres which is one less than ten or eleven spheres which is one more okay many warnings against changing ancient sacred traditions or texts often come down to us through these traditions don't change the wording don't change the the form because this is ultimately something that is basically saying there is such a thing as natural law and if once we get into them the thing is the trap of trying to change that and conforming it with our will we are going against the divine order of things okay there is a divine perfection nest nested in natural law it always works and it always works perfectly and sadly I'd like to say that it's some other way but humanity is getting exactly what it deserves and exactly what it created we are experiencing what we ourselves have created it and actually that's the good news because the good news is we're the ones who made it we can unmake it and make it into whatever we want but if we don't understand that that's impossible and ultimately that's what these traditions are all about and showing us that the truth has to be the thing that we are trying to synthesize amongst each other and this is going to come to one of the other aspects of the ritual why we now have a war on terror terror okay but they never say terror okay it's always this slurring of it and that's deliberate that's actually deliberate because they're waging war on the goddess make no mistake of it and this is why we have a 9/11 truth movement what we'll get into this on in this section okay here we see these two pillars again on both sides the pillar of bow eyes or the dark pillar marked with the B sometimes known as the pillar of beauty the pillar of jackeen sometimes called yakeen okay this is the masculine pillar or sometimes referred to as the pillar of strength but in the middle we have the goddess this is Isis this is Semiramis this is Mary this is a start a this is Diana we can go on and on and on with the names okay this is the Spirit of Truth this is the Sacred Feminine that dwells within us all that if we are going to harmonize with natural law we have to come to an understanding of truth and raise our consciousness up to the point where we can tell truth from falsehood so this is why this she is representative of building seven folks the middle pillar again this is why they couldn't leave it standing truth would remain standing again the ladder to consciousness which is what this goddess principle represents it's symbolic it represents harmonizing with truth the synthesis between the male and the female coming into harmony with truth coming to an awakening of higher self of who we really are this is what this sphere on her head represents this is the Dobbs fear and you see the Tree of Life embedded right behind her on her veil which has to be penetrated which we have to come to know we need to penetrate the veil of Isis as it is called this is going deep deep down into the center of the self the journey to the center of the mind to the center of the human psyche to come to know oneself what one truly is what one truly is not so the the tree of life is right on the pattern behind her there because Kabbalah and Tarot are completely interwoven again she is the lunar goddess the lunar side of the consciousness the internal aspects she holds the Torah the law she is natural law dark occultists don't want natural law standing they don't want the truth known about the nature of consciousness and reality they want to destroy it they want to bring all of this down this she is sits in the Temple of Solomon the balanced brain the Sun and the moon coming together in synthesis the left brain hemisphere and the right brain hemisphere we've looked into all of the symbolism on past shows so this is a very brief review of complex symbolism that has prerequisites for understanding namely what how the human brain is structured it's all in the podcast archives folks it's a journey in knowledge start at the beginning we see the Kabbalistic tree right behind her in the pomegranate that is above her head represents the katare crown chakra okay they want to destroy the truth they want to destroy natural law the dark occultist this is why they had to bring down all three of the buildings not just the two towers but building seven be referent which represents symbolically the God's truth natural law connection the higher-self are you getting the debt folks I hope this isn't in vain you're still with me let's continue this on the other side this is what on earth is happening we are back this is what on earth is happening on your host mark passio we're looking at 911 as an occult ritual today on the show the images for the show can be found that what on earth is happening calm on the radio show page we're looking at image number 15 911 corresponding to the Tarot tradition we're looking at the card called the high priestess trump card number two of the Major Arcana we see that this priestess represents truth higher consciousness natural law the Sacred Feminine all things that the dark occult is want destroyed she corresponds to building seven in the ritual and that's why they could not allow that building to remain standing her name is many throughout history okay I mean you can go on and on about the names of this goddess but one of the oldest names that she was ever given in the ancient Eastern traditions where the goddess worship the goddess principle was held in high reverence was Tara t-ara now this morphed over time phonetically as it came as this name came through different traditions in Egypt she was towered in the Middle Eastern tradition she became known as Tarrou and the name truth is a phonetic variant of tar roof therefore that is why we have a war on terror again she is the goddess of the earth the earth is named after her she is Gaia also scientifically the earth is named Tara ter RA Tara as in we're standing on terra firma firm ground firm earth which the truth must be based upon firm ground fertile ground she is the goddess of fertility we have a war on the people of Earth if you're not with us you're with the terrorists you're with those who stand with the goddess of truth and wisdom and natural law you're with the people of Earth so what does that mean I don't go into that at least not yet anyway on this show because many people are not ready for that but you can insinuate a few things about what it means calling people the people of the earth and I'm at war with the people of the earth is what the dark occultists are saying so what does that leave you to conclude about them ultimately in every way that matters they're not fundamentally like us ladies and gentlemen that's all I'll say at this point they're psychopaths they don't have basic human emotions like we do and they want to murder this goddess and they do it all the time symbolically and this is another symbolic goddess sacrifice ritual we saw many examples of them in the past Columbine High School Virginia Tech all named after the goddess the Columbia Space Shuttle disaster named after the goddess and the war on terror as George Bush phrases it phrased it the war on the earth is what's being waged make no mistake about it and that's only possible to wage that war once you destroy the truth which is what is being represented here this is why we have a movement to tell the truth about 9/11 to get to the truth of it to penetrate that veil of see and cover up it's called the 9/11 truth movement look at the next card the next slide image number 16 anak again taro being invoked we see the two towers in the background right and the Sun is setting between them and this is because this is the death card the Egyptians called dying Westing the land of the Setting Sun going to the land of the Setting Sun out of manifestation into the void and here we see death the rider on the white horse with his black flag which is an inverted pentagram uninvited rose pentagram that's very significant we haven't begun looking into the Rosicrucian tradition either but this is certainly representative of the dark aspect of the rose and the order of the Rose is a high-level dark occult order that needs to be understood ultimately death this rider who comes wanting to take over everything okay we need to understand the order of death what that is as well ultimately it is the representation of this the entire dark occultists the who I would refer to as the dark illumine Aries okay the dark Illuminati who are using occult knowledge to pervert and control people all right keep him in a state of base consciousness death is riding down he is killing a king whose crown is on the ground okay and a Pope the Pope is still standing but he's cowering in fear asking for leniency the people are on their knees worshipping death already okay and he's getting ready to run down the the religion as well because this represents the unification of church and state which is what the dark occultists are seeking see the Old World Order is royalty / religion reigning the New World Order is government as God the Old World Order's on its way out because we don't think of royalty as actually in a position of rulership although those of us who really understand bloodlines know that it absolutely is in positions of rulership still to this day and religion the priest class ruling okay that's the old world order the new world order that they want to bring in is the unification or synthesis between these things in the form of government as king and the controller of the new religion government as the new religion the thing that binds us that ties us back that holds back human consciousness we understand the word religion coming from the latin verb relig are a meaning to tie back or to hold back they want to run down these two pillars and erect the single one in its place government as total authoritarian dictator or essentially as God the inverted Spirit is the flag or the banner that is carried by this force representative of the inverted pentagram and the black rose the dead rose say the antithesis of rising having risen or rose this is the inability to rise the inverted pentagram thrusting the spirit into the ground crushing it between the forces of materialism identification with the physical world is what it represents and that represents the light going out setting between the two pillars how much more symbolic can one card be of every we witness on that day in this event I mean that card speaks volumes volumes on the other side of the break we will look into 911 connected with dark masonry not true freak masonry but the perversion thereof don't go anywhere folks this is what on earth is happening welcome back ladies and gentlemen this is what on earth is happening on your host mark passio continuing with the imagery of the occult symbolism employed on 9/11 2001 as part of this human sacrifice ritual conducted in broad daylight by Darko cultists we see an image number 17 of the slides that are presented on the what on earth is happening radio show page at what on earth is happening calm an obvious correspondence for anyone who knows anything about Freemasonry and here once again we see the three pillars corresponding to the three buildings of the World Trade Center and the symbol of knowledge again the all-seeing eye radiating the light corresponding to the Pentagon the first degree tracing board which is here in image number 17 is representative of the Temple of Solomon which is basically the human brain the left and right brain hemispheres that need to be merged or synthesized in order to create balance and awakening okay this is the key that is depicted there the path to higher level of knowledge is the balance between the left and right brain hemispheres and this is what grants access up the ladder that's referred to as Jacob's latter in free in the free Masonic tradition and to the Stargate or to the Sun and the all-seeing eye okay it takes us out of darkness and into light out of base consciousness represented by the checkerboard floor of the house and to higher consciousness represented by the all-seeing eye and the Sun okay the realm of the gods to go beyond the earthbound awareness the prison that we have created for our self through identification with the material okay so once again the ritual is about the destruction of these pillars because the occultists who who conducted this ritual and ultimately planned it and all of its symbolism want to see the destruction of Jacob's Ladder they don't want Jacob's Ladder standing on the middle pillar to grant access to higher levels of consciousness through the key which is balanced and care the heart chakra represented by the color green the second degree initiate they don't want that they want people remaining right here in base consciousness depicted by the lines of latitude and longitude of the earth the prison that they've created for Souls we saw this symbolic connection when we looked into Freemasonry and analyze this tracing board in detail the checkerboard floor ultimately represents the earth as a prison if you turn sideways to the right you'll see that the pillars represent the tropics of cancer and Capricorn and then the middle pillar of course represents the equator the point of balance so ultimately what I can say is that the occultists who conducted this ritual won all of the positive occult traditions and their understandings destroyed from the face of the earth they do not want anybody to know what these traditions really originally meant they want that knowledge gone to anybody but them and in doing that they will be able to perpetually control people's minds because people will never really be able to get to a deep fundamental understanding of human consciousness and how that consciousness could be manipulated through the knowledge that I've already explained in former podcasts of who we really are what consciousness actually is how it expresses through the thoughts emotions and actions and how we have to take ownership of it and that's all we're allowed to own and control is our own thoughts our own emotions and our own actions and I've said that a million times and will probably say it a million more moving on to slide number eighteen okay well building seven again real quick before we do that represents again the ladder to the higher realm okay Jacob's Ladder being brought down at the end of the day okay they're at a higher level of consciousness these darker cultists they know what's really going on they just want to use that knowledge as a weapon once they're up in their lofty Tower that they're ruling everything from they don't want anybody to get up there and see how they're pulling their tricks and pulling their tricks off and you know winning the game so they need to cut the ladder off nobody can follow them up there and see how the magic trick is done they don't want anybody climbing in consciousness climbing Jacob's Ladder climbing the ladder to God so they had to bring Building seven down at the end of the day because that's what it symbolically represents image eighteen I show that the three pillars again in this symbol of Freemasonry with the two pillars the terrestrial and celestial globe and then the middle pillar represented by Hiram Abiff riding again the fertility symbol of fertile ground of the great work he is the Prima Materia the first matter okay who needs to come up off the floor of the house through connection to the truth taking his blindfold off okay the blindfold is twofold symbolism it represents the blinder of the material reality that needs to be taken off but it also represents becoming blind to the material world and seeing with the true I not seeing with the dual eyes in duality but seeing things through the one eye the all-seeing eye and ladies and gentlemen this is what this symbolism represents it's not really even my interpretation I'm telling you this is how this symbolism was intended by the people who made it I'm just explaining the interpretation of this symbolism and what it actually represents this is why they choose very specific symbolism there's a known meaning to this in occult circles and practice and this is what it represents Hiram Abiff represents the connection to the spirit of truth again as we saw on the tarot card it's the same meanings it's just different interchangeable symbols on the tarot card they're basically using these pillars but they're putting the goddess there well this is what Hiram Abiff represents this it's the same principle its awakening to the truth its awakening to higher consciousness and the true true awareness of the higher level of self that's what it is about that's what the the goddess on the tarot card represents that's what Hiram Abiff represents in this symbol now I'm going to connect that in with the Egyptian tradition now on the side you see and I mentioned when we looked at the first degree tracing board that we have to understand these symbols also as symbolic analogues these pillars are symbolic analogues to the big towers that were built in Egypt the pyramids they are analogues to those symbolically so the traditional Freemasonry of Kabbalah of Tarot did ultimately originate in a and commit Egypt this is where they were practiced they may have caught they may have you actually been invented in much older traditions but they were practiced and preserved in comment' okay and these pillars or monuments these pyramids were built as symbolic analogues to these concepts not just physical buildings but trying to tell us something about the wisdom and abilities of the ancients that is long since forgotten in the modern world we think we're so advanced we're on the cutting edge of technology and human development and nothing could be farther from the truth humanity wasn't always at this low level of consciousness ladies and gentlemen we have been at Heights before and the occultists do not want us to understand that and to reevaluate and rediscover these lost civilizations because they know the transformative capabilities that we would begin to rediscover were we to rediscover these ancient traditions and civilizations and that's why they want you to believe the official stories when it comes to those as well oh these were just primitive people cutting immense stones with copper tools sure right and and and no higher level physics were was understood to do this feats that we still could not accomplish to this day and no one is going to tell anybody that we can't accomplish something like the pyramids because there is no cutting or placement technology that could accomplish that with stones and the people the engineers who have tried have made a mockery of themselves even to do a 20-foot tall pyramid they could not place the stones with the Precision's of these so-called primitive ancients so when we look into the layout of the World Trade Center moving the image 19 we see that there is a symbolic correlation to the pyramids [Music] we'll pick that up on the other side this is what on earth is happening don't go anywhere folks I'm gonna wrap this up and hopefully get to take a couple calls in the last segment stay with us [Music] welcome back ladies and gentlemen this is what on earth is happening I'm going to attempt to wrap up the presentation on the occult aspects of the 911 ritual today we'll be looking into the gematria of 911 next week the occult numerology so we were looking at image number 19 before the break showing that the layout of the World Trade Center is actually a symbolic correlation to the ancient centers of initiation that the great pyramids were so we have the two great towers okay the Pyramid of Khufu and Khafre as cowers one and two and we have building seven representative of the Mancari pyramid the ancillary pyramids around the major pyramids are the smaller buildings of the World Trade Center complex and again this is another reason they want to destroy these buildings symbolically what they are laid out to represent initiation the beginning of the journey to higher levels of awareness they don't want that they want the ancient mystery traditions destroyed so that they don't want people having that knowledge in any wider sense because they would awaken and they would not be able to be controlled if that were to happen if everybody on the earth understood what I understand about consciousness and understood the aspects of the occult that I grasp being totally correspondent to the inner qualities of the self no one in the world would be able to be placed under mind control and controlled they would not have they would not be able to have their behavior controlled through someone else and that's the greatest nightmare of the dark occultists who conducted this ritual image number 20 I'm going to briefly explain some biblical correspondence to the 911 event and there is biblical correspondence as well the image to the right that you see is a depiction of a man that was dreamed about by the Babylonian king Nebuchadnezzar and this story is told in the Book of Daniel Daniel is a book of time gnosis in the Bible people just generally refer to it as a book of prophecy but it's actually more than that Daniel is depicting essentially wave functions in time that progress and have ripples in them to show us points in the past that we could pay attention to that would give us hints about what's possibly could be going to to occur in our present these are windows of opportunity or moments that we can seize to create change in ways that we want them to change wave functions of time many researchers get into this we'll look at that a little bit when we talk about getting out of time bound awareness as part of our solutions section but this image is the gold headed man of the dream of Nebuchadnezzar from the Book of Daniel and Daniel interprets his dream and basically tells him that this represents the power of the kingdom that it begins as the gold head and then eventually weakens in power and he's meaning powers of kings of men okay now symbolically we could look at this as well we need to move toward is that gold head which is the actual awakening of the mind but that's not how it's meant in the interpretation of the dream it means the kingdom that is ruled by men being the most powerful when it is unified at the head one ruler a monarchy the synthesis the Dark synthesis I should say between a king and a priest external worldly power wielded and spiritual power wielded spiritual control the synthesis of all forms of mind control the belief and authority and the belief in religion not real actual high level spirituality or truth but religion belief unified with the concept of authority the state which is what the New World Order represents and this is the Old World Order as I've already talked about they want to get back to it because it's been weakening in its control minds have been slipping out of their grasp and they don't like that so the weakening represents the adulteration of the gold down to silver and then bronze the upper and lower torsos then when you finally get down to the legs it becomes iron okay what steel starts out as till it other alloys strengthen it and it becomes steel well these are what the two twin towers represent the legs of this Babylonian gold headed man finally the the the feet are clay which represents the breaking up of that power and truly the individual pieces of that break up becoming sovereign maintaining the power to stand on their own feet by themselves and they don't want that they want all of the power in one centralized place one dictatorship that's running running the right in the left side of the body the right hand in the left hand this is an example of the dark Hegelian dialectic or dark synthesis as opposed to true positive synthesis the coming together of the masculine and feminine to open the all-seeing eye so they need to destroy these towers because they represent the weakening of their control system and what are they going to build in place where two towers once stood they're going to build one and they're lovingly going to call it ladies and gentlemen the Freedom Tower isn't that wonderful the Freedom Tower because and it's very appropriate we would be talking about this the day before fourth of July which half Americans out there don't even know what it means anymore why it was originally celebrated it's very appropriate that we should mention this right before this so-called holiday where we celebrate our freedom our independence when there's nothing of the kind really going on controls are being tightened more and more and more and they're moving ever closer to the completion of their one world United order of state and religion under one centralized authority the New World Order as it is referred to as the dark New World Order as I call it well I'll leave it there we have time for a couple of quick calls here we go you're live on what on earth is happening we have very little time what do you have for us mark thanks for taking my call it's Bob from Cincinnati you you have the floor till the end of the show go right ahead oh you're too you're too kind mark we all thank you for initiating us into the mysteries this knowledge is blowing us away this this comparative of the the man with the clay feet and the two towers of steel as his legs beyond reality Marcus you know the ancient nobility has never left power they fooled us at the end of World War one that the nobility had left power that the the Monarchs had abdicated however they laid dormant and as you know they are still in power behind them of course as you know sir is a nefarious priest class as you pointed out in one of your earlier lectures the power behind this dark New World Order lay in Rome very dark mark and the last thing the symbol of this ruler priest class you pointed out was the king man lincoln sitting on his throne in washington DC yes also symbolized in masonry by the crown with the cross through it sovereignty mixed with the religious power thank you Mark Bob always a pleasure to hear from you always bring up great points and a lot of food for thought for other people so I want to thank you for calling in well we have about one minute left on the program let's see we have one other caller I believe here we go caller you're on what on earth is happening you can take us out yeah I just about the way people are thinking about things maybe it's counted too you know weights and measures about you know even quantity versus quality that's important yes but you know I think the thing for focus are absolutely there we go folks that's all we have time for tonight hope you've enjoyed the show hope to see as many people as possible out at the Nikola Tesla energy independence celebrations coming up this week and into next weekend we'll see you next week right here on what on earth is happening tonight folks [Music] you

What On Earth Is Happening Show #068

Topics: *Nikola Tesla Energy Independence Celebrations 2011, Frater X, Free Energy, Unity Consciousness, Resonance, Coral Castle, Ed Leedskalnin*

freedom man that's what it's all about [Music] [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host Marc Pascal [Music] welcome one and all you're listening to what on earth is happening right here on the Oracle broadcasting radio network I am your host mark passio my website what on earth is happening dot-com the network's website Oracle broadcasting dot-com today is Sunday July 10 2011 today is the 155th birthday of the great inventor and humanitarian Nikola Tesla and I have just actually now within the past hour less than an hour come in from the third annual Nikola Tesla energy independence celebrations here in the city of Philadelphia and it was an amazing event this week and weekend I have to tell you folks I'm exhausted mentally and physically it was a challenging event we had such a great time we hosted a whole lot of phenomenal scientists electrical engineers physicists you name it energy healers people who have great applications of advanced technologies having to do with Tesla technology we did outreaches to the public we're going to talk about this a lot more tonight I know that last week I had promised everybody a show on the continuation of the topic that I opened up last week which was the occult aspects of the 9/11 event which we began last week and we looked at some of the occult traditions in connection with 9/11 and I had told people last week on the show that we were going to look at the gematria or the occult numerology that was involved in the 9/11 event this week but unfortunately I was so busy with the my responsibilities for helping out in the organization of the events this weekend with the Tesla energy independence celebrations that I did not quite have a chance to prepare the show on 9:11 gematria so instead we have a very special treat coming up for you during the the next couple of hours we're going to recap the events over the past weekend and I'm going to bring on a very special guest in the next segment you won't want to miss it and I'm sure people will have a strong reaction one way or another who my guest is but this gentleman joined me at the Tesla event this weekend and it was a pleasure to spend time with with him and his family we mutually shared a whole lot of information I know I learned a lot from him and we're gonna get his thoughts on the events of the past weekend at the Tesla energy independence celebrations here in Philadelphia so stay tuned that's going to be coming up and we'll recap the entire event when we come back on the other side of this break which is coming up so for anyone who wants more information on the Tesla Science Foundation I encourage everyone to check out their website which is WWF and asian' org a great group of people everyone should become involved to bring the works of the great inventor Nikola Tesla to fruition and no better day no more fitting day to be talking about this than on this birthday [Music] alright ladies and gentlemen we are back here on what on earth is happening on this one hundred and fifty fifth anniversary of the birth a great scientist and inventor Nikola Tesla Tesla was born on midnight between July 9th and 10th in 1856 and he did so much to move the progress of humanity forward we honor him on this day no better day no more fitting day than I could be doing a broadcast than on Tesla's birthday this year so without any further ado we're going to go live to our special guest who is on the road he is heading back from the Tesla science conference he was just there with me earlier today we were having a brainstorming session on the 32nd floor of the Liberty to tower here in Philadelphia where the Tesla science conference was happening and then we got a chance to check out one of the great lectures the presentations there in the conference room joining me is a fellow radio talk-show host a fellow internet talk show host his show is broadcast on American freedom radio and it is called Radio Free humanity live from the road heading back to Massachusetts after visiting the Tesla Science Foundation's energy independence celebrations this weekend ladies and gentlemen please welcome - what on earth is happening my special guests for the show today freighter x-ray right March I am thank you greetings to you and friends of Mark and all the listeners out there well it's a pleasure to have you on it was a great time getting together with you and having a chance to hang out and share ideas this weekend why don't you just begin in with telling the listeners what you thought of the overall Tesla energy independence celebrations this weekend give them your thoughts your impressions talk a little bit about what you liked about the conference talk a little bit about what you shared with people there maybe what you learned and we'll go from there okay great well you know first of all let me just say thank you to you and to all the people involved in the the Tesla Science Foundation for not only welcoming myself and my family down to Philadelphia and making us feel so welcome there but also simply for putting on this conference because you know I think that it's just so exciting you know I mean what an important event to be involved in just to attend and soak up the knowledge and wisdom that was being laid down there everywhere I turned it was amazing to me you know it was like a quickening and I don't yeah I felt overwhelmed I didn't know which way to turn and I wanted to get everything you know it was just like everywhere I looked it was a smorgasbord of knowledge and an experience and people's inspiration you could really sense how inspired everyone seemed to be and they were really excited because you know it's like particles are the same charge coming together you know I mean that was one thing I felt like I felt like a particle charged in a Tesla coil field you know there was a real quantum reaction this weekend just eggs are far-reaching yeah they're far-reaching and we're still still yet to be realized what do you say mark absolutely the the caliber of minds that were present there is just not enough can be said about it and I'll tell you a little anecdote about what happened to me on the second day of the conference and this is a four-day conference which is pretty much long for anybody I have a pretty high tolerance for the intake of information I could pretty much go with the best of them as far as that is concerned but on on Friday I came home after the brainstorming session that we had on Friday on the 32nd floor of Liberty to and after the event there on Friday there was so many ideas flying back and forth and I'll tell people about the brainstorming session that we did have there and what it was about as we as we progress along on the show this evening but afterward so many ideas were flying through my mind that I just felt like I was on overload that I couldn't even process it like that I had to just go into the void I guess you could say to just let things sink in and I I decided I was going to lay down for 15 minutes and just you know just recoup for a little while after I came in and I went right out like a light and I didn't wake up until about 5:30 in the morning then the next morning and I had to get up to do some preparations and that was barely enough time to do them I did get them done but I you know basically stayed up from that point forward till the next day but I never go out like that like a light and just stay out on it's not that I'm a light sleeper either but my girlfriend barb said a few times she attempted to wake me up even to eat you know for because we really had an eaten dinner when we came home from the conference and I didn't even want to wake up to eat which is highly unusual for me so it just seems like there was so much energy going on and it was so much to process that it was even you know a lot for people who could take a lot of information in and it's like my body kind of responded to that right in the middle of the conference there and uh with a need to have to rejuvenate at a very deep level so I thought that was pretty interesting but you're absolutely right Frederick's on the caliber of minds and the the synergy the the synergistic energy between people at this conference was just off the chart yeah it was really like next-level stuff and like you said you know coming into contact with this information is not unlike you know an upgrade I mean you need you need time so if you let it soak in you know I mean there's so much coming down and if you know that it's dynamic knowledge because it feels that way you know you can Intuit that what you're dealing with here is the next-level stuff it's be redundant but one of the most exciting things that I came into contact on Saturday night was that the ethical Society award ceremony and the cerumen ensemble concert it was amazing but the speaker dr. Prabhakar the dead his name prophets yes yes from from University a lot of times I grabbed Michael prophet say yes dr. Michael profits up a physics professor who gave the most astounding I think what we could call a recap of Tesla's impact on our culture on our species on the world and one of the most profound things he said in that talk was when he looked at us all and said you know a hundred and fifty-five years ago Tesla invented polyphase dynamo right or yes the yeah the engine that little dynamo electric motor right and you know what other adventure he said a hundred over a hundred and fifty five years later the invention remains the way it was invented besides like the wheel inventor he said I mean that's how potent an invention this was yes Tesla's and so you know life is still have an impact in every corner of the world in every area of our lives all the modern technology we take for granted would not even be possible hadn't had Tesla not developed the the theories and the systems that he did to make possible that the driving of all the other pieces of technology that we use all around us absolutely you know and I mean that's the one message that I think came through loud and clear this weekend you know we're talking about this man I mean I think it was important for some of the speakers who spoke about the tragic side of his story I know you you addressed that some up but also other speakers who who really focus on you know that's left the the tragic side of The Chronicles of his life and clearly the the manner the depth of the travesty committed against humanity by the moneyed interests who stood opposite of him opposed his you know I mean the fact that the man died alone and penniless and couldn't even in the last years of his life afford the patent applications for inventions it's like you know it's an injustice I think that's all statement to say the least we'll get right back to that story on the other side of this break you're listening to what on earth is happening with my special guest fray Rex don't go anywhere folks we'll be right back hey this [Music] we're back folks you are listening - what on earth is happening I am your host mark Cassio my website what on earth is happening dot-com we are recapping the events of this past week the Nikola Tesla energy independence celebrations here in Philadelphia hosted by the Tesla Science Foundation their website Tesla Science Foundation org and it was a tremendously successful event scientists from all over the country came in inventors enthusiasts we had a great celebration at Independence Mall park just outside the independence Visitor Center here in Philadelphia I'm going to be talking about the the spirit of Independence that was underlying this entire event and the the entire weekend and I'll be reading the Declaration of Energy Independence which which the Tesla Science Foundation has drafted and put forward which is a declaration of free energy for all humanity and how that is our birthright as a species because this is what is being held back in this controlled and limited and polluting energy paradigm that we are we are stuck in and we are addicted to and that we need to break those thought patterns and those habits in order to to truly break free as a species so with me today coming back from the Tesla science conference and the energy independence celebrations is fraida Rex he is still on the line Frey directs let me ask you another question what did you think of the phenomenal concert that was put on by mano de vino' and the divine hand ensemble why don't you tell people a little bit about that because I know you were there at the ethical Society for that and many people aren't familiar with the theremin why don't you give them your impressions of that instrument in that great orchestral ensemble that you heard yeah first of all let me say I was most impressed by that entire Pete that the piece that did and the performances the explanation that the leader of the ensemble what was his name again his name is mano de vino' it's actually Latin were dividing in so it's kind of a stage name but he's just a brilliant individual and very eloquent and he just gave a phenomenal presentation on the theremin instrument yeah that was very clear that he obviously is a brilliant individual I mean he just he comes across yeah just amazing and that is his posture on stage the performance it was fascinating the way I've never seen a live performance of a theremin and you know for any of your listeners that aren't familiar with the invention that was Leon theremin invented the device yes didn't you say during this during his talk last night that that the the principles behind the theremin were originally based on a burglary alarm or anti burglar defy us yes yeah any talk about how it's a double antenna system where one acts as a pitch shifter and the other a control function a volume function and it's just amazing how it's put together and it's amazing that it's the only instrument that's played without actually touching the instrument your

your body just simply interferes with the capacitance field that surrounds the instrument and it's so specific it's so sensitive that he was telling people there that even his breathing patterns can have effect on the pitch of the instrument that's how sensitive it is and how difficult it can be to set up and get the tonality just right so he stands almost completely statue-like still with statue-like stillness on the stage while he plays and only moves his hands while he plays it's truly amazing to see it done and he's really a virtuoso with this instrument well that was the that was the impressive part the you know his posture his concentration I mean you could really see him he's breathing everything became a part of that performance I mean he was so involved in it and then the finesse and the subtlety and the elegance of his movement along with the string ensemble behind him it was just it was so rewarding as an audience participant it was such and I know that my wife was so moved by it not only did you know the instruments and the sounds but also the pieces that they chose sure because you know that they were really unique pieces I think that that really each one of those each song that they did I think conveyed a message you know I really brought something to us and one of the things that I found and when I'm looking back on the entire experience I'm sure the average participant in this conference would agree that one of the main unifying themes that you find in this whole entire endeavor involved with Tesla and other inventors like Tesla theremin and others you have the realization that we are surrounded by an energy field that is completely invisible that we are a part of that our bodies are a part of that picks up on every move every sensory perception that we emit into this field has an effect now sensible effect imagine if it says that's unquantifiable I'm qualifiable bystander you know five senses perception when you hook up you know the Karelian yeah camera or any of the other devices that will pick up the changes you realize we're opening a whole world a metaphysical reality that proves that more to this reality that we are privy to and one of the speakers today Anya Petrovich which was giving her lecture as I had to leave the conference to come to come back to my home to do the show here today was talking about this this field this field that we're constantly interacting with that we are changing information with that we are sending data to that field that is sending data back to us we're constantly moving back and forward between that field she was talking about the this new camera system that they're using for heat energy healing work known as the PIP camera p IP I'm not I can't remember what the acronym stands for but I'm sure people can look it up and check it out she has a great website called Tesla metamorphosis which is about energy healing using tests Tesla resonant frequencies and that's really what one of the themes over all was was frequency resonance this was talked about throughout the conference this is what Tesla basically worked with he didn't work with Hertzian waves he worked with standing waves or what are generally known as scalar waves or non Hertzian waves and this is the distinction between his level of understanding of physics and the physical reality that we live in versus standard physics models that basically don't talk about much these kind of waves so this was a theme throughout the entire conference another great lecture that I heard yesterday was us a gentleman by the name of a stoian I can't I think his name was guarana it's a Serbian name I'm not quite sure how to pronounce it I'll look it up but his and he right here okay yes sorry I didn't mean to but his name was Sarge Sarge stoyan sorry yeah that's it okay yes he was absolutely phenomenal in talking about a new field propulsion methodology and this was basically about the cancellation of inertia and it was a new model a new unified field model that has been put forward that would unify gravity with the other forces and basically this was this theory was if applied and understood would basically make things like actual space travel possible because it completely nullifies the effects of inertia so I I was looking at that in conjunction with something I'm quite interested in which is how the gentleman named Edward Leedskalnin built Coral Castle back in the 1920s and 30s because that's an enigma that goes back to the ancient world and how the ancient builders built the tremendous achievements that they accomplished in the stone monuments that they built throughout the ancient world and Leedskalnin basically said he built those his coral castle with the same principles that they used to build these ancient monuments so there was so many tie ins with so many different pieces of Technology and tie-ins with the esoteric world as well which is where you fit in incredibly well when you came today we really got into a discussion about the esoteric traditions and there are people there who are very receptive to that message as well there's a blending happening between science and spirituality we saw that as another continued theme throughout this formal broadcasting radio network [Music] welcome back folks this is what on earth is happening and I'm your host mark passio today is July 10 2011 we're celebrating Tesla's birthday on the show today with us today is our special guest from American freedom radio in his show Radio freaking manatee freighter X he is heading back from the Tesla science conference to his home in Massachusetts freighter X I wanted to get your thoughts on what I was talking about before the break and I apologize for going through the break there folks I wasn't watching the clock and I did not hear the break music start to fade in so before the break I was talking about the merger that seems to be happening and coming rising more and more between this the the ideas of science and spirituality and how they seem to be coming together can you speak fraida Rex to the dine that dynamic as you perceive that at the Tesla science conference absolutely you know mark I think that it's it's it's clear we we know looking back that there there always has been some sort of correlative factor between science and the esoteric are you depending on the individual scientist or a researcher innovator inventor there's always been a connection there and then of course we suspect and have evidence that there still remains a secret factor to science today that's involved in answer Derek probably not for any good reasons but you know look at even in the in the 50s and 60s I believe with Jack parson and the the Jet Propulsion Laboratory I mean he was completely involved in the esoteric but obviously that was in a more negative framework you know framework than what we're talking about here I think that it is very clear in talking about the science of Tesla and and others like him that the the correlated factors are multitude I mean just the simple fact of the polyphase system that he first imagined and then you realized in in real material form if I'm not mistaken was based on the tandem aperture system of the earth the and the Sun and the field that's created there now as we both know the earth the moon and the Sun are powerful esoteric symbols so right there you have a correlative factor and for the individual who come in comes into contact with all the teachings and philosophies that are being espoused and surround the scientific that this form of science you have just endless I think what really draws people here is that we are outside the box we are entering a realm that moves away from the known away from the paradigm that that we've been all conditioned to view reality in and I think that the people who are drawn to this event and are listening now and feel something stirring within them it's because they know they lack truth and our world is totally out of joint and off balance because I believe that many people have been fleeced of truth or bad the truth removed from their consciousness and I think that one step towards that for folks who are drawn to this is the realization of the esoteric and the metaphysical reality that surrounds us absolutely and I think more and more people seem to be receptive of that even within what could be considered the mainstream scientific community that's happening in that in those circles very slowly but as they say slowly but surely so I tend to see that a lot and very open minded people open minded people in the scientific community coming out to events like this and realizing that there is more to life than meets the eye and certainly more to the physical a great quote that was repeated through the weekend was one that Tesla said during his life that once science stops paying attention to only the physical alone and starts paying attention to the non-physical reality we're going to make more progress in a decade than we have in the last millennium you know so and I totally agree with that we need to pay it Inchon to the the basis the underlying forces that give rise to our physical reality and as I call it as I word that on the what on earth is happening radio show the causal factors the actual real work of nature itself instead of paying attention so much to just the physical interactions we need to pay attention to things that give rise to those physical interactions absolutely and I'd like to throw in a quote that I heard this weekend spoken more than once it's attributed to Tesla and I may be paraphrasing but this is how I wrote it down in my notes he is attributed with these words science is that a perversion of itself unless its ultimate goal is the betterment of humanity yes and that intention right there is a paradigm smasher in our modern world because that's not how science functions in the mainstream although they love to say that yeah unfortunately that's the truth although they love to say that their motivation is that you know increase our species or you know technology and efficiency and all that in reality we know what the motivator is unfortunately to a large extent that motivation is control you could say it's profit but it's profit toward an end and that end is control itself so that's why again we need to transition toward not only clean and environmentally clean but open free sources of energy that are a non limited that don't create the dynamic in in the consciousness in the actual psychological makeup of scarcity because that's what routes us in the base brain consciousness in the reptile modality of consciousness and keeps us trapped in material identification rather than allowing us to realize that we are bathing in energy all around us that is all that all that is required is to simply understand how to tap into that that endless field of energy that is there for us at any given time when we need it and then that mentality of scarcity and we'll go away and with it the form of consciousness that goes along with staying in that mindset that's the key thing people are starting to realize that energy and the way we produce it in the way we distribute it in the way we use it has everything to do with what the consciousness of the people who are using that said energy paradigm is like and that is directly related to the quality of the experience that we have in the world that we live in absolutely and I think that one thing that is become clear to me is the importance of awareness and concentration every invention every innovative idea every every advancement that Tesla and inventors like him made were as a result of their own concentration and and realization through awareness of their surroundings awareness of the elements awareness of the way that the systems of life function with each other this is all signposts to me and I'm sure to others that we need to cultivate greater awareness understanding concentration these are all things that are anathema in our modern culture I mean we're churning out ADP left and right what's there is why is that happening in America almost exclusively because our awareness has been fragmented and refracted into a million points of light you know where we we cannot stop for a moment and just focus on reality we're always being you know coaxed to move on to the next thing and move on to the next thing and to allow ourselves to be captivated and captured our awareness captured it and diverted down told us acts of of extractions yes described abstraction and this short attention span theater a form of consciousness see that that's the whole thing that that Tesla never fell into he always maintained laser-like focus he always was able to pull back and see the big picture but his mind worked with laser-like precision he exercised the will he had the imaginative capacity but he come find that tremendous right brain imaginative capacity in which he could envision inventions in his mind even before he put them together and understand that they would basically work when he did put them together he combined that with the scientific logical left brain that maintained laser-like focus and willpower and intent and when he put those together you see the type of genius that resulted that's why I say this is the scientist probably who has had the most balanced and balanced brain out of any other throughout the course of human history because that's the dynamic that balance of the brain hemispheres is what allowed this man to achieve the heights of genius that he did and to do more for the world as far as invention goes and as far as science goes than perhaps any other inventor or scientist in history that's exactly my point that's exactly the point I was trying to make you know to get back to the to the the esoteric aspect of this when you ask that question well what is at the root of esoteric pursuit it's not the balance between the metaphysical and the physical all right so there yes I'm sorry that's absolutely right because we have to get out of this dualistic mindset of spiritual versus physical you know these need to be brought together they're they're one in the same I keep saying this okay there's the intro music for this next break we'll pick that discussion up on the other side of the the idea of the merger between the spiritual and the physical and how that blends with the idea of the merger between science and spirituality we'll take a look at that on the other side with our special guest Frey directs from American freedom radio and his great show Radio Free humanity which I highly encourage everyone to check out stay with us folks don't go anywhere listen you no longer being tied down [Music] we're back folks this is what on earth is happening I'm your host mark passio my website what on earth is happening calm today we're recapping the Tesla Science Foundation's Nikola Tesla energy independence celebrations 2011 with our special guest Frey directs we'll be going back to freighter X momentarily I just want to give the call in numbers the calling number for the show so if anyone wants to call in we will be taking calls in the coming segments the calling number for the show today is eight six six eight four one one zero six five we want to hear from you with your questions we want to hear anything you have to say on the topic of Nikola Tesla or free energy or the energy paradigm in general that were stuck in right now how we might transition away from that and help to break free from that and if you have any questions for freighter X feel free to fire them fire them off it looks like freighter X just dropped off the line freighter if you are listening you can call back in and I'll get you right back on here I'm not sure what happened it's possible he's driving through an area where he lost his cell phone reception okay I see he is called back in freighter X are you there you dropped off there for a moment yeah I'm on the outskirts of New York City now so I think I'm getting into a little interference if I get disconnected I'll just keep calling back in it's not a problem at all I understand that cell phone reception on the road could be a little bit spotty so no problem before the break we were really hitting on something that is critical and I want to go back to that and that is the idea that ultimately what we need to really understand and what's still keeping science and spirituality separate and not able to really be bridged or merged fully is the fact that people still have this dichotomy this dualism in mind between the spiritual and the physical and really there is no duality there if we truly understand the material reality living as a construct of the spiritual world in general so can you speak to that and how that's basically just a way of dividing people absolutely I prefer to them as the engineers of our society and I believe that that the ruling paradigm under which we all operate in our modern culture is one which would which would have us believe that there is a division between the spiritual and the material and that I believe is what keeps or as kept up until this moment science and our species from moving into that realm that Tesla mapped out for us a hundred years ago if all things are clearly one how could there be any any separation between those things absolutely that's you just reminded me the speaker from last night the psychologist who was born in Serbia that spoke at the ethical Society millena by it right she would not be said at one point right she said at one point that Tesla's realization was in fact that we are all one and when she said that an idea popped into my head the meaning of the word individual most people when you say individual it immediately the semantic reaction as you're thinking about one little isolated item right but the word individual actually means undivided undivided non a dual that's exactly right yes don't believe me but that's what it means so the reality there is Wow what what a powerful meaning to a word that we we think of as almost the exact opposite and there's a clear there's clear evidence right there of the ruling paradigm under which we all operate when we construct this consensual reality that we move through in everyday life and and that is in fact the program I think that was put in place a long time ago to disempower us and keep us limited in our scope so that we might be led where they would have us go and I say they but hey you know the engineers of our society that's exactly right and that's exactly how that dialectic works you keep people not only divided in their worldview you keep them not only divided between each other you keep them divided within themselves so that they see themselves as separate not only from everything else but they're divided amongst their own inner self and that level of inner division gets reflected in the external reality in which they live and that's why the world is in the state that it is in ladies and gentlemen because until we bring ourselves individually individually together meaning no longer be divided within on an individual basis a one-to-one basis okay we're never really going to be able to come together as a whole as a species with all of the all of the multitude of individuated consciousnesses that exists in in this in this thing that we call a species to make forward progress as as a collective as a collective consciousness so I absolutely agree with your take on that and I think that is so important of how people are mind-controlled that is exactly how this dialectic is perpetuated and it's it's very critical to make that distinct distinction particularly when it comes to again bridging the worlds between science and spirituality which has been very slow to happen but I think there's evidence that it is slowly but surely taking place and I think this conference here this weekend is of is proof positive of that yeah this conference is like a key to unlock that kind of thought control that you mentioned that the self-governance that's the kind of thought control that no one can compete with because if you're being governed by some paradigm that is then transplanted into your very psyche how can anyone really you know make any kind of an impression on you you're dealing with an inner dialogue an inner guidance system that is and you you know it so that's it's a great way it's a it's a powerful system of thought control and and as you have already stated we see the evidence evidence of it all around us why would a scientific system you know mainstream science in our culture its specialized and it's all about quantifiable and qualifiable results you know there's no there's no room for abstract speculation there's no room for outside the box thinking it's all viewed as somehow less viable less authentic and and and why is that I mean obviously why do we as a species where as a culture now because in the beginning of American society when when the people had to basically take care of themselves it didn't have a phone book full of specialists to turn to for every one of your needs everyone had to know how to do everything you know everyone was a was a mechanic a plumber and elected or not electrician but you know a farmer all the things that you had to know you couldn't turn to anyone else to help you and now our society has progressed to a point where we've been completely everyone specialized I would call it disempowerment because no one on your stove anything from a state of independence being able to do things for yourself on your own to a state of dependence and that's what they absolutely want us on and you know this this conference this weekend being held at the independence Visitor Center I mean there's so many great little signposts like that all around you know that's a society of Philadelphia and Liberty place I mean absolutely and you know the things just honestly did work just work out like that that was not deliberately planned I'm sorry I'm at the toll booth there and somebody's ranting and raving but anyways that no prongs on the road crazy things go on like that so not a problem but we have a caller on the line fray Rex do you want to go to the phones sure okay here we go Tim in Virginia you are live on what on earth is happening with our special guest Frey directs what do you have for us here today hey Mark and freighter to hear from you I'll always enjoy your show um what about Tunguska that's what I want to know about I was always under the assumption that that was a Tesla shot he was trying to hit the North Pole up there there was an archeologist or bird or somebody was headed up to the North Pole ik expedition yes and he overshot the North Pole you know no never tried anything like this before of course come on give the guy a break he's a mastermind he overshot the North Pole hit Tunguska and it's government you know that's what I was I was really thinking that the government is always watching Tesla ever since he began you know Westinghouse had him at first and then more took him over and destroyed everything and just put everything under locks and you know the government the whole time had been watching what was going on and they watched what went on there and that's what they've got now they've got those kind of weapons but you know the meteorite thing just doesn't stand with me what do you think of that yeah I thought you know that a bit ago and pretty much you take it all I was gonna say mark was that you know the theories about what happened in Siberia on what was it 1902 or something like that when that happened I believe it was on five on not certain it might have been o2 I can look it up but it was early well either way there's the Furies our legions what that boy what it what exactly have in there right I mean oh wait actually but either way I really cannot speak towards that but one thing I wanted to save is the caller mention you know I'm not so sure we're good up to break hold that thought we'll okay right on the other side of this break when we come back on what on earth is happening don't go anywhere folks [Music] [Applause] [Music] [Music] our special guest freighter X and we were talking about the possibility of Tesla's involvement in Tunguska a good question so Tim are you still with us yes I am and I wanted to say Marquess you're hot man you just laid in right there what Tesla is all about and he tried to give them people of the world a kick forward just understand how all this this pyramids and everything was built and to give us a kick forward and all we got was a kick in the nuts by the US government JP Morgan and the powers that shouldn't be I could have known here talked earlier you talked earlier about Coral Castle man that's you know that hurt but that's the most mysterious not mysterious but that was technically technology but you know no electrons or anything flying you know Tesla was powerful and he was he's my superstar he's amazing he was a guy practically we're gonna get you know on Coral Castle in a little bit I'm gonna tell people a little bit about what that was about because I had a little bit of a side show going on related with Coral Castle we did a little brainstorming session I'll tell people about that in a moment let me go back to freighter X and get finished getting his take on Tunguska Tunguska and what may have happened they're afraid of Rex go right ahead well actually for clarity sake I what I really wanted to address was the part of Tim's question about the the government and JPMorgan being involved in suppressing Tesla's innovations and technology and I just wanted to you know just for the sake of clarity and the reach there's a reason that I would bring this up is that I I'm not so sure that the government preceded Morgan or Westinghouse in their suppression of Tesla I think it was more more possible than Morgan Westinghouse and other you know industrialists targeted Tesla and use the government as one as an arm of that you know of that targeting and the reason the reason why I bring that up the reason why I make that distinction is I think it's really it's important for us all to be clear on on who's pulling the strings and what the motivating factor you know a lot of people will speculate about all the possibilities but if you want to keep it in a purely material sense I think it's clear the motivating factor of the industrialist in this endeavor and then of course we can move into the esoteric and spiritual effort and talk about who was controlling JP Morgan and pulling his strings who were his owners who were his masters who was he answering to behind the scenes and that I would suggest goes and connects directly in with the occult world the dark occult world your honor yeah read speculations that Morgan was a agent of the Rothschild concerns right the Rothschild red shield I mean these guys they go way back with their esoteric actions you know so let me go back let me go back to the Tunguska question I've talked about this with some researchers and some people even in the Tesla Science Foundation and there's a there's no consensus there's no general consensus although some people do feel that it may have been Tesla's experimentations with scalar wave technologies that may have resulted in the Tunguska phenomenon disaster or however you want to look at it or whatever you want to call that luckily that haven't happened in a fairly sparsely populated region or it could have been much more disastrous we'll get right back to that on the other side of this break this short segment that's all we have time for we'll be right back after these messages on what on earth is happening don't go anywhere folks [Music] welcome back folks this is this happens special Saturday we're recapping the Tesla Science Foundation's 2011 Nikola Tesla energy independent celebrations on Tesla's 155th birthday July 10 2011 so on the line with us is freighter X before we get back to freighter X and get his take on some other things that went down during the Tesla science conference this year I want to give the call-in number once again because we are taking calls and the callin number is eight six six eight four one one zero six five once again eight six six eight four one one zero six five feel free to call in I want to thank a few people who were very instrumental in the Tesla Science Foundation's energy independence celebration this year of course the president of the Tesla Science Foundation Nikola launched our and his wife Maureen launch our who helped organize the entire thing my girlfriend Barbara marinelli for helping so in so many ways and specifically for supporting me throughout the entire event my good friend Michael falsetto who helped transport me around during the Tesla Science Foundation and bought me lunch on many days of the event thanks Michael Dave and Fred Hammond or food did a great job organizing the outdoor event at the independence Visitor Center Dave Rosen yo Lee who coordinated that the Tesla science conference and basically brought the speakers to the the conference and organized that entire thing what a massive job that was so great job Dave Dave salties who did the filming in the conference room Michael River Song who acted as the emcee in the science conference room mano de vino' who just and the divine hand ensemble people just have to go and check out this great ensembles website divine hand dotnet and you'll never hear anything like this in your life just phenomenal orchestral music phenomenal chamber music by the divine hand just an incredible performance that they put together for the event at the ethical Society on Saturday evening Melissa Dunphy who acted as the co-host and introduced these speakers at the ethical society great job Melissa Frank Taney who generously donated this donated the space for the science conference at the Liberty to building Jerry Hartman thanks for acting as security Fernando salgueiro who lent us a generator for the independence mall portion of the event and drew who brought a lot of the DJ's who played out there at Independence Mall so I'm sure I'm leaving many other people who were involved in the event out don't hold it against me I'm just I just put together a quick list before that segment and just wanted to run down it and thank people who you know directly I worked with me during the conference but I met so many phenomenal people during the the event and that's what a conference is all about is bringing people together so that then they can collaborate further in the future and take action to improve this place so with that having been said and the callin numbers in hand let's go back to our special guest freighter X freighter are you up for taking another call sure you know I have to say mark that I too felt that spirit of unity consciousness and the supportive the feeling of support and welcome everyone gave everyone else and you know I feel like I came away from that with some new friends you know and that's a really important part of this whole thing is unity consciousness and that's supporting each other because we need support that's how we move forward you know I mean and Tesla's story is a is a sad example of the other direction of what happens when people aren't supported that's exactly right and I think that's another great point that dr. Michael prophet brought up during the a ethical Society event he said if we don't make people known make it known to people about who Tesla was and what he did in this generation when a new Tesla a new inventor or scientists on the order of a Tesla comes along in the future we're not going to provide a supportive environment for that type of a being to be able to do as great of things or even greater things than what Tesla did and an opportunity will have been squandered and I think that's just a brilliant point that was brought up by him the keynote speaker at the ethical Society yeah imagine the folks out there that don't have the strength of will the Tesla did to manifest what he could in spite of the odds against him you know traveling to a foreign nation thousands of miles away from all basically without any real cleaner you know I was just going to lay out it wasn't if nothing was mapped out he had that just kind of make it up as he went along now his will and his concentration he was he was able to to make the achievement society could but imagine those out there that don't have is kind of will that they need support but it may got support where they could take us hello I'm sorry there I dropped off from that's what getting involved is all about in a cause that you truly believe in and back and know why it must be done the question why has to be answered what is the motivation why are people coming together to attempt to do this endeavor and you have to ask that question you have to ant get get the answer to that question honestly and then decide whether you're gonna put your effort behind that and then put it into that effort a hundred percent and that's what the the drive and the will is all about and that's what care combining care with that drive and that will that's what that's ultimately all about that's what gets anything done that's what makes anything change and if we don't understand that basic generative principle that I always talk about on this show we're not gonna make much forward progress as a species if we do have that key firmly in hand we're going to unlock all the the locks on all the doors and we're going to make a whole lot of forward progress in ways that we can scarcely even imagine right now yep everything we want to do we have to imagine it first and we have to hold it in our minds and believe it freighter let's go to a call on the line here we go caller you are on what on earth is happening with our special guest freighter axe what do you have for us today two gentlemen mark I just wanted to make a comment to you and to add a piece to the Coral Castle mystery sure you took the care enough to do these hole presentations on the 911 and I listened to it and and during one part of that you said that you would spend all these episodes forty through 60 just in preparation for that one show and you asked during the third show is it worth it where you hope that it's worth it yes marks it was worth it girl I've now listened to 85% of the content on your on your of your shows there and it was because of your right action that I'm making right actions now to write myself in the world fantastic i3c give you the kind words and the onion courage man I appreciate that a lot yeah I was just saying it's an awesome endorsement and as Mark I just wanted to add to the caller and say I too feel the same way about you I listen to your show usually not on Sunday but I download them and listen to them during the week and I'm I am constantly learning stuff in you mark that's awesome thanks so much guys nice callers stay with us on the other side you can make a further comment and ask a question for Frey directs we'll be right back don't go anywhere folks you're listening to what on earth is happening right here on the Oracle Broadcasting Network [Music] we're back folks there goes mark past my website what on earth is happening comm taking a break from our regular presentation style environment where I lay out some thoughts and ideas and symbolism etc and we were looking at the 911 event over the last few weeks and we're going into the esoteric side of 911 last week we'll be doing that again next week after I've had a little bit of time to recuperate from the the whirlwind of events this week and weekend and I can't tell you talk about energy flow just a whole lot going on in a short amount of time and you know you you're I realize you know I'm human too folks there's only so much that you can do in so much time that you're given so I really didn't have time to prepare the show that I was planning on so that's why we're doing an off-the-cuff show today recapping the Tesla Science Foundation with our great guest fraida Rex who was a guest of mine at the Tesla science conference today and and yesterday he attended the ethical society event and was outside at the on the lawn at Liberty to as own Independence Mall as well so let's go back to the caller that we had on the line previously and see if he has a question for frayed Rex and then I want to talk to fraida Rex about that portion outdoors at the Tesla birthday celebration there at midnight and we we were on American freedom radio while that was going on live and we'll tell you a little bit more about that in a moment so caller did you have something specific for Freya Rex I'm at a specific for freighter X but I wanted to bring some information that I'd heard in a conference during month one of Michael challengers conferences sure which I might suggest is a great yes that you could have on marquees I am in line with doors I am familiar with Michael tell injure so I would love to have him on its own future point hmm indeed well I went to his one of his recent talks and one little small thing about the Coral Castle mystery was unveiled during that talk okay as many people know there was one man who made this massive stone monument and he did all the work himself he never let anybody see though him doing the work right but he would end up moving massive blocks of stone in a matter of a few moments and nobody could figure it out well there were some kids in the Nick in the neighborhood there who observed him while he wasn't sure that they were there and saw that he was using ice cream cones in his hands to move the blocks of stone meaning he was using a cone shape yes ice or own to manipulate sound frequency to be able to move these stones using sound technology that we have since forgotten absolutely fascinating and it's something that we are going to continue to look at a small I guess you could say a subgroup of us at the Tesla Science Foundation and and related members and and associates of this group who are very interested in the enigma of Coral Castle and really want to crack that code because we feel that it holds the secrets of antigravity and a Leedskalnin was on to something and his mind worked on the order of someone like a genius like Nikola Tesla so I want to thank you for bringing that up and on that note I'd like to basically tell people about very quickly about a little side presentation that I there wasn't a presentation it was more of a brainstorming session that I put together at the Tesla science conference this year we took some interested people in the Coral Castle phenomenon and we went into a little side area at the conference on the 32nd floor at Liberty - and we sat down and talked about this and really just brainstormed ideas and we had a whiteboard we had a projector and a screen and we just completely it was a think-tank on how this may have been done and so many things were brought up and so many ideas were sent back and forth and so many great minds were coming together we did not come to any specific consensus on this but there is specific experiments that people want to do there is a for a future research that is going to be done into this we may even be planning some sort of a trip down to Coral Castle soon with some of these participants and uh and uh think-tank team members I guess you could call them and uh I'll be giving you some more word on that as it develops but that's what was one of my functions during the first two days during the Thursday and Friday of the event of the Tesla event because I think this is all related with resonant frequencies and I think that's how Tesla managed to do what he did with an understanding of these frequencies it's how Leedskalnin ed Leedskalnin the Builder of Coral Castle managed to do what he did it's how someone like Royal Raymond rife the the great scientist and optics engineer managed to do what he did with healing diseases through resonant frequency technologies and I think all of these things are interrelated and it's all going to break sooner than anybody realizes people are going to crack all of these enigmas codes however you want to look at it and if the powers that shouldn't be are not going to be able to hold that knowledge back for much longer because too many people are interested and too many people are working on revealing those great secrets of the hidden mysteries of the wheel work of nature and we're going to do it and it's going to happen within the lifetimes of the people listening to this program right now so crater X I want to go back to you and talk a little bit about the great Tesla birthday celebration that happened during a midnight last night on midnight between the 9th and 10th which is when Tesla was born at the stroke of midnight in the village of smelly on which is now modern-day croatia it was the austria-hungarian empire when tesla was born there but would you think about the dynamic outdoors that right in the the cradle of Liberty the birthplace human freedom which is independent small right here in Philadelphia yeah that was one of the highlights I think of our experience was being there for that and attending that celebration there was what probably a hundred plus people standing around at midnight you know center of Philadelphia there was coals go up my my son was so excited about getting to put the big fluorescent bulb near the corner watch it right up and I mean it was just fascinating watching it was like a bunch of kids in a candy store and there were a bunch of kids there but there were people of all ages and all walks of life all coming together and we yeah we broadcast the Radio Free humanities show arrived which was an awesome opportunity I felt so privileged to be a part of this and Mark coming on your show today it's like it I am so jazzed to have my self associated with Tesla you know I know that everyone that I talk to you that's involved in all this says the same thing you know it's it's something that we the people that are being drawn to this they realize the importance of all this and one thing that we went over in the show with my co-host Jack last night was how you know big the level of satisfaction in the realization that the show we were doing was that the result of Tesla's work here I was wireless transmission for Philadelphia Jack wireless transmission from Hilo Hawaii all transmitting back to Austin Texas for AFR you know it's amazing any stone that has technologies all based on Tesla's technologies would not be what not impossible without him absolutely and then you know surrounded by his technology all around us you know in the center of Philadelphia and it's yeah I that's part of the reason why I felt like I was coming away from this entire conference having made new friends because of the folks that was there at the independence Visitor Center right people were so well people give everybody your website and go and check out his archive folks your website that these www.a go freedom anity comm check down free to read said that run AFR great radio show on american freedom radio folks and thank you so much for having me on as a special guest caller last night on the show out there at right at independence visitor center i want to thank you for that we'll be right back folks don't go anywhere [Music] we are back on what on earth is happening on their host mark Hasse a my website what on earth is happening calm we are on the line with special guests Frey directs radio talk show host on American freedom radio his show Radio Free humanity let's go back to frayed Rex and let's uh bring in another caller here we go caller you're on what on earth is happening do you have something for myself or frayed Rex yes mark I it's Kevin Kevin how are you awesome I was totally enjoying yesterday and until everyone Kevin was also one of the great organizers and he helped bring the DJ's in so Kevin I should also give great thanks to you for your help in organizing the event out at Independence Mall yesterday because without you we wouldn't have had a lot of the musical aspect to the celebrations out there on the lawn so thanks so much Kevin for your contributions the event as well it was an honor to help out I so had it just was so much fun like even my son like the best part of it was when I was leaving and and taking my son home and he was saying I don't want to go I knew I needed it something at that moment you know like when my seven-year-old it had such a good time even like getting to play with the Tesla coil as well like it was really a beautiful day and like everyone that was there really seemed to enjoy like you weren't there but I was actually handing out a whole bunch of the Tesla pamphlets oh that's pretty good that that were there that were as available as well and I put him into a hand of at least like 6070 tourists that were coming through as well even though that that was what was going on I'm glad they were being used in that capacity that's what we printed them for and again I did have to leave early yesterday at the independent small section to go help set up at the ethical Society so I want to thank you for you know taking the reins and and and doing that kind of outreach there that's what the uneventful yeah it was a lot of fun like do me a favor check your Facebook I actually sent you a link to a video that I made for it which is pretty much like of the day of the time period that you missed and I think you'll really appreciate it you were in one of the pictures that I took of you before yeah you had left but like it's it's a really cute overview of what we got out there and I hope you enjoy it that's awesome Kevin do you have anything for freighter wrecks actually I don't know if I got a chance to meet you while I was there I like I said I left a little earlier like around 6 7 o'clock so I I don't want to take up any more of your time thank you guys for like helping to co-create reality with me it was like great it's really beautiful thanks so much for being a part of the event you know I forgot to mention the music that was an awesome addition to the experience the AJ tent that was that was really cool oh and another person I should mention thanks to was pan adelphia who came out with a collaborative artistic they they basically do collaborative art parties where they bring out these huge tarps and let people co-create art all together and in a tapestry which is a beautiful allegorical symbol of what we really need to be doing collectively as a species so Paul and squints of pan adelphia I want to also send thanks out to them and I'm sure I'm leaving out a whole bunch of people and you know whenever you make a list you're inevitably going to leave people off a thanks to everyone who was involved in put making this event happen you all understand and know who you are and your role in it and without everybody's involvement it would not have been the success that it was and I'm sure it will grow even bigger next year and more people will become involved and the outreach will be even even more intense so Frater did did well I think we do have another caller on the line so let's see what this caller has to say here we go caller you're live what on earth is happening with our special guest to freighter X what do you have for us Thank You mark it's Bob from Cincinnati thank you for your glorious and oh I'm fine mark you know you deserve all the rest you can get thank you to you and your guests freighter X and all the other excellent people who stood in our stead those who couldn't be there at the Tesla Science Foundation conference out there thank you gentlemen we're keeping Nikola Tesla the true wizard of science he took science into the realm of what we would call magic therefore he is a true wizard and thank you for your voices we must continue to keep Tesla Mark you were one of the most steadfast voices for Nikola Tesla he is our answer he his work has been suppressed for seventy years it is now coming to light he left Croatia Serbia Croatia with the plans for a flying machine that had no wings if I may there is a quick article in the New York Herald I want people to Google Tesla knew monarch of machines New York Herald 1911 the October 5th edition his own words and I quote my flying machine will have neither wings nor propellers you might see it on the ground and you would never guess it was a flying machine yet it will be able to move at will through the air in any direction with perfect safety higher speeds than have yet been reached regardless of whether and oblivious to holes in the air or downward current it will ascend in such currents if desired it can remain absolutely stationary in the air even in a win for a great length of time its lifting power does not depend on any delicate device as the bird has to employ but upon positive positive mechanical action end quote Nikola Tesla in 1911 had the plans for the wingless craft that we see in the air today using mechanism that is not using aerodynamics he was a master of the ether ether physics has been suppressed I want you to Google ether physics ladies and gentlemen and that is the free energy we're desperate for the free energy that is our birthright Nikola Tesla is the answer thank you for your voices gentlemen Bob before you go give people that first search term again so they can check that article out what was that first search term you wanted on the Google absolutely Tesla knew monarch like a monarch sovereign a king new monarch of machines his article in the New York Herald October 15th 1911 this is a very telling article Bob you always bring phenomenal information to the show and I thank you for all the information you bring forward when you call in here always a pleasure thank you mark good night you got it you take care freighter Exxon yeah I just want to say you know it is an honor and a privilege to be counted as one keeping the spirit of Tesla alive I mean I it makes the entire trip worth it to me just to be a part of this I'll tell ya this is about Tesla and it's it's just it's such an important topic absolutely so let's see what what we want to do next is in the next segment I'm going to read the unanimous declaration of energy independence because that was the entire crux of the event and I read it twice I read it at the ethical Society I read it at Independence Mall and it's an honor to be able to share that with people there because that is where the original Declaration of Independence was read and that's the document that enshrines the principles of natural law of the foundation what is of natural law int into this nation sadly we've fallen very very far off of that path we need to get back to it and we need to get back to it fast but we at the Tesla Science Foundation enshrine these principles into our own declaration of independence and it's a declaration of energy independence so before we do that Frey directs any other comments or words in any kind of a constructive criticism anything that you want to add perceptions that you witness that you saw as part of the dynamics of the Tesla science event the Tesla energy independence event this year in Philadelphia and uh maybe tell us what you might like to see in the future as incorporated as part of the event well first of all let me say wow it must have been such a privilege for you to be able to read that statement in you know in the vicinity of Independence Hall you know knowing what we know about the history there and how important this is and how it goes hand in hand I believe with you know the I believe that this moment right here and now I predict this moment right here now will be viewed eventually as a turning point because these are such important times and for the future of our country of our nation which was begun with that official statement a declaration of independence you know and this is the second one this is a new one and this statement that you're gonna read in the next segment he's one of the most empowered empowering and powerful messages that you as a with Petra Science Foundation as a body have brought to the people that are there to hear it then I'm just so glad to be a part of mark as I'm gonna say anything about this perpetrated it because it was an awesome experience thanks so much and we'll be right back on the other side of this break the declaration of energy independence will be read and we'll get Frater X's take on that and we'll wrap things up in the last segment don't go anywhere folks stay with us you're listening to what on earth is jack blood host of deadline loss [Music] welcome back folks this is the final segment for this edition of what on earth is happening I'm your host mark Cassio my website is what on earth is happening dot-com we are recapping the Tesla Science Foundation's third annual Nikola Tesla energy independence celebrations here today on the show my special guest with us who came out to Philadelphia for the energy independence celebrations is freighter X he is on his way back to Massachusetts after the conference we'll be getting back to freighter X in a moment but as promised in the last segment here I'm going to read the unanimous declaration of energy independence as drafted by the Tesla Science Foundation in conscience July 10th 2009 the unanimous declaration of energy independence when in the course of human events it becomes necessary for the people of Earth to dissolve the relationships habits and thought patterns that have bound us to an unsustainable energy paradigm our conscience compels us to state our grievances with these outmoded systems and to unanimously declare our intentions for the future of free energy we hold these truths to be self-evident that in our modern age all means of energy production are not equal some being polluting limited non-renewable and controlled by corporate driven profit motives while others are clean abundant sustainable and able to be made freely available for the betterment of all people that human innovation and creativity has excelled beyond our current methodologies of energy production and that the current energy paradigm is ecologically unsound economically unfeasible socially divisive and morally bankrupt that dependency on our current energy production methods has led to the increasing environmental debt nation of our living planet and to a growing systemic mentality of scarcity lack fear aggression and imperialism that free energy technology has been developed and suppressed for over a century and we need not be dependent on non-renewable energy for a moment longer that the time is now for us to develop a means of energy production and distribution that utilizes the inherent abundance of nature itself that as stated by the great scientist and inventor Nikola Tesla science is but a perversion of itself unless it has as its ultimate goal the betterment of humanity that whenever any energy model has been perpetuated toward a system of control limitation and the stagnation of humanity's collective evolutionary progress it is the right and duty of the peoples of all nations to abandon the outmoded technologies upon which such systems are built and transitioned toward those which are clean renewable sustainable and free we therefore the free people of Earth in good conscience assembled appealing to the supreme order of nature for the manifestation of our intentions do solemnly declare that in our lifetimes through our continued dedication ingenuity and inspiration we will bring to fruition a new and free energy paradigm one in which empowering advancements and technologies are made widely and freely available to all peoples in the service of human potential and for the support of this declaration of energy independence with a firm reliance on the protection of divine providence we mutually pledge to each other Our Lives our Fortunes and our sacred honor words inspired by the original Declaration of Independence drafted and signed right here in Philadelphia so freighter X your take on the unanimous declaration of energy independence as drafted by the Tesla Science Foundation I'll tell you mark this statement here I rank this high among the statements that humanity has made generally to itself I mean this is such a powerful statement I it is an honor and a privilege to be associated with you folks who have come up with this because I actually rape this association highest I'm online and at present it is this is so important I cannot stress it and I hope that your listeners and those who might hear the show later and the archives could really receive this because this is so important people need to go to your website the website that your organization has I know it's not your organization you're a part of it but that's what Science Foundation org I mean it's got everything there and and then you know I went to the website before I came out here and I it was such a satisfying experience to come and meet the folks that are involved because it takes it to the next level like you said the opportunity looking forward to come and face to face with other people who share your conviction who share your passion who share your desire to move forward as a species and it's it's the most fulfilling experience there could be and I I think it's such a clever way for you to impress upon folks with this statement because it is so powerful it killed it powering and this conference is not an end it's a beginning this is just the beginning of relationships relationships new relationships between people are being forged as a result of this conference and we will work together and collaborate during the course of the coming year on projects and that's how these conferences work that's what a conference means the the word conference comes from the two Latin words con meaning together and Pharaoh fairy meaning to bring that's what the essence of a conference is all about bring people together for a common focus a common goal and that's what why getting involved and getting out there putting yourself out there and and joining up with others there is there it is all about the individual and being non divided non dual that individual in divisive okay but there is power in numbers as well when all of those individual units come together they form a strength that is impossible those bonds are impossible to break when they come together over something that is truly just and moral and they know the reasons that they're doing it they know the why behind behind the effort that's something that a lot of the members of the Tesla Science Foundation share they have a very clear idea there I is on the prize they know why they need to be involved in this organization and we need more help you know there is still work that needs to be done there's still many more roles that people can step in and fill in this great organization so don't think that everybody else has it in hand and there's somebody out there that's got the job done get involved get involved I can't stress that enough so I thanks for making that point we do have one more caller on the line let's see what they have here we go caller you're live on what on earth is happening what do you have for us you think that dr. Phil's right on any of the things the points on his show then he makes I have not actually really looked into him that much I've maybe caught the show a couple of times when I'm in people's houses that that have and watched television I would have to actually you know it's not really related to the topic we're talking about today but I can't speak to it as such he seems to be you know accurate on some of the things that he talks about related to human motivations but I don't want to say any more than that because I don't really know about his work that much and having followed it mainly because I don't really watch television so we want to thank you for that but I can't really speak to that topic in general so sorry fraida Rex I looks like you dropped off there for a moment are you back with us yeah overpass with city and got lost no problem well I'll tell you what there's a minute and a half left in the show you take us out and whatever you have to say the floor is yours and don't forget to give your website at the end so people can check you out on your show on American freedom radio okay mark well I really want to thank you for the opportunity to come on your show and I'd like to you know repay you the favor by having you come on in August and we're going to start talking about the protocols of the wise men of Zion we're going to look at that work and we're going to break it down with my experiences involved in the fraternal orders and then the speculations of those that are outside the borders like yourself my co-host Jack and I would love to have you come on and and help us to break that down absolutely I'm there okay great and once again mark I want to thank you so much all your listeners out there you have an awesome audience that call them a great question if they wanted to check out my show on American freedom radio it's the let's set is www.a do free humanity calm ladies and gentlemen our spread has a great evening for this evening freighter X freighter thanks so much for being here with us today thank you mark have a great evening thanks again for everything you too take care and be safe driving back that's all we have time for tonight folks thanks so much for listening up next [Music] if max is Michael Vale stick around we are

What On Earth Is Happening Show #069

Topics: *Mind Control Methodologies, Chaos Sorcery, 9/11 Occult Numerology, Gematria*

freedom man that's what it's all about welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc Pascal welcome one and all you're listening to what on earth is happening right here on the Oracle broadcasting radio network I'm your host mark passio my website what on earth is happening dot-com the network's website is oracle broadcasting calm today is Sunday July 17 2011 this show is live every Sunday from 5 to 7 p.m. Eastern Time that's 4 to 6 central we have a great show lined up for you here today we are going to be continuing our discussion on the occult aspects of the 9/11 event specifically today I'm going to be getting into the occult numerology of the 911 event so we're going to be looking at something known as gematria which is basically occult numerology and again we've looked at that in past sections when we talked about the pyramid and all-seeing eye symbolism on the back of the one dollar bill we saw the concept of gematria or occult numeral numerology encoded into that symbolism which is complex symbolism so more complex symbolism was employed on 9/11/2001 during this ritual that was enacted in the light of day for all to see I laid it out a couple of weeks back in podcast number 67 and I called it a manifestation right because that's indeed what it was it was a ritual conducted to manifest the desires of the dark Oh cultists who basically orchestrated this event and injected a huge amount of fear into the public consciousness and in doing so were able to change the world in a way that they saw fit to change it at the expense of many other people's natural law Rights and Freedoms so we'll be getting into that in a little bit I have one quick event announcement before we get to the break and that is for the truth freedom prosperity documentary screenings that happen at media Bureau studios the last Wednesday of every month so that is coming up I'm just going to get the date for you that is coming up next Wednesday which I believe is the 26th if I'm not mistaken and they are going to be screening a film called the American dream and this is an animated feature this is going to be taking place here in Philadelphia at media Bureau Studios which is at the corner of 4th and Brown streets in Philadelphia fourth and brown and the meetup starts at 7 p.m. movie is usually about an hour to an hour and a half and then it is followed by a group discussion for more information on truth freedom prosperity and all their events specifically their last Wednesday documentary screenings visit their website at truth freedom prosperity dot org we'll be right back folks stay with us alright ladies and gentlemen we are back on what on earth is happening I'm your host mark passio my website what on earth is happening calm I apologize in the last segment I gave the wrong date for the truth freedom prosperity movie night at media bureau studios it is actually on the 27th next Wednesday July 27th and the start time is technically 7:15 p.m. for anyone who is interested and they will be showing the movie the American dream so anyone in the Philadelphia area interested in coming out and partnering up with this great group of activists next Wednesday July 27th at media Bureau studios at the corner of 4th and brown the exact address is 725 North 4th Street at 7:15 p.m. all right so last week's show was great I want to thank Frater X once again for coming on after the Nikola Tesla energy independent celebrations last weekend here in Philadelphia and for being on the show I invited him to come on while we were hanging out and having some discussions during the Tesla conference last weekend and he agreed to come on since I really didn't have time to prepare the show that I'm going to do today last week since I was so busy during the Tesla science conference so freighter X thank you very much it was a great show I think people learned a lot and I think it sparked a lot of interest in the Tesla Science Foundation so this week we're getting back into occult topics and we've been looking at the occult for a long time and we've been looking at the dark for a long time in general and I just want to let people know that that's essentially going to be winding down because there's not much more that we could focus on where that is concerned I'm going to be shifting this show very much toward solution based thinking in the near future and we're going to be covering solutions to all of these problems ways that we can actually Angele practically get out of the mess that we're in as a species and to those ends I'll be not only discussing solutions and also you know taking calls as we always do to talk to people and get you know their take and see what the pulse is out there but I'll be bringing people on who are sort of experts in their solution oriented approaches toward all of the topics that we've already looked into and covered on this show whether it be consciousness related to whether it be related to health food whether it be related to the quality of our attention whether it be related to how to combat specific mind control techniques so the show will be moving in a more what some would consider positive direction as we are looking toward solutions to all the the woes that we have been covering all the things that we know now are wrong with our society and with our world as a whole and basically talking about how do we fix these things what do we do to make things better because people want real tangible approaches to this not just theories so that's what we'll be covering in upcoming shows I am going to do one or two more shows on the darkness after I finish with the 911 material I'm going to do a 1 or 1 or 2 depending on how it goes about the overall overarching agenda of the dark occult their worldview how they see this place how they see the people in it and what ultimately do they want to accomplish when people look at some of the things some of the control based approaches that are going on that are enacted by the so called elite they're nothing of the sort as I've said many times on this show they're not our elites they like to think of themselves as such as owners of other people as betters of others but people will say well what's the ultimate end of all of this what do they really want to do what do they really want to accomplish so we're going to be looking at point by point what the actual goals of what I call the dark occult esoteric agenda is for the people of Earth so we'll be looking at that next week and possibly the week after that depending on how that goes but for today we're going to be getting into the numerology of 911 again two weeks ago I did a show on the occult symbology behind the 911 event I think many people found that interesting again I hope that this is kind of reaching many of the eyes and ears out there because it is quite abstract material at times I'll be the first to admit that this you needed a semi deep understanding of occult topics and symbology to understand how 9/11 wasn't a cult ritual but that's what this podcast is all about it's establishing a tapestry it is an initiation of of sorts into the occult and its symbols and today we're going to be continuing that exploration that I started a couple weeks back of the 9/11 event and we're going to be looking at numbers that were involved on 9/11 2001 the whole event is known for its numbers 9 and 11 and we're going to be looking at how the numbers that are involved in 9/11 are specific to the occult they are indeed occult numbers and known occult numbers in different traditions and schools of occultism so we're going to be looking at that today and when you see the interconnections of these numbers and the correlations that are established with these numbers as related to the 9/11 event I think most people will not try to make the stretch that this is pure coincidence and that if there's nothing going on behind the scenes here and realize this is beyond chance this is beyond coincidence that this is something that is indeed orchestrated or deliberate and I have to leave my mind open to the fact that it may be something that I call synchro mystic after the term synchro mysticism which is basically the universe self-organizing something that is seemingly ordinary not not that the 9/11 event was ordinary in any way but even down to things like information encoded in movies or books or popular culture and it is telling us something extraordinary okay so it is the mystical contained in the seeming mundane physical worldly events that are taking place but yet the universe itself as an intelligent principle is self-organizing that information and just it happens to come out in an extraordinary way that is telling a deep underlying philosophical principle to everybody involved which in this case is humanity when it comes to the 911 event so synchro mysticism could be at play but I would suggest that it's probably a combination of both because when you understand the occult significances of these numbers there's no way that the orchestrators of 9/11 event do not understand that these are occult numbers and I feel that they employed them deliberately as part of the orchestration in order to invoke certain energies and frequencies that they believed whether you believe it or not they certainly do that these numbers invoke in and of themselves so we'll be getting into this very deeply on the other side that's a brief introduction just to whet your appetite I'll send you up to the website to get the imagery that we're going to explore on the show when we come back after these messages don't go anywhere folks ok ladies and gentlemen we are back on what on earth is happening on your host mark passio I want to send everyone up to my website what on earth is happening calm because for the presentation this evening you will need the images that accompany it and they are posted on the radio show page of the what on earth is happening dot-com website right underneath the player you can see images for today's show and there are 21 images listed there you can click them individually and jump from image to image like a slide show and there's deliberately 21 images there ladies and gentlemen it's not an accidental number I did that on purpose and you'll understand why hopefully moving forward with the presentation today I figured since we're going to talk about numerology why not make it a significant occult number so here we go before we start I just want to say that many people again will find this information too abstract they'll find it unbelievable that numbers happen to work out like this and they'll say people are seeing patterns where there aren't any and I would counter with the fact that what consciousness ultimately is is the ability to recognize patterns and meaning with respect to those patterns when you understand that the people who are currently in control of our civilization as a whole are dark Oh cultists you understand they believe in the power of numbers they believe that all the forces of the universe all of the forms of the universe that underlie everything are based in number and indeed they are it's the universal language mathematics in general and number does carry meaning with it inherently it's not just people that ascribe that meaning so some people may or may not accept that or believe it but I'll tell you what the occultists who are running the show here they certainly do believe that and that's why they employ number to their benefit and they could do this openly in the light of day practically that's how unconscious the general population is that they would not recognize the occult numbers that were used as part of this event so let's begin by looking at slide number one which I basically showed people this configuration or arrangement of the buildings on 9/11 a couple of weeks back we have the three yes three buildings which came down in New York City which is building one the North Tower there to the left with the radio antenna on the top tower to the South Tower which had no radio radio antenna atop it and building seven also known as the Salomon Brothers building and this was a forty seven storey skyscraper that stood closer to the east than the other two buildings of course the Pentagon was also damaged but did not collapse quote unquote collapse in the way that the two towers actually the three towers came down into their own base on that day so we saw the correspondences two different occult traditions a couple of weeks ago and we compared the buildings and their arrangements to the columns or pillars in three different occult traditions namely the Kabbalistic tradition the tradition of Kabbalah the taro tradition and Freemasonry and we looked at the occult correspondences to understand basically that these pillars were being destroyed as a symbolic representation of the ability to climb in consciousness okay the ability to ascend the ability to transform to go beyond ego and base consciousness and division and duality to come up to a higher level of awareness and the occultists are essentially destroying that they're destroying truth they're destroying the goddess again this is another symbolic goddess sacrifice ritual because that middle pillar as we saw when we related the arrangement of these buildings to the Tarot tradition represents the goddess in that tradition and people will say well these are this is a stretch you know this is a seeing correspondences where it doesn't exist if you follow through the progression for anybody that happens to be new to the show you follow the progression of this podcast to understand the occult correspondences and symbology you will understand this is no mistake or accident these correspondences exist and a cultists were using them to great effect on 911 now if we move to slide number two we see this the building numbers these are the simple building numbers which were assigned to the buildings in the World Trade Center complex here we start with the numbers okay building one building two and building 7 which I've already outlined okay now if we simply total that number one plus two plus seven we get the number ten now coming to a higher level of consciousness involves bringing together the male the masculine okay or the left brain hemisphere and the feminine or the right brain hemisphere and we we have seen the symbolic correlations to the masculine and feminine the phallic symbol representing the masculine aspect of consciousness for action okay this phallic symbol sits atop the North Tower and it represents a one okay a straight line a vertical line that's why a an obelisk is a phallic symbol okay a straight line one is always representative of an archetypal symbol of the masculine aspect of consciousness the egg or a zero is a an archetypal symbol of the feminine aspect of consciousness or the emotions and this is a ritual as we will ultimately see to play upon human emotion in order to evoke certain emotions so that you could then evoke certain actions okay so moving on to slide number three I keep these numbers in place to help people to understand that it is 10 that is being destroyed on these three buildings that came down in New York City and we have 10 Seth hero on the Kabbalistic tree which we saw the the symbolic analog to the correspondence to a couple of weeks ago the Kabbalistic tradition the ladder to God the three pillars were paths namely the path of severity the path of mercy and the Middle Pillar the path of mildness leading from base consciousness Malkuth the kingdom to unity consciousness katare the crown again this is also correlated to and representative of the chakra system or the Kundalini energy that resides within the body along the spinal cord and the bilateral symmetry between the left and right sides of the body okay so the three pillars or buildings these skyscrapers are representative of these three paths on the Kabbalistic tree and they are being symbolically destroyed the ten Sephirot are being symbolically destroyed in the ritual known as 9/11 see it's not ten it's not the union of male and female it's 9:00 and it's 11:00 if not ten and we'll explain what that means on the other side of the break don't go anywhere folks you're listening to what on earth is have real information okay we're back folks this is what on earth is happening today on the show we're talking about the occult numerology involved in the 9/11 event all of the images for the show can be found on what on earth is happening calm on the radio show page right underneath the player there's 21 images listed there for you to click on to follow along we are talking about image number three which is showing the correspondences between the three buildings that were brought down on 9/11 in New York City and the three paths of the Kabbalistic Tree of Life and namely how there are ten Sephirot or emanations on the Tree of Life and the total number when we account for the building numbers building one building two in building seven that were brought down into the street of New York City is 10 now on this image of the tree you see the sphere called dot which is behind the middle pillar that is not considered one of the sethi wrote themself in books like the Sepher Yetzirah and the zohar which are primary Kabbalistic source texts they give prescriptions against thinking of there being any less or more Safiye wrote on the tree on the Kabbalistic Tree of Life than 10 they say it is blasphemy to speak of it of the Tree of Life as having any less or more sefirot than 10 10 is the number because it represents the union between male and female which is ultimately the path to higher consciousness okay archetype only it represents that the number 10 okay what they are bringing down is this divine union which is the path the ladder to God okay all of the paths of the Kabbalistic tree are being destroyed in this ritual because these buildings rep and the tree itself okay now essentially what we want to understand is that the name of the ritual is based upon this Kabbalistic tradition and the warnings in the Zohar it's called 911 okay so the name is a blasphemy in itself of the ritual it's it's a blasphemy of the Kabbalistic tradition and it essentially represents the destruction of this path to awakening okay or awareness now if we look at the plain numbers the numbers of the forces that were used to hit these four buildings okay if we include the Pentagon all right now we're moving to image number four slide number four if we look at the plane numbers these are the flight numbers for the planes that are said to have struck these targets flight 11 was the first plane to hit a target it hit the North Tower the male pillar the second plane number to be involved was flight 175 that struck the South Tower okay now that plane was when the world realized whoa this is something that is not an accident this is deliberate it's on purpose it's an an attack and that's when the fear set in because they used the feminine principle see the first number hit the North Tower representative of will representative of action that's when this event is set into motion then the real terror the rear real Oshin becomes involved like a punch when the second plane hits which is flight 175 and when we understand the occult significance is of these numbers will understand that this is a deeper connection when we understand that these two numbers that I've just told you are indeed import no cult numbers but they're not recognized as such generally the other two plane numbers or flight numbers that are involved generally are recognized by most people who have even a peripheral understanding of the occult and its principles as occult numbers and they are the number the numbers 77 which is the flight number that hit the Pentagon or allegedly at the Pentagon and 93 which is the number of the plane that crashed in Shanksville Pennsylvania which I have been very vocally suggesting that this plane was meant for building number seven but although it did not reach its intended target that extremely important building 7 which is the key to understanding the entire 9/11 ritual the plane did not make it to its destination and we don't really know why that is I would suggest that against orders in an act of one's own will refusing stand-down orders to let this plane go unhindered that plane was shot out of the air by a pilot but guaranteed that plane was not headed for Washington DC as they want to suggest that plane was headed for New York City also or whatever it was okay because there's a lot of evidence that suggests that no plane hit the Pentagon but it may have been a missile of some type and I'm not going to get bogged down in that speculation I'm just saying that's certainly a possibility but we're talking about the plain numbers or flight numbers that are attributed to the planes and this is very significant because these are all highly significant occult numbers for anyone with a trained eye and anyone that has done a little bit of reading into the occult now the next image begins the breakdown and the explanation of these occult numbers and this is slide number five which is going to be the meet it's going to be the bulk of the presentation here today we're looking at occult numerology and eventually this leads into something known as gematria okay gematria is the addition of numbers and their reduction usually two single-digit values okay and it's the understanding of how words when you ascribe numbers or values to the letters that comprise the words take on a value in and of themselves numerologically okay so we'll be looking at how this works and we'll be analyzing these four significant occult numbers that are the flight numbers of the planes that were used as the weapon to attack these buildings and the people inside of them on 9/11/2001 so let's start with the number 93 which is probably the most well known out of these numbers when it comes to occultism in general even people who have some occult knowledge many won't recognize these numbers but of those who have a little bit of knowledge 93 will probably be the most recognizable number when it comes to occult numerology what the number 93 represents we saw back podcasts ago when we looked at the symbolism of the all-seeing eye and pyramid on the back of the one dollar bill because this is the number that represents Ascension okay it represents moving from a lower level of consciousness to a higher one it represents the number of the climb so to speak okay now there are two Greek words that essentially when you add their gematria values or the values that are given that are assigned to the individual letters in the Greek language when you add all of the letters up that make a couple of words in Greek they both total to the number 93 and the first word is written there in the second column underneath where I have the derivation and meaning o cultic derivation and meaning of these numbers okay so the word thelema Thelema okay if you transliterated that greek word there that's printed in the right hand column next to the number 93 which is thelema into English you would spell it th e le ma Thelema okay so what that word means in the Greek language is will will okay and then the letter theta is given the value of nine the letter ADA which is the second letter I'm sorry epsilon is given the value of five the number the letter lambda is given the value 30 in Greek gematria the letter ADA is given eight the letter mu is given the value of 40 and the letter alpha is of course one when you total those numbers you have the number 93 93 is the number of the will we'll pick this up on the other side don't go anywhere this is what on earth is happening we're back ladies and gentlemen this is what on earth is happening my website what on earth is happening calm we're looking at the occult numerology involved in the 9/11 event today and we are looking at image number five which can be found among the other images on what on earth is happening calm on the radio show page of my website right underneath the player there's a series of 21 images which are acting as the slides for the presentation today on the show image five shows the numbers of the flight numbers involved on 9/11 these are the the flight numbers of the planes that hit the buildings we're looking at the number 93 to understand its occult significance it is the number represented by the Greek word Tolima which means will we do the Greek gematria of the letters in the word thelema and it equals 93 also the word agape in Greek alpha gamma alpha Pi ada equals 93 those letters in the Greek language can be given the values alpha is 1 gamma is 3 alpha is 1 pi is 80 and ADA is 8 you add those up you get the number 93 this word in Greek in the Greek language means love so the will and love things that we have talked about extensively on what on earth is happening in the previous podcasts they are equivalents in the occult world in the world of numerology these words are identical they mean the same thing to ascend the higher level of consciousness truly to do the will capital W not the lowercase egoic will not my will be done the higher will of the transformation of consciousness that is love these are equivalent principles they are identical you could call it the plan of God if you want you can call it the will of creation I don't really it doesn't matter to me what it's called that is the dynamic energy of the creative force called love that is the force that expands consciousness we've talked about it ad infinitum on previous podcasts so what the word the number 93 ultimately represents is ascension out of ego and duality dualistic thinking and it is ascension to love will or unity consciousness this number when added together reduces to the number 3 because 9 plus 3 is 12 and then we add the 1 in the 2 to get 3 okay that's how you reduce in Jamaa tree to get down to a single digit value the number 93 you add the 9 and the 3 together you get the number 12 and then you add the 1 in the 2 and 12 together to get the number 3 so that's the reduction of the number 93 ok since 93 reduces to 3 it is equivalent to the very significant occult number 777 which we looked at in the past on this show because 7 plus 7 plus 7 is 21 which I said was a significant significant occult number as well for that very reason 777 is the number of men embodying the principles of higher consciousness having an activated and intellect and activated true care or heart and activated will action for the right reasons so thought emotion and action are unified brought together they're not in a state of duality or opposition and they are all geared toward the higher will their complete and activated and they're all headed in the right direction that's what 777 represents and therefore it is the number of being in the world but not of it it is the number of somebody that is embodying what is known as the Christ consciousness so when we total seven plus seven plus seven we get 21 and then that also reduces to 3 2 plus 1 is 3 therefore 93 could be said to be the equivalent of 777 in a cult numerology or in other words the embodiment in man of the divine okay men embodying the divine being like the Creator the essence of the Creator but still being in the world not being God not what I'm saying so people should not put words in my mouth that's not what I'm saying I'm saying you are embodying the principles of higher consciousness of Christ consciousness of divinity while still existing and operating on the physical plane being in this world but not of it which is the words attributed to the teacher that people call Jesus now that's the same as love or the true will 93 okay so the number 77 let's look at what that represents 77 well immediately we can see that it has a correlation to the number 777 except one seven is missing it's only two of the three sevens so here I've put 77 out of 777 well we're looking at the number 77 and we're talking about it in occult terms okay not just your you know everyday mundane looking at a number but in how it is viewed in the occult the number 77 is very significant because it represents two out of those three sevens which symbolically represent a man existing in a state of divine consciousness okay so if we do the reduction on seventy-seven and the reduction on 777 what we're seeing is that 77 out of 777 actually is 14 out of 21 because seven plus seven equals 14 and of course seven plus seven plus seven is 21 so you're missing one-third or in other words you have two-thirds the two thirds that are being talked about here symbolically are thought and action or intellect combined with will lowercase W will or what I have called here egoic will this means I'm not concerned with what's going on in a wider sense I'm not concerned with the will of creation I'm not concerned with helping anybody ascend in consciousness I'm worried about number one I'm looking out for me the ego run amuck okay the ego mind gone haywire that's the egoic will my will be done so in this case these two sevens represent the intellect and the will combined the lower will but no mo no compassion the heart has been completely stifled so you have the skull the intellect and the bones the willingness to carry out your actions but the heart or the spirit has been killed or has been completely taken away that's the definition of a psychopath which we should understand by this point this is what these so called elitist / globalist / dark occultists are their psychopathic individuals who have murdered true care how they do it every year at Bohemian Grove in a ritual called the cremation of care destroying the inner child destroying the Sacred Feminine destroying the heart that's what they're all about they only care about themselves so that's what 77 represents it's the number of the sorcerer of the dark occultist this is their number we'll be right back on the other side of this break folks we'll pick up the occultic numerology and the explanations of these four significant occult numbers involved in the 9/11 event don't go anywhere you're listening - what on earth is happening here on the Oracle broadcasting radio network why 97 this is two of the three 7s 14 out of 21 okay so it represents the skullenbones it represents the sorcerers it represents intellect and we'll devoid of compassion okay and two-thirds in decimal format happens to reduced to a repeating 6 6 6 6 repeating that's significant the number of the beast representative of base consciousness not achieving the 7 at all okay so in other words it's saying like having these two developed is like having nothing develop because you've really learned nothing if you haven't activated the heart very significant in what it is saying symbolically okay 77 is duality times 7 and we'll see what that means in a moment because 11 is actually a number that represents duality in the occult and 2 times anything by 7 is like saying you've taken it to the extreme okay that's even numerology that you find in the Bible as well not just in in a cult and Kabbalistic traditions and gematria and numerological traditions but you see even see that in biblical traditions to time something by 7 is to take it to the very extreme and indeed that's what these are cultists these darker cultists who are the sorcerers they're the 77 they definitely have an extremist point of view when it comes to not caring about anybody but themselves one will notice that 77 is one short of the book of truth the Tarot which has 78 cards in it and this is all about the truth remaining hidden and some people trying to bring it out the revelation of the occult the revelation of 911 truth the book of truth of Tara of the taro cards 78 cards 77 one short meaning you didn't make it to the truth see this one short comes up over and over again in the occult the number 92 which we're going to see which is what 9/11 is 92 9 and then the two ones reduced to a to add to it to 92 you didn't make it to 93 are you getting it yet is it sinking in the real meaning behind this ritual ultimately the number 77 represents deceit or the opposite of truth and represents sorcery it represents chaos and represents all of these things prevailing over truth love and the true will so in the dark occult this is a significant number and for anybody with a sane rational working brain and sin and a true range of human emotions that involve care this is a number that should be viewed as at least when it comes to its occult usage as something that is dark and sinister pick up the other two occult numbers used in the 911 event on the other side of this break don't go anywhere folks welcome back ladies and gentlemen - what on earth is happening I'm your host mark passio my website what on earth is happening dot-com this show is live every Sunday evening from 5 to 7 p.m. Eastern time here on Oracle broadcasting we're looking at the occult numerology of the 911 event today on the show all images may be found that what on earth is happening calm on the radio page radio show page we're on image number 5 and we are looking at the flight numbers that hit the buildings on 9/11 so we looked at 93 and 77 and understood and now understand the true dichotomy between these numbers and how they're essentially polar opposites couldn't be more dissimilar when it comes to occult terms now let's look at two lesser known numbers but nonetheless significant numbers in the occult 11 and 175 11 is a signalling number a signalling number used to identify a cultists to each other okay it represents the great work of synthesis between opposing forces or in general dialectics that we've talked about here on the show many many times union of opposites now this could be a good thing or a bad thing depending on how it is used bringing things together is not necessarily a bad thing but doing it in a way that is orchestrated of chaos in order to get your way as a result of the management of that chaos okay creating chaos and then capitalizing on it to create the synthesis that you want is the dark usage of the dialectic we've talked about both of these examples and 9/11 being a prime example of the dark usage of the Hegelian dialectic okay but in general eleven represents duality or two forces these are the two pillars that play off against each other the positive and negative the male and female okay so in general it represents duality and then them staying in a state of duality not coming together ultimately that's what the eleven represents see it represents the great work in the sense that yes you have the thesis and the antithesis but you must bring them together to form the synthesis as a number itself and as an archetype the two vertical lines without the third without coming together without them being tilted or placed you know in any kind of an overlap represents duality remaining okay so this is also a number that represents chaos duality in general it represents an us-versus-them mentality I've also put here it represents the fall or this the original sin of thinking of oneself as separate from everything else that's what the true quote original sin is coming into dualistic consciousness that's what the fall of man is ultimately about a change in the way he perceives his reality and his place in it that is a degradation in consciousness a fall so the number 175 is probably the least known had evolved four of these numbers and again we have to look at it in relationship to another number and I would suggest they used the the 175 here because to use the war the number that they probably really wanted to use would have made it altogether too obvious because I guarantee you I guarantee that when they were planning this the occultists who planned this event and they said what numbers are we going to give these have these flights or you know when we send our Lackey even if you know they didn't actually just assign these flight numbers you know when we sent our Lackey on what flights are we gonna send them on these people who were gonna you know basically have VR patsies for this event and I guarantee you somebody wanted to put them on flight for 18 guaranteed if you know anything about the occult and what that number is but they said that would be altogether too obvious if it wasn't already obvious with the other three numbers 93 77 and 11 and incidentally folks flight 11 the flight to hit the North Tower struck floor 93 and flight 175 the flight that hit the South Tower struck floor number 77 so are there enough coincidences yet built up on top of each other for you to see that it's not a coincidence that there's a pattern here if you understand the number 175 in relationship to the number 418 it becomes very clear there were we're seeing here the dark usage of a thalamic magical tradition that was employed by Aleister Crowley okay and we're seeing dark occult numerology brought into this event in plain sight because what the number 418 is is it is considered the magic word of the Aeon abracadabra not abracadabra okay with a Serie K but abrahama with an H okay this is an 11-letter word that represents magical force the invocation of magical force employed toward a specific manifestation that's what the number 418 represents now if we reduce 4:18 we get 13 if we reduce 175 we get 13 therefore they are equivalents in a cult numerology there's no difference between them they mean the same thing just as we saw with will and love the leymah and agape so they could be used interchangeably so realize when we're seeing the number 175 that struck the South Tower and began the day of terror in people's minds that's the flight that hit the feminine pillar and invoked the emotional reaction of fear intense fear what that was was the magic trick really being begun that was the ritual they signaled each other 11 flight 11 has hit the North Tower well dark occultus all over the world probably stood up and paid attention that's a signalling number it's a number of duality and sorcery and then when 175 hit that's abracadabra the trick is on and this is the Rite of manifestation as I've said that's what this ritual was about that's what it was called in the occult circles an act of chaos sorcery in dark ocultism is generally referred to as a right of manifestation the word manifestation in the occult reduces to the number 13 in general this number is representative of magic or ritual workings we'll pick it up after the break don't go anywhere this is what on earth is happening the back pokes this is what on earth is happening on your host more capacity looking at the okay numerology of the 911 event on the show today before we get back into the topic of two quick things the first is something I've been wanting a drug to address on the show I'm gonna take a brief interlude here to do this is the topic of email a lot of people email me and I really really appreciate the fact that people take time out of their day to send me email I just want to make it publicly known that I get so much email during the course of any given day that is next to impossible for me to personal personally respond to a lot of the email that I get so I don't want people to take offense I just want to state that that if I set an answered email I will read it but if I if I sat and answered all of it I would literally do nothing else during the course of any given day but be sitting at the computer answering email and I just simply don't have the time to do that so I really appreciate everybody taking the time to write and make their thoughts known I read the email that is sent I unfortunately cannot respond to it all it's something I haven't addressed here on the show and I felt like it was time to do that because the volume of email really is picking up and that's good to see because that means people are engaging in this information the other thing I wanted to comment on is I was just taking a look at my chat room during the break and people are pretty on the ball and somebody put something in the chat room that said and this person was anonymous in the chat room anon 9 2 7 9 said that the gematria of the name mark passio in english gematria equals 7 777 and said is mark one of the sorcerers awesome comment what many people may not know is that my middle name is Anthony so include that into the equation and that's all that's all that I'll say on that so the properties of two other numbers is what we're going to jump back into here for a slide number six we're going to now okay slide number six on the water on earth is happening page the other numbers that need to be understood in relationship to these four numbers we've already seen we looked at these two numbers when we were analyzing the symbology and the gematria of the pyramid and all-seeing eye symbolism that's on past podcasts here on what on earth is happening so if you look at the number 777 again this is man and unity consciousness we've already gone over that on the show the number 666 is man and beast consciousness or base consciousness where thought emotion and action are inactive or incomplete now these reduce to again respectively the number 3 777 reduces to 21 which reduces to 3 and then the number 666 reduces to 18 which reduces to the number 9 9 being the number of ego and base consciousness we saw this on a previous show the properties of 9 in addition and multiplication what 9 symbolically represents okay this isn't you know trying to say inherently the number 9 you know it's is evil or anything like that symbolically when you add it to something else it does not change the resultant value no matter what number you add it to it's essentially like adding a zero so adding ego to any given situation changes nothing if you come to the table with more ego that's all that you get is you get more of the same it changes nothing ultimately ok the when the multiplication side of the number 9 the aspect ok the multiplicative acts aspect always returns to itself ok so 9 times any number you add the digits together that result you're always going to come back to the number 9 so 9 it's more of itself in or in other words when ego multiplies only more ego is ever made you're not changing anything symbolically in numerology in a cult numerology from a symbolic perspective 9 is the number of base consciousness and ego which ultimately can never change anything if you're coming to any situation from the perspective of ego and lower consciousness selfishness you're never alternately going to create the change that you're looking for ok so the geometry of 9/11 moving to slide number 8 now is the number 92 okay the the entire ritual is based around the number 92 911 you just add the two ones together to get 92 this means you have fallen short again just like we saw 77 is the falling short of the truth of 78 the book of truth okay and also the number 15 which is related to five five five triple five is in Freemasonry the number of the divine Hiram Abiff number man-like being like God essentially being in that divine state of consciousness embodying the divine is a good way of looking at it okay so 92 out of 93 of course the nines basically can just be removed they go away when you add in gematria it's like adding a zero but I took people through the intermediate step 90 92 when you add those numbers together you get 11 and then you can reduce to two conversely 93 when you add those together you get 12 and then one plus two is three but ultimately it's saying you've fallen short there's been a failure to achieve 93 if you've only come to 92 it means you've fallen short of love you've fallen short of will you've fallen short of higher consciousness of unity consciousness and if you arrived at 92 out of 93 you've arrived at two-thirds just like if you have a that 77 out of 777 you've arrived the two-thirds and that number two-thirds is significant because it's a repeating six and this is symbolic in numerology of failure perpetual failure never coming up to higher consciousness that's the the sticks they called hell by any other name you want to call it that's what it is perpetually failing to raise consciousness and always staying in base awareness is a condition called hell it's separation from the divine eternally and that's what hell has always been considered by any tradition so this is a ritual of invocation to hell it's a ritual by which they want to keep people rooted it rooted in base consciousness never ascending the ladder to god never ascending jacob's ladder never ascending the middle pillar see podcast number 67 for further details about the other occult significance is and correlations to 9/11 and the traditions the occult traditions that it corresponds to to go back to the numerology we look at these four flight numbers once again and we see even within these four numbers there is a pattern embedded if we simply do the gematria of them we add them together okay so 77 added together you get 14 now I'm working with slide number 10 now for those who are following in the slideshow slide 10 77 I'm adding those two digits together to arrive at 14 11 I'm just keeping as 11 for now to keep it in a decent layout okay 93 right underneath it I add the 9 and the 3 together and I put the number 12 and then 175 I added to get and I get 13 so we have a linear progression of numbers 11 12 13 and 14 the 14 being the highest we'll pick it up right here on the other side of the break we have two segments left I'm going to try to get your calls in the fourth in the final segment don't go anywhere folks I'm mark SEO and this is what on earth is happening okay folks who are back on what on earth is happening let's jump right back into the topic which is a cult numerology of the 911 event looking at image number 10 on what on earth is happening calm on the radio show paid here we see the reduction of the four forces I guess you could say that we used to conduct the 911 ritual before plane flight numbers and we're simply doing the Jomon tree reduction upon them which is adding the digits together and we see a linear pattern emerge when we add seventy seven we get fourteen and when we add eleven 93 and 175 we get eleven twelve thirteen respectively so following through this reduction pattern on the next slide slide number eleven we get the numbers two three four and five so keep in mind what we're talking about here is what I would just consider the forces that were used to invoke the entire event which were these four planes regardless of whether they're actual planes we're talking about the numbers here okay and we have a pattern two three four five when we add these digits up once again we're back to the number fourteen which is essentially the number 77 it's like an odd it's like the perpetrators of the event telling you yeah it was us the dark occultists love to tell people exactly what's going on exactly who's doing it to them at every step of the way it's it's they derive a sick sense of enjoyment a perverted sense of pleasure from understanding that they can put this into someone's face and they still can't see it now why is 14 significant well first of all as we just saw it is the reduction of all of the values of the flight numbers or the forces that were used to enact the event it is also the reduction of the event date itself 9/11 2001 you add all of the digits together in that date and you get the number 14 okay but why is this significant why is aside from being the equivalent of the number 77 why is this significant well this is significant because it relates to it corresponds to and that's the key factor here correspondences that's what consciousness awakens it allows you to see patterns and correspondences and everything is a correspondence that which is above is like to that which is below and vice versa the universe is self-similar across scales we live in a fractal universe the very large the macrocosm is like the very small the microcosm okay so this event through the reduction of the main forces that were used to conduct the event is telling us who did it and perhaps the perpetrators of the event planned this deliberately again I'm open-minded to the concept that this may be synchro mysticism as it is generally called that's what it's been coined this idea that the universe is self-organizing this to attempt to further awaken people okay but I think it may be a combination of both of these things in any event slide number 14 and ladies and gentlemen no I did not deliberately put that in that slide I'm realizing this at this point okay which shows you how synchro mysticism works I did not deliberately try to make this the 14th slide but it worked out like that I did deliberately make 21 slides in all though slide number 14 shows the significance of 14 the all-seeing eye in pyramid which we've talked so much about the light or the eye being representative of the divine of God of the Creator whatever you want to call that force the brick being the 13 layers of darkness that we need to get past or that we need to transmute because we're all a personal zodiac the light the spark of the divine there the Sun and the 12 helpers or houses okay and we need to bring that light into its fullness so that we can embody the real light the true light the true source that unites us all the one eye meaning there's no separation between any one there's only one eye okay so that unifying factor is the fourteenth level of the pyramid and no man or woman can claim to be it in this world in the physical domain we aspire to it we reach toward it we realize we are all of it it dwells within us we dwell within it but nobody can make the claim that they are God and that they are the authority here in this realm however this is what a small group of individuals here on this planet that I call the dark Oh cultists the controllers the sorcerers name them what you will think that they can become that's their ultimate goal folks which we're going to talk a lot about next week they want to be God they think that they can be God here become all-powerful become all-seeing become all-knowing become um present live forever and rain in a place that they've turned into hell rather than face the consequences of their actions through natural law and they consider themselves the fourteenth level of the pyramid in their minds they are god on earth and ultimately they're using their power their force to bring about this Rite of manifestation or in other words the 14 that's who they are they are the seventy seven the Sorcerer's and they're using the power of the of sorcery which is what this event is to conduct this ritual a rite of chaos sorcery I don't use the term chaos magic I know it's a more popular term that's been coined but I make a distinction between magic and sorcery and I took a look at in the chatroom and didn't see another comment from mr. anonymous because apparently people understood what the the gematria of my name added to a magician yes a sorcerer no everybody can be a magician that's what we need we need magic to fill the world and that's the light of the true divine creator not this sick twisted psycho psycho Pathak ruling class that thinks their God we can all aspire toward unity consciousness the unification of our thoughts our emotions and our actions as one operating toward the higher will with no contradiction between them we just have to set our mind toward it now I'm gonna leave that part of it there but I'm gonna move into one other further aspect of the gematria between 911 and this is what the event numerologically is saying overall if you already haven't seen enough of that and understand that there's no way these numbers just happen to work out like that as coincidence okay slide number 15 shows these numbers and the buildings that they struck the flight numbers and buildings that they struck and again there's so many other correspondences in numerology to the event in so many different areas I'm sure people can bring things to my attention I haven't heard of but this is just one more I'm going to lay out on the table before we go to the calls in the next segment 11 and 175 while 77 is the flight were that hit the building where they're sorcerer's that really conducted this event were at the Pentagon and the intelligence agencies okay and the Defense Department etc okay who were really conducting this inside job the the the flight that was supposed to hit building seven I'll say was flight 93 okay and again that is my contention well I can't 100% prove that in all likelihood that's where 93 was headed and a pilot refused the stand-down order shot it out of a sky in an active will we're gonna look at the two numbers 11 and 175 on the two towers and understand the significance when you bring these together in an act of synthesis on the other side of this break don't go anywhere folks I'm mark Pesce oh we have one more segment left I will wrap up this segment on occult numerology and then we'll go to the phones in the last segment we're listening to what on earth is happening on the Oracle Broadcasting Network stay with us god made us stay asleep oh babe when he looks at it with his eyes it won't be seen when he looks at it with the sunglasses we see the same things all the way through the subliminals is gonna be courtesy okay no we defended before we're back folks last segment of what on earth is happening on this Sunday July 17 2011 edition we're looking at the occult numerology the gematria of the 9/11 2001 event which were coming rapidly up to the 10th anniversary of we're looking at slide number 15 on the what on earth is happening dot-com radio show page and let's move to image 16 where I am adding together the forces or flight numbers that struck only the two towers okay the pillars of duality because ultimately they wanted to bring down all three of these pillars these structures that represent the Kabbalistic tree that represent the temple of solomon that represent the temple of the goddess etc okay all three of these pillars eventually came down that's why they had to bring down the middle pillar building seven even though no plane hit it the ritual would not be complete without bringing down that middle pillar even though it had not been struck openly by one of these flights but if we simply add the two values that struck that large towers tower one and tower two which are trying to synthesize through this force okay a fear the injection of fear is trying to create is needed to make a synthesis this is what the dark usage of the Hegelian dialectic is we add these two forces together these two flight numbers and we get the number 186 which isn't significant in another self until we redistribute that force equally that combined force equally between the two towers so in image number 17 I do that and lo and behold what do we have 93 on every one of the pillars now there's no way that's an accident there's no way they chose to occult numbers that when added together and then divide it in half to redistribute them equally you get 93 on each one impossible no way that's an accident 11 plus 175 is 186 divide that by two in half and you get 93 so ultimately one could say you could discard all of the other numbers and the 9/11 event really only adds to two numbers only comes down to occult eclis numerologically it comes down to two occult numbers the number 77 and the number 93 and we already understand the significance of these numbers but which number ended up winning on that day and ever since I would say well the number 77 was on was the flight number that hit the building that did not come down that did not collapse yes it was impacted it was damaged and that was done for a psychological effect to say oh not even the heart of our defences is safe who is safe then that's just there to inspire more fear ultimately we understand that these numbers are occult numbers that essentially are derivations derivations of more significant occult numbers which we've already seen 77 is 2/3 of the 777 which reduces to 666 and 93 is equivalent in Jamaat tria to the number 777 so what is this what is this ritual ultimately doing what is it ultimately saying why is it ultimately what is it ultimately design to instill in this in the cont the subconscious mind it's the triumph of evil over good it's the triumph of the Sorcerer's over the light the true light is the triumph of the forces of darkness over the true god of creation that's what they're saying to us symbolically 666 beast consciousness reigning over the 777 or the 93 which was destroyed in a ritual that added up to 92 9/11 ultimately this was all about the Hegelian dialectic and all about manipulation of human consciousness into patterns of thought and action thought and action thought and action that's what the dialectic does it removes the true emotional dynamic out of the equation because if one is ruled by the emotion of fear they can't really use true care they're locked in the r-complex of the brain and when you're locked in the r-complex of the brain you are stuck in a cyclical pattern of thought and action but you're never really using your emotions as a guidance system you're in the reactive mind and that's what this ritual was designed to do it was a perfect example of setting people against each other they do this all the time in politics this is the the simple dialectic but in this example it was ratcheted up a few notches and really had a whole lot of occult aspects involved in it because ultimately what they were trying to do is make everyone in the world take a side and pit the Western world against the Eastern world or ultimately pit judeo-christianity against Islam and they can wage a whole lot of war as a result they can pillage a whole lot of other countries steal a whole lot of resources and ultimately make more and more headway into the removal of natural law rights from the people of this country and every other that's what this event was ultimately all about let's go to the phones caller you're live on what on earth is happening we don't have a lot of time what do you have for us hello caller yes can you hear me yes your own lives I wasn't sure if this is relevant but it might be only because I happened to notice 11 all over the the the 9/11 offense yes the number 11 but I was curious to know how it's relevant to I guess your take on the 11:00 11:00 time prompt phenomenon sure well when you put the second 11 in you are balancing than the number see that's the only number on a digital clock that is in perfect balance on both sides of the of the colon in the middle of the digital clock think about there's no other number that is in perfect balance on both sides it's a mirror which is essentially telling us the answer is to look within look in the mirror there's the solution there's the answer 11:11 is actually a transformative event in in the concept of syncro mysticism and maybe we could do a whole show on that because it's very interesting once you start looking into it and let me tell you something I don't know how many other people out there have had this phenomenon and strike them but I've had the 11:11 phenomenon hit me so hard where it's so far beyond chance or coincidence of seeing that number it they call it the lightworkers call 11:11 people who are called to do this kind of work I'm sorry you broke up there I'm sorry I was just saying I would love to see it at that show sure maybe I could do a show on that in the future well thanks so much for calling and I'm going taken try to squeeze another couple of calls in here let's see there we go caller you're live on what on earth is happening we're pressed for time so what do you have for us a good day March looks like 9/11 was a false flag operation everybody knows that super great I just wanted to be make everyone aware that there's another one coming this year probably around November 9th and probably something do this whole element things will be aware of it and don't be freaked out and don't be pushing to the negative vibration because of something really big that's gonna make 9/11 look taller think about it 11-9 it's it's very quite possible they love remotes a cultist love reverses so no i i am definitely an agreement we should definitely keep our eyes and ears open and you know not fall into the pattern of reaction reacting that's what we did on 9/11 I even fell into it unfortunately folks that's all the time we have on this edition of what on earth is happening I want to thank everybody for listening great calls as always sorry that you get some more will get to take some calls next week when I talk about the ultimate point of the occult esoteric agenda stick around up next the vantage point with Michael Vale see you next week folks

What On Earth Is Happening Show #070

Topics: *The Dark Occult Esoteric Agenda, New World Order, Mind Control, Natural Law, Military & Police Willing Complicity In Human Slavery*

freedom man that's what it's all about welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc Pascoe welcome one and all you are listening to what on earth is happening here on the Oracle broadcasting radio network I'm your host mark passio my website is what on earth is happening calm the networks website of course Oracle broadcasting calm today is Sunday July 24th 2011 the show is live here on Oracle every Sunday from 5 to 7 p.m. Eastern Time that's 4 to 6 p.m. Central we have a good show lined up for you here tonight we are going to be discussing the end goals of the occult esoteric agenda what ultimately do the dominators of this world want to create what is their dark new world order what will it look like for Humanity if it is completed we're going to be delving deeply into the dark here tonight as sort of a finale in delving into the darkness because this show is going to be shifting toward solutions oriented approaches in the coming weeks so today we are going to focus on what the end goal is all about the why behind the New World Order as it is known before we do that though I want to make one quick event announcement before we go to the break here in the first short segment the great activist group here in Philadelphia truth freedom prosperity is hosting their monthly documentary screening and discussion night this coming Wednesday July 27th at 7:15 p.m. they're going to be screening the documentary called the American Dream about the Federal Reserve System this documentary is going to be shown at media Bureau Studios media Bureau is at 7:00 25 North 4th Street that is the corner of 4th and Brown streets in the Northern Liberties section of Philadelphia there will be a documentary screening and then following that there will be a discussion about the film and anybody that is interested in this great activist group or attending the documentary screenings that they host that media Bureau every month please see their full schedule and all of their activities on meetup.com you can get there get to their meetup group by going to the web page ww truth freedom prosperity Iorg that's truth freedom prosperity org a great activist group here in the Philadelphia area I'm honored to be involved with them and take part in some of the the implementation of the great events that they hold multiple times yearly here in the city of Philadelphia so we're coming up to the first break on the other side of the break we will be getting into what is the end game right here on what on earth is happening don't go anywhere folks we are back ladies and gentlemen this is what on earth is happening and I'm your host mark passio today on the show we're going to be discussing the dark occult esoteric agenda what is the endgame of the dark Oh cultists who are currently in control what do they want to accomplish why are they doing what they are doing this is sort of a roundup this is sort of a an ending synthesis if you will of all of the things that we have been discussing since we moved our discussion into the darkness into the methodologies of control we've been talking about the methods of mind control for over a year on this show and we're at the point where now we need to just basically get out there to people what is the end game what is the reason the why behind all of these controls that are put in place what do these controllers expect to see what do they want to create what is the world that they are attempting to bring to fruition look like what would it look like for us that's what we're gonna be talking about here on the show today before we do that let me give the call-in numbers because I will be taking calls in a little while anyone feel free to call in there are never any taboo topics here on what on earth is happening the calling number for the show eight six six eight four one one zero six five once again the call in number eight six six eight four one one zero six five like to direct everyone up to my website at what on earth is happening calm there you will see some slides listed on the radio show page you'll see them listed under images for today's show these are accompanying images that go along with the talk for today probably not quite as necessary as some past shows where we've delved into symbolism and numerology etc but nonetheless they provide a good visual feedback for the topics and ideas that will be being discussed here today so let's jump right in what we're talking about if you take a look at image number one is what I've simply labeled the agenda and what this agenda is is the endgame of the Darko cultists the hidden controllers again the word occult simply meaning hidden and the controllers who are currently basically at the top of the food chain when it comes to being able to control resources being able to control people being able to make things happen in our reality largely because they have conditioned so many people's minds into the acceptance of certain basic fundamental axioms fundamental underlying ways of seeing the world taking it as red that something is just simply true and that's just how it is that's what an axiom basically is and if they can convince enough people to function along those basic lines of thought that in 99% of cases absolutely are not even remotely close to being true they can control their behavior that's what mind control is all about getting people to think a certain way so that they act a certain way it's that simple and if you know enough about how the human psyche works how its constructed with the components of it are what its motivations are people's basic underlying drives if you know enough about how all of those things function and simultaneously you have it within yourself that desire to control which is basically rooted in ego and rooted in materialism consciousness or I should say lack of consciousness okay basically ego identification and $0.05 material world identification if that's the level of consciousness that exists within a person that holds that much knowledge it's a piece of cake for them to control the many regardless of how few they may be so this first image really gives a great visual to what the dark New World Order is all about because it's a image of Hell and I look at it and I can't help but think this looks about like the last couple of days here in Philadelphia because man was it roasting hot we got up over I believe 101 the last couple of days or 102 something like that and it's been pretty brutal here in in Philadelphia the last couple of days during this heat wave today it cooled down to 96 degrees and it felt like a cool day outside in comparison of the last few days but that's what this image sort of brings to mind but it's a it's a vision of hell because that's ultimately what they're really trying to create as we'll talk about so if we move on to the next image I have a couple of quotes in here that I think do a good job of summing up what the new world order is all about and what their basic modus operandi is Douglas MacArthur is quoted as having said our government has kept us in a perpetual state of fear kept us in a continuous stampede of patriotic fervor with the cry of grave national emergency always there has been some terrible evil at home or some monstrous foreign power that was going to gobble us up if we did not blindly rally behind it this is the basic way that the agenda always gets people to obey its bidding through fear through the cry of there will be chaos if it isn't this way and you know what folks maybe to a certain extent that is true maybe there would be a certain amount of chaos have you ever really sat back and thought about it if this horrific out-of-control corrupt government suddenly vanished or went away what would the world be like in the short term at least do you think there would be chaos do you think that might be a good thing see we're so conditioned to fear this concept of chaos we don't really understand what real chaos is I've said many times before on the show I don't fear chaos I look at myself almost as an agent of chaos because I would rather there be learning that comes about in failure rather than perpetual ignorant food control think the valley if it's some serious consideration and we'll continue this on the other side of this break you are listening to what on earth is happening I'm your host mark passio my website what on earth is happening calm we'll be right back don't go anywhere folks behind the girl I'll make my all day we're back folks this is what on earth is happening here on the Oracle broadcasting radio network I'm your host mark passio my website what on earth is happening dot-com we're talking about the dark occult esoteric agenda what is the occultists endgame what does their dark new world order look like and what will it entail for the people of Earth if it comes to fruition it's looking at a quote by Douglas MacArthur that talked about governments just basically want to keep people in fear that's the way they control you that's the way they own your mind you have to be in fear in order to help perpetuate this agenda and I want to hammer that concept home and I hope to give people a lot of food for thought in this show regarding just how much any given individual that may be listening to this broadcast is indeed helping the dark ou cultists agenda perhaps unknowingly just by the fact of them fearing certain things if you want to really make an impact to reverse this agenda and to bring true human freedom to this planet you have to get out of fear ladies and gentlemen you can't fear anything you can't fear one death that's the top thing that you have to get over your fear of you have to know definitively that there is no such thing and no one can instill that knowledge in you you have to arrive at it by delving into reality enough and going within enough you can't fear what will happen to you as far as your situation in life is concerned oh how will I end up where will I be living what will the quality of my life be like if I do this or that or that all of these fears have to be shed get out of the concept known as the hassle-free zone that I just want to be left alone and I don't want to make any waves so there's no hassle for me in my life so nobody in an authority position will come along and tell me you can't do that so many people live in perpetual fear of these things and in doing so a lot of them are keeping their mouths closed how about fear of what other people might think of us even within our own family what about our spouses what they may think how might my relationship turn if I start talking about this kind of these kind of issues that are going on in the world fear drives so much of our actions or our non actions and it's what's keeping the world in the state of slavery that it is in and if you don't think that we exist as like basically animals on a farm and that this world is a gigantic prison you're deluding yourself because we are not physically free some people may be mentally free and there's there are few and far between of those let me tell you but nobody here is physically free okay you know you you look at the concept of a prison in jail guards you know the jail guards aren't physically free they're in the same cage they're in the cage with the other prisoners the people who think that they're going to continue to control people you know they're bound in the same basic prison system they're in the same state of mind control of mental control in a mental cage as the other people they're attempting to control which is why in order for you to have the attitude that you're going to control somebody else or that even control is good in any way as opposed to truly properly educating someone no matter how hard that may be to do as long as you're of the opinion that control is better than true education I would suggest that is a mental prison in and of itself and ultimately you're putting the shackles on yourself and I would suggest anybody that thinks that there's any such thing as government and the all government isn't mind control is in that state of mind and that's mind control because if you think you're going to solve problems through control you're delusional we looked at what fear leading to control creates leading to the desire to control creates it creates chaos which is what we have we have a world filled with chaos now there's this other quality of chaos that I referred to in the last segment which is the idea that once your belief systems once your systems of thought have calcified to a certain extent and you've held on to them even though for so long even though they don't serve who what we really are when you finally begin to let go of them if enough people have held on to these erroneous belief systems for long enough there may be a transitional period that is quite chaotic where people have to read learn natural law or people have to relearn what reality really is and how it really operates and what the generative principle of our reality really is what drives the things that that we are actually creating ourselves the causal factors that we talked so much about in the early stages of this show that create what we are experiencing we're always working with those causal factors we're always engaging them we are always creating the reality that we experience whether we know it or not whether we understand how those laws function or not yes maybe there might be a transitional chaotic period when certain systems crumble before new ways of being in the world arise and I say that's a good thing there is such a thing as a good form of chaos and it should not be feared and I say this because I think we're really getting ready to enter a period like that I don't say it's coming next week or next month I'm just saying it's coming don't react to it with fear it should be embraced because it's a sign of something better coming on the over-the-horizon the worst thing that could happen is things stay the way that they are and continue to go along that route which is toward more centralization of control and an a way that they do it we talked about it over the last several weeks chaos history also known as problem reaction solution or the Hegelian dialectic hermann goering the Nazi Luftwaffe he said naturally the common people don't want war neither in Russia nor England nor for that matter in Germany that's understood but after all it's the leaders of the country who determined the policy and is always a simple matter to drag people along whether it's a democracy a fascist dictatorship a parliament or a communist dictatorship we'll pick this quote up on the other side of the break folks you're listening to what on earth is happening we're delving into how the controllers keep people in the state of fear that enables them to enact their agenda we'll pick this up on the other side but don't go anywhere this is what on earth is happening okay folks were back this is what on earth is happening and before the break I was reading a quote by the captain of the Luftwaffe Hermann Goering during the Nazi Third Reich he said to paraphrase doesn't matter whether the common people want war or not it's a simple matter for sense leaders of a country determine the agenda it's a simple matter to bring the people to the bidding of the leaders doesn't matter what kind of government it is okay and to continue to quote him he says voice or no voice the people can always be brought to the bidding of the leaders that is easy all you have to do is tell them they are being attacked and denounced the peacemakers for lack of patriotism and exposing the country to danger it works the same in any country Goering perfectly understood how fear will lead to the desire to control and get people to basically want to lay down their natural inherent rights and freedoms in order to be protected because they fear chaos therefore if you can create chaos you are instilling that fear and it's a endless cycle it's a perpetual loop then the people cry out for more control you take more of their freedom away create some more chaos get the reaction take more of their freedom away just like 9/11 this is exactly what happened on 9/11 create the problem wait for the reaction that is incomplete fear and crying out for something to be done and then propose the solution which is ultimately what you wanted to do all along which was in still completely unamerican unconstitutional controls like the Patriot Act and then denounce anybody oh if you and they you name it that you put that word on it even though it has nothing to do with real patriotism you put that word on it and you denounce anybody that doesn't want to go along with it as unpatriotic and this was done in pre World War two Germany Hitler had his secret police burned down the parliamentary building the Reichstag blame it on the Communists so he could impose new legislation called the enabling act and basically take away the people's rights and be able to do things that are completely against natural law because that's ultimately what these dominators want they want a world that's not ruled by natural law they want a world that's ruled by their own law where they can do whatever they want and tell other people what they may or may not do it's it's as simple as that that's what man's law is designed to do and always has been designed to do people who are under this erroneous mistaken impression that man's law was set up for some wonderful purpose once again you're delusional I don't know how much more blunt I could say it if you think governments are supposed to be or supposed to be originally set up truly to care for the people forget it get that notion out of your mind because it's a wishful pipe dream governments have always been about nothing but mind control that is evidenced by the word itself which we've gone over many times means mind control goober nari plus meant a to control the mind that's what governments are there for to keep people in fear to justify their own existence because after all who will protect us see that's the entire crux of the problem people feel that it's someone else's responsibility to grant them protection they don't understand what protection is created by they don't understand that principle they think someone could give you protection no one can give you protection ladies and gentlemen impossible impossible protection is created through adherence to natural law principles the end period for all time bang your fists against the desk pound your head against the wall you're never going to change that if you don't understand that you're helping create the dark new world order if you do not understand that protection cannot be granted from one person to another cannot be given that it is created whether we are in compliance with natural law or whether we are completely trouncing natural law if we are in compliance with it protection is granted by the universe if we are not in compliance with natural law if we're not living in harmony with natural law then all protection is removed is withdrawn by the universe that's how the generative principle works folks and get is stark raving mad as you want about that it will never change as long as you operate in the three-dimensional facetime universe that we're in and like I said before once you figure a way out of that let me know because I'd like to go somewhere else too so as long as we're operating here let's find out how this place operates and work in harmony with its laws as opposed to working against them in creating suffering for ourselves but once again one in a thousand people are going to understand that because people are in too much ego to accept that this place simply has laws we're eternally bound by them and that does not mean that that makes the universe of prison see this is the mindset of the dark Oh cultists and I'm telling you that's their mindset I'm not asking you to believe it I'm not telling you that that's what I think their mindset is since I worked with these individuals I'm telling you I know that's their mindset I'm simply telling you that's what their mindset is I don't care whether you believe it or not they think that the universe is a prison and they want to be the ruler of the prison they don't care what what all that complete antithesis of natural law creates they don't care they would rather rule in hell then be bound by natural law in a paradise that could be created if only we lived in harmony with that natural law and that's why one of the first sections I think next week what I'm gonna do on the show is I'm gonna have an entire show dedicated to what the religion of the ocultist truly is and it's going to be the last segment on the dark then when we move into the light and the solutions I'm going to have many shows at the very beginning of that section that do nothing but break down natural law it's gonna be like the natural law presentation that I gave but I'm going to extend it out and really delve into what natural law is how it works how it operates in our lives and give examples of things that are in compliance with it and things that are in complete disharmony with it so that people gain a better understanding of what natural law really is because that's the ultimate solution if we don't have that as the foundational basis of our solution oriented approaches toward the dark new world order will never create the light new world order it will not happen folks without that deep understanding of natural law and that takes a long time to understand because there's a lot of unlearning that needs to be done there's a lot of things people are vehemently grasping clinging on to as if for dear life when that's the very poison that's destroying them and no one wants to hear that they want to see the world through rose-colored glasses and be tailed told everything is bunny rabbits and daisies they don't want to be told they're doing anything wrong so let's move on with the presentation for today but that's what's coming up I think next week I'll do an entire show based on what is the ideology of Satanism and dark luciferianism because that's the religion of the dark new world order and people don't have a firm enough understanding of what the true dark religion is it's called the old religion now I'm gonna break it down here next week we'll be hearing some tenets of it this week as we move further into looking at this dark agenda stay with us folks this is what on earth is happening I'm your host mark passio we'll be back after these words we're back folks this is what on earth is happening on your host mark passio my website what on earth is happening calm today's topic is the dark new world order what is the endgame what is their esoteric agenda and I think it can be summed up by former FBI director j edgar Hoover who by no means please don't think that this is it and it was in any way any sort of a good human being because he was one of the demons that are running amok until he I think very late in his life he began to realize what he was truly a part of and a party to and he said that the individual is handicapped by coming face-to-face with a conspiracy so monstrous he cannot believe it exists the American mind simply has not come to a realization of the evil which has been introduced into our midst it rejects even the assumption that human creatures could espouse a philosophy which must ultimately destroy all that is good and decent a perfect summation of what the dark occult is all about and he uses the word conspiracy now probably one of the methodologies of mind control I should have included is the use of words themselves but this is so pervasive it's really nested in every other form of mind control the world is controlled through words I've said this probably a hundred times on the show we need to make a study of words to understand what we are actually saying when we speak so studying linguistics studying etymology studying ancient languages is actually critical to the decoding of our world and the idea of the word conspiracy is mind control in and of itself as most people think of the meaning of this word just when you go up to someone and play a word association game with nine out of ten people you say the word conspiracy and they will think theory that's the first word that will come back to their mind that we will come out of their mouth when they play a word association game when in fact if we break down the word into its constituent elements and then we look at the etymology of those elements we can find out what the word really means so the the prefix con comes from the latin language and it basically means with or together with or together is what con means so to connect means to bind together or put together okay con means together or with and then the second part of the word which I put a little dictionary window up from a program that defines it is spiro spero spear RA in Latin and this is the the verb which means to breathe or to live see the breath was always looked at as in just about all ancient forms of spiritual traditions the breath was always looked at as the quality of life that is infusing the individual because if you stop breathing you die it's pretty simple to arrive at the understanding of why the breath is looked at as the life-giving force so Spiro which is the root of spirit means to breathe to be infused with spirit or life force is to breathe it's very very simple to understand as long as we have the the etymologies of these words at hand why these things were named as such it's not that difficult so all Con Spiro or conspiracy means is to live and breathe together to be of the same spirit that's it and you could simply extrapolate that a little bit further and basically that means to have the same goal in mind that's it you are living for the same purpose you are moving toward the same goal and of course that's what a conspiracy is those who operate together toward a similar goal that's it so we need to be deconditioned as a culture about things is simple about what the words we are speaking mean if we're ever gonna make any headway our progress toward real freedom because as long as we're under these this mind control game when it comes to what words mean we're not even on the same page when we're talking about a concept you say something and the word comes out of your mouth and when it leaves you have a meaning that you have in mind for it but when it strikes the other person's your drummond goes into their brain and gets decoded they think you're talking about something completely different this is the inherent limitation of language which is why we need a new living language that really is the language called Veritas or truth where people can grasp what you're saying just by the nature of how fervently you know that that is the truth and that you're committed to it you're dedicated to it and that's all you're dedicated to people will get that sense if you have enough conviction when it comes to speaking and espousing the truth so conspirators or sorcerers as I've called them throughout this show main goal is the key people in fear because as long as you're in fear you're in the r-complex of the brain you're in the lower base brain the reptile brain we've talked about this extensively in former podcasts and if you're in that base brain and that's where you operate your actions can be controlled like a puppet master controlling a puppet on strings I can't stress that enough over and over again fear is their main modus operandi and we're gonna get to who some of the most fearful individuals in the world are and it could be said these are cultists themselves are some of the most fearful individuals in the world because they are afraid to unleash the true power of the human potential they're afraid of what it will mean for them they might have to really actually do some work in the world you know your food doesn't completely grow and distribute itself you know structures that we may need don't automatically build themselves they want everything done for them and most of all they don't want to really do the real great work of truly morally educating people that's the thing they want all responsibility from they want no no part in that responsibility so they're people who run away from something that is a challenge then they're not really courageous individuals they may be intelligent individuals they may have willpower but do they really have heart or courage I would suggest that there in some of the deepest states of fear but I'm gonna talk about some groups of people who are in even more fear than them certainly and there are people who we look at as having courage when in fact it's exactly the other way around and I think that the more advanced already understand who I'm talking about and we'll be talking about later on in the show Ben Franklin said that those who would give up Essential Liberty to purchase a little temporary safety deserve neither liberty nor safety and each he's using these words very specifically and has chosen the words specifically he is saying they deserve neither I'm in wholehearted agreement with this statement as harsh as that statement may seem to some if you will give up your freedom to be safe you deserve your enslavement the end you deserve it people will say how can you say somebody deserves to be enslaved deserves to be a slave well if they're so stupid that they would give up their freedom to be quote protected by someone else you don't deserve to be free you deserve to be a kept pet and that's what most people are the problem is that State of Mind is affecting people's freedom who really understand what freedom is and want it more than anything else therefore that makes staying in that state of mind morally unacceptable we'll get back and pick this up on the other side of the break you're listening to what on earth is happening I'm your host mark passio stay with us folks a person ever did or said and that's not the case I can bring up a quote that I wholeheartedly concur with and I don't have to agree with everything that that person did or said during their life you know because the founding fathers kept slaves they were enlightened in some respects and they were completely shut down in other respects that doesn't mean I can't respect the good things that they did while saying they were completely stupid to think that human rights extended only to some people and not to all people I mean that's completely ass-backwards to put it bluntly that you you believe that some people should be completely free and sovereign and while simultaneously believing in the concept of slavery for other people that you considered three-fifths of a human being I mean this is nonsense sheer nonsense it it confounds me it makes me wonder how someone could be so enlightened on one hand and so completely in the dark on the other hand it's an enigma and certain enigmas it just is better not to try to figure it out why they were like that take the good and leave the bed it's simple same thing I can quote something from a tradition and say I agree with that teaching and it doesn't mean I have to embrace the entire traditional I don't look at I have any one tradition that I adhere to my approach towards spirituality is an integral one meaning I take all of the most positive powerful and beneficial and empowering things from every tradition I study and combine them to form a new approach to being in the world that's it and that's what our challenge is you you get down into an ism you get down into a box consciousness gets shut down and that's what they want they want you to subscribe to isms and belief systems instead of saying no I'll take an integral approach and take the best from every aspect and put it together in a way that truly serves who and what we really are so Franklin understood the concept of what the controllers try to do to create fear so that they can take away rights this is just what happened and with the Patriot Act just would happen with you know 9/11 that's all it was there for and it's there also for other agendas so that we can go and wage war in other countries project the big fear of the the the boogeyman coming together from from other countries so we can send our troops who are in tremendous amounts of fear and constantly living in that are complex of the brain to go and act as the militant arm of this dark occult agenda going and taking whatever resources they tell them to go and take and to kill whatever people they tell them to go and kill and they'll do it for a paycheck for a pittance they'll do it because they want to feel better about themselves by harming other people because ultimately deep down inside people like that ate themselves and that's a painful thing to hear and we'll be talking about it more of this hour don't go anywhere folks we'll be right back okay we're back folks let's pick it right back up you were talking about how the dominators use fear to get other people to react and then go and do their bidding as a result because they promised them protections and they promise that if they'll just do what they tell them to do that the chaos will go away and some of the most fearful people that continue to do these things for a paycheck are police and military and though it may be painful to hear these are the people who are really enacting the agenda of the New World Order the dark New World Order people don't want to hear that they want to continue to give these people it the right I guess you could say they want to continue to give them carte blanche to just continue to abdicate their personal responsibility for what they are creating in the world that's what they want to do they don't want to pin the responsibility squarely upon the shoulders of the most fearful people in the world because their fear is creating hell on earth which is ultimately what their agenda is the loss of all human freedom and a machine world where people just do things without emotion and they're doing this just because they're in fear and the thing that they're in fear of the most I'm telling you this folks this is key to understand this go back to the show where I talked about in the podcast archive to the show where I talked about the primal fears okay it's it's critical to understand this I believe it was podcast number 19 go back to that and understand how these primal fears are all intertwined and ultimately they're all they're all the fear of chaos the fear of darkness the fear of predators the fear of abandonment by the Dominator father-figure Big Daddy the government okay oh we can't have all of these people these predators running around we can't we need protection from them because that's what the government provides protection from all the bad guys and if we don't have that there'll be chaos and that fear is what's embedded in the brain of men and women but mostly that fear is most of all embedded in the brains of men there are the people who are falling for this the most because men have to enact this Dominator agenda male police and male military officers are ultimately who is enacting the control mechanism they're the ones doing it they're not planning it they're not planners they're not thinkers hell they're all too happy to admit they're not thinkers see they think that if they say I don't think about what I do I just do it or I don't make the decision to do it I just take the action that that somehow magically absolves them from the responsibility of the harm that they create and the rights that they are stepping on daily when they sworn oath to protect rights and it all comes down to folks and I'm gonna start to get harsh here so if you don't like that turn the show off it all comes down to they're dumb people and I'm sick of dumb people and you should be sick of dumb people too and when you are finally get fed up with dumb people you understand the only real thing to do is to properly attempt to morally educate dumb people and the problem is not enough people are doing that great work that's the problem that's why the dark new world order is being created not enough people know enough and care enough to become teachers of this information and that's why we're in a big big problem and a big mess and the numbers are the people who think that like the huge numbers of people are waking up they're delusional - there's a pittance of a wake people folks in comparison how many people are on the earth don't delude yourself into thinking that this is some kind of gigantic thing we are a seed at best and I'm not saying that to be negative I'm saying that to be honest I'm not trying to instill fear and/or promote the idea of doom and gloom I'm being honest the amount of people who understand even a fraction of what I talk about on this show is next to nothing and you could say oh you're being too harsh and critical of people fine that's what I that's the dynamics as I see it and people you know get upset about that about hearing that because they want to be told that everything is wonderful I'm not here to tell people what I think they want to hear or what they want to hear I'm here to attempt to tell people the truth we need to reach these people who are in fear folks and the only way we're gonna reach them is by truly properly morally educating them about what natural law is and what rights are and what rights are not and the people out there doing the job of police and military which is supposed to ostensibly be to protect rights don't even know what rights are they do not know what rights are and I would sit them down face to face right in front them and tell them to their face you do not know what rights are if you knew what rights are you would not be doing that job you would be an educator if you knew what rights are the only reason you do that job is because you are the most fearful individuals in the world the police and the military are the most fearful groups of people they're in more fear than the dark occultists themselves and that's hard to do folks that's pretty hard to do because if you understand their world view and how sick and twisted and destructive it is and you understand that they're the only people that could possibly put that worldview into manifestation for them would have to be in even more fear than they are in a smaller cage in a smaller mental cage than they are themselves it's pretty bad when you think about how destroyed these people's minds have to be to continue to do what they're doing they're putting themselves in their own children in Chains in Chains that's what this agenda is about and they continue to do it for a false god call the dollar bill a paycheck money something that doesn't even exist it exists as digits on a screen a digital digital digit on a screen someplace that's what you're willing to take shackles and put them on the arms and legs of your own child a disgrace these people are a disgrace and the problem is they're isolated they're isolated from other segments of the community they have their own little groupings and then nobody else hangs out with them and they they go out and drink together and they go out and party together and they hang together and they have their own little families which they perpetuate their abuse that they that they put put out to the people they perpetuate that in their own little families hoping nobody ever discovers it but there are people who know what's really going on in their minds I know because I've been at a place like that and worse that's why I know to pick this up on the other side and we'll take calls hopefully I'll get the call and number we come back you're listening to what on earth is happening I'm Mark Hasse on my website what on earth is happening calm be right back folks all right we're back on what on earth is happening calm and I got a little heavy and intense in the last segment but hey I haven't done that in a while so sometimes you got to just put that vitriol out there and get it out of your system but I I stand by everything I said and uh you know there is a word for people who will cooperate with an agenda that is based in pure evil and chaos and that there a house slave and if you don't know what that is or what it means read some information about the Civil War era and what house slaves actually did to other slaves enacted the masters controls upon them in brutal and vicious ways just so they can get an extra blanket or maybe be able to sleep in the house in the shed out behind the house you know or have their food that there might be a little bit more on the plate and it might be a little bit hotter than the other slaves food that got to sleep out in the field and it's it salt it's ultimately a total disgrace because you're willing to do that to your own kind I can't even imagine let me tell you something folks when I was a black-hearted Satanist I still didn't have that attitude I still then even then cooperating with this agenda okay I still didn't have the attitude that I want to go and beat down my fellow man like that I wanted yeah I had the attitude eugenics is a good idea and we should eliminate people but not to a point where the where I thought I want to be a controller and get to just take out my aggressions on other people as long as the master leaves me alone a little bit I never ever ever thought like that it takes a special kind of person if you know what I mean to even have that kind of a mentality I mean these people really think they're the real controllers apparently they think that there's no one in the hierarchy above them and they're allowed to do whatever they want they're in the same cage as everybody else and they need to know it unfortunately not enough people are willing to speak to these people and educate them and they're unwilling to listen which is why sometimes I think we're just on a collision course and it's not going to be pretty but more people need to start speaking about this and trying to educate people according to these principles I can't emphasize that enough Voltaire the philosopher who I don't agree with everything he talked about either but I do agree with this particular quote he said those who can make you believe absurdities can make you commit atrocities and that's what these individuals are doing through their completely erroneous beliefs that are instilled in them through fear namely through the fear of chaos they're committing atrocities in the world and they're committing atrocities against natural law and some of those atrocities you could see on slide 11 torture war putting other people in states of fear homelessness destroyed countries etc and this is what our military and police do folks ultimately they don't protect anybody they never protected me a day in my life harmony with natural law protects me nobody in a uniform protects me nobody in a uniform protects me let me say that loud and clearly natural law adherence to natural law principles is the only thing that generates protection that's what keeps me safe but nobody in a uniform toting a gun keeps me safe and I'll tell that right if let me tell you something if my grandfather came back to life who served in the military I would tell that to his face and again people will say that as seem that as as harsh they'll think that that's harsh I'm not afraid to look somebody in the eye who I know is misled and tell them that they're misled that's one of the differences between me and other people who don't want to be confrontational who think all confrontation is a bad thing direct telling of the truth someone else's face is a bad thing and turns them off no it's not folks this is mind control people need to hear this to their face so it can show that the universe can know it was said to them it was said to them they will not have an ounce they will not have the ability to say I never no one ever told me that speak it to their faces speak it to their faces folks one in 10,000 people will take that advice because most people are afraid most people are in fear of these people you can only be in fear of these people if you love the flesh if you are engrossed and in love with this physical reality so much that you would ultimately give up your soul to continue to be in it me I don't care what they do to my body I'm speaking the truth no matter what happens to my physical body and I'll tell that to anyone alive and I'm being intense on this show deliberately because there's a reason because this agenda is closer than anybody realizes and what it is ultimately about is your soul that's what it's about this isn't just about control this is about the soul ladies and gentlemen that's what it's about make no mistake about it and I'm on the correct side of that equation and yes there is sides when it comes to that equation either you're on the right side or you're on the sinister side and the right side is adherence to natural law which is God's law when it comes down to it that's the law of the universal law of creation and if you're going against that you're going against the supreme force that is the all that is that is underlies everything that is the basis of all life and good luck with that enjoy what you get as a result I for one will be on the other side of that journey heading in the right direction toward the light another house slave puppet david rockefeller who you know clearly envisions himself as one of the Masters when he's on strings as well said made this statement at a I believe it was a meeting of the Council on Foreign Relations he said we are grateful to the Washington Post The New York Times Time magazine and other great publications whose directors have attended our meetings and respected their promises of discretion for almost 40 years it would have been impossible for us to develop our plan for the world if we had been subjected to the light of lights of publicity during those years but the world is now more sophisticated and prepared to march toward a world government the super national sovereignty of an intellectual elite and world bankers is surely preferable to the National auto-determination practiced in past centuries the hubris of this slave the hubris of this slave people think that this is one of the dominators and controllers that those are the words of the slave thanking other slaves for not saying anything about these slaves planning the slavery of the people of the earth imagine that thanking the media for their complicity and hiding this agenda and continue to help this is all just conjecture and hearing feedback on the other side folks stay with us we're back folks you have a lot of callers on the line I'm going to get to you in the next segment please be patient I know people have maybe maybe the volume of calls is in reaction to some of the vitriol that I've spouted in the last couple of segments but we'll open up the phones in the next segment and this one I'm going to attempt to define what this agenda really is that the house slave David Rockefeller calls the international bankers plan for the world in the quote that I read in the last segment well what it really is folks is global Babylon the global Nazi regime the global bigbrother society it's the Nazi regime on steroids and advanced for the 21st century its global Babylon it's government and religion coming together as one and next week as I promised we're going to be looking at what the religion and yes the occultists who essentially are in control of this planet have a religion ladies and gentlemen make no mistake about it they have a religion and their idea is to put that religion upon the people of the earth and you know what they've largely done it it isn't even about a coming World Order it's about that we're in one that we're trying to take down and reverse because largely they've already succeeded in implementing their agenda and implementing their religion globally because their religion is Satanism and dark luciferianism that's what their religion is and most people have no idea what the tenets of those religions are they have no idea what they encompass what their belief systems are what their ideology is so I'm gonna do a whole show on that next week which is going to be tough to cover that topic in the space of one show but I'll do my best they want to dissolve national borders and national sovereignty so that they can create blocks of Nations super super states as they're known because this makes decision-making easier and easier to centralize and you can put power in fewer and fewer hands so you only need to install a smaller number of puppets to control it's like you know the idea of the spinning plates on on the the metal metal uh you know spokes and you know the the person doing this parlor trick needs to keep the the dishes spinning well so it's a lot easier if you only have a few you have a whole lot you're not going to be able to keep that kind of control in order so easily but if you narrow it down and narrow it down until eventually only have like three plates to spin it's easy to keep them all going perpetually and if you have one becomes a piece of cake which is ultimately what they're trying to move these supranational states to a one-world government and in doing that they want to implement a one-world army a one world bank and a one world financial system that is controlled by chips microchips to what end someone might ask and that's because if you go against what the dictates of that one-world regime happened to be at any given time they can cut off your ability to engage in any kind of commerce and by commerce I don't mean the legal definition of Commerce I'm talking about purchasing anything buying food buying a house buying a car they want to take the ability of anybody to transact and conduct business in the in the physical reality away from any individuals that go against their agenda and unfortunately the stupid people of earth will give them this ability unless we wake up real soon because we're already largely doing that anybody that doesn't want to pay taxes can barely work I don't want to give my tax ma I don't want to give money paid through taxes to child pedophiles call me a weirdo I don't know but you know I have a problem with giving the ability to continue raping children to people I don't know and that might make me crazy maybe I'm just nuts I happen to know these people are our child pedophiles and then they're telling me I need to give them a certain amount of what I make no I don't think so I don't think so not gonna happen in this lifetime you're you're raping and murdering children but I'm gonna need to pay you a certain amount of what I make right that'll happen not a penny ladies and gentlemen not one they want a surveillance state and they've largely achieved that where everybody's watching everybody at all times and there's cameras everywhere and everybody's in fear of what might happen and it's all there just to control people's actions and behavior that's it they want the removal of any sense of empathy the removal of any sense of empathy is key to the enactment of this dark new world order occult agenda and it is a dark occult agenda people who still don't think that the occult that dark occult ISM lies behind this agenda and think it's all political or all financial you are delusional children delusional children because this is it folks I'm laying it all on the line in these net and this week and next week before I begin the transition I'm okay practically what can we do about this now that's what it's gonna that's what the rest of the the shows that I do are going to be about so I want you to understand where these people's mindset is before we start to go into the solutions and they want the Sacred Feminine murdered they want it dead they want your ability to feel dead and that's why the antidepressant drugs are so important to their agenda drugging of children removing their natural innate essence their creative capability their empathy their imagination which is the key to all of this you can't imagine your way out of a scenario you can never create any reality that's different from the direction you're heading and that's why we're headed in this direction seemingly irreversibly they have succeeded largely in destroying the human imagination we need to imagine our way out of this ladies and gentlemen and you can't do that if the right brain is shut down through drugs you can't do that if the Sacred Feminine inside of each of us has been murdered and we don't care and we empathize with other people just because as long as I'm getting my paycheck I don't care and you know how many people think like that the vast majority don't delude yourself into thinking that most people just wouldn't do anything for the right amount of money they'd stab their own mother in the back and Jack the knife and yeah that's painful to hear and it's harsh and it's harsh language it's reality that's what is acknowledge it and then start to do something about it instead of saying oh I don't want to hear that that's too negative this this New Age nonsense thinking that that brings more of what you're talking about no the acknowledgement of a fist coming toward your jaw will give you the ability to duck out of the way of it and believe me there's more than a fist coming at our job there's a locomotive heading toward it ultimately they want a population that can't see what's right before their eyes because they're entranced they're in state of mind control and that they have become willing sheep led to the slaughter and that's what most Americans are again if the founding fathers came back to life and saw what this country has become they would vomit they would vomit in their mouths to be quite frank and and blunt about it that's what the founding fathers of this country would do they told you that you needed to hold on to the Republic that you needed to protect it if you wanted to preserve it a republic if you can keep it was Franklin's words as he left Independence Mall if you can keep it well you can't keep it in a state of fear you can't keep it in a state of sheep herd mentality you certainly can't keep it with the kind of educational system that we have you certainly can't keep it with the kind of food that most people eat all of these things need solutions we need to transition away from these outmoded systems and towards ones that truly serve who we are ultimately they want people in a state where they are puppets or golems golems as in the movie Lord of the Rings and we'll talk about this symbolism for a bit and I'll wrap up the agenda before we get to the calls in the last segment you're missing the what on earth is happening don't go anywhere folks we'll be right back with a wrap-up and your calls after these messages we're back folks last segment of what on earth is happening I'm your host mark passio my website what on earth is happening calm was talking about the concept of what the occultists ultimately want to create in people and that is the state of a golem what is a golem what is a creature that has been made through the desire to control the desire to accumulate material power the desire for wealth the desire for control and influence over other people for things totally rooted in the material realm he loves the ring Gollum in Lord of the Rings he worships that he calls it his precious he'll do anything to protect it yet that's the power of evil it's the power of control it's made of gold this illusory thing called money it's not real alchemical gold it can't be destroyed anyway by casting it back into from whence it was forged in the fires of fear it has fear needs to be immolated as long as you have fear about what's gonna happen to you and your physical body that's what we started with you're a slave period and you will always be a slave the eugenicist julian huxley put it best he said a really efficient totalitarian state would be one which the all-powerful executive of political bosses and their army of managers control a population of slaves who do not have to be coerced because they love their servitude boy ladies and gentlemen this sounds exactly like my family and probably many of yours and don't think it doesn't pain me to have to say that so bluntly and plainly and right out in the light of day but it's the truth and again I'm not here to make friends I'm not here to be a for there to be a popularity contest or to be liked I'm here to tell people what's really going on hence the name of the show this is what they've largely succeeded in and this is what our work is to undo and I'm telling you folks if you think that this is all just a political thing or financial thing once again I can't stress enough next week listen to the show and I'm going to explain the religion of these people Plato said that the price good men pay for indifference to public affairs is to be ruled by evil men meaning if you don't care if you don't employ the generative principle ultimately you're gonna end up a slave and be ruled by evil care is the underlying dynamic that creates our reality the generative principle and that's what the New World Order equates to the dark New World Order slavery they want to hell on earth quite frankly that's what it is a prison from whence there is no escape because all avenues of escape have been cut off and everybody within the prison is simultaneously a master and a slave it's just a matter of degrees and levels of who they're in control of and I've left these last couple of slides for the last concepts that I want to convey the dark New World Order cannot be constructed without military in the police this is the dark occultists minions and it's the people they hate the most if you want to see more extensive work on this topic you can look at my presentation from the free your mind conference available on at free your mind conference calm I do a presentation that covers the occult mockery of these individuals the dark occultists hate the military and the police more than anyone else in the world and I'm telling you this from firsthand experience being in rooms with them when they are talking about these individuals and I'm telling you they mock them at every turn and they load these people more than they loathe anyone because they're they look at it like imagine you would do it to your own kind you'd put your own children in shackles for the money that's faith that we would give to you and and it's not even they know that they're using them for that agenda and and they despise them for it they despise them for it I know that's hard to even imagine but that's that's how they think of them they call them our dogs that's their name for these people they consider them their pets our dogs we're gonna SiC our dogs that we have on a leash they're not free their slaves their animals their pets pets is how these people view these at people the dark occult is view these people as pets period and you know what they are they are their pets because anybody that would take away human freedom for a paycheck is a pet is a dog on a leash more so what they are is clones just like in the stormtroopers in Star Wars we find out in the second series of Star Wars movies that ultimately what lies underneath that stormtrooper mask is all the same face because they all come from one individual who has been cloned so all of the individuality has been robbed from them they are no longer an individual a unique individual with a conscience and feelings and their thoughts of their own they are all clones or another way of putting it is they're all dupes they've been duped see their duplicates and that's exactly what has happened with those people in uniform all of them bar none with no exceptions if they're still in that uniform they're a dupe and they're the people who are enacting this agenda of slavery they're the actual agents of the manifestation of that agenda because without them it could not happen so you think about that ladies and gentlemen before you buy into this hole there's a lot of good cops out there there's a lot of good soldiers out there mind control nonsense anybody that does that as opposed to being an educator about the truth is helping the dark occultists complete their agenda and that's just the harsh reality that's the harsh reality of the situation we're in ladies and gentlemen and the situation we are in is called the apocalypse and that's a mind control term that is meant to be something bad when in fact it's something majestic and magnificent because all it means it comes from the Greek language oppo meaning to take away or to remove and collect Ain meaning to cover or to conceal so what the apocalyptan or apocalypse is is the removal of the covering the removal of the veil the unveiling or the revealing of that which was once concealed and hidden meaning bringing the occult forward into the light of day making the hidden the known and I've said it before and I'll say it again and it should be a tagline this show the people of this planet will never be free until the occult is no longer the occult let's go to the phones here we go caller you're live on what on earth is happening yes hello yes you're live on the air yes sir you're live on the air I'm trying to explain the New World Order to my family and talk about the occult and they have recently sent me to a mental institution for a psychiatric evaluation how long think that my parent how long ago did this did that happen is this modern I was in there for a month and do you think that my parents might be brainwashed how old were you when that happened that they were able to put it to commit you legally they were able to do that well I've smoked a lot of pot and I'm not so smart so I agreed to it so they send me to the mental health institution because I tried to talk to them about the occult and 9/11 and the chemtrails yeah well I mean ultimately people if they're truly balanced and can put this out there in the correct ways and help people to understand it through a tapestry of information they will not be perceived as such because they're able to tell the truth in a way that can be understood clearly okay it's been called hermeneutics it's the ability to put things into simple language you can't come off as somebody that is mentally imbalanced and of other modes of your behavior contribute to that perception that's it's going to create that perception there we go last caller you take us out or we'll have to wait till next week ladies and gentlemen that's all we have time for we delved into the occult esoteric agenda next week the religion of the dark occult is explained here on what on earth is happening

What On Earth Is Happening Show #071

Topics: *The Religion Of The Dark New World Order, The Left Hand Path, Satanism, Setianism, Dark Luciferianism*

freedom man that's what it's all about welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening to endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe welcome ladies and gentlemen you're listening to what on earth is happening here on the Oracle Broadcasting Network I'm your host Mark passio my website what on earth is happening dot-com today is Sunday July 31st 2011 the network's website is oracle broadcasting comm and this show is live here every Sunday from 5 to 7 p.m. Eastern that's 4 to 6 p.m. Central Time and we have a good show lined up here for you today we're going to be talking about the religion of the New World Order of the dark new world order I should say we're going to be talking about the underlying religion of the globalist occultists what is their religion how widespread is it what are the ideologies it espouses that's what the focus of today's show is going to be on and this is the end of our looking into the darkness it won't be totally the end of it I mean we'll revisit topics every now and again but from here on out I want to make this show a solutions oriented show and I want to bring people on who think along those lines of solution think and get their perspectives so you'll be hearing some more guests on the show hopefully and we're going to be talking about how to get out of the hell that we're basically trapped in here on earth as far as the diminishing freedoms and the ever increasing centralization of control that's taking place here on our planet so coming up in a few minutes a discussion on the old religion a discussion about Satanism and dark luciferianism and we'll be breaking down the ideologies that these religions contain in detail so this show isn't going to be for the faint of heart and nor was last week's and I you know have to tell people I got a little bit intense and I got a little bit enraged on last week's show because we talked about what the agenda of these individuals is all about and I started talking about the people who are either wittingly or unwittingly helping these Psychopaths to achieve this agenda and when I do that I get a little bit impassioned and I got a little bit intense and I know a lot of people can't handle that but that you know that's okay sometimes people need to hear something that is harsh in order to spur them forward and make them take a deeper look at things and indeed sometimes take a deeper look at themselves so I stand by everything I said last week and I make no apologies for having said them I may do a show in the future on why people tend to want to hear soft pleasant tones as opposed to you know some tough love from time to time I have a lot of ideas about that about emotional mind control that's how the news gets us to buy all the poison they sell us you know they put it in sweet sweet pleasing tones we'll pick this up on the other side and we'll get into our topic of discussion Satanism as the religion of the dark new world order we'll be right back I was born a shot killed in my hands behind the girl I'll make my finals day alright folks were back here on what on earth is happening I'm your host Marc Pascoe my website what on earth is happening dot-com today we're going to be delving down deep into the darkness of Satanism and dark luciferianism we will explain what these ideologies are what these indeed religions are all about and we will be breaking down the foundational tenets of these religions and some people will notice there are no images posted to the show page for today's show because I'm really going to focus on these ideologies on what they really are because many people have extreme misperceptions of what these religions are and think of them in ways that they completely have nothing to do with yet they don't understand how deeply interwoven into the very fabric of this society the religion of Satanism really is and I'll tell you a personal anecdote a little bit later in the show about something that occurred that showed me how much people in my very own family relate to this ideology and indeed live it on a day to day basis without even understanding what it is so no shit no images for today's show and that's done deliberately to really get people to focus on what is actually being said here as far as what the ideology that underlies these religions are and the first thing I want to do to jump into the topic is reiterate the definition of the word religion because some people will insist that these are not religions and that was my take on Satanism when I first became involved with it many years ago I did not consider it a religion I considered it a philosophy and indeed it is most certainly a religion and it is indeed most certainly not a philosophy by definition of both of those words a religion coming from the Latin relig are a and I'm you know we've gone over this many many times that is where the word religion is derived from that is the etymology of the word people will debate that until they're blue in the face go right ahead religion comes from relig RA in Latin which means to tie back to bind or to hold back or thwart okay now there is an alternative definition a way of looking at the word religion that it can mean to retie or to reconnect okay so a true religion would reconnect one to the truth to the light to the higher self to the essence of pure consciousness okay unity consciousness the religions of the world that have been set up as a method of control and distraction distraction to pull people away from the truth to tie them back from realization of the higher self okay is more in line with how I'm using this word in this connotation in this context okay that's what a religion is it's something that holds someone back in their progress in their evolutionary progress in consciousness that is what the word means philosophy on the other hand is derived from Greek roots filos meaning love and Sophos meaning wisdom okay so it is the love of wisdom and again wisdom we've talked about many many times on the show as not necessarily just being equivalent to knowledge but being putting knowledge into action actually taking action based on the knowledge that you have and that knowledge must be based in truth for it to be considered wisdom so the love of wisdom is taking at and upon knowledge that has been gained that ret that is true okay something based in truth and then acting upon it not believing in lies and then acting upon those lies no philosophy will be found there there is no love of wisdom in taking actions that are based on untruths so keep these definitions in mind when we talk about Satanism today because Satanism is a religion and it is not a philosophy by definition so what is the religion of the dark new world order well it's really a dichotomy there's a two-fold religion the largest by far the largest aspect of it is known as Satanism and you can call that many different names okay you can call it Satya nism okay aligning oneself with the dark Egyptian god set in the modern day it's it tends to be called Satanism because of the the Christian personage called Satan that people identify with as the force of evil okay but it's so much deeper than that when we understand all of the forces that lead to chaos in this world which is what we've discussed for over a year now the forces of mind control the forces of keeping people in lower states of consciousness for selfish egoic purposes so that a small class of people can gain an advantage a tactical advantage in knowledge and therefore rule over people who lack that knowledge so Satanism is a huge part of this but luciferianism actually Trump's Satanism in this hierarchy and it is really who the highest level dark occultists are they are Luciferians and I want to make a distinction in types of Luciferians there are light and dark Luciferians because the the concept of Lucifer and here's where many people will also disagree simply means bringer of light this is a symbol again I don't I don't envision Vistage Satan as a being or an entity nor do I envision envisage Lucifer as a being or an entity these are forces at work in the world and these forces wield control over people over human beings and I would go so far as to say they often inhabit humans and put them on strings like puppets so that they will do their bidding now Lucifer the word is based upon light looks in Latin means light and Pharaoh frere in Latin means to bring or to carry so Lucifer is to bring or carry the light it's a two-way shower a Light Bearer that's all it really means and this is a symbol because light represents knowledge it represents the ability to process to take in process and use information accurately all right and the dark occultists who are the Luciferians at the higher level have this knowledge they have this light and they are using it for their own purposes well that information and knowledge can be used for transformative purposes and awakening people as well it's the same information it's information that has been hidden or occulted we'll pick this up on the other side of the break don't go anywhere you're listening - what on earth is happening the black folks this is what on earth is happening on your host mark Cassio we were talking about Satanism and dark luciferianism I was talking about Lucifer as being a symbol a concept representing bringer of light and this is what the dark Luciferians who actually control the Satanists of the world how they view this concept that they have the light they are the enlightened ones everybody else is in a state of ignorance and therefore they have every right they have divine right to steer the direction of the entire species as they see fit regardless of what that means regardless of it even might mean that they need to call people from time to time and reduce world population which is one of their huge agendas and we'll be talking about eugenics today as one of their main goals and this has been uh this has been one of their modus operandi since time immemorial really because a smaller population is easier for them to control than one that has mass numbers of people and right now many more people are waking up to their agenda than ever have before in the past so you know to call that population down and keep it small is to keep it manageable we'll be getting into that in a little bit what I want to go to is the vast numbers of people who subscribe to the New World Order religion are perhaps subscribing to it without even understanding it without even knowing that this is the religion that they are living every day some people who in name only call themselves Christian who people in name only will call themselves a freemason who people in name only will call themselves a Jew or a Buddhist etc and we can go on and on every type of religion or tradition really are living a satanic lifestyle but what does that mean well in order to understand what that really means we need to delve deep into the ideology that underlies the Satanic religion so let's begin doing that now and look at what are what are the main tenets the main underlying beliefs of this religion well the first and foremost and the thing that every other belief of this religion is based upon is the concept of identification with the ego mind that's number one first and foremost without the identification with the ego mind all of the things that follow from that basic fundamental axiom could not occur so what is ego identification well we talked about this on this show way in the past probably over a year ago and we talked about this as being one of the main barriers to true self-realization one of the main barriers to spiritual awakening ego identification is believing that you are your body and your thoughts essentially that's what it is it is identification with the five senses as being the only way that reality can be perceived and the the five sense material world is all that exists okay so nothing outside of what our antennas so to speak our equipment that pick up the vibratory energy in our 3d realm that we live in okay that pick up in this limited frequency band that you can prove is very limited and narrow okay so in other words we perceive visible light in a very small spectrum but there's an infinity of wavelengths on both sides of that spectrum it just happens that our equipment called the human eye can only pick up the frequencies that exist in that narrow bandwidth it's the same principle of a radio or television station it broadcasts over a particular set of frequencies now does that mean while that's broadcasting that there are no other frequencies in existence if we turn on a television set we are tuning in to a specific frequency or we turn on a radio we're tuning in to a specific frequency well every one of the frequencies is bombarding that radio and indeed bombarding us in the room with that radio but we're not hearing them all simultaneously we're tuned to a narrowband okay and that just happens to be what we are perceiving at any given time it doesn't mean that's all that exists the equipment only picks up certain frequencies and only picks up certain frequencies at given times depending on how it's tuned okay so we have to understand we exist in an infinity of frequencies in an infinity of densities if you will and what satanism what its basic tenant it's under first and foremost underlying tenant is that only that which the equipment that we possess can pick up or perceive is reality everything else can be ignored it has no bearing on anything don't try to explain it don't try to come to understand it only be identified with what you can see hear taste smell and touch and do everything you can to gratify those five senses because the second primary tenets of Satanism is that death the cessation of consciousness for all time now what you're hearing right now you will probably already recognize as being a way of seeing the world and a way of being in the world that many many many people in Western civilization subscribe to on a daily basis people live like this every single day thinking that death is the end this existentialism okay this I exist and then I'm gone okay being in nothingness living for a brief time and your life is parentheses in the infinity that exists on both sides of it these this tiny tiny you can already see how limiting how built upon limitation this worldview is okay everything is small and limited in this worldview except one thing the ego the ego identification with the self lowercase s the physical worldly self and one's own thoughts and one's own desires regardless of how selfish or ignoring of anyone else's needs those desires maybe are what are put upon a pedestal and fed that is what is fed and given strength in Satanism okay now already many people will be confused or surprised that this is what this religion is this is the main tenets of this religion and you'll recognize that this is how most people in society think and there's a reason for that it's because the directors the social engineers of the world order that we are moving ever closer toward want this religion propagated because it is the religion of slavery if you think this way if you live this way you cannot ever really truly be free and I'll explain why that is as we go forward looking into this dark ideology called Satanism stay with us folks this is what on earth is happening we'll be right back we are back focus this is what on earth is happening on your host mark passio we're talking about Satanism as the religion of the dark new world order Empire we were looking at ego identification as the first tenet of Satanism one of the other very important tenets of this religion is the death is the cessation of consciousness these two things combined leads to a very dark and poisoned worldview and it's a very fear-filled worldview it is one that places the physical above all aspects of the spiritual hence the inverted pentagram that is their main symbol the four forces of the material world earth air water and fire being raised above the fifth and all important element of spirit which unifies and binds together the other four so what other tenets is in these this religion for the diseased mind the psychopath is really who subscribes to this religion the person in schism the schizoid personality the person who has tremendous levels of imbalance particularly toward the left brain hemisphere this is a left brain hemispherical dominant religion when the left brain is chronically lived and dwelled in and there is no balance toward the right or Sacred Feminine or creative and nurturing hemisphere of the brain and the heart or emotion is left out of the equation altogether this is how the personality goes more and more and more toward this level of imbalanced toward the left and indeed this is why it is known as the left-hand path that is what this religion is known but by its adherents they generally will refer to it more often than not as the left-hand path even as opposed to the name Satanism they call it the left-hand path the left-hand path really encompasses Satanism and luciferianism dark luciferianism see I always want to catch myself when I say that because there is a difference between dark luciferianism and just luciferianism in general just as there is a difference between dark masonry and Freemasonry in general okay so these subtle distinctions should be made and kept in mind so let's look at other tenets of this religion man as just another animal is very important they look at man as no different than any other animal in the animal kingdom and I would make a case against this tenets as well there are many ways almost to numerable to count in which man is completely different than the rest of the animal kingdom yes so are we a member of the animal kingdom certainly are we just another animal absolutely not we're gifted with talents and abilities that no other animal on this planet has now that doesn't give us a right I feel it doesn't give us a right to totally rule over them and use them for whatever purposes we want I think they have a right to life and the pursuit of their happiness in their environments as they see fit as well which is why I don't participate in taking part of the meat diet I'm a strict vegetarian and have been for a few years now and I'd made that decision because I feel that as we do to others we'll be done to us if we keep farms will be kept on a farm but many people aren't ready to hear that either you know they're not there yet as far as their spiritual development is concerned and that's okay but again I just feel I believe in the as above so below principle that the universe is self-similar across skills and if we don't want to be kept as farm animals we probably shouldn't keep farm animals to me it flows logically that's the logical progression but many people will vehement Lee you know fight fight against that and uh you know humanity won't be continued to be kept as a farm animal and you know that that's just basically how things go here people don't want to learn and change bad things continue to happen to them they think they can continue to do the same thing over and over again and expect a different result and that's the definition of being crazy you know continuing to do the same thing and think something's going to change is is insanity that is being crazy so to continue with the this idea of man as just another animal as what Satanists believe this could easily be disproven simply by doing what we've already done here on this show and that's look at the structures of the human brain yes we have two brains that resemble the brain structures that are in the animals in the animal kingdom namely the reptile complex of the brain they are complex and the mem million brain known as limbic system but we also have an extraordinarily developed neocortex this is the part of the brain known as the telencephalon and the neocortex is the outer part of the telencephalon where all the neural activity that we that we use for thinking and creating takes place at on the outer portion of the telencephalon and this is what makes us truly human and what no other animal has as much access to or even as large of a telencephalon as as human beings do so you look at the capabilities that are imparted by the neural activity that takes part in this part of the brain okay and of course it comes from a higher level of being than even that it's not it doesn't come from the physiology the capability to make us operate in the physic domaine operates through the physiology I'm not saying that's its source but you look at the human brain and you look at the left brain being the logical scientific linear thinking the linear processor and the right brain being the part of the brain that helps us engage in creative thought nonlinear thinking compassion and empathy etc and when we really work toward balancing that and bringing those two parts of the brain into a a holistic oneness okay then new vistas of consciousness open up that no other animal can attain to certainly not to the extent that a human being is capable of and that's why we're in a unique position on this planet and that's why we should take seriously our role as stewards of this place not owners of it but stewards of it caretakers and it's too bad we don't take care of ourselves or this planet so Saint nosov Humanity on this world and just look at us as another animal well if we're just another animal and there are no special or unique capabilities of humanity which I would say is absolutely not the case then we can just simply act as other animals it just logically follows if we're another animal we can act as as the lion acts in the field or we can act as a hyena acts or we can act as a wolf ax or a snake there's no difference so just let our beasts animalistic instincts rule acknowledge that that's who we really are and and don't try to ever curb any of those base passions or instincts don't try to ever elevate our consciousness don't try to ever raise up our fellow man just live like an animal that's one of the basic tenets of this religion and that means you could essentially do whatever you want as long as you don't get caught doing it does that sound familiar how many people do you think would live like that if given cart launch go ahead go go right ahead and live like that if there were no repercussions in any form right now most of the repercussions happen in through this thing this other out of control aspect that we call man's law which is the only reason people don't generally act like that is because they're kept in fear of the consequences not because natural law and its tenets and foundational principles are in complete antithesis to acting that way and they have recognized that out of their own discovery and out of their own seeking but because they just fear the reprisal that will happen to them by the even bigger dominators the even bigger takers on this planet called governments so man has just another animal a huge tenant of this religion now that will lead us to the main tenets okay even even it's wider scale than just the ego identification than just man as another animal and this is moral relativism is what this religion enshrine is the idea that there is no such thing as objective right or wrong and this is a big one and we'll be exploring this on the other side as well as we'll be going to the phones as well I know there's a couple of people still waiting hang on I will get to your calls today we'll be exploring moral relativism relativism on the other side and perhaps going to a couple of phone calls stay with us folks this is what on earth is happening you know the Constitution okay folks were back on what on earth is happening on your host mark passio before the break we were talking about moral relativism as one of the main tenets of the Satanic religion of this ideology for psychopathic individuals so what is moral relativism well it's the idea that there is no such thing as objective right or wrong that there is no such thing as any sort of natural law or moral code by which we should be guiding our life according to that there are no repercussions for our actions ultimately unless we get caught by another person who is going to take some action out against us that essentially we can do whatever we want to anyone we want to as long as we can get away with doing it that we're prepared to face the physical repercussions of our actions according to the way things are working in this world but if let's say we were isolated on a desert island someplace and we wanted to kill somebody so that we would have more food well then go right ahead right is what's right for you in any given moment and wrong is what is wrong for you in any given moment but essentially we get to make that up based on the the experience that we're having at any given time how we personally feel about the situation what our likes or dislikes our preferences happen to be I call this being the arbiter of truth well if there's no right or wrong objectively if I have no way of actually gauging the morality of my decisions or behaviors I get to make it all up I'm the arbiter of truth or in other words on God and that's exactly what Satanists think they are their own God their ego their body their personality is God to them that's it that's the God they serve and again ladies and gentlemen I would suggest and submit to you this is exactly where Western society has been headed for a number of years this pure hedonistic egoistic way of living and being in the world not caring about anybody else but oneself maybe maybe your immediate family and relatives surrounding you who might be in a position to help you out from time to time maybe that but it's look out for number one me me me that's what this society has become and that's why it's going into Chains that's why it's going into shackles into a prison cell slam the door lock it up throw away the key bet on it unless that way of thinking and being in the world is changed quickly because that's what again I'll say this again that's what this religion is this is the religion of slavery that's why the New World Order wants so many people to subscribe to it because the dark occult is who are running the show are the dark Luciferians and they're the ones with these puppets on their strings called Satanists who they know just for a little bit of temporal and worldly power will allow themselves to be put on their strings and be told the dance puppet dance and they'll do whatever they tell them to do they'll they'll completely carry out their agenda just as long as they have a full belly just as long as they have a roof over their head just as long as they have the car they want to drive just as long as they have the amount of money in their bank account they want to have they don't care about anybody else because that's what Satanism is all about it's about the cremation of care it's about purging the heart from the Indians of the individual and I told you I would tell you an anecdote and it this seems like a good time and then maybe I'll go to the phones for a little bit I'll give a call and number as well I laid out that all the tenets of Satanism to a relative and I won't say who the relative is and not even because you know I want to protect their identity but it's so embarrassing that I don't even want my the relative to even be traced back to this that's how I'm without their knowledge respecting their complete ignorance and ineptitude at understanding anything in the spiritual evolution so I'm not going to give their identity I'm just going to tell you what the interaction was okay I said to this relative I died said I'm going to show you on this screen some tenets and I had a phone there and I did not show the title of the document the title of the document was the main ideological tenets of the Satanic religion and it contained all of these tenets okay and I went through them one at a time and I just read them all and as I was reading them this person had no problem with each one and an intern basically said to me yeah that's pretty much how I think things are yeah that's pretty much I think things are yeah that's pretty much I think things are in turn each tenant when I was finished I said well you agree with all of that and this person said yeah absolutely that's basically how I live my life and that's what I think that's how I live my life that's how I see things in the world and I'm okay with that and I said okay I scrolled up to the top I took my finger I scrolled up to the top on the phone I showed them the title of the document and the title of the document said the main ideological tenets of the Satanic religion they looked at it for about five seconds then looked at me and though these are the exact words that came out of their mouth quote well then I guess that makes me a Satanist end quote let's go to the phones caller you're live on what on earth is happening how are you and what do you have for us are you talking to me yes I am your your live on the air I'll let you take care of that you want to lower your radio so that echo isn't created and then we'll be able to hear you loud and clear okay so I'll give you a minute for that and then I'll go back to you all right here we go let's try it again caller you have to completely lower the the speakers you have to turn them off otherwise we're going to get feedback so I'll get back to you in a minute let's see we have another caller live on what on earth is happening let's see what they have for us caller are you there okay hello caller are you - yes you're live on what on earth is happening what do you have for us today are you talking to me mark yes I am oh okay great we'll be affordable oh I want to say you've given me some great tools and I have some solution it has been working for me and it's based on what water short green language because I can't hear you come on hold on a second sure you're on you're coming through okay it's a little bit muffled but we can basically hear what you're saying so go right ahead well I mean you could go and break down the word Illuminati in green language I think you'll have some fun doing that caller you're breaking up there but go go ahead okay calm down for us okay you have bill that means not good and then you have room for lumination right and then and then man and I so your darkening the third eye of men right there sir that certainly works for the dark loom absolutely that is what their art yeah they're so right aend in the language that we speak that if we only become conscious of it we'll see that this world that we're living in is actually controlled through words and if we just understand the the basic principles upon which language is built we would be able to open up our consciousness to an extent that we could scarcely imagine right now the study of language is just utterly incredible it's it's a fascinating topic to undertake I wish more people would look at the language because and go into the roots of language because when you do that you understand what it is we're being told and what we're being basically fed on a daily basis and it's not always a good thing you know sometimes words can be really empowering and we can learn a lot from just what they are telling us about you know how they operate with the world at large and sometimes they control us if we are unaware of what they are saying at it at a deeper level well that's effect and well and I've been making a lot of people get it also point out that Jesus in a parable we keep talking about natural law then both will interpret it they've done it for long that's exactly right and more people should look at a message that is actually being spoken in the Bible particularly in the New Testament and understand that all of that is of bait a basis in natural law to try to get us to live that way we'll pick this up on the other jack blood hosts of deadlines live it is there to get people to live in contradiction with natural law and to accept that they are the arbiters of truth they get to make up what's right or wrong see moral relativism means that right is what's right for me at any given moment wrong is what's wrong for me at any given moment there is no objective standard of right or wrong there is no objective standard of morality therefore rights are meaningless because rights are based on what is right what is not wrong to do to another so if there is no right or wrong no one has any rights and man could basically do whatever he wants as God here does this sound familiar this is exactly what the entire control system is based upon this is why a law can be made on the other side of one imaginary boundary called a country that forbids a certain activity and you step across that imaginary boundary into another so-called country and that activity is just fine to do well how can that be if the how could one country say this is wrong and you will be punished for doing it there would be physical repercussions on your actions if you do this thing here but if you do it over here it's not wrong it's okay to do that this is utter nonsense and always has been utter nonsense it's just the game of mind control because the elitist who rules that imaginary border that's his little pen in which he controls his animals on his farm and he's doesn't like that activity so he says that can't be done here will this leader this elite so-called in this pen over here in this country he thinks it's fine for his his cattle and to do that activity that doesn't bother him that much and so that's okay there and that's all law is that's all man's law is now always has been and always will be because it's not based in natural law it's based on tastes and preferences and what somebody at a particular time felt was okay for them not what was right that's why all law of man is not based in right it is has nothing to do with natural law rights it has to do with the Preferences of the dominator in any given region at any given time and it's a methodology of mind control and it's based in moral relativism not natural law which does not consider boundaries whether natural boundaries are otherwise it's in effect in every single solitary space of the universe no matter where you are at in it no matter what time you are at in it natural law is applying it is in effect and we're going to go deeply into natural law what it is how it operates and how you can align ourselves with it as part of the first part of the solutions based approach that I'm going to cover on this show and weeks to come stay with us we'll be right back folks this is what on earth is happening we'll be getting more into the ideology of Satanism and dark luciferianism on the other side of this break we're back folks this is what on earth is happening I'm your host mark passio my website what on earth is happening calm let's continue to look at some of the other foundational tenets of Satanism as a religion so we just looked at moral relativism well what moral relativism will inevitably and invariably lead to in society once enough people subscribe to it is a wonderful little ideology known as social Darwinism social Darwinism is this idea that man lives as just another animal and as such since the theory of Darwinism is based on this idea of survival of the fittest or really survival of the most ruthless that man needs to become the most ruthless within his species become sort of an interspecies predator so he can come out on top and that is the gauge of success in society therefore we can create all kinds of manipulation games we can create all kinds of machination x' we can create all kinds of control based systems that basically keep certain people in the dark keep certain people down feed them poison manipulate their currencies that they use for means of exchange get them to subscribe to completely nonsensical ideas and religions just so long as we profit from that just so long as we come out with a tactical advantage and come out on higher ground than them because after all that's the whole goal of life if you're a social Darwinist that means essentially do whatever you want to other people to keep them down so long as you come out on top and that's one of the main goals of Satanism you yourself since you are separate from everything else and you are completely based in the physical world that's your identity okay and you don't believe in right or wrong those are just those are just invented constructs by the religious minded and again I have absolutely no dealings with religion I don't consider that I have a religion or something that's holding me back from the truth I don't put my consciousness in a box I am attempting to expand it to ever and ever greater vistas of awareness this isn't what Satanism is Satanism is putting your consciousness in a box limited five-sense reality moral relativism and now that leads to the idea of social Darwinism and again this is very very widespread in our current society I would say that probably over 70% of our society agrees with most of these tenets and are living they can say in name only they're a Christian or a name only they're a Jew or a name only they're a Buddhist or a name only they follow Islam or a name only they're a freemason and any other mystical tradition but this is where the majority of people's heads are at in moral relativism and social Darwinism and certainly an ego identification and I just told you that story of one of my own relatives who was fine with being shown the tenets of this religion as being Satanism and then they said well then I guess that makes me a Satanist as if it was just the most natural thing in the world and they had just you know heard that the Sun rose again in the morning on that day no problem with it whatsoever let me give the calling number for anyone that wants to call I see we have a couple of people still holding on the line I'm gonna go to the calls in a moment eight six six eight four one one zero six five eight six six eight one zero six five that's the call-in number be glad to hear from you and if you want to chime in on this discussion let's take a couple of calls right now Larry in Louisiana you're live on what on earth is happening yeah I hear you talking about nature's law what's the first one for you well really it's understanding what is a wrong how is someone else wronged in what ways calculating wrong someone see this is the concept of the apophatic definition and let me let me lay this out this is a great this is a great question okay because this is how we get to the understanding of natural law we get to the understanding of natural law it isn't to say what may we do it's more about saying what we may not do what is not a right how many things may we not do to another person what things that if we do to another person would be infringing upon their rights and therefore it is not one of our rights it is then a wrong see this is the the defining something through the negative which so many people want to shy away from they don't want to look at the knot they want to say oh only define it by what you should do or the the affirmative and this is where I have to say the New Age movement has completely clouded many people's judgments they they get them afraid of this concept of the negative and not and not looking at something as harmful and being aware of it you know it's it's I liken it to if there's a right hook coming at your jaw you might want to be aware so you can duck okay if there's a trick if you're walking near train tracks and the trains barreling down upon you you might want to perk up your ears or you might want to take a look at that locomotive headed in your direction and it's not negative to do so so I'm probably going to be putting a presentation together in the near future called the apophatic path to truth falling in love with the negative okay it's emotional mind control to all always want to go away from anything that seems uncomfortable or negative and I'm telling you the direct the most direct path to enlightenment is to look at the darkness now you can't get lost in it you can't get so steeped down in it that's where you dwell all the time I would never suggest that to anyone it can drive you mad if you stay looking at that continuously which is why after a year and a half of this stuff and laying it out so that people can really deeply understand what's really going on here we're gonna start pulling back from that and looking at solutions once you know enough about what's really wrong it's time to start doing something about what's wrong taking right action so natural law it isn't like a series of one-two-three four-five-six and he's like like the 10 commandments so to speak it doesn't really work like that it's understanding having a deep in innate understanding deep down of what your rights are and what your rights are not how do your actions affect others in the real world and therefore do you have the right to take that action or do you not have the right to take that action and I would say so many things that we do have the right to do are being infringed upon and usurped by the dominator law culture and they have no right to do that and therefore should be ignored and ultimately if they continue to press with it we have a right to take the necessary actions in order to protect our rights and we can talk about what that means at a future time but it's a good question a natural law really should be explored and that's why we're gonna do this in depth when we get into that section probably in a couple of weeks on the show so we're all coming up to another break I'll take another couple calls on the other side and we'll continue with some of the deeper aspects of and safe doesn't want to come back we're back folks this is what on earth is happening we're talking about the religion of Satanism as the religion of the new world order today the dark new world order we've laid out some basic tenants including ego identification death as the cessation of consciousness man as just another animal moral relativism social Darwinism and now what does all of that ultimately lead to what does a twisted psychopathic worldview like this lead to well invariably it leads to man thinking of himself as God on earth and deciding who gets to live and who gets to die setting their own agenda as an unquestioned ruler which is what all dictatorships all communist regimes all socialist regimes all fascist regimes all totalitarian regimes of any kind have always seek sought to do establish the state as God and then start eliminating people that oppose their view of reality eugenics cleansing the population of anyone that they see as unfit as unworthy of life from the Greek root you meaning good and jenn-air a meaning create the underlying code of life genes we're not bound to it it happens to be yes what how traits are expressed they're expressed through those genes in the physiology we can change that code actually if we understand how it works we don't have to be victims of it but this is the mindset of the dominator culture this is why the Third Reich under Hitler and Himmler and others wanted to cleanse as they saw the gene pool of their Reich their order that's where this inevitably goes once you buy moral relativism once you buy pure ego identification once you buy into social Darwinism the slope becomes very slippery slippery very slippery to go headlong into a eugenics program and this is ultimately where the dark new world order wants to take humanity into a calling into a dark harvest into a purging of many of the souls that are here on this planet to gain experience and knowledge they look at it as their right to do this because they look at it as their planet to do with as they will in their mind their God here and nothing could be further from the truth and this is why you see such a close alignment between Satanism and national socialist ideology or Nazism these two religions go hand-in-hand and indeed if you make any kind of an in-depth study of the Third Reich you will invariably if you're being honest with yourself and if you're looking into the right sources you will invariably come to the occult connections between the Nazis and their view of reality and Satanism this connection is deep its interwoven into the fabric of the Nazi order and at the helm of it was Heinrich Himmler and his workings at Vives Berg and if you look into that you'll understand that a lot of the modern satanic cult networks that are out there revere someone like hemler and are working to accomplish the same goals that he and Hitler were working to accomplish the Temple upset is a prot was a prime example there's it's still in existence I know Michael Aquino really loved Heinrich Himmler and patterns his entire lifestyle after him someone like Niklas Shrek who was influential in the Church of Satan and the Temple upset Revere's National Socialism as something that he feels should become the the national political viewpoint of the entire world he wants to see a globalist Nazi state so there's a huge connection between Satanism and National Socialism and again people who think that that's any path to freedom are delusional because I can't think of any better slavery system than National Socialism I mean if people think that the Nazis and the SS members were free you know whether they were doing the killing or being killed none of those people were free they were all inside of a cage they were all slaves the people who did those atrocities were under mind control and that doesn't excuse them that's that's where I disagree with some people who you know think we should just give so much quarter to all these people because they were just manipulated no they're responsible for their own actions whether they're under mind control or not you were too spiritually weak and you let yourself get pulled into a Thrall and taken under mind control that was a choice you wanted to advocate your personal responsibility and hand it over to a psychopath some sicko fanuc leader people looking for a leader and variably are gonna find one and generally it's not gonna be a good one that's why I'm saying people don't look for a leader be your own leader there is no leader look to yourself your higher self as the leader I don't pretend or try to be anybody's leader I want people to think for themselves make their own decisions about what come to an understanding of what's creating our reality through our behavior and whether it's in accordance with natural law or not and that's how we create order or we create chaos we're co-creators with that force and we're eternally bound to it and get over it you know so I'm not looking to be anybody's leader I'm trying to help educate people and get them looking into the right path and help them to understand you're the one who's either creating order or chaos by the way you live so stop looking at the movie screen screamin at it and saying I hate this movie you're the projector of the movie your behavior projects the manifestation of reality that you must then experience and live in let's go to the phones Brian from Washington you are live on what on earth is happening how are you sir yeah but how about empathy how immediate it is for me and how damaged I've been by having been weather and of course I'm not I'm not blaming anyone but when we were shown images of torture during previous administrations Wars and somehow the media thought it was appropriate to show us these images and and having empathy with the victims of this cruel inhumane treatment it's like he was such an immediate sense for me of agony that that that I thought I felt personally damaged by the fact of my country had done that you know and I also I also had added negotiated back that other other warriors or terrorists do things as well that are that are harmful and damaging to life and I believe life is fresh I believe life is precious and this is what I think I I'm not certain to anything lives I mean I'm not certain that we live after life but but Mike but what that leads me to think is that life is precious and should be maintained sure because I'm because I'm because I'm not certain of what happens afterward therefore there shouldn't be me and because that immediate sense of how precious life is and how fragile it is you know that there's there shouldn't you shouldn't be actions taken against anyone one way or another that that are violent or harmful or anything like that that's right I mean that no I can bet I've personally been damaged by whether my control to the media or or what you call handlers only these are on hand but like if I get we're coming up to a break hold it right there I'll hold you through this break and you can finish up your thoughts on the other side we'll be right back folks okay folks who are back talking about empathy and compassion before this last break and I will say to the call or Brian I'm gonna bring him back up in a moment I'll say this is exactly why you don't hear a lot about what's really going on in Wars because they know that that strikes an emotional chord with people that's why so much support was lost during the Vietnam War and why so many people cried out to end it you can keep Wars going endlessly though if you never Forge an emotional connection between people who happen to understand what's really going on in that war and the events that are taking place in it the media was still to a certain degree doing their job during the Vietnam War now they do nothing to show us the real horrors of war so I'll let you come back up and finish your thoughts on that you still with us yeah but yeah just the idea of war and then and then also being dragged in somehow as in the past I'm not sure exactly how this happened and probably as a matter of weakness or a matter of being provoked or being or being controlled or being directed by by people who and you know what it is if someone knows stuff about you they can dirt they can really trace blacks they can turn you they can blackmail you they can put ideas in your head Sharan and actually having been subjected to kind of I wouldn't call them experiments but you know and having made my share of mistakes myself so so it's like it's a situation where it were to break free of that you just have to know that people are still going to remember it's like it's like my personality in the past having or the way I reacted having been subjected to certain manipulation it's a manipulation and then I react to it in an unpleasant fashion oh that's embarrassing that he's talking that way but it's like you know I don't want you know I want it I'm trying to be more Gandhi like I'm trying to be more peaceful but but if but if someone's got your number they can really twist you around you know and it's difficult I really I really I really try to hang on to calm sense you know and it's like and also about about about tort about how people have have confessed to things that they didn't do under the influence of I'm listed I've looked at stuff from Lorraine moraine I've looked at her have you looked at her work with the guy in Vancouver they're talking about the Hart projects and all the stuff and mind-control it's like that looks like something that happened to me you know and it's like I don't you say it's not that I don't remember I don't want to remember but but but I was put in I was put in emotionally psychologically you know situations where I was trapped and and and led to believe things that weren't true about myself or think that I had not done you know and and I don't know what techniques or technology was used at any given time well Brian this is this is something that I'm gonna cover in a future show and it's a concept I want to thank you for the call it's a concept that I call emotional mind control and I I've coined the term for it I call it heart control we talk so much about mind control right but we talk very little about heart control and this is how you can persuade someone to basically act as you will them to behave as you want them to behave or direct their behavior okay which is mind control essentially but you do this through the manipulation of emotions heart based emotions if we do not rule them if we do not own them and I don't mean keep them in a cage I don't mean not actually feel them I mean don't let ourselves be ruled by them we need to take ownership not only of our thoughts but of our emotions as well see this is the second component of consciousness the third being the synthesis of the two of your thoughts and your emotions and then being born into the world as your actions your behaviors can be controlled both through your thoughts and the ideas that you're taking into your mind and they can also be manipulated through your emotional makeup and how you feel about things that are being done or have been done and this is a key thing to keep in mind that there is a whole nother methodology of control out there that is based on emotional dynamics not just thought not just the dynamics of mind so that's a great call to bring those concepts to the forefront we'll get back into talking about Satanism but we have another caller on the line Mike from New York you're live on what on earth is happening I'm on thank you take Michael sure Mike how are you doing huh excellent thank you I was giving a call and reference to talking about those that prefer to carry the positive light versus the negative light or Mason's that prefer to build in the light versus try to obscure the light the ones that are dark have identity to them their vibration slower they they've killed their conscience and severed their connection to their higher self and force us and themselves to live in a third dimensional reality that that they're imprisoned to themselves for those that that are considered you know white hats sort of what white workers that are maybe considered high level or something like that right time is time is going to come when humanity as a whole is gonna have to make a decision on what they truly believe or don't believe you know I I believe that I'm not talking about 2012 but I think you know something along the line is eventually going to come down the road where you know we're gonna have to make a decision on you know it doesn't matter how much we've gained materialistic wise that's right it's about how far we've come you know spiritual was you know and how we put that into motion throughout our life I'm Mike I call that moment our critical moment of choice as a species as per the introduction of this show so I totally agree with that concept that there is a big collective choice looming on the horizon for our species and there is a there is a palpable and very tangible feeling of that that this is coming soon and it's there's this um I guess you could say quickening there's a quickening an acceleration that we're headed toward that moment you know and I put a message out there to all those polite workers that you know time is gonna come where you can't keep that the information hidden for as long as you have the best possible way right now we've ever created as the internet so and in order to get information out there with that you know worrying about it's being stopped is the internet and I think the best way to do that is the people whole sources of information open so I urge all people also to back up older copies of operating systems because they will be useful later on when most of the security technology is going to be geared towards you know the later operating systems and most current stuff you do have an older operating system and you know you can get the drivers it would be a good thing to have as well in the future as well as I put that as a word of advice out there not a bad idea and this this quickening this moment that we're headed to that I call the moment of choice for our species everyone is going to have to individually make that choice as to what side they stand on do they stand with the powers of darkness do they stand with the controller's or they step out and stand in the light and if that's your choice I'd urge everybody who's making the choice to step out stand in the light align themselves with the powers of the light to begin speaking this if you have not already I often say in mailings that I send out the universe is spoken into existence the power of the voice the power of putting this message out there cannot be understated it needs to be heard whether you think anybody's going to change as a result of it or not because I can even be somewhat jaded when it comes to that dynamic oh is anybody really pay tenshun are really listening is this really having any of any impact or people's lives really changing as a result is the dynamic changing out there well you know what I've kind of almost come to the conclusion it doesn't make a difference whether it does or not I'm not I've said this before and people can view this as callous or however they want to view it I'm not really doing this for the people of this planet I serve the force of truth the light itself that's why I'm here that's what I'm defending I'm defending the quote-unquote goddess the Sacred Feminine care the truth etc that's it that's the force I serve I'm not here to serve people I'm here to help people but that's not who I serve I can be of service to them but I'm serving the truth see and it's like a server you know people have this you know it's kind of a technical call there with talking about the operating system as well which we're all part of this huge operating system and we need to act as servers and went servers where you put information on and then people go and can make a connection to it and that's how they get information we need to be servers in our world in our reality and we need to serve up the truth okay and that that needs to actually become more and more distributed so that more and more people are serving that truth into the world and they make more and more connections a BitTorrent model for the techniques out there for the people who are on the BitTorrent sites that's the model we need to have true distributed information sharing I'll be right back on the other side of the break for the last segment where I'll wrap things up talk about what's coming on the show in future weeks we'll be right back ends of time welcome back folks last segment of the show today one of the things it says in the intro to this radio show is that what on earth is happening will endeavor to shine light upon the darkness of our world and that's what we do here we do take a look at the dark we've shined the light pretty brightly and we have seen just how filthy our house is now as we move forward into the future it's time to look at the methods for cleanup how can we clean this house up how can we make it a better brighter place that's what we're going to move toward into the future on the show and I think that's going to be coming up I've been thinking about it in two weeks okay next week I think what I'm gonna do and I've been kind of leading in this direction by taking a lot of calls today I know I haven't gotten two calls in the last couple weeks but um I think I'm gonna do an all call-in show again I did this once a few months back it went pretty well and I'm gonna do that again and let people call in talk about what their concerns are talk about any of the methods of mind control that we have already covered on the show and we can talk about solutions that we're going to be discussing in the future on the show anything is fair game no taboo topics we'll take calls all next week for all two hours so I think that'll be a good bridge between the dark and the light and in two weeks time we will start a deep penetrating analysis of natural law to hammer this in and really help people to develop a firm foundational basis in what natural law actually is so that's coming up on what on earth is happening I want to just wrap up a few things about Satanism and that is to say that the religion of Satanism is the religion of the hierarchy that the New World Order wants to impose it not only puts up pedastal the human ego but it also puts up on a pedestal the concept of human authority that man can become an authority and can basically act as God here on earth and that is not Satanism is not the top or the highest aspect of the hierarchy that's operating here on earth as I said dark Luciferians control the Satanists they are higher in the Satanic Luciferian network okay they are that the real distinction to keep in mind between luciferianism and Satanism is that the dark Luciferians do have a real deep understanding of the spiritual nature of our reality and they have a deep understanding of how natural law functions they know all of these things that we've been talking about on the show they also have a very deep understanding of the primal fears that are nested in man's psyche for thousands of years which we've covered on this show and they know the knowledge about how the human psyche and motivations work to the extent that they can manipulate through those fears they are ultimately the mind controllers of humanity the dark occultists at the highest levels are what I call dark Luciferians they are people who have all of that knowledge and they have turned their backs on it they have decided that it's too hard to do the great work of truly raising people and being an influence for them to come up in consciousness so rather they decide the easier path the left-hand path is to keep them down keep them manipulated so that they can be rulers in hell they would rather have a trashed world with completely degenerated people in it that they rule over like a farm rather than doing the truly difficult work but ultimately much more rewarding of being an influence for others in consciousness to help to raise them up to a higher level and higher vibe raishin so they have copped out and ultimately that's because they are lazy and they are fearful they're not the quote Illuminati the people who understand what we've been laying out on the show for a year and a half are the real Illuminati they're the ones with the true light shining the light on the darkness of these darkly enlightened ones the ones who are of the cult of the dark Sun the dark atenists the dark Luciferians who have the people of the satanic mind set on their strings and are manipulating them like puppets so I think that's where I'll leave this off and wrap up the concept of Satanism as the New World

Order religion just think about it folks how many people actually subscribe to this ideology they're all around us they're everyday individuals who have been convinced that this is the way that they should be living it's our goal to raise them up in consciousness and show them the error of their ways and show them that there is a way out that they don't need to keep going down that path of suffering that they can turn around and make a 180-degree turn about like as did I and turn toward the light and move toward it move toward the truth and move toward the essence of goodness and the essence of higher consciousness in this world so alright I'll wrap up there and we still have a couple of callers on the line let's get to them and then I want to make a couple of statements about the podcast that's going to be going up and a couple of changes about the podcast and I want to talk about some of the documents that I'm going to be posting with the podcast for this week so that will we'll wrap up wrap up the show with that but we have a caller on the line caller you're live on what on earth is happening welcome hello hello yes you're like yes hi um my name is Karen I'm calling from Philadelphia you Karen how long I've been listening to your show for quite some time now and yeah and passing the word around about your show I was really blown away this past week with this human animal splicing and the revelation that they've been doing it for the last 30 years in Great Britain and they have these human beings that have like 20% animal DNA from goats to pig to cows every insect cross yes crosses cut cross species chimeras they've been creating this for years it's part of their eugenics agenda actually yes but they're saying just the opposite that there would they want to grow these extra organs and limbs for human beings who need livers like I saw a picture of this of this mouse that had an ear and human ear on the side of it and I just want to want to ask the question to you and to everyone listening out there you know I know that the Catholic Church is duplicitous and in a lot of ways but where is their voice now you know in terms of eugenic I'll tell you terms of this I'll tell you examination I'll tell you exactly where it is their voice is the same place that it was during the Nazi regime around World War two it's the the exact same place look into the connections between the Vatican and the Nazi Empire and you'll understand a whole lot about where the highest-level religionists of this world where their loyalties lie and you'll find a lot of connections between that hierarchy and the satanic slash Luciferian hierarchy and that's a disturbing place to go but if you really want to be enlightened about what major world religions are all about you need to take up a study of the interconnections between the so-called religion religions of this world the religious hierarchies and the satanic networks that ultimately are controlling and manipulating through those religions so a great call all right I think that's all the calls I'm going to take I'm going to take this last minute so to wrap up and talk about the podcast I'm in the process of moving all of my podcasts over to the what on earth is happening server because they were previously hosted on talk-show I want to really move them over to my site so that they have a permanent home there and I'll probably not be uploading any more podcasts to the talk-show servers for people who may have been following at that location which is where I used to do the podcast from when it first started so that'll take a little bit of time I'm going to transition that over podcasts from now on will be uploaded to the one on earth this happening website itself and not downloaded from an alternative location so we'll need to see how that goes as far as bandwidth load and things like that go but I think the server is up to it so I don't think there should be much of a problem there the next thing I want to say is I'm going to be going on vacation with Barb for the next couple of days so if my podcast for this week is up a little bit late please give me some leeway on that I'm taking a couple days vacation time in the summer here and with the podcast I will post many books and pamphlets on this topic especially a document that explains the the introductory process or the application to the Church of Satan and I'll be posting documents about the Church of Satan the temple of set and other satanic and Luciferian organizations out there so do further reading and research on your own and you'll get a better understanding about what this ideology truly entails that's all we have time for this week folks I hope you enjoyed the show we'll see you know that murky water

What On Earth Is Happening Show #072

Topics: *Call-In Show, Solutions, Natural Law, Raw Milk Raids, Goddess Symbolism, Occult Sacrifice, Kabbalah, Trivium, Consciousness & Animals, Human Origins*

freedom man that's what it's all about [Music] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host mark Pascoe welcome one and all you are listening - what on earth is happening right here on the oracle broadcasting radio network i'm your host mark passio this show is live here on oracle every Sunday from 5 to 7 p.m. Eastern that's 4 to 6 p.m. Central Time today is Sunday August 7th 2011 and we are going to begin the transition into a new phase of what on earth is happening here today this is going to be kind of an interim phase of the transition from taking a look a deep penetrating look an analysis of the darkness of our world into solution oriented thinking and the measures that we can take and the things that we can actually stop doing that are leading our world into darkness then and take a look at the measures that we can take to lead it into the light so today is going to be an open lines all open lines call-in show so you will make the content of this show as the listeners of this show we could talk about anything you want it's going to be a show to basically put our finger on the pulse of the public so to speak so you can talk about anything we've already discussed here on what on earth is happening for the last seventy one week seven this is week 72 that I've been doing this show you could talk about things that we will be discussing in the future solution oriented approaches or you could bring up your concerns questions any clarifications that you might you know won't want to go over to ask me specific things and have me clarify information on any given topic that we've already discussed so that's what's coming up today on what on earth is happening let me give the call-in number right off the bat so people can get ready and start calling in the calling number for this show is eight six six eight four one one zero six five once again the calling number eight six six eight four one one zero six five so call in feel free to talk about anything you like there are no taboo topics here on what on earth is happening there never have and there never will be I don't censor anything that goes on on this show because that's what it's all about is freedom of speech always people have called in and presented intelligent conversation and intelligent questions for discussion discussion on this radio program I expect it to be the same this evening as we move forward into a new phase of the program solution oriented approaches for the problems that plague our world that's coming up after the break on what on earth is happening everybody stick around stay tuned it should be quite an interesting show today I'm your host mark passio and you're listening to what on earth is happening [Music] [Applause] [Music] welcome back folks you're listening - what on earth is happening here on the Oracle Broadcasting Network we're going to do an all caller show today your calls will make the content of the show anything you want to talk about about what we've already covered or what we are about to cover on the show the call-in number eight six six eight four one one zero six five once again eight six six eight four one one zero six five we don't have any callers on the line yet but I'll wait for people to start calling in and I'll bring up a topic of discussion and how this will relate directly to what we are going to be discussing in few future weeks here on what on earth is happening and that is the recent raids that have taken place against sellers of raw milk and raw cheese products the Rossum growers and the healthy family farm growers and this is one of the most appalling things that I can even imagine going on that people are simply providing for the people that want it raw dairy products and these organizations are being raided by armed thugs of the state because the state has told them that they are permitted to do this to people that are making voluntary exchanges with other human beings things that occur in nature in the natural world and as a matter of fact if you look into the enzymes that are contained in raw living milk these are extraordinarily healthy for human beings now you know different people have different takes on using any animal products whatsoever whether you know I have told people before on the show I'm a strict vegetarian I don't eat me I do have however used dairy products I tend to limit my intake up of it aside from cheese I will partake in quite you know on a normal basis but I limit my intake of milk but I don't really see a problem with it as long as the animals are treated with respect to use their the the milk from from farm animals but the nerve of these armed agents of the state rating a farm people who are simply growing food and providing raw and organic foods for people which are the healthiest foods for people to take into their bodies and they're coming in with a SWAT team with guns drawn and closing down their establishment because they're saying that they have not been able their their owners their bosses have not been able to determine the safety how wonderful how kind and loving of these individuals that they're so concerned about the health and safety of the human family that they need to go and stop these criminals who are selling raw dairy products how dare they because after all it's it's these thugs in uniform with automatic weapons who keep the rest of us safe by by rating raw organic farmers people who actually care about the ecosystem and care about human health and are trying to provide the highest nutrient density foods you know the foods that grow naturally from the earth and supplementary foods that come naturally from animals if we care for them and treat them the right way unbelievable truly unbelievable so that's a topic that I'd like to see discussed today and how this is a complete contravention to natural law and how these people who were taking part in these raids I would love to hear from one of these people the who dare to do this unimaginable that this is what your life is that your life is this low in consciousness that you literally have absolutely no idea what your rights are or what other people's rights are and you would dare to go and take someone else's natural law rights you would attempt to usurp their rights because that's what you receive a paycheck to do and you say yes sir yes master let me go and do whatever it is you tell me to do with absolutely no thought as to whether it is actually my right to take part in that action it's a disgrace a disgrace we have some callers here we go John from San Diego you're live on what on earth is happening I change the subject to Osama for a second go right ahead sir I think what comes down to you right now is a basically a rift between people who believe in all of this stuff and all the narratives and people who don't yes and yesterday's story about how the same members of SEAL Team six who killed Osama and threw him in the sea died how at first that was the story and then it changed to no it wasn't the same guys what I get from that is that story was directed specifically to discredit the people who do not believe in this Osama narrative interests you don't thank us and interesting because yes because at first they were saying it's the same people and so then guys like you and I would go to all our friends and family and say hey look this is this is ridiculous their story is just BS and then a couple hours later they you know subtly change their tune but enough to make the believers look at us you brought up that point and say ah they're just they're just looking to discredit the whole thing they are actually believers and the non-believers you know what I mean right though that's not thank you no problem yeah that's another interesting psychological development that story with SEAL team 6 initially putting out that members of that team were involved in the so-called bin Laden raid there's so many different dynamics to that psychologically I mean we could spend a lot of time on that but basically again what you pointed out is all it ultimately comes down to is the people that believe the ridiculous narratives the movie as the researcher David Icke often calls it the movie version of reality this scripted slant on what actually is taking place in our world to just invoke more of this fake patriotic fervor and get people to worship people who are actually being used to take their natural law rights away as their heroes as people who actually keep them safe and I said two weeks ago on this show and I strongly reiterate it nobody in a uniform keeps me safe never has does not now never will adherence to natural law principles is the only thing that keeps anyone in this world indeed in this universe safe nothing else so we'll talk about that more on the other side callers please hold on the line I'll get to your calls we'll be right back on what on earth is happening [Music] [Music] we are back folks this is what on earth is happening on your host mark Hasse oh let's go right back to the phones we have a couple of callers on line here we go all are you're live on what on earth is happening what do you have for us here today is it me yes you are here online oh my name is Chad you have a great show you know I discovered it like two months ago and I've watched every I've listened to every show and it's really amazing stuff thank you so much for all your effort oh thank you yeah I had a couple things I'm actually here in Germany and I've been to a lot of churches around and I see that there's they always use the symbol of the shell that's like a son yes and I noticed you meant you mentioned that in one of your episodes and I did a little research into it and I actually figured out that shell in Hebrew means belonging to or of thee so there's a little symbolism right there interesting I'm also if you noticed you did a great few episodes about 9/11 that was awesome you know I don't know if you never noticed but the Statue of Liberty is you know from one perspective directly in between the Twin Towers yes or what used to be what was used to be 20 hours and that was very interesting that you brought up this whole concept of the Empress tarot-card right and the relationship so really it was actually there in it so I hear it well sure that is was a deliberate alignment with those buildings where the buildings were placed being a deliberate alignment with the Statue of Liberty for that very reason and last thing you know a lot of researchers you know I just saw a video on YouTube the other day and this pretty famous researcher was going on and on about he you know he knows the most about the Bohemian Grove and you know he then he goes he cuts to the owl and he called the almalik and I want to know my research says that the owl is Minerva and I listened to your episodes already on this but I still if you could just quickly touch on it again why why is it Minerva and not Moloch and and why is this character evil the the the connection with Bohemian Grove and the owl statue the owl is one of the symbols of the elitists of the darker cultists who consider themselves predatory interspecies predators who can see their prey in the dark while their prey cannot see them however this connection to Molech comes up Moloch is a Canaanite God and a God in of the Phoenicia Kaena area of the world okay it was originally a bull God okay and the effigies of this bull were created these huge not statues but they were basically built of flammable materials okay and they were erected to look like a huge bull and this is because the bull God is representative of the Sun this is a solar deity the solar cult worships this ancient deity known as Moloch okay the rituals themselves were known as Moloch's mo loc HS Moloch's okay if you research what a Moloch was it was a ritual of sacrifice and it was also a ritual about atonement for sins or in other words an absolution ritual okay they were offering the most pure energy the most pure blood in the form of infant's to this deity and the the rationale here was that any of the wrongdoing that this culture who looked at the Sun as deity as the all giving all pervading essence of life which essentially it really is if the Sun weren't here we wouldn't be able to have life on this planet okay but this dark twisted variant of this knowledge okay is such that we need to satiate to the Sun okay we need to give it energy in the form of our life in order for it to keep giving us its energy which allows us to continue to live so occasionally if this deity becomes displeased with our behavior because we really haven't been doing the right things we can give it the most pure essence of life in other words saying look at what we are willing to provide for you and how they did this was they would make an area in the middle of this effigy of this god this deity like a burner okay and they would put the child inside of this area you know I mean you want to kind of look at it like an oven it could be looked at like that the entire thing was flammable and then they wouldn't ignite the entire thing and it would burn up with the child inside there's many depictions of this online you can read about it there's some books that talk about ritual magic in which you can read about the Molech rituals but that is essentially where the tie to the bull and the owl come from in as this tradition progressed the the bull and owl symbolism were kind of intertwined or intermeshed so it's basically a continuation of the same cult this solar cult which is still in control today what's in control today is a solar cult the cult that basically has all of its symbolism based in the Sun they are referred to in general as illuminated ones okay which they are not the people who really understand like I said last week what we're talking about on this show in relationship to natural law principles are the real alumina but this is also a symbol or a nod to light okay because light is a symbolically representative of knowledge and they possess lots of knowledge about how things really work in this reality they hide that were occult it from others so that they can gain a differential power advantage over them okay while knowledge itself is in power it's a means to power ultimately a means to control should an imbalanced consciousness wish to use it as such so as this solar cult progressed through different regions of the world and through different time periods the symbolism which they actually truly prefer from the even further ancient world of the owl was intertwined with this bull symbolism and if you look at the Ala P Bohemian Grove it almost resembles a bull more than it does an owl so this is this is an example of symbolism that has blended or meshed over a long period of time and different cultures in different regions of the world but the symbolism of Molech itself derives from Phoenicia Cana and look up the rituals known as Moloch's and that the the form that the the burners that they used for these children took on and it was the form of a bull God and one of the other reasons for that before I go to the next caller is that the Sun during this time was in the constellation of Taurus okay that's the ruling deity and it took takes on the form of a bull just like when the Sun moves toward Aries then the ruling deity was the RAM now we're in the Age of Pisces and you look at the ruling solar cult and it's religion all you need to do is look to Rome and understand that the ruling deity is now the fish the fish God the Pope's mitre in the form of the head of a fish it's all about the Sun and it always has been all about the Sun so here we go next caller dawn in Oregon you are live on what on earth is have happening hey Mark thanks for taking my call I I had a question about symbolism for you sure hi can you hold that until the other side of the break just hold on and we'll bring you up first on the other side of the break this is one armed Japanese oaks we'll be right back with dawn from Oregon's call [Music] [Music] welcome back folks this is what on earth is happening and on their host mark patio today an all falling show before the break we were talking with Dawn from Oregon dawn are you still there I apologize I wasn't watching the clock I brought you up right before the intro music for that break goddess so well thank you so much for taking my call and thank you for spending your time sharing your knowledge really appreciate everything you're doing I had a statue of the symbolism of the Statue of Liberty and also about Persephone on top of the White House sure but I'm you know is she they got his freedom mercy Persephone she was like 20 different names but back to the Statue of Liberty their shackles around her ankle the book she's holding I'm wondering what you think about the symbolism of those items on the Statue of Liberty the book and the torch generally represent freedom and you know we go back into the into the Roman language and we look at the word for freedom and it was liebherr liebherr toss okay where we get the word Liberty from that's based on the word for simply free which means which is Lea bear in Latin and that is also the word for book so book and freedom are essentially the same thing they come from the same root word in Latin that's how important the concept of reading and understanding was to people in the ancient world and of course this is long that this word was derived long before the fall of the Roman Republic but we're basically entering a cycle where Rome is falling all over again the Republic is falling all over again and we're heading into those same pitfalls that the ancient Romans fell into hedonism and looking at looking at truth as something that wasn't important wasn't as important as self-gratification and these are the things that do indeed keep Liberty shackled or Liberty and chained because if those dynamics are allowed to just completely run away with absolutely no self-control put in place by people who understand that if there is no internal government governorship or self-ownership or ruling of the passions of the base instincts when those dynamics completely run amok you get a society that is externally enslaved or externally put into chains and that's what we're seeing develop in the world and it's because we have allowed internal anarchy to reign and I think that's what symbolically the the Freemasons who gifted the Statue of Liberty to the United States were encoding into that statue into that effigy of this goddess who has many different names in the ancient world ultimately you know to me that's Isis that is that is um Semiramis of the babylonian tradition it's isis of the Egyptian tradition it's Mary it's all the same goddess you know the seven rays on her head point to the fact that that is a symbol of Isis I mean Isis's star had seven points so inside in certain free Masonic books you often see a Sun inside of a seven pointed star that is the star of Isis giving birth to the god Horus the Sun and god Horus who is in her womb who is carried by her she is the bringer of light hence the torch she bears the torch which is the torch of wisdom and enlightenment and knowledge and she carries a book which represents freedom the same word for freedom LeBaron Libertas in Latin that's my take on the Statue of Liberty I don't have the dark viewpoint that other people have of that imagery there is a dark side of luciferianism of the concept of Lucifer the light bringer I talked about that last week extensively but this to me is the positive side of the Sun it's it's representative of knowledge understanding and then acting on that which is wisdom is the path to freedom and those are the three steps of the Trivium which is another thing we're going to talk about extensively in the solutions section here on what on earth is happening and hopefully I'll be able to get our good friend Yann urban to come on and tell people a whole lot more about the Trivium in coming weeks that's my take on the Statue of Liberty awesome thank you so much for your interpretation it's amazing I'd love to continue listening on my phone here I'm without my computer know any to say about Persephone on the Capitol building again yes sure I'll mute you and you can continue listen I won't hang up on your call then okay great so yeah Persephone again it's another name for this goddess in general she is known as the goddess of freedom or Columbia in in Rome she was Venus Columbia or Venus Kalume the Dove okay it's again just another name for the same incarnation of this goddess which represents the same concepts and it is placed on top of the Congress building because Congress means a coming together okay a gathering it's supposed to be the coming together of the male and the female it's supposed to be Congress or Union that's another word for sexual Union the chemical wedding okay of right action with the emotional empathy that is brought to the table through having developed the emotional qualities okay there Sacred Feminine and that would basically bring wisdom forth or right action born of having a deep connection to the the underlying emotions that are empathetic this however is not at all what we see happening in Congress today this is simply a symbol that is there to try to basically act as a a remnant or a a vestige of a sign or symbol that this is what what it did once mean but they want people to think it still does mean that and equate that with the goddess Columbia or Persephone or Isis or Astarte or you can go on and on with the names you know again you can find 50 different names for this same goddess that represents the same conceptual idea and you could find 50 different names for her child the Sun God who represents the idea of right action in the world but again the whole idea of this being on top of the building is its supposed to represent the concept of compassion and then joined with right action which is what these people who are hired to do the job that they're hired to do are supposed to be doing but do we see them doing that absolutely not they it's been infiltrated by people who don't have those developed emotional qualities and who are essentially psychopathic and who are on the take and who only care about how much money is going into their pocket or their coffers and they're there to serve their own interests not the interests of the public so that's uh you know basically why that that statue is up on top of there I believe the original intent is a good one but I believe of course those ideas we have fallen horribly from in the modern world and it's because moat in general like I said I've said before on this show I can come on the show say three words and say good night folks and there's the reason everything is the way that it is people don't read that's it and by reading I mean reading books you know reading is a pathway to freedom but you have to also be eclectic about the information sources and then you have to process that information process what you take in from varied sources and analyze it to come to whether it is truth or not whether acting upon it would be a good thing that's what I suggest that's why I say don't believe me try to find the wisdom in my words if there is any and if there is then act upon it you know understand first though don't just take somebody's word for it you know just reading isn't the path to freedom understanding what you read and if you understand it to be something that is good and can lead to something that is good then you act upon it that's the path to freedom so great call here we go next caller you are live on what on earth is happening what do you have for us hello hello caller you're live on the air Vicky are you asking for it yes Vicky you're live how are you oh great great fine I'm a member of the Rossum food co-op here in Los Angeles great and that was raided okay and I I have illness and I have to have no right I can't have dairy that's not raw so when I go there Vicky let me say my thoughts are with you as you're going through this difficult time and I think it's an utter disgrace what was done to you and well there's a solution I think this mission is what I want the real trick is I called chef Barker's office the secretary gave me to his assistant sergeant I don't remember his name I mean any claim that sheriff Baca of Los Angeles the sheriff of Los Angeles did not know about it I called the ask why are you letting that unconstitutional activity have hurt on your buildings and he said he didn't know it hurt anyway I recommend this and that he read sheriff smacks of Vicky what coming up we're coming up to a break I want to hold you through to the other side of the break hold on don't go anywhere oh okay folks we'll be right back after these messages you're listening to what on earth is happening [Music] [Music] [Applause] welcome back folks this is what on earth is happening on the host mark passio today is an all call-in show the call-in line is 866 eight four one one zero six five once again eight six six eight four one one zero six five before the break we were talking with Vicki from California who unfortunately had her natural law rights trounced the other day as part of this guns drawn raid by thugs of the state on Raw some foods let's go back to Vicki Vicki are you still on the line yes I am okay continue what you were saying you were telling us about that you tried to go to you our I called you Sheriff Walker's office Sheriff Los Angeles to find out why the heck he would let that on unconstitutional activity occur in this county and I talked to his assistant the secretary gave me to his assistant was a sergeant I remember his name and he said that sheriff Baca didn't know about it so my I had an idea I was I don't I don't if there's a Los Angeles oathkeepers group and I tried to get a couple guns ahold of a couple guys that I thought was in it but anyway if anybody's listening that's in old capers of Los Angeles I'm thinking you should organize a crowd of people to go to the sheriff's office and give them a book and be sure and tell all the TV local TV stations and the local newspapers that you're going to do what sounds like and I'd no doubt it sounds like that's I have no doubt but la is a communication center of this country so that's good if it could be done and I have no doubt that all the members of boss include all the people that get all our food there I bet you they'd even leave work to join it you know so you'd have two groups this meeting all kinds of groups in this LA area Vicki let me know I'm all together what is that what is that I will have what is the reaction of the people of that area been to this raid oh oh just discussed good but see these people are so gentle I don't know why it is but the people that take good care of their bodies and vegetarians they're so sweet and gentle you know and I'm not really you know I need some warriors lesbian that's right people I'll do is I'll go on my computer and find Lal keepers and I was a volunteer - right no I'll help but I need somebody we need to do it your spirit reaction to this as opposed to just laying down and going along with it because the government said that that's what it is you know let me ask you if every sheriff in this country disallowed - there the is officer you you know - nobody higher than them military nobody's higher than myself if every sheriff in this country understood this stuff and implemented this stuff weird three sounds like that Sheriff absolutely isn't even doing his job he's asleep at the sweat I don't know territory that he doesn't even know are there that's their very cheapest I called the DA also and they were very sheepish you know they didn't the DA handed it to some federal DA specializing and it helps foodstuff or something I mean they were getting so many calls there's a lot of us upset this is where we all saw that there is some vitriolic reaction to this that there is some you know L righteous oh yeah may take place yes well I told the DA I said this is like somebody walking into my house and grabbing my food out of my refrigerator this is a private co-op right private you're a member so I said what's the difference between that well you got what they did it is somebody walking in my house right what's the difference and he says I'll probably be brought up in court and then these poor people I did both go to jail in the meantime didn't get only reason they got out of jail is because there's a crowd right and in the meantime they were traumatized by guns drawn raid and what did they do to all of the stock well I mean well and it was what it was nameless but with there throw their gear on right it wasn't just cops of gun it was a team for gosh sakes you know that way we've got to do this is we do this is where we've come in the United fascist socialist States of America you know in the what's wrong with these cops they're lemmings internal to the Constitution don't be freaked these people are uneducated individuals they're people who have never really read any books worth reading in their entire lives and their diet is horrific then maybe they should be drinking milk and eating crap that's in there eating on a regular basis and chemicals thanks so much for calling in and give us given Iraq update thank you your thoughts and prayers are with you okay great great call um yeah this is something that people really need to get up in arms about because I'm this think about this these people are going guns drawn into a place that grows food for other people okay and saying because we've been told by others that they don't think that this is safe and it's all big crock of crap ladies and gentlemen it isn't because they don't think it's safe is because it's because they know that this food will help people's brain to restore to normalcy and they don't want that they want chemicals and pesticides and additives and and chemical fertilizers and preservatives and hormones and junk pure crap in the food because you literally are what you eat your brain becomes what you put into your body and if you put junk into that body computer that we call the human brain you're going to get junk out through behavior and that's why these thugs act the way they do one they have not really done any self-examination in their life they've never taken a good hard look at themselves and whenever they have they hate what they see and therefore they want to take out that hatred and aggression on other people because ultimately they don't like themselves - they're stupid people they're unread period the end and you know you don't like the way that said tough I'm saying it openly outright that's how it is they're dumb and they're dumb because they don't read and that's why they're enslaved that's why their minds are in bondage because they don't read and they have a crap diet therefore the brain is literally virtually destroyed okay if you look at the the if you did a brain scan of one of these criminals because that's what they are you would see a map of the brain on the neocortex that looked like Swiss cheese that looked like the surface of the Moon that's how many craters would be in it of electrochemical deadness of neurosynaptic non-firing but they don't even understand the components of their brain half of them probably don't even understand they have something called a brain because they never paid attention when any learning was attempting to be conveyed to them and sadly much of the time hardly any learning ever was attempted to be conveyed to them in their environmental conditions when they were being brought up which was failed they were not brought up they were not raised by anybody their parents or anybody else and I would say that directly to one of those people's parents how about that folks why doesn't somebody who is a parent of one of these thugs call into this show today and and I'll tell you you didn't raise your child I'll tell you I care more about your child than you ever did and I'll say that to your face it's disgusting disgusting and people should be completely enraged over this happening and put a stop to it immediately immediately if they want to go and raid somebody for doing something destructive to the human body why don't they go raid Monsanto why don't they go raid Philip Morris Oh what because um well they say hey they're putting a cigarette telling you it's bad for you yeah well good people can make the choice of whether they want to drink milk that might have some bacteria in it people are making the choice whether they want to smoke um tobacco that's been treated with radioactive chemicals to make the soil that it grows in overturned faster but they're still puffing away on those cancer sticks we'll be right back folks alone gotta keep my cool make him think I'm made up stop [Music] [Music] [Music] [Applause] airing because basically their brains are devastated by the toxins that they put into their body on a daily basis and by the garbage information that they put into their mind on a daily basis we'll be talking about how to reverse all of those things how to bring the mine end body back to balance as we go forward in what on earth is happening we'll be talking to health food experts will be talking to people who know a whole lot about nutrition we'll be talking to people who know how to determine the veracity or truth of information through methodologies like the Trivium we'll be talking to people who have a lot of knowledge about communication skills and how to go and reach other people with information and truth so putting information out into the world in different ways how to change help to change the quality of people's attention through the right information being put out there into the field okay we'll be talking about all of those things coming up in the solutions section so let's go to some more calls we have a couple more people holding on the line caller you're live on what on earth is happening what do you have for us here today goodnight mark keeper here hey how are you we can hear you fine your life what do you have for us hello let's try this one more time now we lost them call back in I'll bring you up first let's go to the next caller caller you're live on what on earth is happening what do you have for us today hello caller are you there going once yes it is Oh now if you're really on or not I've read scriptures yes and I've also tried to lead a II wait the Holy Kabbalah yes not an easy book to read in fact I think I will not be able to conquer this book imagine my you know to read also in morals and Dogma that the biggest section in morals and dogma is on the Kabbalah yes for 200 pages and what they talk about it makes a lot of sense but can you explain victory and glory hod and nutshell for now a little more I'll take your answer off the air code and net saw yes sure no problem okay the former caller who called in and the call dropped if you want to call back in I'll bring you right up so I apologize for that happening technical glitches happen sometimes so this caller who just called to talk about the Kabbalah as the root of the Western mystery traditions and Freemasonry of course she had a question about the two spheres on the Tree of Life code and that's odd and I can explain those and I'll do that on the other side of this break this was a short segment we'll be right back after these messages you're listening to what on earth is happening [Music] [Music] when he looks at it with his eyes is what we see when he looks it into the sunglasses we see the same things all the way through the subliminal sit wannabe birthday Joey defendant [Music] glasses as we are back folks this is what on earth is happening I'm your host mark passio the caller on the other side of the break had a question about the Kabbalah and also made reference to some of the difficulty in being able to get through some books on occultism and mentioned the author's AE weight as well as Albert Pike and it is true that this could be very heady abstract material and there is often language barriers involved not necessarily the English language to the English language but to the language of the time period because you can be talking 21st century English and using the colloquial terms that we use every day today and this was not the way English was necessarily spoken back a hundred hundred and fifty years ago or even at the beginning of the 20th century there was very different ways of structuring the English language and it was often exceedingly verbose as well where the concepts would go on and on and on within one sentence and it was just a different way of communicating this is I often hear discussed when people talk about the understanding some of the scientific literature of the day back in the early late 1800's or early 1900s and it's definitely a problem that does need to be wrestled with struggled with through an act of will I would say to the woman who just called keep at it don't give up knowledge and insight will come forward through your effort of will so with that having been said I'll go to your question about the two specific Sephiroth that you mentioned known as hood and net saw these are the two Sephirah at the bottom of the Tree of Life the two paths on the right hand side and the left hand side okay of course the very base of the Tree of Life is mal couth which means kingdom but if you look at the two pillars that are on the opposite sides of the middle pillar on the Tree of Life the left-hand path pillar is known as the pillar of severity and this as I've said in former podcasts and just to let you know you can go back to podcasts on the Kabbalah I believe they were in the early 40s so I'm fairly certain they were around 42 42 43 44 these are the podcasts I covered Kabbalah on okay and then if you want to look at the little bit later podcast after that I talked about the connection of Kabbalah to the Tarot tradition tarot cards and Kabbalah is the root of the Western mystery traditions and specifically it is the root of Freemasonry which is why there would be no surprise that Albert Pike would dedicate so much of his book his famous book morals and Dogma to the Kabbalistic tradition to go specifically to your question the sphere hold is at the root of the path known as the path of severity the left-hand path pillar and this is the sphere known as splendour okay this emanation okay this Saphira represents the internal qualities of will because the left-hand path pillar is all about it isn't necessarily about the negative it is about the veiled or hidden or internal qualities those which you don't outwardly directly see we're manifest outwardly so hoed represents again it is on the third chakra level if you look at the levels of the Kabbalistic Tree of Life as chakras within the body as the energy wheels or vortices within the body you have mal coot as the base chakra yes soda as the desire or sacrum chakra and then the third level is a dualistic chakra there are two manifestations an internal and an external when you come to the solar plexus or the will chakra okay so code is the internal manifestation of will and this is courage courage it's called splendor okay in Hebrew code that's what it means in Hebrew but this would be essentially the qualities of courage that the individual carries with them all right the the propensity to look at something and not be fearful or even beyond that perhaps to experience the fear and then move on in spite of it that splendor that is hold okay this is the base of the pillar of severity the left-hand pillar okay the pillar of Mercy or the right-hand pillar the right hand path at the very base of that pillar is the sphere known as net saw net saw means victory in Hebrew and what this sphere represents is the outward manifestations of will so this would be will itself to get things done in the world okay this would be your drive to do things to actually follow through in action on that which you have already taken an internal courage with respect to you've developed the internal courage now you're putting it into action in the world okay so this would be net saw that would be your drive to do things to get things done okay and this has to be bridged with has said mercy true compassion in order to attain wisdom or hokhmah which is above it on the right hand pillar and again we could do a whole nother show on Kabbalah and we probably will because this is one of the big solutions understanding the self is the main solution knowing thyself as was directed by the Oracle at Delphi know thyself and you will know the universe and the gods we started this show with that statement back in episode number one the Western mystery traditions the eastern mystery traditions the traditions out of the Middle East they're at their core are all about self knowledge self understanding going within and knowing what we're made of that is the ultimate solution self-examination which most people don't want to do again as I've said they want to run fifty thousand miles in the opposite direction from that because often you pulled a mirror up to someone and they hate the image that looks back and that's why we're putting ourselves through this mess that we've created here because ultimately many of us don't like ourselves and all we want to do is take out that frustration and aggression on someone else which we have no natural law right to do so we'll go to some more callers on the other side of this break callers who are hang on stay with me we'll be right back folks you're listening to what on earth is happening here on the Oracle Broadcasting Network [Music] [Music] welcome back ladies and gentlemen this is what on earth is happening and I'm your host mark passio it's an all calling show today you create this show anything you want to talk about is fair game no taboo topics the call-in number eight six six eight four one one zero six five coming up on what on earth is happening we are going to be going into a penetrating analysis of natural law this is something that people have been actually asking for wanting some more clarification on we're going to be going into the principles of natural law helping people to understand deeply what is your rights what are your rights what are they not more importantly what are not your rights something that these criminals who raided healthy family farms and raw some foods have absolutely no idea of they don't know what their rights are they don't know what their rights are not and for something that's illusory based on nothing money they're willing to go and pillage the natural law rights of other people and this is what we ultimately need to transmute we need to change this this is unacceptable no one should accept this they are not only trouncing the natural law rights of other people who they're doing this to they're putting their own children in shackles unknowingly unwittingly because they really have no knowledge or no wits about them they're unconscious individuals that we need to help raise properly and I said earlier on and I know some people will take that as a harsh statement their parents did not raise them they failed society failed at raising these individuals that's why we're in this mess as a whole we don't self examine we don't read as a culture we don't read books that are important and see the again I have to commend the woman who called in about the Kabbalah and about reading books on Freemasonry and the Kabbalistic tradition even though she admitted and that's not hard to do that takes courage to admit that you're struggling with something you're struggling with it but you have the desire to do it your this is all about the Wills chakras that you ant asked about all about the the two centers on the Tree of Life that deal with the will power through it and you'll come out better for it so I have to I commend individuals like that who may even say come out and uncomfortably what admit to someone else I'm struggling with this material see that's that's the problem with everything that's going on you see these individuals who are going out and raping other people's natural law rights they won't admit that when they struggled with learning something that's why they're doing a job like that folks you don't do a job because you look like what they're doing because you like yourself because you think you're really doing something good you do a job like that because you struggled with understanding any real knowledge and you never had the courage to admit that to anyone else to say the words I don't know and I'm even maybe having a difficult time coming to a place of knowing but you know what until you admit that and you possibly ask for help you're going to continue to remain in that place of ignorance and apparently people like this are okay with that they're okay with being stupid and just doing a job where they're paid in an amoral capacity to rape someone else's natural law rights well it's not okay it's not okay it's not okay and I would again make an appeal to anyone who happens to be listening to the show to the parents of these individuals to the the sons and daughters of these individuals to the spouses of these individuals the brothers and sisters any relatives you want to call into the show and talk about these people I'll tell you right to your face these are unraised individuals they did were not raised with proper moral values otherwise they would not do what they are doing and not just the family has failed in this capacity Society has failed in this capacity and they need to buck up and admit that and then start attempting to reverse the trend but you can't do that until you yourself have learned what natural law really is how it operates and how this society isn't going anywhere but in the toilet bowl until these principles are deeply understood and then adhered to and that's it and that's how it's always been it's always been like that natural law has always been here with us it has always be been in effect it is unbreakable and it will forever be in effect period the end for all eternity until the three-dimensional space time continuum known as this universe exists and I don't know how much clearer I can make that let's go back to the phones here we go caller you're live caller we just I just lost you I'm sorry about that again this is the second difficulty I've had please call back in and you'll go right to the top of the queue I apologize for that the other caller called in and had some difficulty as soon as I took his call and now we just got disconnected on me attempting to take this call so call her that was in the queue please call in and I'll take take your call immediately that was the only caller in queue right now so let me give the call in numbers one more time for anyone else that wants to call in it's eight six six eight four one one zero six five once again eight six six eight four one one zero six five a little bit of technical difficulty there but no problem we'll work through it so let's continue to talk about natural law for a little bit since I've gotten onto this topic and I've gotten on it through the really disgusting events that have happened through this raid on these raw foods and you know what I I used these raw foods whenever I have an opportunity to buy any cheeses that are completely raw and unpasteurized I take that opportunity so this is something that I recognize as something that is has health benefits and the enzymes in certain cheese's do have health benefits this is unequivocally known okay as the caller who called in previously Vicky said she uses raw milk in a health capacity and it's been known that there are health benefits to drinking raw milk now I would say I don't use a exceeding amount of dairy products but raw milk is something that I have used I've generally transitioned to almond milk which has a lot of antioxidants in it and I make my own I make it from raw almonds that are not treated with radiation or pasteurized or anything else done to them or roasted raw almonds blend them up in purified water and strain off the meal you could use the meal for a delicious bread and drink the almond milk it you could use it in the same way you could use any other type of milk any dairy milk and it's absolutely delicious and it's health healthful and it has tons of antioxidants in it and you know that once somebody starts taking away your right to make decisions about what you put into your body they own your body that's what they're telling you we own your body your body belongs to us we'll tell you what you're allowed to do with it not so I think this is the same caller who I accidentally disconnected call her you lot are you there good day market paper how are you I'll enter client thank you thank you well I'm gonna hold you through to the break I wasn't watching the clock once again I do this all the time so hold on to the break and we'll bring you back on right after this next commercial break [Music] you're listening to wall on earth is happening folks we'll pick this up after these messages [Music] I was born Oh shot killed behind the girl I'll make my father stay [Music] we're back folks this is what on earth is happening on there host mark passier let's go right back to the phone's keeper you're live on what on earth is happening thank you very much my good friend Jim and I really appreciate this so it has really helped to enlighten me and and illuminates me along my path which has been going along for a long time by by being having things pointed out to me then I can actually do something about them make a change or decide to keep those habits and those ways of being and as I've been listening to your show quite consistently over the past several weeks in your previous show in fact you were mentioning the ten tenets of Satanism and I remember you going over moral relativism and the concept of sophistry solid season thank you well so they're solid sysm isn't specifically one of the tenets of Satanism as a matter of fact it's quite interesting to note that Satanists warn other Satanists about solipsistic insinde panic religion of the Satanic ideology and there's a reason for that Satanists want other individuals that they control to be solipsistic truth and it's all just a matter of opinion it's all just a matter of preference Satanists themselves warn other dark occultists against falling into any such trap as solace ISM and they consider this a no-no they consider this something that any self-respecting occultist particularly an occultist on the left-hand path would never would never engage or adhere to but they use this concept this this ideology known as solid system to put other people off of the troop so that they can be more easily controlled its salep sysm is a tool of the Satanists but not one of their beliefs and their tenants so it's an important distinction to keep in mind oh thank you thank you and in fact it is a slippery slope and I know I went through those those modalities of thought I actually did think that way you know back in the day you know growing up and so forth that I found myself but yeah I used to be like that but I changed I saw the saw the trap for what it is and now I'm on my own modality my own personal path that I'm drumming myself into existence here and realizing that I'm marching past all these different paradigms and modalities and mental traps there to speak the universe that I want into action and I've been employing that and putting it into action and even if I get the blank stares back it's not about that person is about speaking the truth into the universe that's right that's exactly right and that is a phenomenal insight they're really really glad that you in your own personal development and journey have arrived at that point because that is where more and more people need to come to to understand it is about doing the right thing and speaking the truth and putting the truth into action for truths sake not not necessarily even for other people not even necessarily for ourselves it is for the fact that this is the right thing to do period and we want to align ourselves with that force because that is the higher self that's what it is that is the higher power that really generates anything here that is worth being a part of that is good or wholesome or positive or empowering that's what it's all about so I commend you on that and that's just a phenomenal to hear that coming out of someone else's mouth and to know that more people are on that path and on that journey in their purse live so thanks for that well thank you Mark it's it's been a pleasure in a really illuminating time and I'm appreciating this I look forward to to getting back into more discussion of positive aspects of particular thing it's it's good to look at the negative to gain my understanding right but don't look too deeply into the abyss because it stares back at you absolutely you can't dwell on looking at it becoming aware of it is one thing dwelling in it and letting it completely shape your worldview into something darker and more and more sinister in your in your own life is probably not is definitely not a good thing it's not where you want to go you want to be aware of the dark as I said last week you want to be aware of the dirt all over the house but then shine the light on it they're shining a light on it makes you aware of it and then you want to take the necessary action to clean up the dirt not just go was me look at how dirty the house is you know that that path toward knowledge is so that you understand the causal factors of the problem not so that you just sit and dwell in the problem it's then about once you have the knowledge of those causal factors then taking the appropriate steps and the appropriate actions to rectify that problem to make it right that's what it's that's what wisdom really is as I've said so many times on the show it's taking action based on what you learned if you just sit there and not don't take action and just say oh I've learned all of this horrible stuff that's going on in the world and then you don't take any action actually correct it or to make it right what good was learning what good was all of that knowledge that you accumulated so great observations your heart and and do what you feel is the right thing and actually do the action you have to follow these natural laws and the more you follow those natural laws in your own inner sense your own compass of what is right and what is wrong in the situation you'll find yourself truly living the law of attraction and the universe will start working you will gain that protection that you mentioned chose back and you will become a lucky person oh man does things just start working out well yeah if you go with the flow instead of fighting against the flow of the universe things start working out synchronicity right can be amazing once you set foot on that path and start walking down it Kiefer thanks so much for that call just great insights and uh just uh phenomenal observations there so thanks for calling call back in any time next caller here we go caller you're live on what on earth is happening hello caller are you there hello yes you're live on the air yes I'm not yes very happy to speak here just just very happy for you doing incredible work I just had two questions from my first question was regarding if we look at the birth of having some of the great apparently the Temple of Artemis burned down on his birth now the Temple of Artemis was supposed to be a temple of the goddess now yes but not be some kind of possible burning devadutt absolutely posturing certainly symbolic are not very incredible if it was not directly a false flag event of the ancient world it most certainly is a synchronistic a synchro mystic event that calls to mind the this again this burning or emulation of the Sacred Feminine that we see over and over and over again in in events of the world often which precede a very sharp decline in consciousness and a sharp rise in psychopathic tendencies or behaviors in a wider sense in in civilization so absolutely that's a that's a pretty synchro mystic connection that you've made there and I think there's something to absolutely best name brother do you think that Alexander was possibly sort of brain person yes I do think that he was one of Dominator yes the elite from the elite bloodlines and if you look at some of the the directions that he took the the former greatness that was Egypt I don't see him as anybody that was really trying to help raise consciousness he was definitely of these uh bloodlines that was attempting to subvert people and keep them under control I mean if you look at if you look at things that these higher level emperors you know people who looked at themselves as separate from everybody else and just they were rulers they repeat people there to be put upon Thrones and worship that's God God meant on earth you know he they they had basically gone through an apotheosis while they're alive and basically they are elevated to a tremendous level above everybody else and that gives them the divine right to rule you look at they all had the same basic knowledge the same basic information as what they kept from the from the population that they ruled over if you look into ancient Rome specifically you'll see all of the Caesars of Rome specifically during the empire and you see that if you study some of the journals of some of these individuals they always warn against any of their people in their command teaching anybody the methods of the Trivium I'll pick this up on the other side of the break in the last segment stay with us folks this is what on earth is happening [Music] welcome back folks this is the last segment of this edition of what on earth is happening I'm your host mark Cassio my website what on earth is happening dot-com in coming weeks on the show we're going to be getting into a penetrating analysis of natural law principles and we're going to hammer this home because it is so critical to understand what natural law is how it works what the mechanics of this system that has been put in place in the universe for our benefit what its underlying mechanics are and we're going to look at that and we're going to deeply explore and we're going to give examples and we're going to try to help people to come up to a higher level of understanding of how natural law and our adherence to it or cut or conversely our completely living in disharmony with it is directly related to the quality of the experience that we have in life and can never be separated from that it's a cause-

and-effect relationship so let's go back to the phones before the break we had a caller on the line I'm going to go back to them and see if he had anything else caller did you have anything else that you wanted to bring up before we went to the break we were talking about ancient rulers and I was I have mentioned that if you look into some of the writings of some of these rulers they talk about their method for learning and how that was strictly to be held in their confidence and in in the confidence of the individuals that were below them in their hierarchical system who were helping to control the people that they considered slaves but it was expressly forbidden to ever teach that methodology of learning to the slave class and something like the Trivium is a perfect example the Trivium was forbidden to be taught to any non free people only free people who were given the right to read by this ruling were allowed to learn the Trivium absolutely fascinating I'm particularly fascinated by your answer singing through the Alexander questions regarding of the date of birth and the burning of the Temple of Artemis because it's very interesting hearing that from you I think I mean that possibly there is something that I didn't have a sexy question essentially when we look at just nature around us I at least tend to find that so there is a lot of nurturing but there's also a lot of sort of pain and suffering a degree of cruelty when you look at an animal killing another animal feeling a sharp chin you see all type of what that attacking its prey in a certain way that's part full and etc um I don't know this just confuses me in the sense of if the natural state is love why do we finding sort of paintings of nature that are working that needs to be being negative there's two ways of looking at that one is that these aren't human creatures they are animals and generally at a lower state of developmental consciousness than are we so we have taken on new characteristics and capabilities another very interesting way of looking at this that the couple of researchers whose names escape me right now that I have come across information that they have put forward having to do with fields and what they call morphic fields or Morpho genetic fields having to do with how powerful human consciousness is in what is observed in what we call the wider animal kingdom here on earth and that if human consciousness were to change you may not actually observe that level of cruelty in the animal kingdom as well and I think that is that is possible that perhaps the way animal behavior is now is not the way it has always been in the past so that's something for people's consideration when they hear that and again we can't directly say just because this form of life behaves in this way that that means that it is the natural way for us to behave we have a whole higher order of thinking and a whole higher order computer that we are gifted with called the human brain and if you study the brain and the structures of the brain is we've done on this show you understand that we are in a completely hot separate and what I would consider higher class of consciousness than are then is the animal the other and that doesn't mean that we can treat them with cruelty that means we we should act as their stewards and help them along their evolutionary journey in consciousness as well because it's all life it like you said it is all suffering ok there is so much suffering in both the human and animal worlds and our goal should be to help alleviate that suffering for all beings not just even be speciesist about it and just want to help human beings I want I don't want to see animals suffer either you know I I want to alleviate suffering for all beings that that's my get mites mind of the previous people right I think do you think it might be sort of egotistical to think of it as a sort of test a test with humans to see if they will be sort of innocence accused by the suffering and go down that route alright who's not go down that route and treat animals as loving nurturing way and right then possibly reach higher domains once we die I definitely think that's true and and another thing to keep in mind is look at the the level of energy that's the suffering energy that we put into the world and then consumed as a result of how we treat animals okay and then certain people eat those animals and they're taking all of that energy and suffering into themselves and this bears out in human behavior because this everything is energy and if we eat something that is low energy because of the way it was treated but when it was alive what we're doing harm things to our consciousness as a result I tell people there's only one documentary in my collection of thousands that I will not watch again and that is the documentary called Earthlings Earthlings is a powerful documentary about how human beings treat animals and I only recommend it to people with very strong constitutions because I was devastated as a practically psychologically devastated as a result of watching this and I forced myself to watch it a second time just a hammer the point home of the what human beings have actually become in relation to the natural world around them and it's it's a it's a horrific horrific look but it's true it's true I mean like I said I made myself watch it a second time to just hammer that point home look at what we've become look at what we are doing this needs to change this needs to be undone this is not the way we should be behaving toward beings that we are generally as a higher form of consciousness in stewardship with here on the planet Earth not there to be treated as commodities or as just a you know things these people treat these beings as things well the more we do that with the beings that are at a lower developmental level of consciousness than us the more that will be done to us again it's natural law it's a cause and effect relationship so I want to thank you for your great points I have a couple other calls I'm going to try to get to before the end of the show great thanks okay here we go next caller in the queue you're live Dylan from tech from Kansas you're live on what on earth is happening hi mark I don't want to waste your time I'll let you get to the other callers I just had a question you know we talked a lot about you know the elites and history of you know others other people and I'm curious if we're looking for information about ourselves and and our own heritage can you give me a couple points to maybe see some of that information makes a lot of great show well one of the things I would encourage you to do if you really want to go down deep into that rabbit hole is to attempt to look into the information about human origins in general and you'll come across some very interesting perspectives of course people will bring up the works of zecharia sitchin I think that's some interesting work I'd recommend the works of a Mooney he wrote a book called gods of air and darkness I would recommend any writings by good free Masonic authors on the origin of humanity I would recommend Albert Church Ward I would um there's so many that we could name Manley P Hall his works look up human origins in general not any specific people or race of people on the earth but to get to the knowledge of our origins is empowerment as well because it is all about the history of control itself and I'll leave it right there we'll see you next week folks thanks for listening this is what on earth is happening here on the Oracle Broadcasting Network up next Michael Vale you

What On Earth Is Happening Show #073

Topics: *Solutions, Natural Law, Ignorance vs. Freedom, Belief vs. Discovery*

freedom man that's what it's all about you've got to groove on freedom like the good book says welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host mark pascio welcome one and all you are listening to what on earth is happening right here on the oracle broadcasting radio network i'm your host mark pacio my website what on earth is happening dot com the network's website is oracle broadcasting.com today is sunday august 14th 2011. we have a great show lined up for you here today we are going to be transitioning our topics for discussion on the show as we have been talking about for about the last year to year and a half the methodologies of mind control how all of those methods work to law us into a trance and ultimately to usurp our god-given natural law rights we've looked at that now we've uncovered those methodologies we've exposed them and we've brought them out into the light of day now we are going to transition toward solution-oriented approaches we're going to look at how we can solve these problems and they do indeed have solutions the solutions are not easy simple perhaps but not easy simple meaning they're not difficult to understand they're not complex however some of them will require a tremendous will in order to implement some of these solutions specifically when you look at how deep into mind control much of the world has descended one of the first things that we're going to look at in depth and i'm probably going to take a few shows to do this is developing a deep understanding of natural law natural law principles need to be deeply grasped and understood if we are going to get out of the mess of consciousness that we are in right now on this planet and if we are ever going to see the freedoms which have gradually slipped away from us be restored and held on to as they rightfully should be so today on the show we have a very ambitious show planned for today lots of images up on the website at what on earth is happening dot com on the radio listen page go up there and check out the images for today's show we'll be progressing through them as i give the talk here today and we are going to attempt to get through the first major part of the understanding of natural law and that is understanding its expressions or in other words how it actually works in the world we'll be getting into that on the other side of this break i'm your host mark pascio and you are listening to what on earth is happening right here on the oracle broadcasting network stay tuned folks oh welcome back folks you're listening to what on earth is happening i'm your host mark pascio my website what on earth is happening dot com on today's show we are going to be discussing natural law and this is something that many people have been asking for and asking me to get into a deeper breakdown of so we're going to do that here today i want to take people back before we get into the discussion to show number one where i said that what this show was ultimately going to be about was an analysis of the causal factors that create our current conditions without a deep understanding of the causal factors of any given problem anyone essentially remains powerless to solve that problem so i would suggest to you the reason we see all of the problems that continue to go on seemingly unabated will continue unabated unless humanity gains a proper understanding of these causal factors so we looked at consciousness way back on the show we looked at its basic components we studied the structure of the brain to help better understand human behavior we looked at the qualities of the self we looked at forces that shape our world basic polarities or what i called seeming polarities because they're actually all essences of one thing just different degrees of it we looked at what creates order versus chaos and that is whether we are in harmony with natural law or not so that's something we're going to deeply look at here today ultimately that's what natural law is that's the gauge for whether we're creating order or chaos whether we're going deeper into control or whether we're helping freedom to flourish whether we are in harmony with natural law or whether we stand against it and try to completely go against its flow on past shows we looked at the structures of control and then we took a deep penetrating look into all of the various multifaceted methodologies of mind control and we took a great deal of time in doing that because there are so many mind control attacks that are waged against humanity on a daily basis it can seem like just a tsunami a huge wave of manipulation that is just washing over us because these attacks are under are going on 24 hours a day seven days a week evil never rests ever it does its work continually which is why we as seekers of the truth and tellers of truth need to also be on constant vigilance and constantly be doing this great work of exposing the darkness and helping people to come over into the light of day so with that having been said we're going to start our analysis of natural law principles here today and before we do that i want to give the call-in number because hopefully there'll be some time remaining and i'll take a few calls in the second hour so the call-in number for the show is eight six six eight four one one zero six five once again eight six six eight four one one zero six five if you want to call and get in the queue i will be getting to calls in the next hour so here we go up on the website at what on earth is happening.com on the radio show page just click the radio show tab underneath the player you'll see a list of images for today's show in image number one you see a great representation of our world it's a pyramid scheme controlled by master manipulators and all of the power is flowing to them and they are breathing it in as i said i believe it was two shows ago the word conspiracy is grossly misunderstood it simply means to breathe together the breath the word for breath in latin the word for to breathe in latin is spiro spirari khan in latin is a prefix which simply means together or with so the root of the word spirit is to breathe because if one is infused with spirit in the physical world one is breathing that is the essence of life is the spirit and if it is present within the vehicle for expression the body then one has life therefore conspiracy simply means those of the same spirit those of like spirit who work together that's all it means indeed there is this colossal monumental conspiracy to keep people in the dark not understanding the causal factors not understanding that they are the co-creators of their experience together and therefore to continuously get them to abdicate both their responsibility and their power such that that power flows upward to the higher levels of that pyramid in which the adepts at those higher levels who do understand natural law who do understand the causal relationships of creation in this world how we get what we manifest these people at this higher level are the ones who all of this power and influence is flowing into the hands of because they have convinced everyone of a dark poisonous world view in which they are powerless and actually can change nothing and nothing could be farther from the truth this is a gigantic lie in order to perpetuate this system of control and that's what their goal is we talked about their agenda and their control on past shows to keep people in the dark i'm moving on to slide two the imagery speaks for itself keep people asleep keep them content keep them in a state of hypnosis of trance so you can bring in a big brother police state and ultimately lead them into a world of slavery we're going to be talking about how we get out of that mind state on the other side of this break stick around folks you're listening to what on earth is happening welcome back folks this is what on earth is happening today on the show we're talking about natural law principles specifically we are going to be getting into the mechanics of how natural law actually works its expressions and all that is actually depending on what we do what forces we choose to work with it's all ultimately up to us that's the good news and that's what this whole section actually the rest of this show is ultimately going to be about the good news yes we'll be talking about all the machinations of the the mind controllers that are still ongoing out there but ultimately we're going to be talking about how all of that can be done away with and yes it can the question is will we choose that path because action is required and that takes willpower in order to step away from what we've been doing and choose something different so we were looking at slide number two moving on to slide number three all these images can be found on the radio show page of what on earth is happening dot com image number three shows the world that these manipulators want a closed society locked down hard the earth in chains a prison planet if you will what we're going to be looking at today and forward into the future is the master key for that padlock for that cell or hell however the way you want to look at it may be image number four shows a key in hand with light radiating out from it that is what the understanding of natural law ultimately is ladies and gentlemen and an understanding of natural law is by definition an understanding of the truth this is what we have to help our fellow men and women gain a hold of to grasp the principles of truth help them come out of their poisoned world view of social darwinism their poisoned world view of solipsism the belief that there is no such thing as truth or you can't actually really know anything get them out of their poisoned world view of moral relativism this dangerous and poisonous ideology that there's no such thing as right or wrong we get to make it all up it's just personal preferences we impose our moral understanding on any given situation and nothing could be further from the truth ladies and gentlemen moral relativism is the basis the ideological basis of satanism and i know that firsthand because i was a priest in satanic organizations in my past and i'm telling you moral relativism is one of their chief tenets so in helping people to grasp these higher principles that are at work whether they understand them or not whether they accept them presently or not whether they want them to be in place or not they are working they are shaping this reality we are shaping it again through our adherence to those principles of natural law or to the extent that we completely ignore them so this idea this understanding of how natural law works is essentially borne out in the next statement in slide number six this quote from the philosopher kierkegaard sauron kierkegaard said there are two ways to be fooled one is to believe that which is not true the other is to refuse to accept what is true and that's exactly what is going on in the world today people are believing things that simply are not true social darwinism moral relativism solipsism and they are refusing to accept that which is true the principles of co-creation based on our adherence to natural law or the degree to which we refuse to accept natural law and adhere to it and before anybody even brings up this notion because it's one of the notions that the dark occultists adhere to that even if we do accept that natural law exists that it's a set of rules it's after all it's laws and that means we're bound we're in chains even if we do live in harmony with natural law nothing could be further from the truth these laws are not here to control us these laws are here to teach us not to imbalance ourselves and society to the point where we are living in a state of utter chaos which is our present situation and rapidly becoming more and more chaotic because people refuse to grasp the principles which we are going to talk about on the show here today so those are the only two ways people ever really let's just put it plainly screw themselves they accept all kinds of ridiculous notions and they refuse to accept what actually is true and in place and affecting them at any at every given moment thomas jefferson understood this dynamic very well and be one more caveat before people start identifying what i'm uh some perhaps a quote that i'm making from from an individual in history and assuming that that means i agree with every single thing they ever said or every way that they lived that's untrue as well i can quote someone and put up a piece of their wisdom without having to identify or believe in everything they ever did okay i jefferson was a slave owner how he understood all of the things he understood about natural law and still thought it was somehow acceptable to keep slaves is beyond my comprehension so i don't agree with everything the founding fathers did nor should you but there are basic principles that they did deeply grasp and i'm just simply quoting that that doesn't mean that i believe in everything that they ever did or ever said you have to take what is true and leave the rest so here's a true statement that jefferson uttered he said that if a nation expects to be ignorant and free in a state of civilization it expects what never was and never will be ignorance and freedom are diametrically opposed they are inversely proportional for our left brain friends among us okay as ignorance goes up freedom goes down as knowledge goes up and ignorance goes down freedom goes up real simple yet it is an eternal truth and there's no easy way out of this mess except through learning and then applying that knowledge which has been understood and that is what wisdom is the discovery of knowledge understanding it and then acting upon it and another way of saying those three things is the trivium that's what the trivium is knowledge understanding and wisdom we'll pick that up on the other side of the break don't go anywhere folks this is what on earth has happened we're back folks talking about natural fall on today's edition of what on earth is happening slides that go along with this talk can be found on my website on the radio show page at what on earth is happening dot com we were on slide number seven a quote by jefferson talking about ignorance and freedom being diametrically opposed this is borne out in the latin language itself where there was no different word for free and book they meant the they were based on the same word and ultimately they lead to freedom books lead to freedom the word liber which is the basis of the word liberty in the english language it means book in latin and it also meant free so much is said right there that the romans didn't even have a different word for freedom than they had for book that's how closely associated with knowledge the concept that freedom was of course we know what happened to that republic the same thing that's happening to this one this one's in free fall just like the roman republic fell and became an empire we can still reverse it because we have the opportunity to learn from history so that we are not doomed to repeat it but only if we get out of our ignorance and again ignorance is different than nations nations means you don't have the opportunity to actually know something from the latin eskie neschio nesquiere which means to not know to be uh not to be cognizant of however it means you were not aware of something because you never had the opportunity to be exposed to the knowledge ignorance on the other hand means that the knowledge was there all along and you chose willingly not to look at it not to incorporate it so moving on to the next slide image number eight is a quote by einstein who did things in his life i most certainly don't agree with helping to bring in the destructive usage of atomic energy into our world unfortunately but somebody like that can make a good statement that is certainly true and he did in this statement he said that no problem can ever be solved by the same level of consciousness that created it this is exactly what i've been talking about when i talk about causal factors the causal factors of ignorance which put our current day problems into place can never be overcome or solved again solution oriented approaches if we continue to attack those problems from the same level of consciousness you must come up to a higher level of awareness and understanding in order to truly solve those problems and we're not at a higher level of understanding from the tyranny that was here during uh the time of uh colonial america that led to the american revolution which was utter failure because even if we did attain a modicum amount of freedom in the in the small interim between tyrannies we didn't really learn the lesson because the tyranny is back again the failure of that enterprise was that the people who succeeded in it ostensibly succeeded in it did not properly morally educate the people that were left here when the dust settled they just went back about their lives and figured out that's taken care of and no it wasn't taken care of it wasn't taken care of because the consciousness of the people of this land was not raised to a sufficient level to prevent that problem from recurring and the reason that it recurred is because people have lost sight and lost knowledge of how natural law operates and this is borne out in the next statement the next quote a few quotes to start things off here today generally considered to be the father of modern anarchism mikhail bakunin he said that the liberty of man consists solely in this that he obeys the laws of nature because he has himself recognized them as such and not because they have been imposed upon him externally by any foreign will whatsoever backing and is saying that we will only be free truly if we deeply incorporate an understanding of natural law into ourselves and not a moment before i wholeheartedly concur with that statement we are not going to get out of the mess that we're in at the same level of understanding at the same level of consciousness not going to happen go ahead and get as angry as you want about that you know bang your head up against the wall because it's not going to change a thing natural law must be understood must be accepted and understood so you can't force anybody to accept anything but don't expect freedom don't expect freedom for a millisecond not gonna happen until people understand how natural law operates and then live within its boundaries because these are boundary conditions inherent to this universe the end these are boundary conditions inherent to this universe and people have discovered these laws they know them they know how they operate they are not unknowable they are discoverable and knowable and there are many people walking on the earth who know these laws and know how they operate and are living within harmony in harmony with them but as long as the bulk of humanity just ignores this thinks that these things are not in operation and goes about their lives doing whatever they want believing in whatever they want shackles will be upon us period the end and guess what ladies and gentlemen get as angry as you want about this next statement that's exactly how it should be exactly how it should be i'm not saying that things are broken here and are not working properly things are working beautifully they're working wondrously they're working exactly as they are intended to work at a cosmic level you want to ignore natural law you're going into chains hardcore chains you want to live in harmony with natural law principles and respect the rights of your fellow man and woman then there will be freedom so let's begin our analysis into natural law what is it what is natural law let's simply pick apart the terms to begin the definition of the word natural means that it is inherent it exists within something already nothing had to put it there it's there by way of its existence creation put it there okay regardless of what you want to think of that force as that's not for me to tell you what that force is okay we can talk about that because this definitely gets into the idea of god and a creator etc without question and we can get into that let's simply look at the definitions of the words first and i'm on slide number 10 now the word natural means inherent okay self-existing having a basis in nature reality and truth not made or caused by humankind meaning we did not invent this thing it exists by virtue of simply being a component of the universe itself it's like space we didn't invent space it's inherent to creation that's what natural means it's a natural component let's look at what a law generally means on the other side of this break we'll be right back folks don't go anywhere you're listening to what on earth is happening where we're delving into natural law today on the program we'll be right back we're back folks this is what on earth is happening i'm your host mark cassio today on the show we're talking about natural law before the break we were looking at a simple definition for natural law we looked at the word natural and you could liken the word natural to the term in the ancient egyptian language commission language which means spirit or god which is um which is uh neter it's the basis of this word neter okay so right in the word is contain this idea of spirit or god law is a condition that already exists an existing condition which is binding and immutable binding meaning that you are affected by it it governs actions which you take you do certain things certain things occur you put forth certain energies certain things are manifested there is a causal relationship that's what a binding is a cause and effect relationship immutable means that it cannot be changed it's something that is there as long as the current conditions of this universe are in place that's it as long as you are on the earth gravity is in operation you get out into space there's a zero g environment but gravity is a law here and now if a comet struck the earth and it broke it up into very small chunks you know asteroidal debris well there wouldn't be the type of gravity that we have on the earth now when the earth is in an integral intact hole so as long as certain conditions exist there are laws in operation it's why people get into these ridiculous semantical arguments about natural law well does this exist inside inside this condition or on this on this planet or world that you know is it in another dimension who cares you're here you're you're affected by this now and it's destroying your freedom because you're just completely flat flaunting it and just doing whatever you want and not paying attention and taking in poisonous substances and not caring and letting people get away with murder and the same people who act like that have children and and dare to bring children into this world in their pure ignorance and don't care whether they've just birthed someone into a prison cell doesn't make a difference what's happening in other dimensions or densities you're in this one so understand the laws that operate in this one and then start worrying about other ones so when we put this all together what natural law is is a set of existing conditions that was not created by humankind that is in operation in the here and now and humankind has no power to change that's it that's what natural law is now that sounds almost non it doesn't sound like something that's hopeful or good because it's like you you're not in control of this it affects you and you don't have a say yeah that's right these are the boundary conditions for this universe that are put in place so that we have a chance to understand how things work here have a chance to understand the repercussions of our own actions take responsibility for those actions learn and grow as a result and be able to increase our power and freedom as a result these are conditions that are in place for our eternal betterment the manipulators the dark occultists of this world see these in a poisoned worldview state in their poisonous worldview they see these conditions as shackles as chains see they look at it like i want to do whatever i want regardless of who it hurts how dare these conditions exist so what they have done is erect a system of mind control that insulates them from these pre-existing conditions they convince other people to do their dirty work for them they take the actual actions and then natural law ultimately affects them the people who took the actions and they've created an insulin an insulative barrier between themselves and natural law as a result and they're getting away with it they're getting away with it folks and you know who let them get away with it you did by not understanding these principles hoodwinked you had the wool pulled over your eyes ladies and gentlemen and the people who have had the wool pulled over their eyes more than anybody else are the people who are doing their work for them and that is the military and the police the people who break natural law at all turns at all turns for their owners for their masters like pets like kept pets that they are they're the people who have put prison society into place no one else and they're the people who ultimately need to change who we need to help change the world's never going to be free as long as people are willing to follow orders folks you're willing to follow orders and you don't know why somebody is telling you to do what they're doing what they're telling you to do and yet you do it anyway you are a slave not only are you a slave you're helping to put other people in the same chains you're in and it doesn't matter that you have some petty power that some psychopath told you it was okay for you to take when you actually have no inherent natural law right to do what you're doing you know you think because oh i have this little bit of earthly temporal power oh that makes it all okay you you're gonna find out how okay it really is you think you're gonna get away with it you're not getting away with nothing exactly zero is what you're getting away with because natural law is in place and that may not sound like oh any kind of a profound statement to people who are listening in that kind of a sick demented mind state as the people who go along with these uh psychopathic dominator occultists biddings like the little lap dogs that they are they think they're real men they're nothing of the kind they wouldn't know what a real man or woman was if they got run down by them like a freight train because they have no sense of true power in their lives they're they're self-loathing they've never done any self-examination in their lives they're fearful because of how ignorant they are and they just want to listen and follow orders like a good little pet that's it and think that's as harsh as you want to think it is that's exactly how this world is exactly that's what's going on here yeah it's harsh sometimes people need to hear things put plainly okay and these are the people we need to reach they're the sickest among us they need we need to help them understand they are putting their children into chains into a cage because they don't understand what natural law is and they don't understand they're breaking it every moment as long as they continue to do these jobs we'll take a look at some historical significances of natural law on the other side of the break you're listening to what on earth is happening don't go anywhere when he looks at it with his eyes it's what we see when he looks at it with the sunglasses we seeing the same things all the way through the subliminal symbolic you couldn't see obey no independence yourself have freedom unless we fully understand and live within its tenets we need to come to a deep understanding of natural law understand that it's something that has been put in place by creation itself for our benefit for our evolutionary progress and to choose make a conscious willful decision to live in harmony with it and this was enshrined in the foundational documents of this country in the declaration of independence the founders of america understood that they were essentially forming a union that was supposed to be in harmony with natural law the founders were deists they believed in a creator but they also believed that the natural world or the physical world basically was as at as important as the spiritual domain they didn't place any greater or lesser imports on either one of these domains the spiritual or the physical they were merged as one in their philosophy because what happens here on the physical plane echoes in the spiritual world yes this is a war of souls make no mistake about it that's what's going on here on the earth but it doesn't mean that we should completely ignore what's taking place in the physical because that's where the world war for souls takes place ladies and gentlemen it's important what we do here the actions we take are important and this ridiculous christian movement this this nonsensical uh born-again movement that talks about that good works are meaningless and it's all only about believing in an idea is is utter trash okay you should go back into the bible and read the words of jesus who never told anybody to worship him as a god he was putting forward a way of living in the world being in this world but not being so absorbed and identified with it that you're willing to trounce on other people's natural law rights being in the world but not of it having your mind your essence your psyche being of a higher spiritual nature but still operating on this plane he was a deist as well the deist principles are outlined in the declaration of independence this was founded to be a deist country and that means believe in whatever creative force you want to believe in okay don't impose that on anybody else and live in harmony with natural law we'll look at where specifically in the declaration that's enshrined on the other side of this break stay tuned folks we're covering natural law principles this is an introduction to natural law on what on earth is happening we'll be right back is we're back folks this is what on earth is happening today we're introducing the topic of natural law as the first and foremost solution that needs to be deeply deeply understood and then acted upon in this world if we're ever going to see true freedom emerge so we're looking at natural law in the foundations of america the historical significance of natural law and how the founders of this country understood it they attempted to convey this understanding in the documents of this country specifically in the declaration of independence so the first statement in that document is when in the course of human events it becomes necessary for one people to dissolve the political bans which have connected them with another and to assume among the powers of the earth the separate and equal station to which the laws of nature and of nature's god entitle them a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation now let's translate this this means if one group of people are basically saying we're done living under the these people's dictates they're saying we're simply making the statement a declarative statement that's what a declaration is we're not asking we're telling period it's not a suggestion it's not an application it's not asking or begging anyone for anything it's a statement i'm done with you you don't own me i'm not doing this anymore i'm going over here and doing this and you're not going to stop me you're not going to tell me i must live according to the quote laws that you've set down i'm going to live in the ways that i am entitled entitled a birthright it means that right is within me inherently by nature according to the laws of nature i'm going to live and nature's god these words are right in there people think that this is founded to be a christian nation nothing of the sort could be further from the truth according to church christianity i'm talking about organized religious christianity we should enshrine true christian principles according to the actual words and teachings that are contained in the new testament the words attributed to jesus the golden rule treat others as you would like to be treated period it's real simple it's it's actually laughably simple unfortunately people make it so difficult for themselves because they're attached to so many different wrong ideas but right here in the first sentence of the declaration of independence the founders of this country are telling you they believe in the laws of nature and nature's god not the jewish god not the muslim god not the christian god not the hindu gods nature's god and they're setting this they were essentially telling people we are separating ourselves from where we came from because the oppression that is in place is in contravention to the laws of nature and nature's god and they were absolutely correct it was and it still is see we think we're free of british oppression and the oppression of the crown most ignorant americans believe that this country is wholly owned and it's owned by the crown and the vatican and the dark occultists of this world they own this place and they own it for one reason because they own the minds of the people who live here the mind needs to be taken back before any freedom can be taken back and in order to take back your mind you need to get down to the deep understanding of the principles of natural law otherwise you will be willing to believe and accept anything so the general principles of natural law people ask me all the time what book should i read on natural law i'm gonna post some okay i'm gonna we'll have a reading list posted with this podcast and with others in the future on this topic but these are the basic principles of natural law that you can gather from many different documents on the subject natural law is ultimately expressed through seven basic principles these are the expressions of how natural law works principles mean first things that's what the word principles means it means things that you should put first before anything else things that you should hold in high value and esteem and protect these are the most valued things first things unfortunately most people of this country and throughout the world have no principles you know what their principles are based on or i should say lack of principles are based on money an illusion whose purpose is nothing but control that's what they value that's what they live for that's what they make their decisions based upon not whether anything is right or wrong or really truly good for everyone they make their decisions based on what's that going to get for me now in the moment that's it pure selfish ego identified thinking almost always based in money because that's their god they don't have any actual god that they look up to aspire to be more like their god isn't a god of love their god isn't a god of truth their god isn't a god of higher consciousness their god is the dollar bill they bow and worship and kneel at its altar and allow it to put it shackles around their neck natural law forget about that how much money am i gonna make as a result right or wrong who cares give me enough money i'll do it this is how i would say over nine tenths of the world thinks and some people may think that's harsh that's probably very accurate i'd say 90 of the human population has very little conscience very little that's why the people who do understand this really need to be speaking it in force we'll look at these seven principles what they really are we'll start to do that on the other side of this break this is what on earth is happening i'm your host mark pacio we'll be right back folks don't go anywhere i was born a shotgun in my hands behind the gun i'll make we're back folks this is what on earth is happening talking about natural law on the program today an introduction to natural law principles the sites on my website what on earth is happening dot com you can find the slides for today's show we're looking at image number 13. these images are on the radio show page on my website what on earth is happening dot com the general principles of natural law expressed through these seven principles first things those who know and adhere to these principles possess the key which we've already talked about we're looking for the key solutions to unlock the doors to this caged society well when we understand natural law and we live in harmony with it we have that key through which the wisdom of the entire universe may be unveiled to us ultimately the self is a reflection of the universe and vice versa the universe a reflection of self what is manifested in the macrocosm the large manifested domain all around us we call it our environment our world whatever you want to call it is a reflection of what is taking place individually inside each consciousness that makes up that environment so as we change the individuated consciousnesses the monads as they are called in different mystery school traditions the one units we change each individual mind and they start radiating a different signal out into the field eventually that field will change but if the individual just says no it's too fearful it's too hard i'm just going to stay doing this the the entire dynamic will stay exactly the same and that's what we see occurring largely too many people living in fear and choosing a path which is ultimately leading to destruction and they're going to have their way they're going to have their destruction that they're begging for they're begging for it they want it the hard way i've been saying i've said for many years there's really only two teachers on the earth and i call them by their their goddess names there's isis and there's aeris that's it they're the two teachers that you have a choice between and ultimately you're getting taught by one or the other isis is the goddess of love truth natural law freedom etc you can learn her principles you can learn the sacred feminine way incorporate that sacred feminine aspect of consciousness and thereby learn from it take in the truth radiate the truth that's the isis principle and again this is just a symbol i don't really care whether you believe there's an actual goddess or not believe whatever you want i'm talking about a general concept if people can wrap their mind around we can associate symbols to something okay that's the isis principle the errors principle is if you don't do that which is actually the easier way of learning it may seem difficult at first but it's actually the much easier way to get something done is to apply your willpower to it take it in incorporate it into your makeup deeply comprehend it then act upon it for the right reasons and in keeping with natural law that's the isis principle we don't do that we're going to continue the the universal field of intelligent energy all around us which if you still haven't really grasped that that's what we're living in that that's what we're completely awash in and afloat in is a universal field of all-encompassing intelligent energy i don't know what to tell you go back to sleep go back to bed you know you clearly haven't learned a thing if you think this is a dead universe this is a dead non-dynamic non-living place that we're in back to sleep our behaviors our ways of being in the world in general interact with this field and this is an intelligent field we live a certain way that field will restructure itself and give us a reflection of how we are living internally and then how we are expressing that internal nature out into the physical manifested domain as our behaviors and then that field will pick up on that and it will restructure the field so it actually displays back to us more of the same we create more of the same and that's why we have a world that's basically enslaved because most of the people in it are of a mindset of control that it's good to control that oh when when this person does something in a complete state of mental imbalance we need to throw them lock them up and throw them in a cage we don't need to address the underlying problems we just don't want to see that behavior manifested we don't want to actually change the causal factors that led to that behavior in the first place oh god no that might involve hard work that might involve self-examination and more importantly that might involve communication with others how dare you even suggest it throw him in a cage see this is the thinking that has given us this prison society that's the thinking because it's abdication of personal responsibility and then that's how natural law works it gives us back the exact things that we put out that's it it's a big mirror you know i could come on say natural law is a big mirror good night folks it's all that really needs to be said but one in a million people will probably accept that and good luck because again you don't want to accept that there's the second teacher eris goddess of chaos who will teach you the harsh lesson when you don't want to learn from isis and she'll teach you real good she's teaching us real good right now isn't she something interesting happened i won't mention any names family member was uh around him this past weekend um young kid eight years old barb was cooking some eggs she had the pan on he was in the kitchen his parents were there but they were not in the room at the time barb says to him i'm cooking this is an electric stove it's going to get very very hot don't go near it don't touch it don't touch the pan you'll get burned and apparently this male child had never been burned in his life he didn't know what burn really was he's probably heard the word but he never actually experienced a burn he didn't want to take barb's word for it so he went as soon as she went to the refrigerator to get something out of the refrigerator in two seconds he went up to that pan and put his index finger and his middle finger right up against the pan and eris taught him well did not want to accept the truth that someone was telling him now you can't go too far and say well that means you need to believe everything anyone is saying to you no this person has more experience they're honest you have no reason to really distrust what she's saying he went and did it anyway chaos results and therefore you had to learn the hard way not a bad thing though it's a teacher we'll be right back folks this is what on earth is but it's happening we're back folks before the break i was telling a story about learning through chaos the second teacher the heiress principle we don't want to learn the easy way through knowledge then chaos teaches us the lesson either way we're getting the lesson not getting out of here without it it's just a matter of how much pain and suffering we want to undergo before we finally accept the lesson which is a gift being offered and we'd keep wanting to slap the gift away instead of accepting it graciously when uh this child was had a piece of ice on his hand and he was crying and he sat down on the couch with the ice on you know pressed on his fingers try to make uh you know the burn go down uh you know he had a second degree burn there was blister a couple blisters on his fingers it'll go away in you know a few days but he's sitting there crying i was trying to talk to him and tell him you know you're you're in pain now right but you did something that you could have avoided if you had listened to someone who was trying to tell you what would happen but you simply didn't know any better so you wanted to find out for yourself so now you learned right don't look at it as a bad thing i understand you're in a lot of pain now it's hard trying to tell that to a young kid but you know um you know when you're talking to a young child they're they're more focused on the experience than what you're saying he all he was thinking about probably is his fingers but i was trying to tell him yes you're in pain now but look at it as a lesson did you learn it do you understand something now that you didn't understand before and i think he did you know i don't think he'll try to do that again right unfortunately humanity isn't so smart as that eight-year-old child you know we're we're like the retarded child who keeps doing the same thing over and over and over and over again sadly that's the case you know we don't have the mental acumen and the psychological acumen to understand where we are going wrong and how we are living against natural law and to simply buck up and accept that responsibility and make the correction make the adjustment in consciousness no we want to keep touching the stove over and over and over and over and over and say it doesn't make a difference how many times i get burned for some reason we hate ourselves so much collectively as a species we want to keep inflicting that torture upon ourselves well to me you'll only be allowed to do that for so long you know and then another goddess will step in and it will be mott and she will come in her destroyer aspect and decide to put this experiment to an end at some point you know if it keeps going the way it it is now i think that'll be a merciful time actually not something that should be feared or looked at as something horrible but i still think we you know can leave eris's embrace and go over and join isis anytime we wish any time we wish it's a choice and it doesn't have anything to do with belief in anything it has to do with discovery and it has to do with the discovery of the principles of natural law these are not beliefs they are qualities and conditions that are in effect the end and i don't know how many times i could just say that over and over again like a broken record i've said before i've joked around with friends just call me don't call me mark just call me mr broken record because all this is about is saying the same thing over and over and over and over and over again until somehow maybe it will sink into people that there are noble discoverable laws that they these laws do not care whether you accept them or not they do not care whether you believe in them or not they are completely independent from what you think and your ego is in the way if you think otherwise your ego will not allow you to grasp that principle you do not make the laws of creation you are not the law maker this is what the sick occultists of this world think they are and they have given us their mind they think that so many people especially in this complete bs new age movement think we can create the dynamics of of reality you know with our mind i'm talking about the physical dynamics and the dynamics of natural law i'm not talking about the manifested reality okay yeah we can create that with our mind based on what how we are willing to live that the conditions of our society and the whole world upon which we live can change can be created by us no question but you are not the creator of natural law you are not the creator of the physical laws that govern reality either and this is what i mean when i talk about belief irrelevant to the discussion of natural law this doesn't mean all beliefs are horrible this doesn't mean you shouldn't believe in truth you shouldn't believe in trying to do good things you shouldn't believe in yourself i'm not talking about that kind of belief i'm talking about the idea this solipsistic idea that well those things don't affect me if i don't believe in them wrong wrong there are things that are inherent to this creation that do not require your belief ladies and gentlemen and that's it it's just so tough on people's egos they're so rooted in the ego mind that they cannot accept that notion now i'm talking about slides 15 and 16 here we'll go back to the principles of natural law or maybe we'll hold that over until next week and we'll get into that maybe i'll just make some discussion uh maybe i'll just make some suggestions i meant uh on some reading materials and um maybe uh we'll take some calls in the last segment but i want to talk about this dynamic of belief okay slides 15 and 16 i show an ignoramus jumping off of a cliff and he's wearing a three-piece suit and you know that is a strong statement that's why i chose that image okay man in a dark suit leaping off of a cliff with arms outstretched saying i don't believe in gravity well you're gonna go splat doesn't matter what you believe you didn't make that law that law is in effect inherently in creation you're bound by it the end see this is the the idea that i'm going to believe i can fly and therefore i'm going to do it even though i'm still operating in a 3d space-time field with one g gravity in place is the idea that i'm god that's what the idea is and anybody that's you know still in this new age this fake new age paradigm this whole garbage new thought movement i'm not talking about real law of attraction which is what i'm talking about here today is the real law of attraction you get what you put out into creation according to its adherence or contravention to natural law that's the real law of attraction this law of attraction that says i'm going to think about this car and therefore i'm going to get it i'm going to think that i can fly and therefore i'm going to be able to is utter new age garbage there are laws in effect in creation you are bound by them you are not the highest power in creation you did not create those laws you did not make the universe yourself you are not going to just completely trounce those laws because you believe you can this is the exact thinking that the dark occultists have exact and i'm not asking you to even believe that because it came out of my mouth i'm telling you that's the case because i spent time around them and worked with them directly and i'm telling you i know this factually i know that like i know two plus two equals four factually that's their thinking we're going to be god here we're going to be do able to do anything we want to do no matter how much against natural law it is we're going to do it and that's how convinced they are that they own your mind completely and to a great extent they're correct they do own most people's minds completely and the garbage ideas that they have sold most people on it's unbelievable it's unfathomable part of the other solutions oriented approach that we need to get into and we'll be getting into in conjunction with talking about natural law is talking about the trivium because without the trivium and the methodologies of the trivium people are liable to believe anything absolutely anything and that's where belief becomes dangerous yes there are good forms of belief again you need to believe in yourself you need to believe that you can accomplish good things before you go and set out and do them you need to believe that there is a truth to be grasped and understood and incorporated otherwise why go and look up look for anything why seek anything any knowledge you need to believe there's such a thing as knowledge period which unfortunately many people don't because they bought the big lie the biggest lie of solipsism we'll pick this up on the other side you're listening to what on earth is happening stick around for the last segment folks otherwise the terrorists win welcome back folks this is the last segment today on what on earth is happening we're talking about natural law and how when it comes to natural law people's belief is irrelevant this isn't something you need to believe in it isn't something that believing in or not believing in will change these laws are immutable they were not put in place by human beings they will not be undone by human beings the ego mind has a hard time with being told that what it believes is not relevant to any given situation so i know people will have an incredibly difficult time with that statement i'm not telling you that all every single belief that you could ever believe is a negative or bad thing what i'm saying is when it comes to natural law belief is irrelevant these are not dependent on belief there is no dependencies in place meaning that this has to be in place for this to exist and be in place that's called a dependency there is no dependency of natural law want to know why man didn't make it the creator made it that's why it was here before anything else was here it is creation it is the dynamic force of creation itself that's what natural law is you didn't make that are you a part of that yes because as an inherent part of the universe you're part of that there is no separation between anything including creator and creation therefore you are that thing and i don't mean by yourself i'm talking about as one of the individuated elements within the all and these are heady abstract concepts to wrap one's mind around i know reading can help so before i get give some reading suggestions and i'll post some documents on the website let me give the call and number if anybody wants to call in and chime in on any of this or ask any questions i think we'll we'll leave deeper teachings for next time okay and i'll get into the expressions and i'll actually get into the um seven principles next time okay so we'll look at those one at a time we'll really break this down and extend it we might do four or five shows on natural law maybe more because that's how important this is all right and then we'll deeply look into the expressions of natural law from the very beginning of the generative force the very polarity which you start working with all the way down to the manifested expression in other words what you get as a result of using one of these two ultimate creative forces of course love and fear is what i'm referring to so we'll look at how that works next time but i'm glad we got a chance to really talk about how belief is connected with natural law or i should say not connected with natural law okay so the call-in number 866-841-1065 this is the last segment anybody wants to chime in give a call 866-841-1065 um reading materials okay one of the first things i think is books is that i feel is indispensable to a proper comprehension of natural law is an occult text that is derived from the teachings of hermeticism and it's called the kaibaleon okay this is a very good primer and a good place to start and yes it's abstract but it gives some good practical examples as well okay but it's written in language that is very simple yet elegant and it's easy to understand it's not something i think is going to lose the beginner now what that having been said it is also really pretty much all anyone really needs to know which means it has extraordinarily profound ideas in it and someone should take their time reading it read it slowly it's spelled k y b a l i o n kybaleon okay and ultimately this means the spirit of those the individuals or the souls of the light that's what that actually means the spirit of the souls of light okay the essence the radiated essence of the individuals the souls that are of the light and when you read it you will understand why it is named that so kybaleon i can't recommend it highly enough as a primer for natural law principles okay because they are outlined in this small book it's you know as an electronic document it's probably about 50 pages or something like that 60 pages i happen to have a physical hard copy of it which is an interesting story in its own right how i came to that some people say there's a legend that goes along with this book that you don't find this book this book finds you this book found me um i guess it was about six or seven years ago and uh barb found this book she was in a um like a second-hand store and they had some used books and this was just laying discarded you know i guess whoever had it didn't really understand the treasure that was or didn't have anyone they wanted to give gift this book to uh so they just got rid of it and barb picked it up gave it to me i devoured it because you know they say when the student is ready the teachings will appear the teacher and the teachings will appear and i was ready at that point in time and um hopefully i can help other people to find this book or i should say hope that i can help this book to find who it needs to find so another one that i highly recommend is um the end of all evil uh by jeremy locke and i've read excerpts from it on the show in the past but again simple elegant language easy to comprehend not long you don't need to be completely overly verbose when it comes to any of this you need to put it in simple easy to understand speech and language that can be grasped by other people and not sugar-coated either and that's what i feel jeremy locke has a gift and a talent in doing so i would recommend the book the end of all evil i'd recommend works by thomas paine on the rights of man common sense read the declaration of independence understand why our forefathers did what they did and separated from uh england in the way that they did um but ultimately failed because we're again we're right back into the tyranny um so those are some good introductory works and there'll be others i'll post a whole bunch on the site for people's uh reading edification so here we go to the phones we have a caller kevin from minnesota you are live on what on earth is happening hello sir thank you very much for taking my call i've been enjoying the show and i do enjoy it when i do catch the show right and today i find it quite interesting and thank you for that um now the question that keeps coming up uh in my mind as i hear you discussing and sharing your wisdom would you say that your belief system is based more on a christian background no i would say that first and foremost i don't really have a belief system i am a seeker of actuality of truth of the way things actually operate in this domain that we call the three-dimensional space-time continuum called our universe and i believe that those laws are not unknowable that the creator of this domain did not put these boundary conditions into effect and then hide their existence or their operation in order to tantalize and torture us i think it's uh our task to raise our consciousness to the point where we can comprehend not only what the what behind natural law in other words how it actually operates but the why behind it or why these laws were indeed put into effect in the first place that would be my answer great unfortunately kevin we're out of time i will pick this up for you you call in next week i'll bring you up and you can ask more questions but that's all the time we have for today folks thanks for listening to what on earth is happening we'll see you next week

What On Earth Is Happening Show #074

Topics: *General Principles Of Natural Law, The Most Deeply Occulted Knowledge, Message From Isis, Cause & Effect, Law Of Attraction, Karma, Golden Rule, Principle Of Mentalism*

freedom man that's what it's all about [Music] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc past ago [Music] welcome one and all you're listening to what on earth is happening here on the Oracle broadcasting radio network I'm your host mark passio my website is what on earth is happening dot-com the network's website of course Oracle broadcasting com this show is live every Sunday from 5 to 7 p.m. Eastern Time that's 4 to 6 p.m. Central and we have a great show lined up for you once again here today we are going to be continuing our ongoing discussion of the general principles of natural law who will be getting deep into this today and we'll be talking about how this understanding is completely intertwined interwoven and inseparable from human freedom as the intro music says that's what it's all about folks human freedom is what this show talks about and discovers the principles upon which human freedom is based and that is the principles of natural law and without an understanding of those general principles we are awash in a sea of ignorance and our ship is sailing without any guidance or direction into harmful waters so that's going to be coming up today is August 21st 2011 and I want to give the call in numbers for the show haven't taken a lot of calls recently but anyone is welcome to call in at any time during the show and please be patient wait on the switchboard I will get to you I want to ask people who call in today to attempt to limit their questions or areas of discussion to natural law specifically because I really want to delve into this topic and try to kind of get your take on it and any questions that that you guys listening might have so the call-in number for the network is 8 6 6 8 4 1 1 six-five once again the calling number eight six six eight four one one zero six five call in with any questions that you have that are pertinent to the principles of natural law what we're going to be getting into today is the understanding of this being the suppressed occult knowledge this knowledge actually is the occult information that has been hidden from the general public for thousands of years this is what all of the distractions are for all of the distractions out there and the useless information and the disinformation and all the COINTELPRO stuff that goes on is all to ultimately keep this information information from reaching the public's eyes and ears this is what they don't want you to know Oakes at the deepest fundamental level will be getting into it on the other side I'm your host mark passio you are listening to what on earth is happening don't go anywhere folks [Music] [Music] welcome back everyone who are listening to you what on earth is happening on your host mark Cassio I'd like to direct everyone's attention to my website what on earth is happening calm there you will find a few images on the radio show tab of the website that contained concepts that we'll be going over today on the show that's coming up in a few moments in this segment I want to talk about a few things before we actually get into the the meat of the topic which is the general principles of natural law here today and that is the fact that this is the occult information that is being hidden from the general population by the the d'arco cultists of the world and this is the information that ultimately they don't want anyone receiving because this is the most empowering information that anyone can receive and that's what I'm attempting to do here today is to begin really breaking open the floodgates we can talk about the problems of the world until we're blue in the face you know but ultimately it's about solutions and this is the ultimate solution this is the solution upon which all of the other actual practical actions that we can take are predicated upon this is the foundation upon which those solutions are built if you have no actual deep cognitive understanding if you have no actual comprehension of natural law principles than any action that you take is ultimately for it's in vain really it's it's not for any actual purpose that can truly serve us as a species in any way that will bring about anything that resembles true freedom so that's what our goal is and therefore to move toward that goal we need a firm foundation in the principles of natural law the second thing I want to mention here is that with last week's podcast I posted a bunch of books and pamphlets so if you go to the podcasts page with show number 73 which was the beginning of our discussion on natural law as a solution oriented approach to the problems of humanity I posted documents like Aquinas on Liberty which is a phenomenal short essay written by someone named Aquinas on the principles of natural law and how chaos basically enters into our society and remains with us until we become enlightened to these principles I posted wisdom from just about every tradition that is out there the Buddhist tradition from the free Masonic tradition wisdom from the founding fathers of this country including Thomas Paine a great book called the end of all evil by Jeremy Locke which I think everyone should read very simple practical principles contained in that book the wisdom of the Hermetic tradition from a book known as the Chi ba Lian which as I've said is a very good primer for the understanding of natural law and many other documents up there so avail yourself of this information go to work read folks read read read read I can't stress that enough reading is the path the cognitive Liberty it really is and there's a wealth of information out there it's at our fingertips like never before in human history it's at our fingertips so avail yourself of this knowledge and put it to good use so tons of documents on show number 73 perhaps I'll post a few more this week so one other thing I want to talk about before we get started is a gentleman I believe called up a couple of weeks ago at the very end of the show and we ran out of time he basically asked me what my I guess you could say what my tradition is or where my teachings are derived or you know I guess what my background in this esoteric knowledge is the perspective or the the take that I have on this where it comes from I guess you could say and I'd like to really address this a little bit because I think people get too hung up on where certain information comes from versus the actual resonance with truth that it has and how it can actually help us in the really big picture sense okay so my take on this is it doesn't matter where truth what tradition it is derived from and how I would respond to that is that the teachings that I put forward on this show are not derived from any one specific tradition in particular they are derived from an integral approach meaning that a bit is taken from everywhere I don't limit what I study I study the traditions of the Western mystery traditions I study Commission or ancient Egyptian mystery tradition I study ancient esoteric Freemasonry I study the original esoteric forms of Christianity I study Eastern Buddhism and Daoism I study the hermetic arts that are older than the Egyptian tradition even and then have been preserved through that tradition and then carried into ancient Greece and other places and I think the main thing to keep in mind here is you can pull wisdom from any tradition that's out there you take what resonates and what is capable of doing good and leave the rest okay so this information could come from Kabbalah this information can come from Rosicrucianism it doesn't make a difference where it's coming from it makes a difference whether it's true whether it's in harmony with natural law that's what is of utmost importance because that is what is actually dictating and creating our experience here the quality of our experience and that's what this is all about is trying to help people improve the manifested quality of their experience on earth through harmony with the principles of nature that's ultimately what this entire show is about because we've gone so far off of that path of harmony with natural law that we are creating a completely chaotic society and I mean chaos in a in a bad way and in the sense that this form of learning learning this information has become exceedingly difficult sometimes what many might consider next to impossible because of how many calcified ideas that are completely erroneous have been hammered into us through the methods of mind control and that we're so reluctant through fear to abandon these outmoded ideas so that's what I'm attempting to help that process that's what I'm here to do help to put that process in motion to help people to let go of the outmoded outdated belief systems that no longer serve us and to get back to a deep understanding of natural law principles okay so when we come back I want to talk about one tradition in particular which many will recognize as one of the foundations of the principles of natural law which we're going to discuss today and that's the Hermetic tradition we'll do that on the other side of the break you're listening to what on earth is happening stay with us folks [Music] [Music] all right folks were back this is what on earth is happening on your host mark passio today on the show we are talking about the principles of natural law and some of the things that I'm going to be discussing on the show today many will recognize from hermeticism the Hermetic tradition which as I've already said predates ancient Egypt and goes right back to the dawn of antiquity of our species and it is preserved knowledge this lamp of of knowledge this lamp of wisdom has been kept lit by initiates throughout the centuries sometimes at the cost of their own lives in extraordinarily dark times darker than even the times we're living in today where one would have been basically murdered for even possessing or attempting to communicate this type of knowledge so we live in a very unique time of opportunity it should be seen as a time of opportunity that this information is free-flowing and able to be effectively communicated for those who wish to receive it so the word hermetic means sealed basically hermetically sealed we use it as in modern kalokhe colloquial English and this is because this relates directly with a topic that we talked about last week that natural law is inherent it has a basis in nature okay it is eternal it is always like this as long as the universe that we're living in exists these are foundational laws that you upon which our universe is built okay they are boundary conditions for this universe this universe is governed by law and I can't do anything to make anyone accept that truth that's an eternal truth that is always here regardless of what anyone thinks about it and no one can be made or forced to accept it they can only continue to go along in their folly until they suffer enough and then finally hopefully through that suffering they will come to their own discovery of these principles these principles however are known and have been known I'm not the first I won't be the last there's nothing special about me for having discovered this information it's something that has always been here and always will be here again for as long as this universe exists that's the first basic thing I want to say about the the tradition from which the conveyance of this information comes from ok the second thing is the Hermetic tradition is named after Hermes ok a messenger of the gods of the ancient world he is also associated with the Egyptian Thoth the scribe of the gods in the Roman tradition so Hermes or Hermes Trismegistus is the messenger of this information of natural law ok he's not the Creator God ok the the be-all-end-all of the force of creation he is the conveyance through which the discovery of natural law comes that brings the knowledge of that creative force ok in the Roman tradition he was known as mercury and again this is associated with the planet Mercury because he is the closest to the Sun which is seen as a center of spiritual insight and vision associated with light the light of the Creator ok so mercury is the first planet orbiting the Sun he is also it is also the planet with the fastest orbit of any other planet around the Sun I believe it's about 7 approximately 79 days it is one of its years sunny 79 Earth days is one of Mercury's years meaning it makes a complete revolution about the Sun in 79 days so therefore mercury was also seen as the closest to the Sun therefore the one who is conveying the knowledge or the light the most directly therefore he was considered a Messenger of God God's son etc okay people have often asked does the word hermit derived from hermetic and I don't think it directly per se derives from that but I think there is a synchro mystic connection to the word hermit if you look at the Tarot tradition and the tarot card number nine of the Trump's of the major arcana we've looked at this in the past on this show that is the Hermit card and he holds the lamp of wisdom he is setting off he wears a grey robe and he is setting off on a path of self-discovery okay he knows that he is in spiritual darkness but has the desire to go forth and discover the principles of natural law the secrets of nature if you will that which has been occulted from us because one they are these are non-physical laws okay so they're they're more difficult to see when we are only relying upon our physical senses for the intake of information and not our intuitive nature our intuition okay secondly they're hidden by earthly forces because those in possession of this knowledge as I've already said wish to keep this knowledge from people to wield it as a weapon against them those who are in ignorance of these principles are at a distinct disadvantage to those who know them and may wish to use that information as a power differential and that's what the dark occult is the dark Oh cultists have this information they know it well they know it in fullness and yet they actually use it as a weapon against people who they attempt to keep an ignorant of these principles because the knowledge of these principles is personal empowerment that's why I'm presenting it as the main solution in our solutions oriented approaches toward recovering human freedom and letting it actually flower and come to a fuller expression all right so that's what the term hermetic at least as I see it we truly means and yes it is related with the Hermit not only because he is the seeker of truth and the seeker of natural law knowledge but because in the ancient world this information certainly would have that the search for this information certainly would have made you somewhat of a hermit because they had a lot more difficult of a time than we do folks with accessing this type of information today you can go online type anything you want to know and you'll have it on your screen in in moments they would have basically died for that level of capability of learning and imagine only twenty years ago how hard knowledge was to come by you would have had to walk or drive or bike to a library and then go through a card catalog try to find the book okay by topic or author then locate it in the large space of the library and then go and hope that that book was present and it wasn't checked out and that you would be able to sit with it for a while or check it out of the library and take it home and people who wanted knowledge they needed to do that back then now it's as easy as a few keyboard strokes and information pops up on a screen in front of you um in the ancient past that was even more difficult you might have had a journey for weeks or even months to get to the location where knowledge was housed or to speak with teachers who were in possession of that knowledge and it was a journey of love it was a labor of love in order to do that and again since some of this knowledge was forbidden at that time it was a risk to one's own life one's own life and limb was at risk for even seeking out that knowledge and certainly for attempting to communicate it an even darker times in human history than we live in right now so again we need to see this as an opportunity that this occult knowledge now has the ability to come into the light of day become do coltd and be used as a form of personal empowerment for our species and unfortunately very sadly we're also living in a time where many people don't want this knowledge and want to do anything they can to reject it or to stay outside of its scope and remain in so they don't have the responsibility of helping to change our world for the better we'll pick this up on the other side of the break and we will be getting into a couple of phone calls so callers hold on the line and we'll also be getting into our discussion of natural ball principles on the other side you're listening to what on earth is happening here on the oracle Broadcasting Network stay with us folks [Music] okay folks we are back on what on earth is happening I'm your host mark passio today talking about natural law principles here on the show and before the break we were talking about one of the traditions from which some of these principles are derived from which they were carried in the ancient past how difficult that was to do at darker times in human history when this knowledge was even more outlawed than it is now if you can even imagine that so what I would like to do right now to begin this topic of discussion is to talk about initiation because that's ultimately also what this show is about the initiation into hidden knowledge and the reasons for initiations for undertaking it how we need to set the ego aside in order to do that how the underlying drive for wisdom must be based in a deep desire for truth and a deep desire for harmony with natural law principles in order to create true order in the world not this fake controlled order that the dominators of this planet want to see come about and it is it's already here to a large extent but it has to be done because we truly resonate with truth okay and the ego can't be there in order to do that because the ego is always going to be saying what's in it for me what's in it for me what's in it for me okay and we see all too many false teachers like that out there you know who are always about what's in it for them versus whether this is actually going to help our species evolve in consciousness okay so there is a book that I posted with last week's podcast called the stellar man the stellar man by John Baines and I'd like to read a quote about the initiation into the mystery traditions that John Baines writes in the book the stellar man so I'm going to take most of this segment to do that this is called a message from Isis as we talked about last week Isis is the goddess of higher consciousness of love of natural law of the Sacred Feminine wisdom in other words wisdom meaning actually acting upon knowledge when it is right when it is moral when it is in keeping with natural law okay so this is called a message from Isis I Isis mistress of the mysteries of nature speak to you you novice who seeks to go through the gates of initiation and you laymen who will read with idle curiosity calm your spirit clear your mind calm your emotions get away from worldly noises and look for shelter under the mantle of your own self so you may cross the threshold that leads to the abode of the magician's with no danger cast away your prejudices shed your egotism flee from personalism and rashness for an instant analyze with serene eyes do not fear aught but yourself do not doubt but that which you analyze superficially do not deny before meditating separate yourself from the multitude that obscures your ideas be yourself and think for yourself do not limit yourself you seeker of wonder you candidate for initiation do not look into the distance gather all your energy within yourself forget about India and Tibet do not cry out for God Allah or Jesus what you look for is right where you are at this moment yes stop looking toward the outside and bury your sight deeply within yourself tune your perceptions sharpen your senses and there in the center of your being are you your eye your real essence the truth behind lies the immortal energy that gives life to the clay that is you look with devotion and reverence because there is light and the light that blinds you is God listen to how it decrees I am the road and the life but beware you cannot contemplate God face to face without dying are you willing to continue I can grant you a great gift I offer you death do not tremble this death is the gift of the Immortals it is the gift of the Phoenix that is gloriously reborn from its own ashes to be one must not be to be born and to be one must first die if you achieve this you will be called the twice-born do not scorn my offer consider it carefully it is better to die now than to live awaiting death do not believe that if you reject me you will be able to continue your path unharmed on the contrary all paths lead to me ignorant orphan who does not know its parents you only have two paths either I devour you or you unite with me yours and only your's is the choice if you decide to be devoured fully dedicate your life to enjoyment drink the last drop from the cup of pleasure close your mind to the voice of your spirit abandon yourself to the Beast and enjoy the sensual pleasures of matter thus when you are least aware the moment of final cannibalism will arrive do you really believe that I will take pity on you you deceive yourself I have no feelings I am beyond pleasure and pain beyond right and wrong I am like the Sun that rises in the morning to light everything equally after your death you will become only remains and a relic afterwards not even that if you desire to marry me you must be ready to suffer the death of initiation you must pass the trials the terrible Sphinx will send you without mercy in order to judge your spiritual courage and the quality of your nature I surrender myself only to he who has reached the stage of crucifixion resisting the attacks of the four elements I love only those who have drunk from the cup of bitterness of betrayal of ridicule and mockery of persecutions of slander and of defamation I love the initiative persisted with courage suffering the loneliness of the Spirit in the midst of a world of animals you come to me after experiencing slander and defamation which are the specific trials of the element of air after blows and persecution the trials of the element of Earth after sensual temptation and vices which are the trials of the element of water and after dominating uncontrolled ambitions which are the trials of fire this quarternary corresponds to each of the ends of the cross to which one who came to me was nailed Jesus Christ nevertheless others even greater have lived and live in secret no one knows of their existence because it is better for their work do not believe that in the world there exists only the once born and the twice born unfortunately the once and a half born and the aborted ones also exist beware not to be taken in by their convincing lies and Machiavelli in language these beings live neither in this world nor the next they are neither initiates nor laymen but imitators of masters semi sages sewers with unclean hands the followers of dead scrolls and black magicians who covet me and boast of my love when they are not even worthy of my smile some may wear saris or tunics others collars and aprons others the Rosicrucian attire some proclaim themselves the only possessors of the truth believing that they actually possess this monopoly all of them claim my friendship but are only beggars who plead to me for crumbs of wisdom you do not achieve second birth by standing on your head or meditating nor in the coffin of purely symbolic ceremonies nor by good works for the grace of the Holy Spirit if you descent disdain me receive my blessings and continue on your road destined to be food for the gods I will pause right there we'll pick this up on the other side there's two paragraphs remaining you're listening to what on earth is happening folks don't go anywhere [Music] we're back folks this is what on earth is happening on your host mark patio my website what on earth is happening calm we are beginning a look at the general principles of natural law here on the show today and I was reading a quote a few paragraphs from the book called the stellar man the stellar man s te ll AR as in of the stars okay the stellar man by John Baines it's actually posted to my website as a PDF document on podcast number 73 on the podcast page of what on earth is happening com we were reading a quote we were reading a segment from a part of his book the stellar man called a message from Isis Isis of course the goddess of wisdom the goddess of natural law okay the goddess of love energy so we were talking about that she was talking about that there are false teachers out there black magicians who want this knowledge for themselves who come to it for egoic purposes not to really truly teach humanity how to come up in consciousness and better themselves and create a world filled with more freedom not more enslavement okay so there's two paragraphs left I'm going to go back to this reading and then we'll jump in to a couple of phone calls so here we go continuing with a message from Isis she says if you disdain me receive my blessings and continue on your road destined to be food for the gods not all can be men some can only be animals or worse vegetables if you come to me through curiosity think twice it is easy to be rash with what one does not know if you are not brave enough turn back shield yourself with your vanity and your pride tent yourself to look down at the ground like your kin if you are not prepared do not aspire to see my face unfortunate is he who possessed by animal greed or misguided curiosity contemplates only my reflection as he will never forget me and will die tormented by the desire to possess me if you are prepared if you have eyes to see and ears to hear if your intention is pure and Noble proceed without discouragement and know that from the moment you cross the threshold of the occult abode I will be anxiously awaiting you like the young bride for her first love seek and you will find do not pray to the gods fight for me that is extraordinarily powerful ladies and gentlemen a message from the goddess and I believe that's almost like a channeled message from the deepest subconscious recesses of the Sacred Feminine force itself that mr. Hains there was almost a channeling through automatic writing that's what I believe that came from that came from a place beyond the brain even beyond the heart of a human being that came from the deep recesses of nature herself which that individual had to somehow get in touch with to bring something like that forward that's natural law speaking it's message to us and beseeching us don't continue to go down the road you're on it leads nowhere it leads to destruction and that's it that's all there really is we choose in the natural law path or we choose the path of chaos and destruction okay so I'll leave that there and I want to direct everybody to site and to the images up there because I'm going to actually now start looking into some of the principles we'll do that we I think I have a couple of callers on the line we do let's do that first we'll go to the calls then we'll jump into this because I'm interested to hear from some people and see what they have to say on what's already been said here so here we go caller live on what on earth is happening oh I was wondering if you're familiar with terence mckenna's work Oh Terence Mckenna he is actually my favorite team are you familiar with them linguistic diseases linguistic diseases yeah specifically what kind well it's a it's a vague term it's one of it's a term that chance we can I use this for people that are in epistemological cartoons okay his own words basically but certain like cultural belief systems and um oh there's stuff like that I believe causes certain linguistic diseases like well for example in South America the there's a tribe that um they have a linguistic disease that's that the the symptoms of the linguistic disease are bad luck okay I I'm trying to I was wondering this beautiful like possibly that you were a victim of these linguistic diseases through such indoctrinations into Freemasonry and exedra no not at all I have not been indoctrinated in any specific belief system that's what I was trying to say I don't have a tradition or a set of beliefs I try to go through the different traditions that are out there and in it seemed like you had trouble describing that Isis story that you were just saying

I also described most of truth often found in fewer words I was I wasn't really prescribing anything I was reading a passage from a book that is posted to my site now I mean after read it you were like this is slow above but really if it was from anyway it would be from the spirit world and it seems like you had trouble like summing that up that's I believe that's basically what I said it came from the deep recesses of nature herself that is nature herself is different though than from the generic term for the spirit world you're talking about a goddess of nature it's a civic your symbol you're taking things I don't think you remember certain things that Terence Mckenna said about nature like nature is very like an alchemy nature is uh it's very like abrasive like like it dissolves things like if you live in the jungle you're not gonna be able to have books for very long because they're gonna get eaten by that well this is what is said by that message of Isis that she doesn't have things that it is law herself this is something about to give people the idea that it doesn't require our but you don't the mystery schools that's their doctrine and when you're speaking that you're speaking at incantation that's affecting the minds of the listeners well sir it sounds it sounds like that you've already made up your mind about what is actually taking place and you think that there's no such thing as positive hidden teachings that can benefit humanity I would suggest that that is a form of indoctrination and deciding to put your own consciousness into a box and not look outside of limited indoctrinated belief systems that it sounds like you subscribe to and like I said I don't have a religion I don't have something that holds me back which is the definition of the word religion if you want to look into linguistics look into the actual etymology of that word okay because the religions that are out there which I see this is where this was leading to is are all created by the d'arco cultists and I've been over this on the show many many times so if that's where you want to stay go right ahead I personally want to look past all of those deceptions all of those limitations for consciousness and try to get to the truth of the workings of nature it's self because that's how one grows in consciousness that's how one truly prospers and that's how one evolves spiritually so let's go to another call there we go okay there's the intro music for this break we'll pick up with more of your calls on the other side you're listening to what on earth is happening here on the Oracle broadcasting radio network we'll be right back folks [Music] we're back folks this is what on earth is happening I'm your host mark Cassio my website what on earth is happening calm today on the show we're talking about the general principles of natural law we'll be outlining them and beginning to get into the mount know how far through that we'll get we'll probably pick that up next week because I'm really going to unpack them slowly and attempt to delve into them in a lot of detail so you know the last caller you know I believe is typical of people who are in a fearful mind state unfortunately who think that all knowledge that is contained within the occult world is evil they've bought into the mind control of words exactly what he was talking about the mind control of words is relating one word to another with it with a with another concept without that actually being the real meaning or definition of that word so you equate by repetition the word occult with evil okay when in fact all the word occult means as we've said so many times on this show that it's almost sickening all occult means is hidden that's it it comes from the latin verb occult are a meaning to hide or to conceal or to keep hidden and therefore it is creating a dichotomy in the person's mind yes they want good things they're not evil by their nature and so you've equated the word occult with the word evil in their perception therefore they don't want to look into it because they see it as a bad thing and in doing so in refusing to look at it they're remaining in the ignorance of all of the principles that the dark occultists already know and are using against them to keep them as a slave and works who psychologically immature to realize this and grow up and do our own studies in our own research and go wherever the truth leads because we're kept confined by these systems of control called religious beliefs and that's all they're there for and I'm telling you who created these systems the Satanists and dark Luciferians controlled those systems just for you they created those systems they created those systems so that you would not look into the knowledge that they possess and know the same information the same knowledge that your owners have and are using to keep you in a cage let's go to another call here we go caller you're on what on earth is happening please talk about or ask questions related to natural law principles if if you will that's the topic for discussion specifically today thank you well yes you're live on the air okay hi this is Chris how are you doing I'm pretty good how are you I'm good yeah I like that Isis thing that you caught it it's pretty pretty good I I started with tarot - okay and and I actually ever I'm actually drawing my own cards from from the actual cards that's great make my own copy I think that's an exercise that can really help somebody to gain a deep understanding of the concepts that are contained within the Tarot tradition so that's pretty good that that tells me you've probably studied it enough that you want to gain some more insight through actually making your own deck yep yep it's very good good stuff yeah with natural law like just want give them like an example that far-gone we are like on the radio like like I'm like advertisements or whatever the radio host said that you have to ask permission from the government to plant the garden unbelievably thank you yeah that does show you how far gone we are from the principles of natural law unfortunately well sir I think for the call we're out of time on this segment this was a short segment we'll be picking it up on the other side of this break don't go anywhere folks stay with us this is what on earth is happening [Music] okay we're back folks you're listening to what on earth is happening here on the Oracle Broadcasting Network I'm your host mark passio natural balls the topic of discussion for today's show we're going to be delving into the principles of natural law we have a couple other callers on the line so let's go to the phones caller you're live on what on earth is happening what do you have for us here today hello yes you're live on the air sir oh hi mark my name's Chad I'm calling from Germany it's two a couple things I want to say I read that this book you listed on your site stellar theology and Masonic astronomy yes that was amazing yes on our Astro theology I believe yes this was amazing you know I can't look at religion and these things the same way ever because this book just breaks it down shows how it all relates to the Stars and you know I feel tricked you know well at least you're awake to it now sir and you have to understand that that's that's only the intermediary veil that is walling you off from the real esoteric tradition that religion was supposed to be about conveying originally again you have to go deeper and get down to the allegory of self that this is actually really based upon okay don't question all just Astro theology the Astro theology is actually a story about the self you listen to my podcast or on Astro theology I touch upon that sure but the reality is they're essentially lying to people and controlling them by altering the story in a way that people don't self-identify that's right you have you got it exactly that's exactly it and thanks and the other thing is you know that they blocked off the image is furious on Google Sky I did not but can you think of any reason the quote-unquote Illuminati would do this they don't that they they actually if you go to Google Sky you can't see an image of Sirius and the software I know when you zoom into it they covered it up like that but I suspect they did there something in Photoshop with it cut a circle around it and then you have it up so you can't actually see it it's it's possible that they're they don't currently have in their database an image of resolution that you could zoom in that far I don't want to speak to something specifically when I I don't actually know that that's that's happening or that there's some kind of conspiracy to not have people be able to look at the star Sirius with any kind of magnification so I'll look into it myself and see and I can give you a report and see what I what I make of that but I don't know too much about that right now okay cool okay thanks so much and by the way I've been studying you know this kind of information spirituality my whole life and you know you've got you put out some of the best presentations ever so I'm very thankful for that I feel like you know a student wandering in the wild who finally found a good place to get some lessons so thank you very much well sorry thank you so much thanks for the the great compliment there and keep up your journey and your search for truth that's what it's all about okay thanks so much okay here we go Vicky in Winnipeg Vicky's in Winnipeg you're live on what on earth is happening what do you have for us here today I work I just wanted to say I really enjoy your shows I have a couple inquiries and shortin and plus you've been a big help I just wanted to say that okay the first one would be I'm sort of confused about non-dualism yes do ality yes we're going to talk about that here today when we get into what is known as the principle of polarity which is one of the principles of natural law and how this is simply perceived polarities to have experiences here in the physical realm so we will be getting into that and going going forward into a detailed discussion on that when we get to the fourth general principle of natural law which is the principle of polarity okay so you'll probably I will talk Tony at all now that we'll be answering that that concern hopefully all right and the other one is recently people I know have been in touch with the goddess Isis and they've been doing like moon rituals and like praying and some of this I'm I'm trying to accept it I'm very open I'm like okay well you can do what you do but at the same time it's like okay Vicky we want to find these crystal skulls and then save the world and then that gets me into like okay you're externalizing this yes that's exactly what that's exactly they're doing their external izing something that is within again Isis's request at the beginning of that little channeled type of piece of channeled writing there was all about going within the answer doesn't lie out there the answer lies in here getting in touch with the true self is the way to help the understanding of natural law unfold within an individual and that's what her first request was that we'd go within that we not look outside and her final request was don't pray to the gods or seek anything outside of your self fight for me which means really go within understand natural law and then try to make try to make that net those natural law principles have roots here on the earth so them out there help them to grow on fertile soil meaning communicate this knowledge to other people and fight for the truth that's what she meant oh I see okay well then I'm kind of worried about my friends because they are like oh we have it all figured out and she's like I feel like Jesus right now like okay me to me that level of externalization is all about looking outside of oneself for answers and kind of abdicating personal responsibility I talk about the goddess principle I talk about Isis or what any of our many other names you could probably find 40 or 50 other names she was referred to in the ancient world but it's a symbol I don't I'm not worshiping an individual by any stretch of the imagination this is a symbol and it's a symbol of the the actual laws that govern this reality they they are in place for our benefit our spiritual uplift and our evolution as a species and if we grasp them firmly in hand and in the mind and in the heart there's nothing we can't accomplish here you know it's um that the stars literally are the limit if we come to this understanding this spiritual understanding of natural law principles so the goddess to me represents a symbol and more importantly it represents an inner quality of the individual okay and I just learned symbols like can be whatever you really put meaning to them and they they take on a world of their own yes they can yeah that's looks like a meme an idea that takes root and and you know forms itself and you know basically then takes on a life of its own and there are some good positive memes and there's memes that don't serve us it's all about finding which of those entrenched ideas or ideas that are picking up steam are actually rooted in natural law and truth and going with those and then shedding the ones that aren't serving us because they're not really rooted in natural law and truth and if they're rooted in natural law everything else will just flow correctly I believe so okay all right well oh you're I'm just really thankful for everything they've done and all the books I have to read now I don't know how this stuff like knows that all my site is just a little taste I mean these are these are ones I went through fuck applied to the ideas I talked about pretty well and are not overly complicated or overly verbose and want to just give people a taste but there's so much more out there I want to thank you for the call so much we pick this up on the other side of the break folks don't go anywhere this is what on earth is happening [Music] [Applause] [Music] welcome back everyone this is what on earth is happening I'm your host mark passio we have one more caller on the line so I'm gonna go to him or her and then I want to say a couple other things before we begin unpacking these ideas so here we go caller you're live on what on earth is happening hello yes how are you a few months now and the topic of religion is very interesting I make a few notations and Orpha yes and still there I wanted to ask you because you seem to know a profound knowledge of things we wanted to ask you about the old and billions of Africa okay come over that came over to the new world doing food every time like what we have today in the Caribbean yeah you tell me more about that you know I don't have I don't have too much in depth knowledge about that specifically but what I can tell you is that the African continent has some of the oldest esoteric traditions in the world and I believe that this is truly the cradle of civilization here on the earth and ultimately that's why the

Moorish legacy is so suppressed by the dominators of this planet I think of course Egypt was in Africa okay the traditions that actually predated Egypt that gave all of their knowledge to the ancient Egyptians were certainly from Africa these are this knowledge was exported over the Mediterranean into Greece and the Greek mystery traditions which is where a lot of the Hermetic tradition that I'm basically going to be talking about some of these laws where they derive from and or I should say the discoveries and then they were put down into in that tradition and then conveyed from from there from the the Greek mystery traditions but one of the most interesting places to look is in South and Central America where I believe some of these sea faring civilizations went across the Atlantic and settled in and even also across the Pacific from the Asian continent as well you look at the Olmec civilization of central Mexico which I had the pleasure to visit when Barb and I took a cross-country trip across Mexico and visited a ton of the ancient sites down there the Olmec civilization these are large stone heads that they placed there clearly have African features and they're not meso American facial features so I believe that this civilization was a global one and basically took its knowledge to the far corners of of the earth and you know it's it's again it's this knowledge is is basically eternal it's here with us it's always been here with us it's ancient it's um it doesn't limit itself to any continent any culture to any civilization but specifically I believe the ancient African peoples were one of the carriers of this information let me ask you this matriarchal and how come they they'd be bad like this to do with him having to be practical now right they have gone this has gone through a swing I would recommend a book called the chalice and the blade by Rihanna Eisler it's an excellent discussion on the dichotomy between patriarchal and matriarchal societies and how we have undergone this pendulum swing from matriarchy to patriarchy certainly what we need is that perfect balance or blending between these so that there is no rulership except self rulership which is a blending internally within each one of us in our own psyches between the masculine and feminine forces or the uniting of the chalice and blade and I'd recommend going back to some of the earliest podcasts that I've done where we talk about the human brain and the the sacred masculine and feminine qualities within each one of us and the goal of higher consciousness is to unite those two forces within the individual now how come they say that binos cannot do or perform certain things within decreed and males cannot perform certain things among secreted as well that has to do with the with the other it definitely has to do with this split with this dichotomy that we're undergoing and this schism between masculine and feminine energies and the polarity shifting toward the dominance of male energy this is why we say well females are more intuitive well as in the in the macrocosm the male dominators society wishes to suppress the intuitive energies because that's what we need to rely upon to really forge further discovery of truth okay so they're seeking that heat that feminine aspect that sacred feminine aspects suppressed so it's a reflection okay but is this now or has that has been from the beginning of time I'm thinking I would say not since the beginning of time I would say it's been this way for what in my estimation I would consider tens of thousands of years and and we need we need to work diligently to bring this back to a place of balance not to get it to shift toward the other opposite extreme but to bring it to the middle point and that middle point really is ultimately about balancing those energies within ourselves see we stopped doing that work and taking the responsibility to do that work within ourselves and that's why you see these extremes of polarities between dominating energies whether they be them the female dominant or in our case now in the current civilization in the male dominant variety so it's all about balancing the internal aspects of each one of us which is called the chemical wedding bringing these forces together in a synergy okay and we're specifically be talking about in future weeks brain balancing techniques as a solutions oriented approach the problems that were undergoing in our civilization because this is something that many people ask me to do specifically address the one brain hemispherical dominance versus another and how we can bring that to to centeredness or to balance and that's ultimately also what this is all about it's about that finding that balance point between those energies within ourselves so I want to really thank you for the great call brought up a lot of great points so Tennyson in the name of the book that deals with the Stars in relation to the yeah he was talking about stellar theology and Masonic astronomy and I the author's name just escapes my my mind right now if you go to my podcast page okay and you look at the podcasts that I did on Astro theology Astro theology okay you will see that in somewhere in in that section about religion and Astro theology I posted a whole bunch of books in PDF format one of them is called a stellar astrology and Masonic astronomy I believe or something to that effect and that's the book that that gentleman was referring to the talks about how religion is based upon Astro theology okay sometimes explain to us the seasons between the left and the right man Hemisphere yes that is done I would recommend ma'am that you go to the early podcasts on my podcast page and we've covered that topic in quite some detail in the earlier podcast you'll see the the human brain the triune brain the polarities all of that is actually discussed there in the earlier podcast I'd recommend actually going back to podcast number one and catching up all the way through from where the point where you started listening to the to the show and you'll see that it unfolds in a very orderly program at least I have attempted to make it an orderly progression for people to gain an understanding of what's actually going on so I want to thank you for the call and that's all the time we have for in this segment so in the next segment I know we've done a lot of building to this point we're going to start breaking down the actual general principles of natural law in the last half-hour of the show and then we'll pick this up next week folks so a lot of build-up to it but we're going to actually get into the meat of the matter because this is stuff it takes a while to unpack so stay with us don't go anywhere we'll be right back looking for new [Music] you won't stop us from conveying the deepest held occult knowledge that has been used to control this world for thousands of years no matter what is threatening because this is the truth of how this realm operates and how possessing the knowledge of natural law we can create a future that we can scarcely dream of right now in comparison to how things are right now and I mean for the better without the kind of self-inflicted suffering that we see all around us and yes these will be heady topics and abstract topics and you know as I said before I think I do a fairly decent job of unpacking these topics in some detail and doing it in an orderly way and in a progression that helps people to understand them but you know I'm not infallible you know I don't always explain every single concept the the best way it can be I do my best I'm not reading from a script here ladies and gentlemen like a lot of the newsreaders the repeaters out there on TV are I'm speaking from the heart okay so you know a lot of people want to hear the most eloquent perfectly structured language you know that is spoken in pleasing term pleasing tones but that isn't my style it's rough its raw it's from the heart and it's done with the in the best way that I know how to do it and that's it so you know if you want those pleasing tones spoken with the beautiful eloquent language and you know appealing to all of your delicate sensibilities then go watch the nightly news where will they'll give you a world of lies that will keep you in a prison cell for the rest of your existence and then some so you know most people want sound byte information conveyance they don't want topics unpacked with any depth you know they want they want you know say it as quick as possible with his least information possible because that's all I have time for well then the path of true wisdom isn't for you and I'd suggest going elsewhere okay that doesn't mean that we need to be overly verbose either we need to get straight to the point and tell it like it is but do it in a way that it can be deeply understood by someone so part of it is you know when we get into this specifically the topic of natural law I guarantee you people will be coming out of the woodwork because when you know as they say when you're over the target you get the flack okay this is what the occultists don't want known these general principles and more than that they don't want the actual expressions of how natural law works known to anyone they want more chaos erupting through the ignorance of natural law because the more we ignore it and the more we trounce on other people's natural law rights the more chaos erupts into this realm and that's what the dominators want because they want to manage that chaos so that they come out in control it's very simple so let's begin the unpacking of the general principles of natural law as we said last week when we started the introduction of this topic natural law is inherent it has a basis in nature in reality and in truth it's not made or caused by humanity its pre-existing it was here before we were here okay it's an existing condition that is binding means we're bound by it whether we like it or not nature's laws are not up for debate they're also not dependent on belief okay then they don't require our belief in order to exist and operate they are immutable meaning that they are unchanging as long as the universe exists these principles and the ways that these laws operate will also exist it's up to us to discover them accept them as boundary conditions for our growth and development they are not prison conditions this place is not a prison cell as the dark Oh cultists believe and would like to have other people believe it is a construct for spiritual experience okay and just because these conditions are immutable doesn't mean they're punishments they are guidelines to have a peaceful and prosperous existence in this realm so last week we said that natural law is ultimately expressed through seven basic principles which we're going to begin to unpack today and then continue to unpack next week principles mean first things they means the most important things the things that values are based upon or that they should be based upon the things we consider important and valuable and that we put first before anything else those who know and adhere to these principles possess the key to unlock the prison cell door that's it that's what we're looking for here we want the key the magic master key that unlocks all the locks on all the doors on all the cage cell doors that's what we're looking for that key to true freedom and the understanding of the principles of natural law is that very key and through that key the wisdom of this universe is unveiled unto us and ultimately if you really get down to it as we said already this is truly deep knowledge of self of the true self the higher self the spiritual self it's independent of belief I put a couple of slides up on the on the images section that talk about belief being irrelevant to an understanding and a deep comprehension of natural law natural law doesn't care about whether you believe in it as that reading toward Isis said I don't you think I have feelings in the way that you understand feelings this is these are law principles that's it you know it's like you break them and there are consequences that's it people have called this many different things karma is one of the big things that it's been called throughout the ages okay so I have a slide image number five on the website today is uh natural law also known as what would have people attributed this collection of laws and called it you know they've they've basically given it simple simplifying names in the past they've called it the law of cause and effect this is simply one of its principles but people have attributed so much importance to that one aspect of it that they've simply called natural law cause and effect okay meaning that effect the manifestation of what actually occurs invariably follows a prime cause something that set that manifestation into motion okay so effect invariably follows a cause there must be a cause for there to be effect in manifestation this has also been said in a scientific way that for every action there exists an equal and opposite reaction there's a reason for everything nothing is by chance there are no accidents there are no true coincidences there are reasons that things are the way that they are and those reasons can be discovered it's also been called natural law has also been called the law of attraction by many people this is popular in the new-age research community but it's also a very good way of looking at it that we attract what we put out into the universe the universe is an intelligent field an intelligent interactive field through which we experience things learn and grow and what we put into that field is what the field actually becomes and then rearranges and reorganizes itself and then displays back to us so it's showing us at all times where we are like a gigantic mirror I said last week jokingly I could come on here you want really quick a real quick lesson and something that doesn't require much unpacking at all if words you know too many words uh make you nervous well natural law is a gigantic mirror good night that's it that's what you really need to understand that's what the intelligent field oh that's all around us that we're a part of not just around us we're in it that's what it is it's a huge mirror so the energy that you admit that you put out is the energy that you attract unto yourself it's been also said that energy flows where our attention goes the quality of our attention dictates the quality of our experience how awake are we how conscious are we of these laws and their effects are we truly taking responsibility understanding that there are consequences to our behavior or are we just living unconsciously see because these laws are the ways we create the reality around us collectively it doesn't matter whether we're conscious of them or not it doesn't matter whether we believe in them or not they are in operation we are bound by them we are creating our experience through our adherence to them or our ignorance of them period the end the law of attraction has also stated the generative principle of as you think so you shall be showing the knowledge that thought is ultimately the basis for our experience for ending everything that ultimately manifests in this domain and it's also been called karma or moral law we'll look at that on the other side of the break and then we'll outline the natural ball principles this is what on earth is happening I'm your host mark passio stay with us iPad folks [Music] we're back folks this is what on earth is happening final segment here today on this edition talking about natural law and some of the other forms that it is known as the the terminology that is often used one of them we were talking about before the break the law of attraction and there's this watered down version of the law of attraction that's popular in the new-age communities the New Age movement that is I believe a cul-de-sac for people to wander down aimlessly without a real deep understanding of what this true law of attraction really is and you know they appeal to the ego in order to do that getting people to think oh just you yourself are creating the collective reality and you know you the idea toward for learning this natural law is rooted in ego because you want things or you want money or you want success okay and that's completely you know in in worldly sense you want success and that that is completely the wrong way of looking at the law of attraction this is a watered down version variant of this teaching what the law of attraction is saying when it talks about as you think so you shall be they're talking about us collectively as our consciousness wanes and we don't really understand natural law and so we're deeply rooted in ego we are going to form together to co-create a more enslaved Society as our consciousness evolves and opens up and flowers and reaches higher and higher expressions and deeper understandings of natural law and the true rights of humanity and living beings everywhere well then so our society will evolve in a similar way and become more and more free that's what this means it's not doesn't mean that I individually mark pacion creating the manifested universe around me this is bunk this is utter nonsense and anybody that thinks of that as such is delusional and crazy because they think they're god you're not creating the universe you're a part of the universe you're in the universe okay we are collectively as a species creating the experience of our shared reality of the quality of our shared experience here on earth by how we think as a species that's what this means okay so another variant of the natural law principles is simply karmic law simply put karma over a Sanskrit word meaning action okay because our behaviors are based upon our thoughts and emotions and then we ultimately move them into an outward expression or an outward manifestation called our actions or our behavior and that's what actually creates the reality that we experience that's why action is so important in this dynamic it's the most important thing that's why our actions must be in keeping in harmony with natural law principles and if they're not we create chaos or in other words we reap what we sow okay again the field of energy the dynamic living create a field of energy that we exist in will restructure and reorganize itself according to the laws that was created through to give us the experience that we have chosen and we fully deserve based on how we think feel and act it's it's actually quite simple it's almost laughable you could put it in such simple terms do good things good things will happen your quality of your experience will be good do bad things bad things will happen and the ultimate quality of your experience will be bad it's so simple it's laughable and people complicate it and want to make it into something that it's not but ultimately that's how natural law works at the very easiest first grade level of understanding it very simple not complex really easy from our current mind controlled conditions to understand and live in harmony with no not easy simple yes easy is a whole different ballgame where we've the corner we've worked ourselves into right now that we've painted ourselves into I'd say the understanding and living in harmony with natural law may be quite hard or difficult it may require a lot of courage we're considering where we're at collectively as a species right now and ultimately natural law can be summed up in another very brilliant synthesis which a master teacher in a way that a master teacher put it and this is do unto others as you would have done unto yourself or what is simply known as the Golden Rule and because that is the path to higher consciousness that way of living in the world of being in the world is the path to alchemical spiritual gold that's that's all of the riches that we ever need or could ever want in the spiritual kingdom hey you will have gold if that's how you live that's why it's called the golden rule so let's take a look at the actual general principles of natural law the principle of mentalism is principle number one principle number two is called the principle of Correspondence number three the principle of vibration and we one pack these one at a time probably over the next week or two okay the principle of polarity is principle number four as a former caller called in and asked about I will be unpacking polarity I did this before but we'll be doing it again maybe even in some more detail okay principle number five of natural law is the principle of rhythm rhythm principle number six is known as the principle of cause and effect again something we've already looked at and that many people attribute as the very deepest basis for natural law and call natural law that cause and effect okay so that's principle number six and finally the seventh is known as the principle of gender gender so a good place to start again is at the very beginning number one the principle of mentalism we've already begun talking about this a little here today that our thoughts are the essence of our experience the foundational basis the creative essence or what in different mystery school traditions has been referred to as the generative principle our thoughts in combination with our emotions these are the unseen qualities that go on within the individual what we think and how we feel combined form the womb for the creative experience of the manifested reality that we all share because that's what we're basing the child the child aspect of consciousness the male child actions or behavior the thing that we actually do in the world the external solar masculine force that we exert into the actual field of energy in which we are living and that's what ultimately becomes the experience collectively okay so the thoughts are of primary importance what that doesn't mean we should downplay behavior that we should downplay feeling these are all part of it there are they shall be given equal importance but the the emanation if you will the actual essence of that expression comes from the thoughts okay this is why the Egyptian god Thoth okay he was named after thought his name okay he is the one of the creator gods or the scribe of the creator of gods actually okay he is bringing the understanding of natural law in through the mind and this principle is not just about how our thoughts in human form create the shared reality that we experience at a fundamental level but it's about how the entire universe is a mental construct it is indeed the thoughts of the mind of the Creator itself the creative force had to have a thought in order for this construct that we call three dimensional space-time reality to exist and then express that through the third principle the principle of vibration speaking the universe into existence vibratory energy came into being but there had to be a thought a prime causal factor before that occurred consciousness itself pre-exists everything that is unformed that's the principle of mentalism the mind is all consciousness is all that's all we have time for here today folks stick around Chris Everard is up next we'll see here next week on what on earth is happening [Music]

What On Earth Is Happening Show #075

Topics: *Natural Law, General Principles Of Natural Law, Hermeticism, The Kybalion, The Principle Of Mentalism, The Principle Of Correspondence, The Principle Of Vibration*

freedom man that's what it's all about [Music] [Laughter] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law vehicle and all issues affect the freedom of the people of Earth what on earth is happening to endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc past you [Music] liberate your soul and mind the truth is waiting for you all to find ladies and gentlemen welcome one and all this is what on earth is happening here on the Oracle Broadcasting Network I'm your host mark passio my website what on earth is happening calm the networks website of course Oracle broadcasting calm today is Sunday August 28th 2011 we have another great show lined up for you here today on Oracle we're going to be continuing our ongoing discussion of the principles of natural law and how this is the most occulted knowledge that exists and how the dominators the occultists of this world the dark ocultist of this world do not want people to have or understand this wisdom what I'll be doing today on the show is reading a little bit from the book known as the Cabal Eon which contains within it the general principles of natural law not natural law itself per se but a general understanding of how natural law operates and goes into effect in the world through these principles okay later on in the next coming weeks we'll be looking specifically at how natural law actually works in our um realm of operation through our thoughts emotions and actions we'll be looking at what I call the uh the UM effects of natural law how basically the expressions these expressions work through our behaviors so we'll look at that in coming weeks but today largely what we're doing is we're going to look at the general principles of natural law in depth okay and I started telling people last week not only is this the deepest occult wisdom that is known by the dominators of this world they know this and they try to keep this information from the people who would they are enacting their control upon and the way that they can continue to get away with that is people remain in ignorance of these general principles and how natural law actually works its its manifestations okay so in order to overcome that we have to gain this knowledge we have to understand these are laws that are we did not set into operation the universe did creation did and in doing so we can make a conscious freewill decision to live in harmony with these principles and laws and not contravene them and therefore create self-inflicted suffering for ourselves and as I said once you start to talk about this you're definitely over the target because this is what has been occulted from the eyes of the general population this is what has been hidden and so the ad hominem attacks I'm expecting because people don't want this information readily available we'll pick this up on the other side and we'll start looking into the wisdom contained in the Kabbalah non on natural law principles they're listening to what on earth has happened don't go anywhere folks okay folks we're back I'm mark passio and this is what on earth is happening today on the show we're going to be talking about the general principles of natural law we're going to be reading excerpts from a tome of wisdom known as the Chi ba Lian and while it is a quite short book I call it a tone because there is so much contained so much information knowledge and wisdom contained in the Chi Bali on that one could probably read it for the rest of their life and not take it all in so on the show today I'll be reading the introduction and the first two chapters of this book and it's a hermetic book which means that it comes from an ancient tradition and again people have asked me before on the show what tradition am I a member of what belief system do I subscribe to just because I'm reading a book from the Hermetic tradition doesn't mean I consider myself a follower of Hermeticism or a her medicines per se I think this is part of the integral makeup of myself I take in wisdom from wherever it comes and take that into myself and then act upon it and that's what my tradition is for lack of a better term is it is an integral one that is based on wisdom it doesn't matter where that wisdom happens to come from because my consciousness is not in a box like followers of religions are see followers or religion will be the first to attack anything that if I read something that comes from Buddhism like let's say the eight Noble Truths the Four Noble Truths I'm sorry or the Eightfold Path of Buddhism okay really four zuv Islam may attack that we're followers of Christianity may attack that because they won't actually endeavor to listen to the wisdom contained in it it's not in keeping with their dogma or their doctrine because that's all religion is it's a system of control that has been set up to hold people back from a deep integral understanding of truth specifically of natural law because the understanding of natural law is what truly creates order not only understanding it but living within its boundaries because these are boundary conditions that the Creator put into place for our betterment it is not a prison system as some people seem to think when you talk about natural law gravity just exists nature put it there it's not a prison system that things fall to the ground when they're released you can think of it like that go right ahead that doesn't make it the case but it is the case that that law is in effect so if you want to live in harmony with that law don't go up to high places and leap off thinking that you're going to be free from it you're not you're bound by it it's in effect the end get as upset about it as you like somebody suggested to make some t-shirts with that phrase on it for the show it's true though people want to rage against what is that's really the only thing that's creating a lot of suffering here and religion is one of those things that makes people rage against what is they want things to conform to their belief system and when it comes to natural laws we've already said belief is irrelevant what religionists are doing is they're looking for someone to come and save them from themselves because they don't want to understand natural law they want to remain in ignorance of it and think that they can prosper and all that is is it that equates to the abduction of personal the abdication of personal responsibility they don't want the responsibility of truly expanding their consciousness and coming to an understanding of the laws that are inherent in nature they somehow want to run away from that and yet think that good things will look just magically happened to them or someone will come down and save them from themselves when through their ignorance they've created the exact situation that they're in see I started the entire subject on natural law as the first and most important solution we're not looking at the deep problem anymore see because you could talk about that until you're blue in the face and people will continue to want you to talk about that though they want you to continue to go on and on and on describing the cage that you're in let me describe the ball ours the material that they're made of the floor oh I can describe myself so well but when someone with a lot of wisdom comes along to try to hand them the key to their prison cell the ignorant will slap it out of their hands like they're a costing member with a weapon instead of attempting to graciously take it in they're ignorant and in their darkness and say maybe it is me that I need to improve maybe it is my understanding that I need to expand my consciousness that I need to expand and this is a key this is a master key to do just that no they slap it out of the hand of the person who is attempting through love through higher consciousness to come in and hand them the key to their own cell and that's because of the house slave the house slave loves it in their cage they love it in their cage they don't want to go anywhere because stepping outside of that little confine that that boundary of the mind requires responsibility and that that's the last thing they want it also requires maybe a deep introspection and maybe even seeking knowledge and that might require reading god forbid god forbid so the ignorant always attempt to slap away the key right out of your hand that you're attempting to give them and they'll come with ad hominem attacks and guess what that's okay let them because the truth is going to be spoken no matter what happens and it's going to exist no matter what happens nobody coming with ad hominem attacks to anyone attempting to convey truth is going to change truth that's why they'll always ignore the issue and take this um this uh obfuscation method to try to derail the actual issue at hand and get people to focus on a person or an event and they'll always say oh that doesn't come from my tradition therefore it needs to be ignored limitation that's what lack of consciousness is that's what ignorant is refusing to look at what is right in front of us and it's all based on the same thing fear always based in fear so let's start today looking at the principles of natural law in depth and I'm going to start with the introduction to the book known as the Chi ba Lian okay and we'll continue this through breaks because it'll it'll probably take a few segments to get through this material so bear with me through the breaks the Chi ba Lian is written by three initiates and of course this is because number three is a sacred number three aspects to the consciousness okay there's always three involved in everything thought emotion and action mother father child father son spirit etc the Trinity is a very crucial concept in all of health is it okay it represents thesis meeting antithesis to create synthesis we'll be right back after these messages folks don't go anywhere okay folks we're back this is what on earth is happening I'm mark passio my web site what on earth is happening calm today on the show an introduction to the general principles of natural law through a book of wisdom from the Hermetic tradition known as the Cavalli on written by three initiates and as I was saying before the break this is symbolic it represents the three aspects of consciousness thought emotion and action it represents the three parts of the brain it represents the sacred Trinity of Father Son Spirit or as it really should be look look that father of mother and child the three steps of initiation entering passing and mastering okay you can go on and on three is a sacred number in just about every tradition out there every a tradition of wisdom out there also seven is a sacred number seven chakras okay you have seven basic principles of natural law etc it's a sacred number in a lot of different traditions you put three and seven together you have the ten okay the ten set your oath of the Kabbalistic tree all right the one in the zero the the male and female archetype scumming together the chalice and the blade as it has been called okay the phallus and the womb etc all art types and that's why these numbers are chosen okay they're very significant symbolically and they correspond to many different things so we're going to look at the seven principles of how natural law is actually created in the world today and we're going to do this by again looking at the introduction and the first two chapters of the Chi ba Lian and again Chi ba Lian and they'll say in here that they don't really know the origin of the term it is my understanding that this basically means the essence of the spirit of light the spirit or essence of those of the light of high-level knowledge and wisdom that's what this basically means the spirit of that the essence of that okay and that's really what this is it's attempting to convey wisdom ancient wisdom and wisdom is something that if followed if listened to and then incorporated into action can create harmony and order if it is ignored chaos results so here we go the introduction to the Cavalli on we take great pleasure in presenting to the attention of students and investigators of the secret doctrines this little work based upon the world old hermetic teachings there has been so little written upon this subject notwithstanding the countless references to the teachings in the many works upon ocultism that the many earnest searchers after the arcane truths will doubtless welcome the appearance of the present volume the purpose of this work is not the enunciation of any special philosophy or doctrine but rather is to give the students a statement of the truth that will serve to reconcile the many bits of occult knowledge that they may have acquired but which are apparently opposed to each other and which often serve to discourage and disgust the beginner in the study our intent is not to erect a new temple of knowledge but rather to place in the hands of the student a master key with which he may open the many inner doors in the temple of mystery through the main portals he has already entered there is no portion of the occult possessed by the world which have been so closely guarded as the fragments of hermetic teachings which have come down to us over the tens of centuries which have elapsed since the time of its great founder Hermes Trismegistus the quote scribe of the gods unquote who dwelt in old Egypt in the days when the present race of men was in its infancy contemporary with Abraham and if the legends be true an instructor of that venerable sage Hermes was and is the Great Central Sun of ocultism whose rays have served to illuminate the countless teachings which have been promulgated since his time all the fundamental and basic teachings embedded in the esoteric teachings of every race may be traced back to Hermes even the most ancient teachings of India undoubtedly have their roots in the original hermetic teachings from the lands from the land of the Ganges many advanced occultus wandered to the land of Egypt and sat at the feet of the master from him they obtained the master key which explained and Reckitt reconciled their divergent views and thus the secret doctrine was firmly established from other lands also came the learned ones all of whom regarded Hermes as the master of masters and his influence was so great that in spite of the many wanderings from the path on the part of the centuries of teachers in these different lands there may still be found a certain basic resemblance and correspondence which underlies the many and often quite divergent theories entertained and taught by the occultists of these different lands today the student of comparative religions will be able to perceive the influence of the hermetic teachings in every religion worthy of the name now known to man whether it be a dead religion or one in full vigor in our own lifetimes there is always a certain correspondence in spite of the Contra three features and the Hermetic teachings acts as the great reconciler the life work of Hermes seems to have been in the direction of planting the great seed truth which has grown and blossomed in so many strange forms rather than to establish a school of philosophy which would dominate the world's thought but nevertheless the original truths taught by him have been kept intact in their original purity by a few men in each age who who refusing great numbers of half-developed students and followers follow the hermetic custom and reserved their truth for the few who were ready to comprehend and master it from lip to ear the truth has been handed down among the few there have always been a few initiates in each generation in the various lands of the earth who kept alive the sacred flame of the hermetic teachings and such have always been willing to use their lamps to relight the lesser lamps of the outside world when the light of truth grew dim and clouded by reason of neglect and when the wicks became clogged with foreign matter there were always a few to tend faithfully to the altar of truth upon which was kept alight the perpetual lamp of wisdom these men devoted their lives to the labor of love which the poet has so well stated in his lines oh let the flame let not the flame die out cherished age after age in its dark cavern in its holy temples cherished fed by the pure ministers of love let not the flame die out these men have never sought popular approval nor numbers of followers they are indifferent to these things for they know how few there are in each generation who are ready for the truth and who would recognize it if it were presented to them they reserved the strong meat for men while others furnish the milk for babes they reserved their pearls of wisdom for the few elect who recognize their value and who wear them in their crowns instead of casting them before the materialistic vulgar swine who would trample them in the mud and mix them with their disgusting mental food it's a good place to leave it for now think on that during the break we'll be right back folks don't go anywhere you're listening - what on earth is happening [Music] we're back folks this is what on earth is happening I'm your host Mark Hasse oh my website what on earth is happening calm let's get right back into we were reading from the Cavalli on an introduction to natural law principles you can look at it as and the writers of this little book we're talking about how the principles of the Hermetic tradition over time have always been taught to people in small numbers because the vast bulk of humanity has not really been ready to receive these teachings because they're so calcified in ego I agree with that I personally don't agree with have the extent that these teachings have been kept secret I have my viewpoint on the very many different reasons why that was done one is because let's face it people killed people for even talking about this in the past okay for talking about the wisdom that we're going to be explaining which is about the workings of nature okay and to is because this tradition itself like all the other mystery traditions was basically taken over by people who were deeply in ego and then used as a weapon against people who they knew didn't have this knowledge that's the case today the d'arco cultists rule and they rule because they've set up a power differential through a knowledge differential that's it believe that or don't that's how it is so let's get back to the reading these men have never sought popular approval nor numbers of followers they are indifferent to these things for they know how few there were in each generation who are ready for the truth or who would recognize it if it were presented to them they reserved the quote strong meat for men unquote while others furnish the quote milk for babes unquote they reserved their pearls of wisdom for the few elect who recognize their values and who would wear them in their crowns instead of casting them before the materialistic vulgar swine who would trample them in the mud and mix them with their disgusting mental food but still these men have never forgotten or overlooked the original teachings of Hermes regarded regarding the passing on of the words of truth to those ready to receive it which teaching is stated in the Chi ba Lian as follows quote where fall the footsteps of the master the ears of those ready for his teachings open wide and again quote when the ears of the student are ready to hear then cometh the lips to fill them with wisdom but their customary attitude has always been strictly in accordance with the other hermetic aphorism also in the Chi Bali on quote the lips of wisdom are closed except to the ears of understanding there are those who have criticized this attitude of the Hermit assist and who have claimed that they did not manifest the proper spirit in their policy of seclusion and reticence but a moment's glance back over the pages of history will show the wisdom of the Masters who knew the folly of attempting to teach to the world that which it was neither ready or willing to receive the her medicines have never sought to be martyrs and have instead sat silently aside with a pitying smile on their closed lips while the heathen raged noise noisily about them in their customary amusement of putting to death and torture the honest but misguided enthusiasts who imagined that they could force upon a race of barbarians the truth capable of being understood only by the elect who had advanced along the path and the spirit of persecution has not yet died out in the land there are certain hermetic teachings which if publicly promulgated would bring down upon the teachers a great cry of scorn and revile meant from the multitude who would again raise the cry of crucify crucify in this little work we have endeavored to give you an idea of the fundamental teachings of the Chi ba Lian striving to give you the working principles leaving you to apply them yourselves rather than attempting to work out the teachings in detail if you are a true student you will be able to work out and apply these principles if not then you must develop yourself into one for otherwise the hermetic teachings will be as words words words to you so that's the introduction to the book and I'd like to comment on a few things the first is the phrase the lips of wisdom are closed except to the ears of understanding yes this may most certainly be true that in the past people have decided I'm not even going to bother to attempt to communicate deep spiritual truths to people who basically show a complete disregard for such things and are completely trapped in materialism but the problem is we never lived in a time that is as dangerous and critical as we do right now where not only are these people who are refusing to accept these spiritual insights and jewels of wisdom have basically grown in such numbers but and and they're they basically fill every continent every land that there is on the earth that the earth is in complete utter darkness the problem is it has gotten so systemic that it's to the point where we have become capable of destroying the earth and these teachings along with it at least here of course they exist these teachings is exist throughout the universe but on this planet there we're at a time where the world is so dark that we could easily destroy this planet in our ignorance and mind-control and complete disregard for natural law principles disregard for the rights of others disregard for the planet itself so I don't agree with the concept that these teachings should still be kept for the quote elect this is separatist thinking this is um dualistic thinking there is no elect there are only people here who are suffering and as I've said many times on the show as one suffers all suffer so maybe in the ego of some of these so-called adepts or masters they didn't really fully weed that out they didn't they didn't really fully weed the ego out to the point where they understood this wisdom needs to be continuous spoken no matter what the circumstances are no matter what it means for the person who's speaking it I think you can only think that way if you're still a little too attached to the materialistic I'm going to speak the truth regardless of what happens to my body the end stop that the idea is going to be out there it's going to be seated that part I do agree with this is planting the great seed truth that's what this is but the part about keeping your mouth closed to those who even don't want to hear it absolutely not I I won't accept that maybe that makes me someone who like they say is in folly because you're wanting to bring the pearls before the swine well I'm not the judge of that I'm tasked with speaking it that's it those who will receive it will receive it those who won't will continue to suffer and unfortunately they're still creating suffering for people who have received this wisdom and want to see it propagated to the ends of the earth because it's the only key that can get us out of the mess that we're in it's the only key for the locks on all these doors symbolically that we've put in place we've erected our own cage we've put all the walls up we've put all the doors up all the bars up and we've had locked and shut ourselves inside and then we're going to pray to the gods to come and save us that we've invented and then not even we've invented that dark occultists have invented to keep us from actually doing something to break out of our own self-inflicted prison cells we'll be right back folks you listen to what on earth is happening here on the Oracle Broadcasting Network on the other side of the break I'll read the reading chapter one of the tribe ollie on which begins the explanation of the heart okay we're back on what on earth is happening I'm your host mark passio we're looking at the little book of wisdom known as the Chi ba Lian which explains a lot of the general principles of natural law and if deeply understood is deeply integrated into oneself someone can radically change their entire worldview through this philosophy okay and you could do that through a number of different traditions out there this isn't the only one but I think it probably does one of the best jobs at explaining the principles of natural law which is why I'm reading it during this section of the show we're going to spend many more weeks on natural law probably at least again five six maybe seven more weeks I'm going to really break this down slowly so that people have an opportunity to quote get it and in doing so what I really hope to accomplish is to build a firm foundation for what our rights are what our rights are not this is what we ultimately need to get down to the understanding of because all of the things that are going on on on the earth come down to that basic principle people in general do not know what behaviors under natural law they can take which lead to order versus what behaviors they take which through their contradiction to natural law lead to chaos that's it that's why we're creating so much chaos here folks we don't understand what our rights are we don't understand the difference between right and wrong that's as sad as that is that's the actual reality that we are living in so let's move on to chapter 1 of the Chi ba Lian which begins the explanation of the Hermetic philosophy okay here we go quote the lips of wisdom are closed except to the ears of understanding unquote from old Egypt have come the fundamental esoteric and occult teachings which have so strongly influenced the philosophies of all races nations and peoples for several thousand years Egypt the home of the pyramids and sphinx was the birthplace of the hidden wisdom and mists teachings from her secret doctrine all nations have borrowed India Persia Shadia Medea China Japan Assyria ancient Greece and Rome and other ancient countries partook liberally at the feast of knowledge which the heirophant and masters of the land of Isis so freely provided for those who came prepared to partake of the great store of mystic and occult lore which the masterminds of that ancient land had gathered together in ancient Egypt dwelt the great adepts and masters who have never been surpassed and whom who seldom have been equaled during the centuries that have taken their processional flight since the days of the great hermes in Egypt was located the great Lodge of lodges of the Mystics at the doors of her temples entered the neophytes who afterward as heirophant adepts and masters traveled to the four corners of the earth carrying with them the precious knowledge which they were ready anxious and willing to pass on to those who were ready to receive the same all students of the occult recognized the debt that they owe to these venerable masters of that ancient land but among these great masters of ancient Egypt there once dwelt one of whom masters hailed as the quote master of masters this man if quote man indeed he was dwelt in Egypt in the earliest days he was known as Hermes Trismegistus and I'm breaking in here for Mona folks Trismegistus simply means thrice great were great times three again there's that magic number of three again okay he was great in his thoughts his emotions and his actions he not only learned the truth he had compassion for others and then he acted upon his knowledge and his emotions so he wasn't in contradiction he was a unified being that's why they called him the master and again this may simply be symbolic of getting to that state of consciousness he may not have been an actual person Hermes Trismegistus as the Greeks as the Egyptians referred to him as Thoth described of the gods so going back to the reading he was the father of the occult wisdom the founder of astrology the discoverer of alchemy the details of his life story are lost to history owing to the lapse of the years although several of the ancient countries disputed with each other in their claims to the honor of having furnished his birthplace and this thousands of years ago the date of his sojourn in Egypt in that his last incarnation on this planet is not known but it has been fixed at the early days of the oldest dynasties of Egypt long before the days of Moses the best authorities regard him as a contemporary of Abraham and some of the Jewish traditions goes so far as to claim that Abraham acquired a portion of his mystic knowledge from Hermes himself as the years rolled by after his passing from this plane of life tradition recording that he lived 300 years in the flesh the Egyptians deified Hermes and made him one of their gods under the name of Thoth years later the ancient the people of ancient Greece also made him one of their many gods calling him Hermes the god of wisdom the Egyptians revered his memory for many centuries yes tens of centuries calling him quote the scribe of the gods and bestowing upon him distinctively his title this which means the thrice-great the great great or the greatest great etc in all the ancient lands the name of Hermes Trismegistus was revered the name being synonymous with the quote fount of wisdom even to this day we use the term hermetic in the sense of secret sealed so that nothing can escape etc and by this reason of the fact that the followers of Hermes always have observed the principle of secrecy in their teachings they did not believe in quote casting pearls before swine but rather held to the teaching milk for babes meat for strong men both of which Maxim's are familiar to the readers of the Christian scriptures but both of which had been used by the Egyptians for centuries before the Christian era and this policy of careful dissemination of the truth has always categorized the hermeticism even unto the present day the hermetic teachings are to be found in all lands among all religions but never identified with any particular country nor with any particular religious sect this because of the warning of the ancient teachers against allowing the secret doctrine to become crystallized into a Creed the wisdom of this caution is apparent to all students of history the ancient ocultism of India and Persia degenerated and was largely lost owing to the the fact that the teachers became priests and so mixed theology with the philosophy thus the result being that the ocultism of India and Persia has been gradually lost amid amidst the mass of religious superstitions cults creeds and quote gods I'm going to break in on top one more time because I'd like to say this is exactly how the dark occult was created these again knowledge were that this wisdom this body of wisdom was crystallized calcified into dogma into a creed of a set of rigid beliefs as opposed to simply an understanding of natural law principles that are in effect and put thereby create or in other words science is what we're talking about here ladies and gentlemen science real science is what this tradition is ultimately about it degenerated into a religion because people in a lower state of consciousness gained access to it took took it over turned it into a religion and held the inner body the inner core or esoteric part of this knowledge for themselves and that's what the dark occult is okay so continuing so it was with ancient Greece and Rome so it is so it was with the hermetic teachings of the Gnostics and early Christians which were lost at the time of Constantine whose iron hand smothered philosophy with the blanket of theology losing to the Christian Church that which was its very essence and spirit and causing it to grope throughout several centuries before it found the way back to its ancient faith the indications apparent to all careful observers in this 20th century being that the church is now struggling to get back to its ancient mystic teachings we'll hold it right there pick it up on the other side of this break don't go anywhere folks you are [Music] we're back folks this is what on earth is happening I'm mark casio my website what on earth is happening dot-com we're talking about the general principles of natural law on the show today and we're reading from the Cavalli on a book of hermetic wisdom passed down through the generations and basically containing in it a fairly deep conveyance of the principles of natural law and reading the from the first chapter it's talking about the degeneration of this body of knowledge into religion okay when it became calcified and when people were looking to basically set it up as a mechanism of control so that they can prosper at the expense of other people keep them in the dark get them to subscribe to a rigid set of beliefs and that's exactly how some of this knowledge has been used this is the knowledge that the dark occult does have that they're using against other people and that doesn't mean we should not learn it study it recognize the truth in it and then put that into practice in the right way meaning according to natural law principles according to our rights not toward the usurpation of the rights of people on this planet like it has been being used and regarding this most people will fall into the mind-control methodologies of well that's a cult and that's evil all that occult means evil no that's mind control through words a cult means hidden as we've said a billion times and we'll probably have to say ten trillion more before people finally get that the occult the body of occultism has been hidden from people in order to control them and then called evil so that you never look into how you're being controlled and yet people will still fall for it they'll still fall for that because their religion tells them that I'd like to read a quote this was posted by someone in the chat room last week a quote from Alexander Pope British author who said that a little knowledge is a dangerous thing drink deep or taste not the piri piri inspring they're shallow drafts intoxicate the brain and drinking largely Sobers us again what he's saying here is the people who think they have all figured out about what the New World Order is all about and haven't really gone far enough into understanding that it's all a ruse all of the systems of limitation and controller all a ruse there to get you not to take action not to actually take your rights under natural law regardless of who's trying to usurp them and actually stop the usurpers from doing what they have no right to do as Nazis that's what they are that's what they've always been regardless of what time period in history we're talking about or what place we're talking about and the people who think they have this totally figured out and who have refused to look into the occult that's what I I would that's a perfect thing that I would say applies to them they drink shallow drafts and their brains are intoxicated by that little bit of learning or that little bit of knowledge that they've taken in and they think they have the whole picture when they're still operating from a completely controlled paradigm that's put there by the very people that that are still controlling them and they think they're going to get outside of that cage they think they're somehow going to develop freedom in that kind of a system of mental bondage good luck with that let me know how that works out for you as the end of this short segment we'll pick up the reading of the Cavalli on 6 to 6 liberty stickers calm the world's most dangerous stickers okay folks were back on what on earth is happening continuing with our reading from the Cavalli on we were talking about how this ancient body of knowledge had degenerated into religion and how that ultimately became dark occult I'm going to pick it up here we go but there were always a few faithful souls who kept alive the flame tending it carefully and not allowing its light to become extinguished and thanks to these staunch hearts and fearless minds we have the truth still with us but it is not found in books to any great extent it has been passed along from master to student from initiate to Hierophant from lip to ear when it was written down at all its meaning was veiled in terms of alchemy and astrology so that only those possessing the key could read it a right this was made necessary in order to avoid the persecution of the theologians of the Middle Ages who fought the secret doctrine with fire and sword steak gibbet and cross even to this day there will be found a few reliable books there will be found but few reliable books on hermetic philosophy although there are countless references to it in many books written on various phases of occultism and yet the hermetic philosophy is the only master key which will open all the doors of the occult teachings in the early days there was a compilation of certain basic hermetic doctrines passed on from teacher to student which was known as the Cabal Eon the exact significance and meaning of the term having been lost for several centuries this teaching however is known to many to whom it has descended from mouth to ear on and on throughout the centuries its precepts have never been written down or printed so far as we know it was merely a collection of Maxim's axioms and precepts which were non understandable to outsiders but which were readily understood by students after the axioms Maxim's and precepts had been explained and exemplified by the hermetic initiates to their neophytes these teachings really constituted the basic principles of the art of hermetic alchemy which contrary to the general belief dealt in the mastery of mental forces rather than material elements the transmutation of one kind of mental vibrations into others instead of the changing of one kind of metal into another the legend of the Philosopher's Stone which could turn base metals into gold was an allegory relating to hermetic philosophy readily understood by all students of true hermeticism in this little book of which is the first lesson we invite our students to examine into the hermetic teachings as set forth in the Chi ba Lian and as explained by ourselves humble students of the teachings who while bearing the title of initiates are still students at the feet of Hermes the master we here in give you many of the Maxim's axioms and precepts of the Chi ba Lian accompanied by explanations and illustrations which we deem likely to render the teachings more easily comprehended by the modern student particularly as the original text is purposely veiled in obscure terms the original Maxim's axioms and precepts of the Chi ba Lian are printed here in in quotation marks the proper credit being given our own work is printed in the regular way in the body of the work we trust that the many students to whom we now offer this little work will derive as much benefit from the study of its pages as have the many who have gone on before treading the same path mastery throughout the centuries that have passed since the time of Hermes Trismegistus the master of masters the great great in the words of the Chi Bali on quote where the footsteps of the wear fall the footsteps of the master the ears of those ready for his teachings open wide the Chi ba Lian and quote when the ears of the student are ready to hear then cometh the lips to fill them with wisdom and quote the Chi Bali on so that according to the teachings the passage of this book to those ready for the instruction will attract the attention of such as are prepared to receive the teaching and likewise when the pupil is ready to receive the truth then will this little book come to him or her such as the law the hermetic principle of cause and effect in its aspect of the law of attraction will bring lips and ears together pupil and book in company so mote it be so what they're basically saying is what I was talking about last week that there's a legend that goes along with this book that it comes to those who are ready to receive its teachings and the people who will actually hear and take this seriously and then act upon the wisdom that's contained in this book will are those who were ready to receive it so it's as if this book finds you you don't find this book and as I said that certainly was the case for me when I was ready to receive it it found me and it found me through my partner barb so let's move on to chapter 2 of this deep piece of wisdom about natural law in which the natural law principles are going to be outlined and then explained in short and then I'll comment upon those explanations so this is chapter 2 known as the the seven hermetic principles that's the title of this chapter quote the principles of truth are seven he who knows these understandably possesses the magic key before whose touch all the doors of the temple fly open end quote the Cavalli on the seven hermetic principles upon which the entire hermetic philosophy is based are as follows one the principle of mentalism to the principle of Correspondence three the principle of vibration for the principle of polarity five the principle of rhythm six the principle of cause and effect seven the principle of gender these seven principles will be discussed and explained as we proceed with these lessons a short explanation of each however may as well be given at this point so now they're going to begin the short explanations and I'll pause after each one to comment upon each one one the principle of mentalism quote the all is mind the universe is mental end quote this principle embodies the truth that quote all is mind unquote it explains that the all which is the substantial reality underlying all the outward manifestations and appearances which we know under the terms of the material universe the phenomena of life matter energy and in short all that is apparent to our material senses is spirit which in itself in itself is unknowable and undefinable but which may be considered and thought of as a universal infinite living mind it's a good place to pause and ponder those work [Music] [Music] welcome back folks we were looking at the first general principle of natural law the principle of mentalism I'm going to go back to the reading in the Chi ba Lian that explains this principle this principle embodies the truth that all is mind it explains that the all is spirit which in itself is unknowable and undefinable but which may be considered and thought of as a universal infinite living mind it also explains that all the phenomenal world or universe is simply a mental creation of the all subject to the laws of created things and that the universe as a whole and in its parts or units has its existence in in the mind of the all in which mind we live and move and have our being ok I'm going to read that sentence again because it's so important ok it also explains that all the phenomenal world or universe is simply a mental creation of the all subject to the laws of created things and that the universe as a whole and in its parts or units has its existence in the mind of the all in which mind we live and move and have our being this principle by establishing the mental nature of the universe easily explains all of the varied mental and psychic phenomena that occupy such a large portion of the public attention and which without such explanation are non understandable and defy scientific treatment an understanding of this great hermetic principle of mentalism enables the individual to readily grasp the laws of the mental universe and to apply the same two is well being an advancement the Hermetic student is enabled to apply intelligently the great mental laws instead of using them in a haphazard manner with the master key in his possession the student may unlock the many doors of the mental and psychic temple of knowledge and enter the same freely and intelligently this principle explains the true nature of energy power and matter and why and how all these are subordinate to the mastery of mind this is why we've gone through so much trouble explaining mind control folks because all of the external manifestations are ultimately created in the mind and if the mind is controlled what is created will be controlled by those who have the knowledge on how to control the mind that's why I just spent a year and a half talking about mind control ok back to the reading as a matter of fact let me read that sentence again because it's so important with the master key in his possession the student may unlock the many doors of the mental and psychic temple of knowledge and enter the same freely and intelligently the principle of mentalism explains the true nature of energy power and matter and why and how all of these are subordinate to the mastery of mind one of the old hermetic masters wrote long decades ago he who grasps the truth of the mental nature of the universe is well advanced on the path to mastery and these words are as true today as at the time they were first written without this master key mastery is impossible and the student knocks in vain at the many doors of the temple it's explaining there is only one being here at the highest fundamental level of creation the all call it God whatever you want to call we are exist within this spiritual construct and the spiritual construct gives rise to what we call matter through vibration which we're going to get to in a few moments we think that everything is separate this is this goes to the fundamental basic worldview that we hold is everything completely separate from everything else which leads to materialism which leads to us versus them mentality which leads to the non understanding that as we're doing to someone else we're doing to us because there is no separation at the highest level this is one being having an experience that's why it's called a universe one being experiencing something a change of great change from verse re in Latin meaning to change and yeah I understand it means to turn but that doesn't mean like physical turning it means turning into something else changing like the seasons turn one change the universe the all a spiritual construct that exists in mind this is the mind of God call it whatever you want again that force what that force is you're not going to know in as the a monad a individual unit of consciousness the all knows that what it actually is that's that's what it's doing it's gaining more experience of what it actually is that's why it's going through this one change called the universe its acquiring more knowledge of itself just as that's what our goal should be if we want to reflect the divine we need to acquire more knowledge of ourselves because we're going so far away from the the source the actual true divine mind we're descending deeper and deeper into materialism barbarism and real chaos as a people as a species because we think we know it all because we knows so many things that we think we know about science we have all this knowledge quote-unquote and very little wisdom meaning how to actually apply that knowledge to create something that we really want to create for ourselves that truly serves us and doesn't act as a detriment to our evolutionary progress in consciousness because consciousness is often left out of this equation altogether oh it's all about more knowledge of the physical but never more knowledge of the mental realm of the psychological realm of the emotional realm no we want to run away from that we don't want to really look at that in ourselves and we certainly don't want to understand that we're always all connected to that infinite source in a one-to-one connection that doesn't require priests or intercessors or intermediaries of any kind no because we want to look at we want something to come and rescue us and save us from ourselves not to actually do any real work and transforming our own consciousness on our own to get up to a higher level of understanding god forbid that because that's called real work that's called really looking at oneself and humanity wants nothing to do with that as a species they want license they want license to ignore that work which is licensed to just completely abdicate personal responsibility and until we consciously decide to change that don't expect the external reality to change because it not change in a bit until we change the internal world of mind deeply understand that folks and trying to rage against that isn't going to make it any better [Music] learn prints know them well know how they operate know how our living in harmony with them and understanding them deeply leads to order photocopy of gardening in a failed economy from distributed living dotnet [Music] welcome back this is what on earth is happening and I'm your host mark Cassio my website what on earth is happening calm on this August 28th 2011 edition we are talking about the general principles of natural law specifically we've been discussing the principle of mentalism that the all is mind the universe is ultimately a mental construct of spirit and that mind that universal living mind is simply experiencing itself through this contract the deep understanding of this principle can go a long way toward breaking down a calcified materialist worldview if it is deeply deeply contemplated upon not just reading words it's what the warning in the beginning of the book is about if you're not willing to really do work with this material to integrate it it's all just words okay that's why this principle is so important first and foremost secondarily it is important because we need to understand that we through what we are taking into our minds and then acting upon our creating the circumstances of our experience here and that's great news nothing external is doing this to us we are doing this to us it's our choice we want this to change we have to we have to get enough people to the point of knowledge and understanding to say I do know how this works how these principles work I do know that this is our own creation and that we can make it into whatever we want and then do that that's called wisdom acting upon what you already know and understand and if you're you know at the point where all that this means that nothing can be no and there is no such thing as knowledge again good luck with that salsas Mbeki's Satanism and dark luciferianism this is actually one of their sins and one of the things that they want you to get they want to get you to accept above all else that nothing can be known well the people who don't know anything will never say no to anything think about that hey these words don't sound the same for no reason for you to actually use the word no you need to know something not think it or believe it or have heard about it somewhere you need to know it and your being in the core of your being that it's truth and there is such a thing as truth and it does exist and it is knowable and it can be integrated and and be made a part of us we are a part of it we're not ever really separate from it it's just we think we are just like we think we're a separate thing in creation when we're all integrated in it we live in it not not there's a creator and a creation it's all one thing how could the Creator be someplace else besides the end within the creation that would mean he's not it that force is not some place he/she/it it doesn't exist some place which it wouldn't be possible and people even make the argument all it's possible God can do anything it's all it's the all everything that means well the one thing it can't do is get outside of the all because it is the all this is but simple logic can tell you this even if you're not thinking about it from a right-brain perspective you want it from from the left-brain perspective excuse me but you want to see it from a ripe rain' perspective take a huge hit of DMT you'll see it from the right-brain perspective real fast how this is all one thing and how you're in it not a separate part of it you know people should approach that with reverence as well but they don't think it's a toy we'll get to that as one of our you know practical methodologies for getting outside of the deeply imbalanced consciousness entheogens in a very conscious context much later in our solutions that's one of the later solutions in the ten solutions that I generally propose this outline in natural law is is the master solution it encompasses all of the other ones because if you don't if you don't enact the other grassroots solutions in a deep understanding of natural law they're all in vain we're going to talk about methodologies for knowing things which have been have been hidden as well which is the Trivium method you know and again the Trivium and quadrivium together form seven there's that mystical number again just like seven principles of creation seven chakras seven days of creation etc there's a reason these numbers exist you have your methods and then you have your quantifying means the Trivium and the quadrivium so let's go back to looking at the principles outlined in the Chi ba Lian we talked about the importance of the principle of mentalism which is where we left off last week let's look at the principle of Correspondence now which is principle number two and I'm going to go back to the reading in the Chi ba Lian now here we go quote as above so below as below so above end quote this principle embodies the truth that there is always a correspondence between the laws and phenomena and phenomena of the various planes of being and life the old hermetic axiom ran in these words quote as above so below as below so above end quote and the grasping of this principle gives one the means of solving many a dark paradox and hidden secret of nature there are planes beyond our knowing but when we apply the principle of Correspondence to them we are able to understand much that would otherwise be unknowable to us this principle is of universal application and manifestation on the various planes of the mental of the material mental and spiritual universe it is a universal law the ancient her medicines considered this principle as one of the most important mental instruments by which man was able to pry aside the obstacles which hid from view the unknown it used its use even tore aside the veil of Isis to the extent that a glimpse of the face of the goddess might be caught just as a knowledge of the principles of geometry enables man to measure distance sons and their movements while seated in his observatory so a knowledge of the principle of Correspondence enables man to reason intelligently from the known to the unknown studying the Monad he understands the Archangel think about it folks the more we understand about the internal world the more we will understand about why what has been created in the external world is the way that it is the universe is self-similar across all scales it is consistent with itself across all scales and planes of being and why would it be otherwise nature exists in perfect order only the product of disease would create the level of imbalance and disorder that we have created here on this planet and this is what the fall of man is all about coming out of harmony with the natural law principles and the true understanding of mind and all and then through fear abandoning that understanding abandoning those principles and through that fear creating chaos here part of getting back to a truly ordered society involves on the understanding that that which is within is like to that which is without this is another way of stating the principle of correspondence meaning we are creating the external manifestation through how we live what we believe in think and then acting upon the the what's already in our mental and psychological makeup then acting upon that in the physical reality in which we operate it can be really said very simply I said this once to someone who responded I'll tell you what his response was after I tell you what I said to him this is somebody who I was trying to explain to him that we are creating the reality all around us that no one else is doing this to us and that as we think and peel internally in an act that's the kind of world we're going to get real simple I said to him people create the world here and his response was I have no idea what you live free or die radio with Lee Rogers the most dangerous talk show in America weekdays at 9:00 p.m. central on Oracle broadcasting [Music] but what on earth is happening under host park pass bill my website well owner of this happening.com today we've been talking about the general principles of natural law we've already gotten through two of them and perhaps all endeavor in this last segment to get through the the third and then we'll pick it off next week with prop principles on four through seven but I want to make a statement of about principle number two one end to really the principle of mentalism and correspondence which we've covered so far how great does it feel to know that our reality is simply a construct in which if we only endeavor to understand the laws which have basically made that construct and that we exist within we can have whatever we want whatever we wish to have we can make of this place whatever the the most wildest imaginings of our mind can endeavor to envision that as is actually phenomenal news we can make a paradise of this place not in ignorance though certainly not an ignorance of ourselves and the laws of nature not going to happen but how great is it to know that that's how this place is constructed that it's not going to say no to us no matter what we want to create now conversely how sad is it to realize this is what we've made with what we've been given because we have rejected our responsibilities as stewards of this planet and as stewards of each other as our own caretakers and we want somebody else to come in and take care of us we don't want to take care we don't want to have care in our hands and actually have to use that in a responsible way we want to give it to someone else because care is that inner child that's why they cremate care at Bohemian Grove as the child they want people to continue to sacrifice their personal responsibility they don't want you to have care to take care they want to kill care and unfortunately the rejection of these principles exactly represents that murdering the child within us murdering true care because that's the ultimate generative principle that binds all of the other principles of natural law they are all encompassed within the generative principle that's why when you see the seed of life pattern or what is known as the genesis pattern okay there are seven circles within it and then it is contained within the all-encompassing one circle the eighth circle again eight representing infinity or something that is hermetically sealed that's the generative principle the principle of creation all of these laws all these principles have to do with how we are creating our reality that's what this entire show is all about so what I said on day one what this show would be about explaining the causal principles the causal factors that underlie why we're experiencing what we're experiencing or in other words how we're creating exactly what we're getting it's good news folks regarding the principle of Correspondence let's see if I can remember this quote from the New Testament Jesus is or maybe it I don't think it's from the New Testament it's from one of the Gnostic Gospels I believe I think it's from the Gospel of Thomas he says if you bring forth that which is within you that which is within you will save you but if you do not bring forth that which is within you that which is that which you do not bring forth will destroy you this is a perfect reflection of the principle of Correspondence that which is within is like to that which is without if we go within understand that we're the ones creating this situation we can rearrange it and make of it whatever we want a paradise for ourselves if we choose yet people want to stay calcified in this old way of seeing the world seeing each other and being in this reality and therefore continue to create suffering for themselves and that's the definition of insanity and I quite frankly don't really understand it and I'm quite frankly tired of it of being subject to these people's ignorance because that's what it is the ignorant of this world are holding hostage the people that do understand these principles of creation this is a hostage situation folks consciousness is trying to evolve here and it's being held back against its will against its wishes and that's wrong that's wrong that's called taking something that you're not allowed to take the freedom of some of a being of a consciousness to move forward and not have to deal with the crap that we've created here as a species all because we don't want personal responsibility that's why religion exists ladies and gentlemen people want to still put things in a box and say oh if this person is reading something from this tradition that makes it automatically even and distrust you know I don't want to trust that person or this is you know people shouldn't be listening to this never actually wanting to hear any of the wisdom that's contained in it about why the world is the way that it is so they can sit step back and say oh that's not my problem that's not my doing that's exactly your doing exactly the people that don't want to understand how these principles work are the people who are making this world the way it is get over it that's how it works folks so let's look at principle number three and then we'll wrap it up there if we get through it and we'll continue with the next four next week principle number three from the Chi ba Leon is known as the principle of vibration nothing rests everything moves everything vibrates this principle embodies the truth that everything is in motion everything vibrates nothing is at rest facts which modern science endorses and which each new scientific discovery tends to verify and yet this hermetic principle was enunciated thousands of years ago by the ancient masters of ancient by the Masters of ancient Egypt this principle explains that the differences between different manifestations of matter energy mind and even spirit result largely from varying rates of vibration from the all which is pure spirit down to the grossest form of matter all is in vibration the higher the vibration the higher the position in the scale the vibration of spirit is at such an infinite rate of intensity and rapidity that it is practically at rest just as a rapidly moving wheel seems to be motionless and at the other side and at the other end of the scale there are gross forms of matter whose vibration are so low as to seem at rest between these poles there are millions upon millions of varying degrees of vibration from corpuscle an electron atom and molecule to worlds and universes everything is in vibratory motion this is also true on the planes of energy and force which are but varying degrees of vibration and also on the mental planes whose states depend upon vibrations and even onto the spiritual planes an understanding of this principle with the appropriate formulas enables hermetic students to control their own mental vibrations as well as those of others the masters also study this principle - the conquering of natural phenomena in various ways he who understands the principle of vibration has grasped the scepter of power says one of the old writers if you understand this principle and it has been knowledge you've taken the knowledge in but have not converted it into wisdom and then you're using it as a weapon that's exactly how the dark occultists accomplished what they do on this planet it's called mind control frames if you want to stay in these principles and yet you're at a low level of consciousness knowledge

What On Earth Is Happening Show #076

Topics: *General Principles Of Natural Law, Principle Of Polarity, Principle Of Rhythm, Principle Of Cause And Effect, Principle Of Gender, Morality, Right vs. Wrong*

freedom man that's what it's all about [Music] [Laughter] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law vehicle and all issues affect freedom of the people of Earth what on earth is happening word ever shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of truth and now here is your host mark Pascal welcome one and all you are listening to what on earth is happening right here on the oracle broadcasting radio network i'm your host mark passio my website what on earth is happening dot-com the network's website is oracle broadcasting com today is Sunday September 4th 2011 we have a good show lined up for you here today we are going to be continuing our ongoing discussion about the general principles of natural law right here on what on earth is happening today last week we began the breakdown of the hermetic principles or what I am terming the general principles of natural law these are ancient principles which come down to us over centuries in the mystical traditions of all lands and they embody the underlying factors that we really need to develop a deep education of if we are going to transcend the current human condition that we are in right now and have been trapped in for thousands of years last week on the show we looked at three of the seven general principles of natural law we took a look at the principle of mentalism which basically states that the universe and everything within it is derived from mind mind is all the universe is a mental construct it is a spiritual construct we're talking about mind capital m okay so everything is a spiritual construct for experience we took a look at the principle of Korus fondants that everything is connected and interrelated that the universe is self-similar across all scales of creation that the very very small or the microcosm is a simp as a reflection of the very very large the macrocosm where the term that which is above is light to that which is below comes from or that which is within is light to that which is without as we are individually within so we are creating the external experience that we call the manifested reality in which we live and we have to actually live in and experience that reality that we generated from within ourselves we took a look at the third general principle of natural law which is the principle of vibration that everything that exists is ultimately vibratory energy in different states of vibration that there is no solidity solid matter as such per se if there is simply different states of residents of vibratory resonating energy so we're going to continue to look into the principles the general principles of natural law over this show we'll be looking at the principle of polarity principle of rhythm the principle of cause and effect and the principle of gender that's coming up on this edition of what on earth is happening don't go anywhere folks we'll be right back [Music] we are back focusing listening to what on earth is happening I'm your host mark Fazio my website is what on earth is happening dot-com there you will find a couple of images that basically outline what we're going to be talking about here today it's the same port for images that I had posted here last week and it's they're just there to give people a general outline of the general principles of natural law so we're going to jump right in and start talking about the fourth general principle which is known as the principle of polarity and actually before we do that I'll give the call-in number I'm not going to take calls until the second hour I'm going to stay focused on really getting this information out there but if there's time in the second hour i'll take calls toward the the I guess the second half hour of the second hour of the show so here's the calling number for those who want to get in the queue calling number for the show is eight six six eight four one one zero six five once again the calling number eight six six eight four one one zero six five hopefully we'll have some time to get to a few calls and we I am going to ask people to limit the topic of discussion to natural law principles please that's what we're talking about here today and have been for the last couple of weeks and we'll be continuing to talk about this as the first major overall underlying solution to the problems that we're facing as a species so if you are going to call in please ask some questions or make some comments about the general principles of natural law or anything else that is related to natural law so here we go principle number four and the text that I'm going to be reading some excerpts from is known as the Chi ba Lian and we talked about this last week and the week before this is a general hermetic text that talks about the principles that underlie every that's basically what this text is all about it's very simple it's not very long it's probably about 50 pages in digital format something to that effect and if you own it in a hard hardback copy maybe about a hundred pages so this is not anything that's an extremely long or drawn-out discussion it's there to act as a primer for those who want to begin to grasp the principles that are always at work these are general principles that underlie natural law that are always at work whether we believe in them whether we understand them whether we accept them whether we want them to be in place or not they're in place they are inherent to creation so we are bound by these laws whether we like them or not that's completely irrelevant I'm attempting to explain how these laws function and operate so that if we want to get out of the levels of self-inflicted suffering that we are in as a species we can do this by bringing our actions into harmony with these principles if we decide to not do that we're going to continue to suffer and things are going to continue to become extraordinarily chaotic here on planet earth and in coming weeks I'll be getting into how the expressions of natural law function and essentially what that part of this discussion is all about is really delving deeply into the principle of polarity as it is connected with the principle of cause and effect these are probably the two overarching lis the two most powerful and critical to understand in in the seven okay and if we don't understand how the basic polarities function and how us choosing them and embodying them ultimately gets us the result that we want through the law of cause and effect we generally understand nothing all right so the on the expressions of natural law really goes a long way to helping us understand how these two principles work in conjunction with each other and it's very interesting to note that there's a lot of people who are interested particularly in the principle of polarity an interesting side note is that the number one search term that gets people to my website at what on earth is happening calm you know the traffic to my site if you look at some of the analytics about it aren't um generated by people linking to the site they're generated by people searching for certain concepts and ideas that are contained in the material that's on the site and then finding it that way and the number one search term that drives people to the what on earth is happening website is polarity I was as surprised as anyone else to learn this but it shows you that people have an idea that these principles and laws actually do govern what's really going on here and understanding them is the utmost thing that we can do to towards bringing about a resolution a solution to the problems that we're facing so let's jump into principle number four and the readings when I read quotes are from the Hermetic text known as the Chi ba Leon which is actually posted to my website I believe it's under podcast number 73 you can find a PDF copy of the Kabbalah on so principle number four the principle of polarity quote everything is dual everything has poles everything has its pair of opposites like and unlike are the same opposites are identical in nature but different in degree extremes meet all truths are but half-truths all paradoxes may be reconciled the Chi ba Lian now I'm quoting from the Chi ba Lian once again and this is their the initiative out this book this is their assessment of this general principle this principle embodies the truth that quote everything is dual everything has two poles everything has its pair of opposites all of which were old hermetic axioms it explains the old paradoxes that have perplexed so many which have been stated as follows quote thesis and antithesis are identical in nature but different in degree opposites are the same differing only in degree the pairs of opposites may be reconciled extremes meet everything is and isn't at the same time all truths are but half-truths every truth is half false there are two sides to everything etc etc etc it explains that in everything there are two poles or opposite aspects and that quote opposites are really only the two extremes of the same thing with many varying degrees between them to illustrate heat and cold although quote opposites are really the same thing the difference is consisting merely of degrees of the same thing look at your thumb thermometer and see if you can discover where heat terminates and cold begins there is no such thing as absolute or absolute cold the two terms heat and cold simply indicate varying degrees of the same thing we'll pick this up on the other side of this break you're listening to what on earth is happening right here all the way through welcome back folks this is what on earth is happening and I'm your host mark Basia we're talking about the general principles of natural law we were reading from the Kavali on on the principle of polarity I'm going to pick up the reading they were talking about fact that opposites are really only two extremes of the same thing and they have varying degrees in between them and we left off talking about they were giving an example of temperature heat and cold so it said look at the thermometer and see if you can discover where he terminates and cold begins there is no such thing as quote absolute heat or quote absolute cold the two terms heat and cold simply indicate varying degrees of the same thing and that same thing which manifests as heat and cold is merely a form variety and rate of vibration so heat and cold are simply the two poles of that which we call heat and the phenomenon the phenomenon attended there upon are manifestations of the principle of polarity the same principle manifests itself in the case of light and darkness which are the same thing the difference consisting of varying degrees between the two poles of the phenomena where does darkness leave off and light begin what is the difference between large and small between hard and soft between black and white between sharp and dull between noise and quiet between high and low between positive and negative the principle of polarity explains these paradoxes and no other principle can supersede it the same principle operates on the mantel plane let us take a radical and extreme example that of love and hate two mental states apparently totally different and yet there are degrees of hate and degrees of love and a middle point in which we use the terms like or dislike which shade into each other so gradually that sometimes we are at a loss to know whether we like or dislike or neither and all are simply degrees of the same thing as you will see if you will but think a moment and more than this and considered of more importance by the Hermeticism it is possible to change the vibrations of hate to the vibrations of love in one's own mind and in the minds of others many of you who read these lines have had personal experiences in the involuntary rapid transition from love to hate and the reverse in your own case and that of others and you will therefore realize the possibility of this being accomplished by the use of will by means of the hermetic formulas good and evil are but the poles of the same thing and the Hermit assist understands the art of transmitting transmuting evil into good by means of an application of the principle of polarity in short the act of polarization becomes a phase of mental alchemy known and practiced by the ancient and modern hermetic masters an understanding of the principle will enable one to change his own polarity as well as that of others if he will devote the time and study necessary to master the art so that is the principle of polarity and what I would add to this my comment would be is that there is most certainly only one thing and degrees of it we can take light and darkness as an example as they did here and there's really no such thing as the dark there is only light or its absence it's the removal of the presence of light from a particular place is all the darkness is light is still all that exists there is no actual such thing as darkness it is an illusion based on the non presence of light energy in a particular space so the illusory quality is what I would add is that we only see polarities in place but really there's only one thing love and fear I've talked about as the two basic polarities but really there is only love there is only consciousness and its expansion in an illusory state of mind there is the presence of fear this is an illusion that needs to be recognized as such and that's a tall order saying that and doing that are two extremely different things talk about extremes saying and doing can be looked at as two opposite polarities extremes because it's really easy to say that fear is an illusion but actually removing it from your life such that you do not live in fear can be a tall order especially in a world like this that people who have bought into this illusory identification the world that they've made as a result of it can certainly make that a tall order but we need to understand really there is only the the absolute or the one thing and then there's just degrees from it that extend down from it okay knowledge and ignorance we can look at as another polarity well total knowledge is the mind of God which of course we aspire to we're probably not going to achieve that in human form all right but so we're all at different degrees of ignorance extreme ignorance the total refusal of truth and the total willingness to even acknowledge that there is any such thing as natural law principles that are in effect the total refusal to acknowledge that there is any such thing as the the underlying basis of matter being vibratory energy and these different differing degrees that we call polarities this is extreme ignorance okay it's just a degree of it but really there is only supreme knowledge that's all there really is everything else is just a veil over top of that and that's put there through different layers of fear different expressions of fear we're going to look at those expressions on a future show because if we understand how the two ultimate polarities love and fear work and how one is basically an illusion and what we create by choosing one or the other of those two polarities even though one is illusory it goes a long way toward understand toward helping us understand why we have created that which we have created here collectively again not as an individual this is this is a completely erroneous view of the law of attraction one individual does not make the collective reality we all make it together that's why it's a shared experience of what this world is just one person changing their thoughts isn't going to get the entire external manifested reality to change if anybody thinks that's how the law of attraction works the law of cause and effect works you're delusional enough Minds need to be changed this is why it's called a quantum effect quanta after the Latin word meaning amount quantum means amount in Latin or a degree okay so they're talking about transmuting evil into good by means of the application of the principle of polarity we can only do that once we truly deeply understand how this works we're going to look at that when we look at the expressions of natural law and I put that chart of the expressions up on the site week after week even though I'm not directly have not directly been talking about it for a reason I want people to continue to look at that to understand this is ultimately how it works and it's a one-way street codes you can only ever create good or ordered by using the true polarity which is love which is higher consciousness the expansive force of consciousness and you can only create [Music] okay everyone we're back this is what on earth is happening I'm your host mark passio we're talking about the general principles of natural law over the last few weeks here and we just took a look at the principle of polarity believe it or not the number one search term that drives people to the what on earth is happening website is polarity and it shows that there are people who are looking for answers who do understand that we live in a seemingly dualistic realm its dualistic at the level of manifestation but when you understand that behind all of that the dualism is illusory and it's illusory because people are falling away from an understanding and a deep introspection of the true self and in two different states of fear-based consciousness this is what all of the flagrant violations of natural law that we see around us are under lied by it underlying all of it at whatever level these violations of natural law happening there is fear always you'll hear the person who is breaking that natural law principle giving a justification saying but but what if but this but that and making projections into the future about what could happen if this were to be continued continuing to it be allowed to go to a car it's all fear based all fear the same thing for people who are okay with the kind of police state that we're moving into who think that this is for their protection or their safety all fear based consciousness because you have to be thinking protection from what what do you imagine the things that the imagination can bring up that can happen to you and in that dwelling that mind state of dwelling in fear that's how you give up your true self and ultimately how you give up your freedom which is why I continue to emphasize ultimately fear has to be overcome otherwise we can't create a better future it's not possible and that has to be done on a one-to-one basis that's an internal struggle that's internal warfare if you will because that battle takes place within the heart of each individual the heart and mind someone can show someone through example how to live good mental practices good emotional states a thirst for knowledge but ultimately they can't make them be like that someone has to make that decision to be in the world like that on their own so there's a one-to-one battle that takes place with fear within the hearts and minds of each individual and that's where that battle is won or lost so let's get back to the Chi ba Lian and it's breaking down of some of these general principles of natural law we're going to look at right now we're going to look at principle number five which is called the principle of rhythm so here we go quote everything flows out and in everything has its tides all things rise and fall the pendulum swing manifests in everything the measure of the swing to the right is a measure of the swing to the left rhythm compensates this principle embodies the truth that in everything there is manifested a measured motion to and fro a flow and inflow a swing backward and forward a pendulum like movement a tide like Evan flow a high tide and low tide between the two poles which exist in accordance with the principle of polarity described a moment ago there is always an action and a reaction an advance and a retreat arising and a sinking this is in the affairs of the universe sons worlds men animals mind energy and matter this law is manifest in the creation and destruction of worlds in the rise and fall of Nations in the life of all things and finally in the mental states of man and it is with this latter that the Hermit assists find the HAR medicines find the understanding of the principle most important the her medicines have grasped grasped this principle finding its universal application and have also discovered certain means to overcome its effects in themselves by the use of the appropriate formulas and methods they apply the mental law of neutralization they cannot annul the principle or cause it to cease its operation but they have learned how to escape its effects upon themselves to a certain degree by depending upon the mastery of the principle they have learned how to use it instead of being used by it in this and similar methods consist the art of the Hermit assists the master of hermetics polarizes himself at the point at which he desires to rest and then neutralizes the rhythmic swing of the pendulum which would tend to care him to the other pole all individuals who have attained any degree of self mastery do this to a certain degree more or less unconsciously but the master does this consciously and by the use of his will and attains a degree of poise and mental firmness almost impossible of belief on the part of the masses who are swung backward and forward like a pendulum this principle and that of polarity have been closely studied by the her medicines and the methods of counteracting neutralizing and using them for an important part of the part of the Hermetic mental alchemy ok so this is the principle of polarity everything has a rib sorry the principle of rhythm everything has a swing to it like the swing of a pendulum like tides on the ocean on the shore ok there is a back and forth and ebb and flow movement to everything so everything moves in what we could call cycles in cyclical movement in wave functions okay and high level physics will also tell you this everything is basically a wave function and embedded within this principle we could get into looking at cycles of time which also have their and flow and this is what they were talking about when it says that this principle very much applies to the mental states of man so it says with it is with this latter principle that the her medicines find the understanding of the principle of rhythm the most important in in the in the aspect of the mental states of man okay in the ancient Indian mystical systems they talked about the UGA's these great time cycles these periods of time when the consciousness of humanity would be much much more elevated than it is now and then over time it gradually fell into these illusory states which we see today and once again it will swing back up and people will become very much enlightened again and the true master depending on at the level of mastery that they have attained over self ok mastery of self is the degree which they can counteract this urban flow and remain in certain states of consciousness in other words you're not subject to this principle all right it's still in effect and there will still be a tendency for it to flow in a certain direction but if you have a certain degree of mastery over self in other words you can truly apply the will because you know the self well enough you can tend to overcome those tendencies toward one polarity or another I hope I'm making that clear doesn't mean the law is not still in effect it just means we can help ourselves to I guess you could say be free of its most harsh aspects [Music] [Applause] we're back folks this is what on earth is happening we're talking about the general principles of natural law they just finished covering in the last segment the principle of rhythm there's a couple more things I want to say about that principle specifically related to time you know this is one of the biggest applications of this principle that time is a wave function and it moves in seemingly cyclical patterns or at least something that's akin to a sine wave okay so it isn't necessarily that history repeats itself it's that the same I wouldn't say the same but similar circumstances present themselves at opportune moments throughout history and if we've we have the consciousness to recognize these patterns and say oh I recognize that I we've been here before because we can study the wisdom of the past and that helps us navigate this wave function much better than we could if we did know looking into the past and learning about what people experienced hundreds or thousands of years ago and understand it the same I guess you could say um opportunities are presenting themselves now just like they did at past times we shouldn't look at it like it's an endlessly repeating prison cycle the same thing happening over and over again it's an opportunity for growth and learning something that maybe we didn't do as well with in the past and now a new lesson in a similar way as being presented and it's an opportunity to learn and grow so that's about all I really want to say about that and I could recommend a very good book on the topic there's a book called fractal time by Gregg Braden and I think it does a phenomenal job of explaining how time is a fractal wave function and how it is completely works it completely works according to this general principle of natural law known as the principle of rhythm so definitely check it out a fractal time by Gregg Braden great book with that having been said will like to move on to principle number six so if we could get through the principle of cause and effect and the principle of gender we'll move on and take a few phone calls okay here we go principle number six from the Hermetic text known as the Chi ba Lian is known as the principle of cause and effect quote every cause has its effect every effect has its cause everything happens according to law chance is but a name for law not recognized there are many claims of causation but nothing escapes the law now that's so important folks that I just want to read that quote one more time okay and they're capitalizing the L because this is not the laws of man as they scribble them down in their little law books this is natural law okay the law of cause and effect arguably the most important of the general suppose of natural law okay quote every cause has its effect every effect has its cause everything happens according to the law chance is but a name for law not recognized there are many planes of causation but nothing escapes the law continuing this principle embodies the fact that there is a cause for every effect an effect from every cause it explains that everything happens according to law that nothing ever quote merely happens that there is no such thing as chance that while there are various planes of cause and effect the higher dominating the lower planes still nothing ever entirely escapes the law capital L the her medicines understand the art and methods of rising above the ordinary plane of cause and effect to a certain degree and by mentally rising to a higher plane they become causers instead of effects the masses of people are carried along obediently to environment the wills and desires of others stronger than themselves heredity suggestion and other outward causes moving them about like pawns on the chessboard of life but the Masters rising to the plane above dominate their moods characters qualities and powers as well as the environment surrounding them and become movers instead of pawns they help to play the game of life instead of being played and moving about by other wills and environment they use the principle instead of being its tools the Masters obey the causation of the higher planes but they help to rule on their own plane in this statement there is a condensed there is condensed a wealth of hermetic knowledge let him read who can and that's all they say on the principle of law and effect at least in this chapter it goes on to explain this in further detail later on in the book this is the crux of all of it folks this is it if we don't understand this general principle we are lost we are played as they say ok it's it's explaining that everything is bound according to natural law principles everything either we understand how these laws operate or we suffer the end there is no in-between we learn how to work with these laws we learn how to operate within them and we do that through self mastery not the attempted ownership or mastery of others it is accomplished through self mastery that's what they're talking about when they say masters here they rise to the planes of consciousness above they dominate their moods characters qualities and powers this doesn't mean domination of other people it means coming into dominion with oneself not being in opposition or dualistic consciousness with the self thinking acting and feeling thinking feeling and acting as one no contradiction internally no internal anarchy internal monarchy self rulership being the ruler of the self of the kingdom of self and we've talked about these concepts many times when we looked at the qualities of the self and we looked at the general polarities the basic polarities this knowledge ties back into information that we talked about early on in these podcasts over a year ago so it's critical to understand that the people who do not understand natural law will always be pawns will always be slaves will always be played by others who do know how these laws of cause and effect work because they understand that natural law is always in effect and our behavior in the actual field of natural law creates the effects that we must experience that's a good place to leave it we'll be right back after these messages where we'll pick up with the final general

[Music] we're back folks this is what on earth is happening and I'm your host mark passio my website what on earth is happening calm you can listen they're right on the radio lesson page there's a chatroom discussion all these going on in there during the show the show is live every Sunday from 5 to 7 p.m. Eastern Time that's 4 to 6 p.m. central here on Oracle broadcasting and today we have been discussing the general principles of natural law and we just finished what is arguably one of the most central and pressing issues to understand and to really deeply gain a deep deep understanding of ok if we if we don't understand the law of cause and effect we are navigating blind there is no compass in hand we are wandering in darkness without the understanding of the principle of cause and effect and that is what the general expressions the expressions of natural law these are the principles that we're talking about now the first things that need to really be understood that we're working with then we can look at how do these principles manifest themselves how do are they expressed in the real world we're going to be doing that over the next many weeks if we don't understand the cause and effect we can never under the principle of cause and effect we can never understand how the expressions manifest themselves and again this is totally tied in with the principle of polarity because the polarities are what we're working with and how we work with them what we do with those polarities is governed by the principle of cause and effect and therefore when we work with this polarity we're always going to get this manifestation when we work with a different polarity we're always going to get an opposite manifestation it's just the way the law of cause and effect works so the last and final general principle of natural law is known as the principle of gender so going back to the reading from the Chi ba Lian we'll look at the principle of gender and then I'll make a statement on it and then I'll turn the discussion toward the audience and maybe take some calls and see what the pulse is at this point in time and what questions or concerns or comments people may have about what we're covering so here we go the principle of gender this is the seventh and final of the general principles of natural law quote gender is in everything everything has its masculine and feminine principles gender manifests on all flames the principle of gender this principle embodies the truth that there is gender manifested in everything the masculine and feminine principles ever at work this is true not only of the physical plane but of the mental and even the spiritual planes on the physical plane the principle manifests as sex on the higher planes it takes higher forms but the principle is ever the same no creation physical mental or spiritual is possible without this principle an understanding of its laws will throw light on many a subject that has perplexed the minds of men the principle of gender works ever in the direction of generation reason 3/8 or goto en er f oo D comm we're back folks this is what on earth is happening I'm your host Marc cassia thanks for tuning in today we're talking about the general principles of natural law we are in the middle of discussing the seventh and final principle in our discussion over the last couple of weeks this is known as the principle of gender I was reading from the Hermetic text known as the car dolly on and by quote three initiates again an allegory an allegory for the three components of consciousness being unified thought emotion and action also a symbolic reference to the quote founder of the Hermetic tradition Hermes Trismegistus also known in the Egyptian or Commission tradition as Thoth the scribe of the gods the thrice great one the great greatest of the greats one who had attained one of the highest levels of self mastery that's all it really means race great he unified his thoughts his emotions and his action such that they were one and were not in the state of polarization anymore in not in a state of dualism so let's get back to the principle of gender because this is all about polarity as well this is about seeming opposite states that can be reconciled within the individual indeed which we've talked about many many times that needs to be reconciled within the individual in what is known as the chemical wedding the blending in perfect equilibrium of the masculine and feminine forces within each one of us so continuing to read from the Cavalli on quote the principle of gender works ever in the direction of generation regeneration and creation everything and every person contains the two elements or principles or this great principle within it him or her every male thing has the element the female elements also every female contains also the male principle if you would understand the philosophy of mental and spiritual creation generation and regeneration you must understand and study this hermetic principle it contains the solution of many mysteries of life we caution you that this principle has no reference to the many base pernicious and degrading lustful theories teachings and practices which are taught under fanciful titles and which are a prostitution of the great natural principle of gender such base revivals of the ancient infamous forms of phallus ism tend to ruin mind body and soul and the hermetic philosophy has ever sounded the warning note against these degraded teachings which tends toward lust licentiousness and perversion of nature's principles if you seek such things you must go elsewhere for them Hermeticism contains nothing for you along these lines to the pure all things are pure to the base all things are base and what he's talking about here is vile sex magic okay he's talking about what could be considered dark sex magic the author and this is because people have tended to think of the principle of gender as something that needs an external eyes expression just like they think that the Christ consciousness needs externalized expression as a physical man that we need to worship okay religion it's another way of creating religion something which holds us back from the real deep understanding the actual esoteric meaning embodied by the symbol so the principle or symbol of masculine energy and feminine energy in dwell within each one of us and indeed within everything within creation we have a masculine component and a feminine component regardless of whether we are male or female we're that's talking about physical gender this is talking about mental gender in other words mental and spiritual gender you could look at it as okay we have internal inward dwelling essences these are called our emotions these are our feminine principles and these are our guidance system that help us feel the result of our behaviors our actions which are masculine principles the things that we externally do in the world so the object is to unite our emotions and our action such that there is no contradiction and we say well we don't say well I know that this might not be exactly the right thing to do but I'm going to do this anyway this is internal contradiction it's knowing and feeling internally with the feminine principle that this action I'm about to take may not be the right thing to do and yet with the male principle you're going and doing it anyway that's what is called seitan okay the opposer the adversary the one who destroys the one who tears apart because that destruction and tearing apart is happening within every time we choose to to drive a wedge between the masculine and feminine principles as opposed to uniting them so this principle is of critical importance as well and of course we have a left and a right brain which we've talked ad nauseam about the hemispheres of the brain and how these need to be brought into equilibrium the more they become imbalanced through what we put in our body and through the things that we take into our mind the more our emotions and behaviors become out of balance and we're going to be talking about as one of the solutions brain balancing techniques the modalities of thought to balance the brain and as well we'll be getting into very long and deep discussions about food the kind of energy we fuel our body with as a solution to the problems in consciousness that we experience because of how degraded our food has become and if you're feeding the body horrible fuel it's going to manifest with a horribly imbalanced brain and then that's going to manifest horribly imbalanced behaviors I mean this only follows logically folks this we're not even getting esoteric or deep here this is just logical thought processes you know we are what we eat essentially and again I battle with the whole toxic emotion thing that I get into from time to time people who know me will know that as well I get angry I experience anger because I see how dark other people are in the world and they continue to act in folly and never wanting to acknowledge things like these principles things like natural law and certainly never wanting to look into anything about the occult because they don't believe in that stuff you know therefore it doesn't exist [Music] okay everything were back home although it was happening at least from our capacity of my website what on earth is happening calm this is the show where we attempt to get down to the fundamental causal factors of the human condition because without a deep understanding of those we are navigating in the dark and the understanding of natural law is paramount paramount if we're ever going to reclaim the compass for direction and turn this great ship around and set it into the right direction critical the understanding of natural law we need to understand its basic principles and then we need to understand actually how it works its effects its causes and effects its expressions as I term it and I keep a chart there's a chart up on the website of the general principles you could download the kabali on which we've been reading from over the last couple of weeks in episode number 73 I believe I posted a link to the Chi ba Lian in PDF format and I've been posting this chart of the expressions of natural law over the past couple of weeks because just for people to look at and have in their mind as we go forward because this is what the topic of discussion is going to be for next week the expressions of natural law let me give the call-in number once again we do have a caller waiting on the line I'm going to get to you in just a moment caller I do want to ask that people discuss natural law its general principles and anything else related to natural law okay this is the topic of discussion we are following an actual theme now so it's not like just going anywhere okay we're trying to stay focused so the call-in number is eight six six eight four one one zero six five once again call-in number is eight six six eight four one one zero six five the topic for discussion is natural law in general specifically if you want to address anything that we've been discussing about the general principles of natural law that would be even more focused but anything related to natural law is fine so here we go let's go to the phones caller you are live on what on earth is happening well I mark X thank you taking my call um I had a question uh you know these dark Luciferians that are that have all the Satanists working for them doing all these bad things sure um how do they have how do they avoid the sort of karma of doing that I mean it seems like that the pretty big violation of natural law that is correct and I've been asked this question before on a previous show and I answered it and I believe the answer is fairly thorough and for people who have heard the answer to the question they understand what I and what I mean by this when I say that they are not bearing the brunt of the karmic repercussions of breaking natural law because they are not actually taking the actions through their behaviors they are influencing the actions through suggestion conditioning and mind control the people who will bear the deepest brunt of the natural law repercussions are those who actually take the actions who actually do the bidding of these sick twisted psychopathic individuals they are actually shielding themselves by getting someone else to do the action for them so ID Felder the Vengeance of the state in every in every single country that has ever committed atrocities the agents of the state in every single region that has ever done incredible bloodshed and mass murder and uh wiped out significant poor of their populations the people who are ultimately responsible and will bear the incredible karmic weight of those actions that are in total contravention to natural law are the ones the actual individuals who are doing those behaviors so in effect the answer to your question is they're actually really shielded from it quite well they're still going to experience karmic repercussions but those repercussions are going to be significantly dampened significantly dampened in comparison to the people who actually take the actions I really want people to deeply deeply think about what I have just said here they are the ones who are going to have to deal with the major karmic repercussions of those actions so you know I'm sure Hitler probably had has shot people in his lifetime but I guarantee you he didn't shoot as many people as certain German soldiers or certain people in the Schutzstaffel or certain people in the Luftwaffe who dropped bombs on people I guarantee you they killed way more people than he ever did or Himmler for that matter and the people who are actually going out and raping other people's inherent natural law rights are the ones who are actually going to have to answer to those actions for those actions that is the answer that question in this lifetime or the next are both probably in the physical reality that we live in and then in whatever spiritual domain they happen to pass to when they relinquish the physical body both domains okay thank you very much you got it that's a great question it has been asked before but I don't think it could ever really be understated the answer that question cannot be understated and I think it's something that people really deeply need sitter because and this is this is actually a perfect segue I want to thank the call calling in and actually asking this question again because this is a perfect segue to something that I do want to talk about that has everything to do with natural law and it has exactly to do with this and in the meantime while I'm telling this story if other people want to call in you have the calling number and the lines are open so if you call in I'll go write to you so there was this big issue going on and I very rarely talk about current events as you know I mean I didn't even mention the earthquake or hurricane that we had over the last couple of weeks because I I don't talk about specific events so much 9/11 is of course an exception to that rule but I'm not this isn't a news show okay this is something where we again try to get down to the causal factors about what we're experiencing in life and there was a really a big you know semi big story going on about how police were busting children's lemonade stands just out on their lawns okay just outside their homes setting up the lemonade stand which has been a tradition in this country since its founding and cops were going over to them and saying they're operating without a license you're operating a business without a license to a child okay regardless of whether it was an adult or not you know you don't need a license to do something that you have a natural law right to do so and that you're not harming anyone else as a result of that action so you you you heard about this going on bus were being made which is utterly ridiculous completely against natural law the cops should be utterly ashamed of themselves it's a perfect Nazi is what they are perfect it would have been wonderful wonderful accessories at Sobibor or at Treblinka or at Dachau or at Auschwitz it would have been wonderful okay because it's the same mentality it's the same mentality that people died when we fought the British died fighting when we fought the Nazis and you're acting in the same way okay wonderful example for your own children but anyway after one of these pops made one of these busts he was asked a question that had everything to do with natural law now tell you what that question was on the other seeds and oil can do for you at hemp usa.org [Music] we're back folks this is what on earth is happening we're talking about natural law it's general principles and it's expressions on the show today and we took a call before in the last segment in which the caller asked the mind controllers the dark occultists the so called the leap the powers that shouldn't be as people refer to them as how do they insulate themselves from all of the karmic debt that is going to be built up from doing all the horrible things that go on in this world that they're ultimately quote responsible for and I've answered this question before by saying they're not going to bear the brunt of all of that karmic weight the people who actually take the actions that they're telling them to take are going to take the brunt of it and that means the military and the police who are actually pulling the triggers dropping the bombs raping people's rights doesn't matter whether they think they're doing the right thing it does not matter this is a this is a New Age lie quite frankly in plainest terms it's the only way I could put it the fact people try to say that it's fact that if you don't know you're doing the wrong thing and you do the action anyway you're going to have less karmic repercussions as a result of taking that action and that's absolute BS absolute BS and this is a deliberate lie injected into the New Age movement by dark ocultism because they know the truth that the people who actually do the action whether they are in understanding of the principles of natural law or not we'll have that karmic repercussion come down upon their mind body and soul it does not matter whether they understand this or whether they think they are doing the right thing matters 0-0 if you took the action you and you alone are responsible for it now telling someone to go and do something that is knowing that they know is evil that the person who's telling them knows is it as an evil act is quite a bad thing in and of itself and there will be karmic repercussions for that but I guarantee you they will not be as severe as the person who took the action guaranteed so I was telling a an anecdotal story about the lemonade crackdowns that these police have nothing better to do but then go serve their corporate masters as whores for their corporatist overlords and go and serve their beddings and shut down this unregulated commerce without a license which equates to destroying a little girl's lemonade stand okay so people set up protests about this and they put they set up lemonade stands in different areas in public areas in the in a bunch of different cities and a cop went over to a couple of cops shut down one in Washington DC which they were protesting this activity and to a couple of the cops that went over to these girls and shut down their stand and who put them in cuffs and took them off or black okay and this isn't a racial issue but you're going what it is is it's a moral issue okay it's a moral issue that has everything to do with natural law it has everything to do with principle it has everything to do with morality okay an interviewer after filming the events the person who filmed these horrible events said to one of the cops how aren't you totally disgusted with yourself how do you even sleep how do you even how do you live with yourself I mean look at yourself in a mirror and one of them they were both black one of them answered and that's again it's not a race thing this is it's irrelevant they could have been Indian police they could have been Japanese police it doesn't make a difference they could have been Native American they could have been white irrelevant okay I'm trying to highlight the amoral psychopathic mindset that these people are in and they think that their moral they think they're doing something good and yet they're completely amoral have no principles they're their parents did not raise them I would I'd like an opportunity to say that to one of their faces because I would say that to one of their faces and you can if anybody knows who that person is that I'm going to talk to because many people will know this video tell them that I'll say it right to their face because I'm not afraid of them and I know that they're immoral it's not my opinion I understand how natural law works I understand how they broke it and they don't care as long as they're getting paid that's their God that's their God they don't have any God their God is the dollar bill so he was asked the question if you were a cop in the 1950s during segregation would you have enforced the segregation laws and he tries to escape the question by saying I would have been a cop yeah you wouldn't have because you wouldn't have been allowed to be back then okay but he said okay it's a hypothetical you know hypothetically and he says proudly yes I would have enforced the segregation laws if I was a cop in the 1950s a black man said this and what I want to know is where was the moral outrage about the answer to this question first of all it was wrong no matter what color you were but it's almost like you can you can understand how it's like doubly insane and doubly wrong in some ways that he's basically saying I have no affinity with my Peet my own people okay I'm saying I have always said you shouldn't be identifying with a race at all with race race is an illusion we are all human beings here we are all people who are it's at some level or another suffering and as one suffers all suffer but just imagine that's like saying I wouldn't care if they oppressed members of my own family if members of my own family were being told get to the back of the bus and and they resisted that I would lock them up put him in handcuffs and haul him off to jail because my owners told me that that's what my job is and I don't get paid unless I do that and another guy said hey man I'm not going to rock the boat I'm making six figures at my job you know you must be a captain or whatever because that's all that is of value to this individual truth is meaningless rights are meaningless as long as they're being paid they will do whatever they are being paid to do that's it whatever their owner is paying them to do and telling them to do they will do and then he steps back and tries to say your issue is not with me mean a police officer a cop your issue is with the lawmakers and you know what I'll say to that person absolutely not wrong wrong and get it clear the issue is not with the people scribbling down things in a book someplace you are the issue let's make that real clear and I'm deliberately raising my voice because the people who think that these aren't the people to point a finger at and there is a time to point a finger there is such a thing as blame it exists when people are doing things that are overtly wrong and against conscience yeah you can say hey you you doing this action you're wrong and then you want to step back and raise up your hands and say I'm absolved of this don't look at me you're the one doing it who are we supposed to hold accountable somebody who told you to go and do an action that's clearly wrong and you say well as long as I get a paycheck yeah sure I'll go and do whatever your rate you ask me to do as long if it's wrong I don't I don't consider the notion of right or wrong I don't consider natural law rights have no meaning to me I don't consider rights I consider a paycheck and this clearly folks you can hear this riles me up especially because the person tried to say that he's not the one who should be held accountable for it that really riles me up and it should rile you up too because again that is the mentality of someone that would have exterminated mass groups of people in Stalinist Russia that is the mentality that would have gone along with hoarding people into - chambers or other forms of prison and work and detention camps that's the mentality that will continue to go along with this new world order agenda of total enslavement of the people with the Oracle broadcasting Android application you can take Oracle with you on the go download the app at Oracle broadcasting com all right folks final segment of what on earth is happening for this edition today got a little fired up in the last segment I tend to do that when I talk about people who have no conscience and that's what we're talking about when we talk about a cop who will answer a question about a black cop no less the law answer a question about whether he will enforce would have enforced segregation laws that means if they reinforce them today he'd be locking up black black people for getting on buses sitting up in the front of a bus it's what he's basically saying and I want to know where is the outrage from everyone it doesn't matter what color you are but particularly where's the outrage from the black community on this and again this isn't a racial issue this is a moral issue where's the outrage from that person's own parents oh no they'll probably praise him because he's got such a wonderful job and he brings home six figures because that's all that's of any value right well I'll lay out a challenge I don't even want to hear from that Nazi I want to hear from his parents because you raised a Nazi and if anybody can find out who the parents of that person are in the video that I'm talking about maybe I'll post that video with this podcast so people can look at it find person's parents and have them call into this show there's a challenge for folks out there 13 he obviously lives in the Washington DC area because this is where this happened I'd like to talk to that person's parents and tell them they didn't raise a human being with a conscience they raised a Nazi so let's go back to the phones to take out the show in this last segment here we go Chris in Canada you are live on what on earth is happening calm what do you have for us hey buddy you're talking about your natural law as I you were talking a second person earlier come but I really don't like these divide and conquer issues that you're discussing I find it distracts from the real issues and not always avoiding the real issues back up natural laws not one of the real issues no natural why is one of the real issues but uh the blathers there's other people who understand natural law and attempt to live in harmony with it and people who just completely disregard it and think that they can do whatever they want with no repercussions and no effects outwardly in society that degrade the quality of life for all that's what there is it's not a divide and conquer issue it's reality that that that's how you can actually look at the consciousness of humanity see this is the idea that New Age movements try to put out there that there's no such thing as different levels in consciousness that there's no such thing as different levels in understanding that everybody is at the same place that's not true it's not a divide and conquer strategy I'm speaking the truth there are people extraordinary extraordinarily low states of consciousness through fear this person is one of the most fearful human beings on the planet you think that Nazis who did the atrocities that they did or the secret police of Russia who did the atrocities that they did under Stalin you think that they weren't fearful people you think they were high consciousness individuals do you think they had any real deep understanding of morality and natural law none none of those things applied and you want to look to who actually did those things don't look at the people who were directing it that's the distraction sir that's the distraction the distraction is the people want to always blame somebody above them and the history then records that Hitler did these atrocities yeah was he one of the puppets that that basically trickled down the orders of the Masters down to all of the other foot soldiers absolutely and he was violent evil just like Himmler was and and and Goebbels and all of the other ones but it doesn't happen without the people willing to carry out those orders because they don't care about right or wrong that's the bottom line and that's the truth next caller Eddie in Louisiana you're live on what on earth is happening mark thank you for taking my call it's okay buddy I understand look I first of all I just want to say this is a beautiful analysis of natural law and I would like to say also that there are those who are aware of natural law and they would use and pervert those natural laws to their favor stand within the let at within the last century and a half that between the two world wars the genocides that have taken place and all the different atrocities throughout the world Africa Europe Russia here on this continent people are I think my personal opinion I think karma has brought back all through history those that would do those type things to other people to have it done to them in other words they are being reincarnated into the ones who are being abused so that they can see what they've done to other people and I think that my opinion I dismiss that for a minute and that's quite likely very possible that's very possible what you just said and I did I'd ask people to actually consider that that's a pretty astute observation and I've thought about that myself on more than one occasion it is very quite possible that people who either did these things or or stood by and watch them being done are coming back to actually experience that happen to themselves absolutely that's possible okay and I just wanted to tell you that my daughter she started college this year and before she left I made sure she sat down and watched your presentation on what I was what on earth is happening and it was a beautiful analysis and I'm and I'm very I wanted to make sure she understood that before she went to college now sick the next I want to say is all these cops that are running around and doing the bidding of these corporate masters these cops they wear a shield that she'll protect them from any repercussion from a karmic repercussion from what they're doing to innocent and just just people that don't deserve to be done the way they're done what does it really again if there's attack them it's a symbol that in their mind they're trying to associate in their mind that that's a form of protection against that higher force it doesn't really do that but they're giving it to them to wear as a symbol to make them think that they can continue to do this unscathed that's right that's right and and and there's old saying that the door Dark Lord protects the rich and powerful so that they can perpetuate themselves but these these all these people this this whole thing with what's going on in the world today what on earth is happening and and you are one of the the troopers in the movement to help people wake up to to see that what's going on is being done under the guise of it for the greater good right that's where everybody everybody's lose inside of right and wrong because they think they're doing something under the guise of it's for the greater good so I just wanted to call in and thank you mark because I've been checking out your soul shows since you've been on Oracle it's a great show and I just want to say thank you again have a good day and thanks so much great call and you absolutely bring up the point that people are dissuaded from looking within and really understanding is the action that I am about to take in this moment right or wrong because they're always thinking in the future this is what real present moment awareness is about which is another solution we're going to talk about okay they have you thinking in the future all the time well what if with this we let this go and then this will happen and this will happen and then and then and but but but then then then this is all future projection and this is all justification for one's immoral actions the one is taking in the present moment and never wanting to look at themselves never wanting to turn the finger inward and say I need to take a look at my own actions what I am actually doing to other people that's what the force of darkness for lack of a better term is always trying to get people to ignore to never to look at that never to look at the fact that they are doing something immoral in the present moment the ego wants to rationalize it wants to justify it wants to scapegoats it wants to point the finger outward it wants absolution for one's own immoral behaviors it wants to say no someone else was in control of my actions someone else was in control of my mind it has nothing to do with me even though I'm the one actually doing this thing that's wrong you see how that works folks will be

What On Earth Is Happening Show #077

Topics: *9-11 10th Anniversary, Natural Law, The REAL Law Of Attraction, The Polarities, The Initiative, Internal, External & Generative Expressions Of Natural Law*

freedom man that's what it's all about welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host mark Pascoe welcome one and all you are listening - what on earth is happening right here on the oracle broadcasting radio network i'm your host mark passio this show is live every Sunday from 5 to 7 p.m. East Coast time that's 4 to 6 p.m. Central my website is what on earth is happening calm the networks website is oracle broadcasting calm today of course is September 11th 2011 the 10th anniversary of the dark occult human sacrifice ritual that was done for purposes of trauma-based mind control that was the 911 event we've already gone over to a great extent the events of 9/11 and what the their ultimate purpose was so today we won't be doing that I will be dedicating a little bit of time to 9/11 today in the second segment right after this short segment we'll be going live to New York my friend Tim Smith is there Tim was also one of the organizers of the free your mind conference and he'll be giving us a brief report from New York City about the events that are going on there today so that'll be coming up after this break I have one quick event announcement actually I have two quick event announcements the first is a conference coming up here on the East Coast right here in Philadelphia hosted by MUFON the mutual UFO network these individuals I've worked with in the past they've actually uh a couple of their affiliates have hosted my presentations in the past so MUFON is going to be having one of their conferences coming up here in Philadelphia on October 15th and 16th at the Four Points Sheraton that's in Northeast Philadelphia at 9 for 6 194 6100 veldt Boulevard here in Philadelphia the conference again is Saturday October 15th and Sunday October 16th admission on Saturday is $35 and the speakers will be going from 8:30 to 5:00 p.m. on Saturday admission for Sunday is only $30 and the conference will be 9:00 a.m. to 4:00 p.m. on Sunday the 16th there will also be a dinner with the speakers of the conference on Saturday night October 15th for only $38 the speakers for the mufon Pennsylvania East Coast Conference are Joe Maura Robert Dean Linda Moulton Howe George filer Bill Weber Lynn khatai bill burns Jerry Jonas John venturi and Chris Augustine for more information please visit MUFON ei calm or mainline MUFON calm the next announcement I'll give after we talk to Tim in New York City in the next segment stay with us folks this is what on earth is happening made up stone stay asleep oh man when he looks at it with his eyes is what we see when he looks at it with the sunglasses we see the same things all the way through the subliminal said wannabe courtesy of a are we dependent well hopefully like in the movie they live people have put their sunglasses on so they are able to see through the deception at every turn because it's everywhere in 911 was of course one of the great deceptions of our time in it unfortunately because we were as a country asleep at the switch it cost us the lives of 3,000 people who these occultists and Psychopaths murdered in cold blood on that day to justify their agenda right now I want to go live to New York City on this 10th anniversary of 9/11 2001 to my friend Tim Smith who was there in the streets of New York and he is going to give us a brief report on what's going on there today Tim was one of the organizers of the free your mind conference as well so people owe this gentleman a great debt of gratitude for all the great work he did with that event so Tim are you on the line with us yes I'm here ok so what do you see going on in 9/11 today in New York say 9/11 today I think the main thing really to talk about here is the police state that's going on here I've never seen anything like it besides the videos that I saw of that G was at the g20 or the g8 and Pittsburgh um besides that I mean the amount of cops and the police state that's going on here is just unbelievable like there's just about eight cops eight to ten cops on every single quarter and I don't know there is very first cops and not only New York please not not only local New York cops but just you tell cops and other jurisdictions and uh and just you know they're just they're militarized cops you know and there's they got their cops with big big like rifles I don't know if machine gun an assault rifle you know I'm not really familiar with the terms but what they got these big rice and there I've seen I've seen this thing that looked like a tank it's like it's it's like a black a black looking tank and it's just they just really got us I don't know they got everybody in fear because they got this so-called terrorist threat I don't know if you heard about the terrorist threat mark I don't really pay attention to their brainwashing media once I asked that what it was I no longer subject myself to it so I don't fall into their you know levels of fear-mongering and propaganda but I'm sure that they're actively pumping that out there yeah they said there was a terrorist threat supposed to happen in New York or Washington and that it's funny they said it was credible by unconfirmed source you know that their their language that they use credible but one confirms it that's their way of saying we might plan another false flag if we feel it's the right time to do it that's basically what they're saying you know yeah and and you ask any one of these cops or even just general people walking around in New York City is this is are these the hallmarks of a free State this what a free country looks like is this what a free state looks like police on every corner yeah yeah I want to know when has any cop really ever stopped any crime from being committed they show up after the fact all the time you know the only thing that stops any crime or violence from being committed is understanding natural law principles which is what we're going to talk about in the rest of the show here tonight after this segment but if these cops really wanted to create any level of order they would understand natural law and they would be teaching it to as many other people as they could get to listen to them instead of trying to be a controller which is actually creating more chaos in the world but they're too ill read to understand any of that on for a yeah I totally agree they're just here to create the creates of the division you know just amongst cops first the people or the 911 truthers against the cops or the 911 truthers against the people and they they literally heard of this in to one little area they had you can't even you couldn't even get close to Ground Zero like they had you all the way back to Broadway which is like two blocks away from Ground Zero and I came up here the past couple years and you were able to get right up to Ground Zero and this year they have you popped all the way back and you can't even get close unless they're I saw this one entrance way that you could get in but they literally had a big line and they had these wand metal detectors and they were there were certain people and and metal detectors and checking their IDs to get through the street so this is this is what you get you know people ask why would its Nilan was an inside job why would these people do it well this is this is why because and all the people who think that's okay you you'll ask them did the did the the so-called terrorists defeat America and they'll say no they didn't but look at what America has turned into since 9/11 2001 the level of freedom that's gone and they'll insist that's necessary to keep people safe while control never keeps you safe safe it keeps you a slave that's what control does it doesn't keep you safe it keeps you a slave yeah yeah that's what I was saying now it's what I was yelling out I was saying the tire is one today there's one and it's it's crazy they literally had to turn it into a spot across the street on Broadway where people couldn't even get to and they had barricades all around this and they wouldn't even let people cross the street come over to us so they literally had to separate it from the rest of the population and had people her heard it in there and a great thing you know I tried to stay away from that I crossed the street I just walked around I didn't want to be being that barricade I you know I don't want to be one of those sheep you know and people think that the police are on the side of 9/11 truth they think that they're because they say might say a couple of encouraging words to them in the past on 9/11 in New York that somehow they're on their side that they've woken up these people are completely asleep because they're willing to do whatever their owners tell them for a paycheck that's all it is it's not your job it's not just your job you're murdering freedom that's what you're doing and you're doing it for money you're doing it for a paycheck I just want to be real clear about what their role is and I'm not polarizing anybody against anybody I'm stating truth they have already been polarized against the average person okay who they look at as separate from them these police and these militarized police okay they're the ones who have fallen for the Hegelian dialectic pointing that out doesn't mean that I'm polarized against anybody or trying to polarize anybody against anybody I'm trying to explain to you the conditioning that these individuals are in and people need to wake up to that and understand that they need to help these people come out of their trance that they are in because they think they're doing the right thing and they think what they're doing is acceptable morally acceptable and it is not it is not hey Tim we're at attack on this segment but uh I want to thank you for all calling in with the report letting us know that that's what's going on there in New York on the 10th anniversary of 9/11 I think in he the terrorists are winning but it's not the Islamic fundamentalist it's the terrorists the Constitution let the back welcome back everyone this is what'll hurt is happening and I'm your host mark passio I want to thank Tim Smith came on in the previous segment to give us an update from New York City on this 10th anniversary of 9/11 oh one and you heard it straight from him folks and I wish I could tell you it was some other way but the people who think that you know we're magically waking up as a race and everybody is getting this I think are delusional about how widespread or how fast this is actually happening the truth exists in isolated pockets of humanity and I'd like to tell you that people are doing a better job of getting the truth out there to other people but I can't tell you that there are small cracks appearing in the wall that's true but we need to make a huge surge and a more concerted effort to get the truth out there to people there are too many people who know and not enough people who speak and get as offended about that as you like even the listeners of this show there are too many people who know and not enough people who speak just think about that so and people don't speak because they're in fear what other people will think or they want to stay in a comfort for in a comfort zone they don't want to they don't want to create tension or they don't want to attempt to tell other people how stupid they are because that's what this is really all about people with no knowledge and in many cases what I call negative knowledge meaning they not only are absolute Know Nothings and never picked up a book in their life but they've bought all complete untruths and propaganda they've never attempted to learn anything truly and they've bought tons and tons of lies so they need to do in a tremendous amount of digging themself out of a out of a ditch just to get back to ground level where they're at nothing at zero knowledge and unfortunately the people who do carry around a lot of knowledge aren't helping them to do this because these people tend to stay in isolated pockets and wall themselves off from everybody else the call that the listeners to this show should ask themselves the question how many police do you hang out with on a daily basis and attempt to enlighten you want to know why hardly anybody ever hanging out with these people because they isolate themselves they're a secret society essentially that's what they really are they are they are essentially ostracized from the rest of the community and they only hang out with their own kind who they consider their own kind so it's difficult to even get to their eyes and ears with information because they are so polarized that the world is us and them in their eyes they don't understand that they're in the same cage as everybody else and not enough people are explaining that reality to them in their daily lives because they keep continue to do the same thing in the same actions repetitively over and over their life is an endless cycle of repetition and that's why they're so trapped in the arc complex of the brain they can't reason they can't think logically that can't empathize with anybody else and that's why they're willing to hurt people and try to marginalize their message in New York City like they're doing today it's a disgrace and I'm not gonna sugarcoat it and talk nice about it like some New Age person who's drifting off in some complete spiritual daze meditating eight hours a day and doing nothing doing nothing because they don't understand the importance of the masculine principle of action they think they're gonna meditate their way to freedom and ain't gonna happen that way folks get over it action is required and that means speaking the truth regardless of how uncomfortable it uncomfortable it makes someone else feel you're not here to win a popularity contest and neither am i the truth needs a louder voice so that's really all I have to say about 911 and I'll leave it there I'm going to go back into another event announcement and then we're going to get into the topic of discussion for today which is natural law and will continue to be the topic of discussion for as long as it takes to get these concepts out there in a in-depth fashion I'm not even gonna set a time limit on how long we're going to talk about this because this is the ultimate solution is understanding natural law understanding its foundational principles and then understanding how it actually works in the world without that you're absolutely blind and powerless you cannot cannot do anything to help create freedom or order in the world it is an impossibility without the knowledge of natural law can not be done so coming up at the end of this month and on the last Wednesday of every month here in Philadelphia the group truth freedom prosperity holds their monthly documentary screening and discussion night and responsibilities have fallen to me for this night so now I was helping out in the past with the technical details setting up the actual technical aspects of the movie the computer and whatnot I'm actually going to be running the entire evening now so I'm going to be choosing the movies introducing them welcoming people and running the the technical details as well so um essentially this is like gonna be my thing for the time being okay as part of truth freedom prosperity so this is a great activist group in Philly and this is one of their meetups that they hold monthly every last Wednesday of the month at media Bureau Studios media Bureau is at 7:00 25 North 4th Street that's the corner of 4th and Brown in the northern Liberty section of Philadelphia and this month on September 28th Wednesday September 28th at 7 o'clock p.m. we will be screening the film Human Resources social engineering in the 20th century and this is a phenomenal documentary anybody that wants to understand the real dynamics that are going on in the world needs to see this film so all of the documentary screenings that are hosted by truth freedom prosperity at media Bureau are free we don't charge ok if you want to give a donation you're welcome to do that to help pay for the cost of the room but essentially anyone is welcome for free and we encourage people to bring people out who need to hear this information drag them out there if you have to okay that's the whole point of this even if you understand these things you need to bring people and expose them to this information so free monthly documentary screening and discussion night for truth freedom prosperity Wednesday September 28th 2011 at 7 o'clock at media Bureau Studios on the corner of 4th and Brown here in Philadelphia don't miss it for people who are in the area with that having been said let's give the calling number for the show and if there's time after we introduce the concepts that I want to cover today we will take some calls in the later part of the show the call-in number eight six six eight four one one zero six five once again the calling number is eight six six eight four one one zero six five what we've already covered on natural law is what it is which is something that is inherent not made or caused by humanity that is has always been there and is not dependent upon us in any way shape or form and it is an existing condition which is binding meaning is in effect and we are affected by it and it is immutable meaning that we do not have the power to change natural ball or how it functions because it was not put there by us it was put there by the creator of the universe so far that's one of the aspects even carbon talk radio behind the girl I'll make my fire stay well folks that's exactly why I talk about the things that I talk about here on what on earth is happening so that the final stand does not need to be made behind a gun but so that we can make our stand behind the power of truth that is why I do what I do here on what on earth is happening so with that in mind let's get back to natural law because that's the ultimate truth that needs to be conveyed to the people of this planet we've already talked about natural law and what it is okay we've already talked about that it is completely belief independent it does not require the belief of anyone because human beings did not create natural law it is something that exists inherently by way of the creation of the universe it is simply here and there is nothing anyone can do about that it's like gravity being present on the earth it is here you are bound by it you are affected by it whether you believe in it know about it or like it all of those things are irrelevant the same when it comes to belief and natural law belief is irrelevant when it comes to natural law does not matter what you believe in relation to it it works it always works a certain way it is always in effect you are always bound by it the end now I can't help anyone if they don't if they cannot grasp that concept turn the show off go listen to something else go do something else and it's a hopeless case because if you think that your belief has anything to do with how natural law functions good luck good luck to you enjoy what you get enjoy what you create with that having been said the second part of what we talked about in relationship to natural law were the underlying forces that actually generated the underlying principles upon which the manifestations of natural law are built so these are like the foundational principles that give rise to natural law okay and there were these seven principles that we discussed and that we actually really went into depth in in the net in the last couple of weeks when we looked into certain hermetic a certain hermetic text known as the Kabbalah on which beautifully illustrates these basic principles of natural law so these were the principles of mentalism Correspondence vibration polarity rhythm cause-and-effect and gender and we looked at them in depth mentalism being the the principle of mentalism conveying the concept that really everything that exists is ultimately of a mental construct the the all or the universe is mental energy okay it is the mind of God if you will okay it is not solid in the sense that we think of solid matter it is actually constructed of thought energy okay everything that exists first exists as a thought then it comes down through that form of energy into a harder physical form that we call physical manifestation the principle of correspondence talks about the interconnectivity of all things then everything is a reflection of everything else that the macrocosm is a reflection of the microcosm and vice-versa this is the very smaller the microcosm reflects the macrocosm okay that the internal world okay reflects the external that as that which takes place within us is ultimately shown to us through the daily experiences of our life and the things that we call our situations and our experiences what we have manifested so the universe is like a mirror in this respect and it is self-similar across scales the atom is like the solar system that is like the galaxy that is like the cosmos okay everything reflects everything and there within the very small is the very large okay the principle of vibration talks once again that everything about the fact that everything is vibratory energy everything is comprised of harmonics of sound energy of frequency okay and it's not solid as we think of solidity sound and vibration give rise to the physical forms which is why again I say speaking the truth is so important the truth is a frequency of sound and it emerges from us and if we speak it we put it out there to the sound that is emitted from us then we are going to be rearranging the outside world because we're going to be changing the conditions we're going to be changing the conditioning of other people's minds and what we hold in our minds is ultimately what reflects our behavior and therefore what creates the world around us this is how natural law works this is what we're going to be talking about here today the expressions of these principles the fourth principle was the principle of polarity that everything has differing degrees but ultimately these seeming opposites are actually oppo sames they are the same thing only in differing degrees and you could even look at it as there is really only one thing in the polarity but the opposite of it is actually an illusory aspect in order to show us what really exists so I took love and fear as we're gonna look at again today in depth as an example of polarity really there isn't a polarity there is only one thing which is that love or expansive force of consciousness and fear is an illusion but it's there so that the force of love can understand and know itself in more fullness okay just like darkness and ignorance and all of the things that the human race seemingly identifies with and clings on to isn't really who we are it's an illusion that we're trapped in it's a mirror aspect of our true selves an exact opposite mirror reflection of our true selves that we need to look at and say that's not who we are that's not who we really truly are we're consciousness having an experience here we've been trapped in the illusory identification with that polarity of physical form but that's not who we really are unfortunately many people are stuck in this illusory identification and the people who are not in that illusory identification need to help these people get out of it because what they're doing in that identification is causing more and more and more harm not only to themselves but to other people who do not wish to experience experience that level of difficulty and harm and strife in this reality that we could easily through a shift in the way we think turn into a parody sickle realm practically and in a very short order of time believe it or not I understand many people don't have the imaginative capacity to even grasp that but it is the truth and that is the problem is that the imagination and most people has been deadened and that as I've talked about many times on this show is the most powerful form of mind control is to eliminate someone's imagination so that they can never even envisage the opposite of what they already have something completely different than what they already have so that was the fourth principle the fifth principle was the principle of rhythm which conveys that things move in cycles in cyclical terms okay there is an ebb and flow to everything all right and specifically this is helpful when we understand time and history and understand that opportunities present themselves to us over and over it's just up to us to recognize these are similarities in time scales and then take them as opportunities to learn and grow instead of slapping that that lesson and that opportunity away and then having to repeat the discomforts of the previous cycle all over again the idea that for those who do not learn its lessons history does indeed repeat itself that was the principle of rhythm the sixth principle is the one we're really going to be delving into today which is the principle of cause and effect and we're going to be combining this principle with the principle of polarity vibration and correspondence because these are all ultimately interwoven okay but we're gonna really be looking at how cause-and-effect works today and when we look into the expressions of natural law or actually how it works what we're going to be talking about here today is the real law of attraction how we create the experience that we then must live that we must actually experience in the 3d physical world we are creating those circumstances and situations through our free will choices through our decisions to exercise free will choices by choosing the polarities that are offered to us and really as we'll see there are only really two love and fear and then we'll see the consequences of the choice between those two polarities so the principle of cause and effect simply states that nothing is accidental everything has every effect that we observe has its cause and vice-versa every cause creates an effect finally we saw the principle of gender which is that there is a masculine and a feminine component in all things and that's essentially those were the essential general principles of natural law that we covered so that was a brief review okay folks were back this is what on earth is happening I'm your host mark passio my website what on earth is happening dot-com I'd like to direct everyone there for the images that we're going to discuss on the show here today specifically the chart of the expressions of natural law if you go to what on earth is happening calm and you go to the radio show page the radio show tab on the website underneath the player for the show you can see images for today's show and then there are 18 links listed there with images that have to do with the show today I've already discussed image number one was simply a flyer for the MUFON conference coming up here next month that I announced image number two was the definition of natural law image number three were the lit was the listing of the seven general principles of natural law what we're going to really focus on for pretty much the remainder of the show here today is image number four and I've been posting this image with the last several podcasts that I've done this is the chart of the expressions of natural law or in other words how the real law of attraction actually works that's what you can rename this chart to if you want to an even simpler maybe even more catchy name for it this is the real law of attraction okay and you can quote me as saying that go tell the New Agers out there this is the real law of attraction okay that's what I would like this chart to become known as actually okay because the law of attraction that's been put out there in the New Age movement would have people believed that they themselves are somehow creating the reality you know that they experience and that's a complete oversimplification of the real law of attraction we are collectively creating the shared experience that we are having we are co-creators with everyone else and as the imbalances within the monads or individuated units of conscious meaning individuals ok becomes greater and greater a societal imbalance will become greater and greater as there is more internal understanding knowledge of self harmony balance etc within each individual expression meaning within each person individually ok the that quantum effect builds up and then it has an effect societally so the society will be a reflection of the individuals within it in keeping with the law of Correspondence the principle of Correspondence that which is above is like to that which is below that which is without is like to that which is within so if we want to change the external result or manifestation we need to change the expression that begins the manifestation we need to change the freewill choice of the polarity that actually starts that manifestation or the underlying causal factor which creates the effect again this is the real law of attraction it is the principle of cause and effect the sixth of the seven seven principles of natural law were so-called hermetic principles okay so again as I've said this is probably the most important principle to understand because it is how we are collectively creating the reality we are experiencing I don't know how much more I can stress that if this is of utmost importance to understand because once you understand this you understand the only thing that can actually change the manifestation is to understand how these natural law expressions work to create our reality if you do not possess this knowledge you are a blind co-creator of reality and believe me folks we have almost seven billion blind co-creators of reality on this planet there may be a few thousand P people on the earth at this time who deeply deeply deeply in fullness understand these natural law expressions and the manifestations that they create sad to say that's how dark this planet is so with with this having keeping that in mind and with without having been said let's take a look at the real law of attraction or what I call the expressions of natural law okay how natural law actually works so take a look at image number four on what on earth is happening right now okay or with this podcast and you will see a chart called natural law expressions this chart is broken down into two basic columns I should say three basic columns okay we have the forces or the expressions of natural law okay that we work with okay and then we have a positive expression and a negative expression okay there are positive polarity and a negative polarity and then what is created internally and externally as a result of working with those polarities it's actually quite simple okay the problem in conveying this information comes from the ego the ego is the greatest barrier to the acceptance of this information okay and the ego will try to strike out against the hearing of this information and the acceptance of this information because the ego does not want natural law to exist the ego is the dark force of identification with the physical and it is uncomfortable with being governed by a force which it did not create I'm talking about small case a ego okay lower case a ego egoic identical Asian in man's mind in mankind's mind okay this force will attack anybody attempting to put this information out there so I expect ad hominem attacks when I talk about natural law I expect people trying to take the issue off of natural law and putting it on to trying to basically divert the flow of information and conversation and I'm not going to allow that to happen so I've I have asked people in the last couple of shows since I've been talking about natural law that other topics are basically I'm temporarily asking people to take them off the table voluntarily I'm not issuing an order here but at the same time it is my radio show and if I have asked for something to be discussed then I don't want people calling in talking about something else so for that for the time that we're covering natural law I'm asking if you're going to call into the show during that time I've already given the call-in number so anyone who's thinking about calling in or is already waiting on the line the topic for discussion ladies and gentlemen is natural law that is the topic for discussion for a year and a half there weren't absolutely no guidelines for callers it was calling talk about whatever you want there are no taboo topics and there still aren't taboo topics on this show for the time we are talking about natural law I am attempting to maintain focused discussion and energy put onto this topic only please if you are going to call in the topic for discussion is natural law you can talk about its principles its effects its manifestations whenever you want to talk about natural law but for the time on the show that we are discussing natural law the topic for discussion for callers should be natural law I don't know how much more I should go on about this for people to get it okay so if I hear you talking about something other than natural law I'm cutting the call off I'm sorry to have to be like that but unfortunately I think I've already wasted enough time asking people to keep the discussion during the time we are talking about natural law - natural law please okay let's all say about that now back to the actual concepts on the chart we see the to cut basic columns I've put the the the positive expressions in a blue color and the negative expressions in a red color okay and I've done that for a reason okay because these frequencies actually tend to affect the way that we see things so I'm actually being honest with you that I'm using color frequency to actually attempt to get people to understand the information that's on the slides okay so the positive expression is on the the middle column and the negative expression is on the far right column on the left hand column we have the forces and expressions and I'm going to explain what those are on the other side of this break hang on a little gal institutions like the back of your we're back folks this is what on earth is happening on there host mark passio my website what on earth is happening calm we're talking about the expressions of natural law on the show here today and I've directed people to image number four on the radio show page of my website what on earth is happening calm image number four shows a chart of the expressions of natural law or in other words how natural law actually works through our choices to create the manifestations that we create in our lives in other words the real law of attraction that's what this is okay so we start with the generative force or polarity okay and as we've already talked about when we covered the principle of polarity really there is only one thing here the other thing is illusory it comes from identification with something that is actually not who we are there are two generative forces meaning forces that we can create through that's what generative means from the word generate meaning to create from the latin verb generic meaning to create okay the generative principle is what this is about and the there are two basic generative forces they are love and fear okay the positive expression of the generative force is love the negative expression or we could even call this the illusory expression the thing that is actually illusionary it is an identification with something that really is not actual is not real it is a construct purely of an imbalanced mind okay so fear is the negative expression of the jhen relative polarity okay we could also call it the illusory expression all right love is not the romance novel definition the Hollywood story definition of love okay it is the expansive force of consciousness okay it is the force that looks at something head-on once to grow wants to learn more doesn't see things in states of separation or fear okay it is the force which actually creates growth or expansion that's what we have to understand love as okay so if we're attempting to put more love into the world we are attempting to help people to understand and grow in consciousness it's not this wishy-washy mushy definition of love it doesn't mean you don't express that or care for somebody in those ways but that's not I'm talking about love capital L as a matter of fact capital all of the letters love okay we're talking about the higher form of this word it is the expansive force of consciousness okay the force that grows as opposed to shut shuts down the force that shuts things down okay that makes things not grow that actually makes them shrink you can look at it okay that keeps things in a box that stifles the chokes okay is fear this is the debilitating force that stops movement and growth all right this is the force that says don't look there don't understand be afraid these are the only two forces that were ever really working with ladies and gentlemen and one of them is an illusion there's only really one force here and that's the power of luck but we need to actively and in full consciousness to choose that course and we need to conquer the illusory force of fear that's at work in our lives we'll talk about what this freewill choice creates with natural and other side disasters an economic we're back folks this is what on earth is happening we're going to continue talking about the expressions of natural law or what I call the real law of attraction here today on the show if we don't understand this we're navigating blind on dark and stormy waters this is the information that is the most though Calton this is the information that the dark occultists of this world do not want anyone to know about because if you know about how you are creating the reality that you experience you'll change your actions and you'll certainly stop listening to people with very little wisdom who are only trying to control you for their selfish gain and that is what the dark occult is all about if you understand how these expressions work and you pay attention to the wisdom that is contained within nature's teachings again this isn't my information folks that's the thing people think that I'm trying to you know put out what I think this has nothing to do with what I think at all this is information that has existed for as long as the universe has existed and we are only discoverers of it that's it we happen to discover how it works and then we can convey the information about how it works but this isn't know but no one owns this information this is information about how nature works period no one owns the law of gravity people attribute that you know the scientist Isaac Newton may have discovered its workings and then quantified you know the law of how it actually works as far as quantifying it but it doesn't mean Newton it's Newton's gravity you know that's an effect of the universe period it's a law that's in effect period so I want to make that distinction clear here for people that you know our in the state of mind where they hear something and think that it's this is this person's teachings no this isn't my teachings I'm just a for it of getting the word out about this because it's the most important information that we could ever know and it is knowable nature didn't put unknowable laws into effect to torment us for eternity these laws are knowable and they're there for our betterment not for our confinement they're there because living in harmony with this look with these laws creates the most quality of life that's why they're there they're put there in the polarity of love okay so going back to these natural law expressions we work with in our free will the generative forces or polarities of love and fear in each moment we get to choose love or fear and then something happens okay we make a decision through the state of vibration that we are in okay and that the thoughts that we hold in our mind the creative aspects of our individuated consciousness our thoughts okay then they have an initiative expression what I term an initiative expression initiate means to begin so this is the beginning of setting something into motion okay a prime fad causal factor okay lease the snowball that gets down to the bottom of the hill had to start up top as a tiny pebble and it rolled and it picked up steam and it picked up snow as it went and then it became a big boulder with its force and it's giant manifestation at the bottom of that hill okay the same it's the same way natural law works okay we have an essence or a prime polarity love and fear okay then that gets set into motion through the initiative expression the positive initiative expression is the seeking of truth or wanting to know okay so I've simply turned this knowledge alright you could look at it as the desire for knowledge the the quest for knowledge itself okay and there is such a thing as knowledge so again if you think there's no such thing as knowledge or nothing can be known your ass all obsessed and you want to go back to podcast number one and start from there because that's when I talk about solid sessom as being the the ultimate lie the the biggest thing that the dark occultists always want to push off onto the people below them to get them to buy into anything that they happen to be talking about okay solid sysm is the idea that nothing can really ever be known to put it simply and this is bunk bunk pure and simple there is such a thing as knowledge things can be known particularly natural law it can be known period it not only can be known it is known by many people not nearly enough people but this is knowable information okay again if you don't believe that I can't help you that's one of the only beliefs required is that there is such a thing as knowledge it does exist and we can come to know it that is a principle of faith actually because I can't prove to you that something can is knowable when you know it you know it you can't prove to someone else that you're in love with someone else you know it you know that you're in love prove that you love your wife prove that you love your mother or your daughter or your son it you can't prove that to someone else I mean you could probably get them to accept that by the way you treat that person through their actions but you can't prove that to anyone you only know it so it exists as knowledge and each person has to come to that knowledge in a one-to-one basis with it okay so knowledge or seeking of truth is the initiative expression or the positive initiative expression of natural law the negative initiative or beginning expression is the opposite of knowledge which is ignorant okay it is the refusal of truth or the refusal to set upon a journey to discovery of discovery okay you don't set upon a journey to discover truth there is no seeking of knowledge and this is done willfully this is a decision is made to do this okay whether it is done consciously or through pure fear it's still an expression of fear okay and it is the opposite of another form of not knowing known as nations so I'd like to make the distinction between nations and ignorant here Nations the word you can break down you can go to the Latin language and you could break it down nay in in Latin is a negation or not okay and cos quiere which is the basis of the word science okay means to know to understand okay so nacio means not to know but there's a specific connotation in which Nations is used it's not to know but not to have any reasonable expectation to know because the information was never in your presence it was always withheld it was always just absent so you could not reasonably have been expected to know that's nationís ignorance on the other hand is something altogether different than Oracle Broadcasting radio network it we're back folks this is what on earth is happening I'm gonna jump right back in for our discussion of natural law continuing with the chart on image number four on what on earth is happening calm on the radio show page where you can see images for today's show we're looking at the expressions of natural law we've talked about the generative force or the polarity the positive expression being love the negative being fear where were looking at the initiative expression or the beginning of setting into motion these causal factors the positive expression being knowledge or the seeking of truth and the negative expression being ignorant or the refusal of truth and I was talking about nations versus ignorant nations there is no possibility of having discovered the knowledge so there is no reasonable expectation for one to know but ignorant means that the knowledge is present and actively willfully refused that's what ignorant is the active willful refusal of truth through fear okay so do we have an essence society or do we have an ignorant Society and I would state overwhelmingly that our society is not necess we're practically drowning in knowledge let me tell you something folks I've amassed so much knowledge I probably could not go through the amount of stuff the amount of stuff that I have gone through and absorbed and taken into myself is so overwhelmingly colossal that it's almost frightening to myself if you could believe that okay and in comparison to the amount of knowledge that is out there it's like hardly anything the amount of stuff that I still have sitting and waiting to go through is way bigger than than what I've already gone through and like I said what I've already gone through is so colossal that it would make most people pass out to put it quite frankly okay which shows how much knowledge is really out they're in the world we're drowning in it but unfortunately there's very little wisdom in our society because we are refusing that knowledge we won't look at it in fear the generative polarity we are choosing the the negative initiative expression of natural law called ignorance at least most of us are and that's what our task is is to help people get out of that level of fear called ignorance ignoring that which is there if you are ignoring a person that means they are in your presence you're not gnashing of them you you know that they're there but you're deliberately ignoring them that's why it's called ignoring somebody same thing with information and truth if you ignore something that is already there you're not gnashing of it you're acknowledging it's there you're willfully saying I'm not gonna look at that and you know what that's where most human beings are at because of fear they understand the implications and the responsibility that goes with learning the truth and they don't want that they think they're gonna remain blissfully ignorant and ignorance is not bliss folks it's pain as we're gonna see the next phase that natural law passes through through the free well choice between love and fear is after it goes through the initiative expression of either seeking knowledge or refusing knowledge refusing truth okay seeking truth or refusing truth is the internal expression so this is more of a feminine feminine expression the feminine energy is more at work because this is stuff that all takes place within us in the internal realm of the human psyche and emotional and the emotional plain okay so the internal expression in a positive sense is known as aren t you could put the word balance here you could put the word self-knowledge knowledge of self okay you could put the word self-ownership in there you could put the word

Dominion in there rulership of the kingdom of oneself self mastery could be substituted in there there's many different ways you could word it but it ultimately equates to the same thing knowing yourself to the extent that you understand that no one else owns you and that you own you and only you you own the right to control your own thoughts your own emotions and your own actions and to bring those into harmony with each other such that they are not contradictory within okay this is the process of self mastery that means you truly have conquered yourself and you rule the internal kingdom of self no one else does no one else controls your mind no one else controls your emotions no one else controls your actions okay so you're not on anyone elses strings like a puppet being made to dance by a puppet master okay that's sovereignty sovereignty is the state of self rulership now some of the other slides that I put in here deal with these expressions I've put slides that show love of being extending their arms outward and being in the light showing the expansive force another one about fear showing a woman putting her hands up in front of her face and weeping crying you know saying no you know I can't can't deal with that you know because she's in a box she's in the confines of this force of fear I put up a slide image number seven is knowledge okay this is truly knowing oneself being with oneself okay all of the chakras activated the life force energy fully online and glowing around the person this guy is lit up he's acting activated all you know he's running on all cylinders activated okay and because it's because this is a person who knows the self the higher self okay image number eight shows what ignorance is it's putting up a wall it's putting up a barrier block to the truth I don't want to know that keep that out there I like being in my little box here I like being behind my wall that shelters me from the real world and most of all it shelters me from true self-knowledge okay sovereignty I show a picture of in slide number nine you know representation of of course these are conceptual ideas but there's good imagery to go along with a conceptual idea that will hammer at home in people's minds which is why I make these slides okay so this person has the light you know they have grasped the true self they know who they really are they know that no one else owns them they know that they exist under the light of the Creator okay so what is sovereign what does the word mean okay it means above rain so vay comes from the Latin super which means above and regnum means rule or control or rain so it means above external control no one else controls or owns you or rules you you own you you control yourself you rule you period okay a sovereign traditionally is a king or a queen meaning one who is above rule or not a subject to any other not a slave in other words this can only come about through knowledge of self chosen through the expansive force of consciousness or love okay are we beginning to see how this expression of natural law works a sovereign is the ruler of the kingdom of self as we've already said one is who is in dominion over self they own their own thoughts emotions in act these three aspects of consciousness do not exist in a state of non-duality or contradiction they exist in unison they exist in non duality sovereignty is self ownership it is internal monarchy the word monarch means one we're back folks this is what on earth is happening I'm going to jump right back into the expressions of natural law I'm going to attempt to finish filling in this chart here and explaining the concepts on it so we can get to some calls in the final segment we were looking at the positive internal expression of natural law which we called sovereignty which is a state of self rulership self mastery self ownership or internal monarchy monarch Mon is the root for one and are the root for rule or control so it is one ruler one owner that's what a monarch is okay this is another reason that the dark occultists have a program called monarch okay it's about tormenting the monarch slave the one ruler okay it's about preventing the transformation from caterpillar to butterfly which is why they chose that symbol the butterfly the monarch it's a very very sinister their reasons for choosing the symbols that they do okay because they want to be the one ruler of everything so it's a turning on its head this concept of what a monarch an internal monarch really is all about okay so a sovereign is a self ruler they don't attempt to rule other people they know that they are sovereign that they are masters of the self and they don't want other people attempting to make them subject or slave okay so the negative internal expression of natural law it comes about when one has chosen fear and then chosen ignorance and therefore they become confused with in the internal expression the the negative internal expression of natural law is a state of internal confusion it is the state of not knowing the self therefore you are confused with in your thoughts emotions and actions have not been brought into harmony or unison they are in a state of opposition or contradiction you think one thing you do another you feel one way yet your actions betray your thoughts and emotions okay so confusion gives rise to opposition internal opposition which then lays one open to the manipulation of others in other words they become in this state of fear and ignorance and internal confusion they have become subject to mind manipulation they are easily preyed upon in the realm of the psyche in other words they're an easy prey for mind control okay very important to understand how this works that state can only come about when people do not know who they are when they become identified which with that which they are not and one of the main ways they become identified with the physical form is the fear of death that's one of the primary forms of fear identification so much with the material realm that that's all they ever give any credence to or place any importance upon or value on and once you're in that state you're definitely in a state of pure ignorance and that's always going to give rise to a state of internal confusion or opposition and that's always gonna lay you open to external manipulation by others who do know who they are and yet have chosen a dark path even in full knowing Psychopaths and dark occultists so and again that's the very few most people are simply in this state because of fear and and kept there because of fear that now we have these three things okay the generative polarity the initiative expression then the internal internalized expression then they actually begin to create something in the outside world okay this is the correspondence principle at work now we've had an essence and then at a very beginning or seed planted then we've had an internalized expression that hasn't broken through the surface yet but it's happening in all the individuated units of consciousness called the individual okay then that quantum effect gets built up until something actually happens in the external world we we are making we are creating externally a state an external state of mind okay this is the external expression or the masculine expression if you will of natural law the positive expression being of course freedom because when you work through the polarity of love you know the self you understand your that you are sovereign that you rule your own thoughts emotions and actions and you don't rule anyone else we have a society that is based upon freedom in that condition freedom is the state of external anarchy meaning a world without rulers or owners of other people because the individuals within that society own and rule and govern themselves and their needs not be any externalize control and I would say even if people don't exist in the state of sovereignty attempting to impose external control is always going to result in something bad or negative always going to result in disorder and chaos because you're wasting the energy to attempt to physically control because you're identified with the physical world versus teaching someone how natural law actually works and that's the reason do what they do they're totally in ignorance over natural law and they think they're gonna control people into obeying natural law good luck with that let me know how that works out for you in about 22 quadrillion years and you'd still be doing the same thing moron because that's what somebody has to be to think that something's gonna work like that you literally have to be a complete idiot and the word idiot is derived from Greek and you know what it means one who does not know the self that's what an idiot is somebody who thinks they're gonna continue to do the same thing and get a different result which is the exact definition of insanity well I want I want this glass of water to be cold but I'm continuing to put it over top of a heat source you know I'm continuing to warm it up by putting it over this this low heat but I want it cold well you need to remove it from the heat maybe put it in the refrigerator or the freezer no I'm not gonna do that I'm gonna keep the heat on it this is literally how insane this is it's somebody saying they want one thing and yet continuously doing the opposite thing and thinking they're magically going to generate that expression that they want to see that they're just saying they want to see but they're not willing to do what it takes to actually manifest that I'll dry my clothes let me go get a garden hose I'm gonna put them down in the pile and I'm just gonna spray water on them all day and I'll dry them just wait and see sure you will great good luck with that crazy person you're completely insane if you think you'll ever dry any material like that good luck because you're choosing one thing and saying you want the exact opposite to manifest when you can never manifest that thing by using what you're using it's impossible and if you think that's how it works there's no other way to say it but you're dumb you're dumb let's let's know be apologetic to people who are dumb like this let's continue to try to explain that you can't do it that way and here's how it really works but let's not try to say oh I have a whole lot of respect for you I don't have respect for dumb people the problem is they need to have respect for themselves meaning take another look at your actions take another look at your freewill decisions and what you've chosen to bring into manifestation through your ignorance that's what respect is Arion latin means again inspect Oh SPECT re means to take a look at to look at respect means to take another look at yourself that's what respect is and until you respect yourself it's been said many times you can never really truly respect anyone else and someone who doesn't know themselves or in other words an idiot a person who knows not the self can never actually show anyone any real respect because they don't even respect themselves that's the state of confusion folks its internal anarchy meaning there is no rule work within you don't rule yourself gee I'm not going to sugarcoat this because people want it put in delicate sensitive terms that's not my style and I'm never gonna be like that I'm gonna be totally hard-hitting and telling it like it is cuz that's what I'm here for I'm not here to be like a chiral and nominate disasters and economic turmoil okay folks this is the last segment of what on earth is happening for this September 11 2011 edition feel pretty good about what we've covered on the show so far I want to wrap up the chart of the natural law expressions or what I have termed the real law of attraction here today and then we have a caller waiting on the line so we were looking at the positive external expression of natural law which is freedom after you have chosen the polarity of expanded consciousness sought the truth sought the understanding of the higher self gained that understanding and know that you're a sovereign being and then live in that way in unison in thought emotion in action not in contradiction you can build a society based on freedom which is the absence of external rule ok the negative external expression is the society that is based in control control is the external negative expression so this occurs when we choose the polarity of fear we refuse to learn the truth particularly about who we are that's called ignorance we develop a state internally of confusion which is internal anarchy we do not rule the self our thoughts emotions and actions are not in unison or in harmony with each other we then seek external control in this state we want to control other people because we have no control of ourselves no self governance no self control no self mastery so in that level of complete imbalance we want to go and impose our will on others and this is what every state every government throughout time and all of its minions and all of its agents have ever been that's the state of consciousness that they have ever been in not one of them has ever been in a state of enlightenment ever there is no such thing as an enlightened agent of the state an absolute truth people have a hard time with that I shouldn't even say people have a hard time with that the ego has a hard time with that you want to think that there can be such a thing as an enlightened cop there can be such a thing as an enlightened soldier there can be such a thing as an enlightened judge all bunk all bunk ideas does not exist never has existed never will exist because they think control is going to create in any way anything that resembles freedom order or goodness and it never can because it is always based upon confusion ignorant and fear ultimately so that's the negative external expression finally these choices these free will choices between these two polarities and Express through the initiative internal and external expressions of natural law then become a manifestation in the long term sense ok this is what I call the generative expression you started with the generative force it worked through a beginning stage an internal stage and an external stage and then it becomes a manifestation in our world the generative expression or the manifestation of the positive polarity the positive expression of natural law is called order or good what we consider good this is in harmony with what we've stated that we want for ourselves we don't want to suffer we want to see beings get along we want to see good things for ourselves and others that's called good or order it is our ultimate will for ourselves we don't want to suffer ok that is the final end result when we work with the polarity of love or expanded consciousness when we work with the seeking of truth which is knowledge gaining knowledge of self above everything else when we recognize our sovereignty that no one else rules us and we become sovereign meaning actually live in a state of self mastery there will be freedom in our societies not external rulership but there will be external anarchy the absence of external eyes imposed control or coercion and that will create a society that is based in order true order or in other words goodness things will be good for us the negative generative expression or manifestation is the exact opposite of that state it is known as chaos or what we call evil will we experience as evil suffering the perpetuation of self-imposed suffering and this happens because we've chosen the dynamic of fear we've remained an ignorance of self refused to look at the truth and accept it existed in a state of internal confusion which is internal anarchy we have not ruled ourselves or attained any self mastery and then in that state of confusion have attempted to impose externalized control over the populations therefore we are creating nothing but more self perpetuated suffering which is known as chaos or what we have called throughout the centuries evil that is how natural law works ladies and gentlemen this is how it has always worked since the beginning of time this is how it will always work until the end of time this is not my information I am a vehicle for this information the end that's it I can't put it in any simpler terms study it attempt to understand it listen to the podcasts again go through some of the material that I put out when I on the podcast a few weeks ago when I put out some PDF documents gate that deal with natural law and its principles and attempt to learn more I mean that is how it works it can't really be stated any other way or with any further simplicity this is about as simplistic as I can make this information okay and the last slide for today in image number 18 just I have put arrows on the chart to show that it's always a one-way flow you can never create ignorant through love so it doesn't go across the chart you start here and then you create something in that other column it's a one-way flow folks okay you start with that which is at the top of the column and then it cascades down through those rows okay it's a one-way directional flow you start with love that's how you're going to attain knowledge that's how you're gonna recognize your own sovereignty that's how you're gonna create freedom and that's how you're gonna create order or good you start with fear you're always going to exist in a state of ignorance and refuse truth you're always going to create more internal confusion in your own being you're always going to create more external control in the outside world and that's always going to get you chaos or evil that's it that is how natural law actually works it works on a collective level it's a quantum effect and that is the real law of attraction ladies and gentlemen that's the real law of attraction let's go to the phones here we go David in Idaho you are live on what on earth is happening David from Idaho you can take us out today we have for us that was beautiful mark and you had a talent for this I've noticed that when I was young I was getting forced to do things and then I rebelled and I wasn't going to do it anyway and the natural law would attack me anyway and what he just answered my own question also I see natural law in nature now like I never could before from your descriptions I see it in nature as a fractal and then I see it in my own life little things I do that end up to be big like my garage being a mess I do a little thing I do a little thing and it turns into a mess and you just explained it so beautifully thank you the quantum effect that's right little amounts eventually add up to large amounts so when people say oh you doing this isn't going to make that much of a difference I say it is irrelevant whether that's going to change it by my one action I'm not going to participate in the thing that I know we'll always create the opposite effect of what I want whether a million other people are doing it or not I'm gonna withdraw my support from that because I know it's only going to ever create chaos or disorder and I'm gonna put my attention on that which can create order harmony or goodness in the world that's it it doesn't matter who's doing the opposite as far as my choice goes of course yes it matters because they're going to be creating chaos in the world as a result of that choice but as for my decision not to participate with something it doesn't matter what other people choose that's their freewill decision I'm gonna make mine so actually your point about at being a quantum effect and how that works and fractals as well is is a very very valid David thank you so much man and a great call to take us out for the day that's all we have time for folks I'll see you here next Sunday 5 to 7 p.m. Eastern 4 to 6 central you've been listening to what on earth is happening here on the Oracle broadcasting radio network stick around folks Chris Everard is up next Oracle broadcasting radio

What On Earth Is Happening Show #078

Topics: *Natural Law, Objective Morality, Right vs. Wrong, What Are Rights?, Apophasis, Conscience, Natural Law Transgressions, Moral Relativism*

freedom man that's what it's all about you've got to groove on freedom like the good book says welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host mark pascio welcome ladies and gentlemen you are listening to what on earth is happening right here on the oracle broadcasting radio network i'm your host mark pacio today is sunday september 18 2011 my website is what on earth is happening dot com and of course the network's website oracle broadcasting.com we have a really big show lined up for you here today we are going to be continuing our ongoing discussion about natural law the principles of natural law and how it works in our lives and today we will be tackling the critically important topic of how morality fits into the picture of natural law and human freedom so that's coming up on the show i want to read a few event announcements for events that are happening in the philadelphia area because again knowledge is only the beginning of this journey it's actually what we do with it that really counts and that matters in the long term so it's about getting out out there being an activist and taking action in the world uh related to one of these events um i want to let listeners know that i will not be on the air live uh for the first time in 78 uh weeks next week next sunday i am taking a day off and i'm really not taking a day off because i'm going to be supporting my partner barb while she gives a presentation usually i'm the one giving the presentation but she presentations but she has one coming up next sunday and i'm going to be there in support of her and that brings me to my first event announcement uh the group called survive and thrive here in philadelphia that's hosted by our good friend fernando is meeting uh next sunday september 25th at 4 o'clock p.m at liberty's a pub in the northern liberty section of philadelphia at 705 north 2nd street that's the corner of 2nd and fairmount in the northern liberties section of the city survive and thrive meets there i believe twice a month to host um hands-on classes about survival skills and uh barb as a rn is going to be giving a presentation there on emergency trauma care next sunday so that is the first event that i wanted to mention and that is why i will not be on the air next week i will pick a show from the archives to replay in the spot next week so that's event announcement number one the second event announcement is for the truth freedom prosperity uh monthly documentary screening and discussion night that's held on the last wednesday of every month at media bureau studios also in northern liberties media bureau is at 725 north 4th street and wednesday september 28 2011 at 7 00 pm we will be screening the film human resources social engineering in the 20th century a vitally important film that if anyone has not seen in this area please come on out and bring as many people as you can to see this one because this is about the real issues that are going on and causing the loss of liberties so that's the second event announcement i have uh one more on the other side of this break i'll tell you about that and then we'll get into our topic of discussion for this evening this is what on earth is happening we'll be right back we're back folks this is what on earth is happening here on the oracle broadcasting network i'm your host mark pascio my website what on earth is happening dot com sorry i ran a little bit overall before that last break i was uh not able to watch the time clock i was uh taking a look at the uh the um event that i was reading to the audience and i missed the uh the upcoming break so i apologize for that but on uh on to the other event announcement that i have for everyone there's a big east coast conference coming up hosted by mufon the mutual ufo network and there's some great speakers on this conference coming up right here in philadelphia uh october 15th and 16th at the four points sheraton philadelphia northeast that's at 9461 roosevelt boulevard mufon is hosting their uh east coast conference and there's some a great lineup of speakers including joseph mara linda moulton howe bill weber bill burns john ventry robert o dean george filer dr lynn katai jerry jonas and chris augustine and uh it's going to really cover a wide gamut of topics of the the entire range of phenomenon associated with uh uh ufos abductions etc so this is one that people in this area are not going to want to miss if they're into uh the ufo phenomena and the paranormal in general um october 15th and 16th that's saturday and sunday and the event goes 8 30 a.m to 5 p.m on saturday 9 a.m to 4 p.m on sunday saturday is only 35 to attend sunday only 30 to attend and there is a dinner con with with the conference speakers on saturday evening october 15th for only 38 dollars so this is a great event i've uh often worked with some of the promoters of mufon in the past and are a great group of people uh for more information on this east coast conference coming up in october you want to visit mainelinemufon.com that's mainlinemufon.com or you could visit the regional chapter of mufon in pennsylvania at mufonpa.com so those are the event announcements i have actually there is one other i may um it's pretty much confirmed uh i'm going to be speaking november 5th november 5th at media bureau studios a friend of mine kevin is putting on a conference of sorts there i'm still waiting on the final details of this maybe he could even call in today if he's listening and and give the details out over the air when i get the final details with all the speakers i'll be announcing it here but he's asked me to uh give a presentation on november 5th at uh media bureau which is at fourth and brown in the northern liberty section of philadelphia and i'm going to be giving a talk called heart control apophysis and the negative pathway to truth heart control apophysis and the negative pathway to truth on november 5th 2011 here in philadelphia so i'll be i'll have more details as they emerge on that event so with that in mind i want to direct people to my website at what on earth is happening dot com where you will be able to see the images that are associated with today's information if you go to the radio show tab on the website what on earth is happening dot com you'll see listed underneath the player images for today's show and there are 12 images there if you're not seeing all 12 i did add one last minute so refresh your page there are indeed 12 images uh image links listed there and these images are associated with the concepts and ideas that we're going to be talking about on the show here today once again the show today is going to be on natural law and this topic we will continue to discuss until really we've fleshed out in detail all of the um important concepts that one really must grasp if they're going to understand the true causal factors of why what is happening with human freedom is in fact happening okay um we're trying to answer the question why and to do that you have to get down to causal factors you you in order to understand how these causal factors work you need to understand existing conditions natural law is a pre-existing condition in the universe that we are bound by we did not create it it is inherent to the universe it is simply based in nature okay it is not made or caused by humanity a law is an existing condition which is binding and immutable this means that human beings do not have the power to change a law that is in effect and has been put there by nature or by the creator okay so this is what natural law is and we've spent weeks basically helping people to understand what natural law is the actual principles that it is based upon okay we went through the seven general principles of natural law a few weeks back and then last week we did a show on what i called the real laws of attraction okay it was the expressions of natural law or in other words how the principles of natural law actually work in our lives according to our free will choices between polarities to actually create the manifestations the events of our lives as we experience them okay the expressions of natural law were covered last week on the show on show number 77 which uh very synchro mystically if you will um happened on september 11th the uh 10th anniversary of the 911 um human sacrifice occult ritual and very interesting that it was show number 77 uh numerologically you know it could not have been planned any better than that and it was not planned that just happened to be how the numerology of this show worked out for anybody that has taken a look at the show that i did on occult numerology involved in september 11th you'll understand what i mean by that statement so last week we covered the expressions of natural law we went through the the generative polarities love and fear okay the expansive force of consciousness and the force that shuts consciousness down okay we took a look at the initiative or the beginning expressions of these polarities okay the positive expression being active seeking of the truth going out in search of knowledge wanting to know the desire to know okay and the negative expression based in fear being ignorance or the refusal of truth the internalized expression coming to know oneself and bring one's thoughts emotions and actions in harmony with each other in a state of non-duality is the state of internal monarchy or sovereignty it's the rulership of oneself becoming a master of oneself and then the negative expression based in fear confusion internal anarchy not ruling oneself not understanding what's going on either within both within or around oneself we took at the took a look at the positive external expression based in love okay which is freedom true freedom or external anarchy no one ruling anybody else and then we also saw the negative expression of the external expression which is based in fear which is control will continue looking at natural law on the other side of this break this is what on earth is happening we'll be right back we are welcome back everyone you're listening to what on earth is happening on the oracle broadcasting network today on the show we're continuing our discussion about natural law its principles how natural law works in our lives through our decisions the polarities that we choose to work with and then it creates a manifestation and ultimately we're the ones doing that so if we don't like the manifestation the good news is we can change it by choosing the opposite polarity anytime we so choose the where i left off before the last break was we were talking about the external expressions of natural law both both positive and negative a positive externalized expression being freedom which is the absence of external rule or external anarchy in other words no one ruling over anybody else no masters and slaves okay that's not the relationship that people choose between each other okay so the negative externalized expression is control where people do choose a relationship based on master and slave relationship okay they do choose that there's external control in place i call this external monarchy other people rule people okay people aren't ruling themselves so they're ruled by someone else they're owned and controlled by another okay and you just take a look at the chart and this is uh image number four on the radio show page of what on earth is happening calm i generally put up images that go along with the concepts that i talk about on the show to illustrate them better to the listeners because people can associate the words that are being said with uh something tangible right in front of their eyes okay this is why i put these slides up on the site and if you just look at the way that the flow of the chart goes okay you start out with the positive expression you always stay in that column so if you start out choosing love and knowledge and understanding your own sovereignty meaning that you are above rule and you live that way okay so your thoughts emotions and actions are in unison are in harmony with each other and you're not living a dualistic life okay you're really embodying sovereignty you have become a monarch a ruler of the self okay and you don't have the right to rule anyone else you do have a right to control your own thoughts your own emotions and your own actions okay and that those rights end where someone else's rights to exercise their own rights begin okay so as long as you don't tread on anyone else's natural law rights you're free to continue to do as you want as a sovereign being as long as you respect the sovereignty of others and when you live in that state then there's external freedom or in other words external anarchy no one ruling anybody else the absence of rulers is what the word anarchy means see it's a mind control trick to get you to think that that means chaos chaos is actually on the other side of the chart that's the generative expression the negative genera generative expression of natural law because when we embody sovereignty in our lives and then freedom results and again think about it you can only have external anarchy once you have internal monarchy that's the way this uh natural law expression takes root okay it's actually this is a this is a sequence in time as much as it is an explanation of how natural law functions okay you have to start choosing higher consciousness or love and then you'll come to know yourself and the truth about the events that are happening both within yourself and in the world better you've come to a place of knowledge you can then recognize your own sovereignty okay and then start building freedom in the external world around you which can only be done once only truly be done once you understand and embody your own sovereignty okay and that's how good or order is created or manifested in the world that's the generative expression conversely if you live in fear and you refuse truth and decide to ignore what is ignorance choosing the path of ignorance there will be internal confusion or internal anarchy you won't know yourself you won't know how you work and then that sets up the path to manipulation mind control etc and then there will be externalized controls put in place by other people who do know the the score who do know what's really going on okay and that's the path to chaos or what we call evil that which we do not want for ourselves at least we say we don't want that for ourselves sometimes i wonder because people keep doing the same thing and saying they don't want it and expect a different result and think that they can continue to do that same thing based on the same polarity and get a different result which is pure lunacy okay so when people tell me what's your what are your politics what's your political views i tell them i don't have any politics politics is an illusion i don't believe in politics it's a dialectic set up there to keep people in opposition with themselves there is no such thing as politics doesn't exist it never has existed it never will exist it's a mechanism for controlling one's mind i tell people while i absolutely don't believe in politics i believe in monarchy and anarchy simultaneously and that usually leaves them with a totally confused expression on their face until i explain what i mean by monarchy is internal monarchy or sovereignty of the individual so long as they don't infringe on the natural law rights of others recognizing one's own sovereignty under the creator bringing your thoughts emotions and action into alignment and i also believe in anarchy the absence of rulership over others but what i absolutely do not believe in is internal anarchy because if you're going to live in a state of internal anarchy or in other words duality within thinking or feeling one thing and yet your actions betraying what you know and how you feel and yet you do something else other than how you say you feel you do something else other than what you say you know okay then that's a state of internal anarchy and that only leads to external monarchy meaning someone else controlling your behavior you not truly owning you so i don't believe in those forms of anarchy or monarchy i believe in internal monarchy ruling your own house in a state of non-duality within and i believe an external anarchy no one else ruling me because i own myself just as everyone else out there owns themselves and should take care of their own house and that's the only way we're going to get to freedom ladies and gentlemen it's not going to happen any other magical way get over it so to some people that's a very negative or hard view to take a look at because they know how much work is actually involved in coming to that state of internal monarchy or sovereignty they know how much self-examination is required they know how much knowledge seeking actually looking at the truth actually admitting that you are wrong in so many instances and that have been duped in so many ways and places in your life just to make that apology and say i was wrong and then actually change your actions to bring your actions into accordance into alignment with truth it's not an easy process this chart looks simple and it is simple as far as the concepts go but actually doing it is a different thing knowing the path and walking the path are sometimes altogether different in their level of challenge so that's the goal that we need to look toward is creating true good or true order based in freedom sovereignty and ultimately the polarity of love we're going to take a look at how morality fits into this picture on the other side don't go anywhere folks you're listening to what on earth is happening welcome back everyone this is what on earth is happening i'm your host mark pacio my website what on earth is happening dot com we're going to be getting into some deep aspects of natural law here today on the show before we do that i want to give the call-in number hopefully we'll have some time to take some calls in the last couple segments call-in number for the show today is eight six six eight four one one zero six five once again the call in number eight six six eight four one one zero six five when you call in just hang on the line be patient i'll uh try to get to you in the later part of the show but you can call in now to get in the queue so we're going to be talking about really the fundamental thing that is causing the loss of human freedom and as sad as it is to make this statement here's as simple as it gets human freedom is being destroyed and lost at the rate that it is being destroyed and lost at for one basic overarching reason human beings unfortunately have come to a point in their consciousness where most of them no longer know the difference between right and wrong that's it folks that's it if you want to know why the events that are happening are happening that is the causal factor right there they do not know not believe or think or just have an opinion about they do not definitively know the difference between right and wrong and there is such a thing and i want to make a real hard definitive statement here any spiritual teacher that is not telling people that there is a definitive objective difference between right and wrong is a fraud or a deceiver they are a fraud or a deceiver okay or both or sadly they're a useful dupe who really doesn't know the difference themselves and is trying to make a buck okay so let me be as plain and as clear about that as i can the people who are telling anybody out there that there's no such thing is really a difference between right and wrong and oh this is just further polarizing people and you know when we make it about right or wrong you know we're adding to the problem wrong there is such a thing as right and wrong there is such a thing as objective morality okay it is based in natural law principles and when we started this show 78 weeks ago one of the first things i talked about was the ideology known as moral relativism which is destroying the people of the earth when i then went into all of the methodologies of mind control and helped people to understand that it is dark occultists who propagate all of these mind control methodologies and what their ultimate religion is all based upon is moral relativism on the shows that i did on satanism and dark luciferianism this is their foundational ideology that there really isn't any such thing as right or wrong it's all relative it's all based on what we think our preferences based on the current situation at the time and if you believe that you are under mind control put there by dark occultists if you believe that there is no such thing as objective right and wrong you are under mind control and that is the problem that so many people actually believe in moral relativism that's the problem with the people of earth and that's why the people of earth are going into deep slavery and i'm choosing my words very deliberately okay and people will not like to hear this they will rebel against this in whatever way they can because they want to abdicate personal responsibility to to know the difference between right and wrong and then to choose the right they don't want that responsibility they want to claim ignorance i didn't know i didn't know as i was uh hoarding people into work camps that that was the wrong thing to do i thought it was fine i didn't know as i was signing off on all of these bad loans i didn't know i didn't know that i was basically telling taking away these people's rights to speak and make their opinion voice their their their uh concerns and opinions that i silenced them i didn't know that was wrong i was just doing what i was told i was just following orders i was just doing my job how long are we going to let this fly as an excuse as a people we heard that at nuremberg the russian secret police that worked under stalin claimed that it was it's just a job i wanted to keep working so i could feed my family the shutstaffer who ran concentration camps were saying that well our government was telling us it was okay people behind all of the these loan frauds and all the the the rape of the economy are saying oh but my my superiors are just telling me to do that that's okay that's company policy and then they just do it because it's just pass the buck down the line just abdicate your own responsibility to know the truth to know right versus wrong and then choose right they're trying to say oh no we don't have that responsibility that's someone else i'm just the foot soldier i'm just a person pushing a pencil or i'm just the person carrying out the actions that my owner tells me to do and we think that's acceptable that that's okay for somebody to just continue to abdicate that personal responsibility and say well they're the ones actually doing these things that they're not responsible for doing them nonsense bunk is what i say to that and that's what you should say to that if you have any understanding about the real dynamic that's taking place here you should call people on that you should call their bs on that because that's exactly what it is and it shouldn't fly in any kind of a moral society for someone to make claims like that that they're not the ones responsible even though they're the ones actually doing the action so someone else told me it was okay think about this folks this is as common sense as it gets see because that's ultimately what we're talking about here today is common sense that's a key phrase that's going to be coming up so that's the dynamic people really don't know the difference between right and wrong they don't know what their rights are and they don't know what their rights are not and i told you when i started the section on natural law i told you two things and remember my words this is the most deeply occulted information on the earth and it's some of the most basic but it is the most deeply hidden truth you're never going to hear anybody talking about this on television you won't hear this on the nightly news okay you won't even hear amongst some of the top alternative media this is the most occulted information in the world this is the information that the dark occultists who are running the show know and are using against people as a weapon and ultimately are trying to get people not to ever look at this is what they want hidden from your site which is what the word occult means hidden from sight okay another form of mind control is trying to make one word associated with something that it's not really associated with at all and one of the best forms of mind control is associating the word occult with evil because it means no such thing it means hidden because it is hidden knowledge about objective morality and the workings of natural law which if you do not understand you can only create chaos you can never create a world that you want truly that you in which you live and are free from self-imposed suffering we're doing this to ourselves ladies and gentlemen no one else is doing this to us in our ignorance of morality and natural law we are creating this heinous hideous situation of the loss of freedom and the slow spiraling descent into servitude we're doing it and it's being directed by clever people who know how these laws work and have subsequently hidden that knowledge and taken it out of general circulation so we're going to talk about right and wrong and really get down to the true differences between these ways of being in the world you're listening to what on earth is happening don't go anywhere ladies and gentlemen here we're back this is what on earth is happening i'm your host mark pascago we're going to be getting down to the real causal factors of why humanity is experiencing that which it is and it ultimately comes down to knowing the difference between right and wrong and there is such a thing and it is objective and can be known and there are people who know it and many people don't want to hear that and again they'll rebel against it i told you to expect ad hominem attacks against me for stating these things because when people cannot refute something that is based in truth and based in principle they will just attack the messenger that's it and it's always done by people who don't want the personal responsibility of knowing the truth knowing right versus wrong and then choosing the right that's who always does that they want to be absolved of the responsibility of having to choose the right when given the choice between right and wrong they want someone else to choose that for them or and tell them here's what you're gonna do go do it and they say yes i'll go and do that and then they can blame it on this other person and that's all it comes down to and i don't care again i told you i don't care what time period in history we're talking about that ideology that way of being in the world no matter what time period no matter what people no matter what land is the ideology of a nazi i don't care whether you call them british redcoats i don't care whether you call them people uh in um waging tribal work warfare against others just to eradicate uh the opposing tribe in some region in in africa someplace okay i don't care whether we're talking about communists i don't care whether we're talking about any form of radicalized police state controllers no matter where they were roman centurions doesn't make a difference it's the same mind state it's the same mind state i'm going to do this whether it's right or wrong if i get something out of it if somehow i benefit it doesn't make a difference who i'm harming who i'm hurting who i have no right to be doing these actions to i'm going to make the decision willfully to do it anyway and 9.9 out of 10 times i'm going to point the finger externally when asked why were you acting like that you don't have any right to act like that the action is wrong because it results in harm to someone else when you had no right to cause that harm i'm going to point the figure and finger and say that person told me it was okay and there's nothing anybody can say no matter how much you want to say oh i agree or disagree with politically what happened during that time of the world or why these actions were taken nobody can actually refute the wrongness in morality of the actions of these people and claim that they are not pointing the finger and saying that person told me it was okay because they're a mindless follower that's all it comes down to and i'm i want to be harsh about how i'm wording this it's deliberate harsh language because people need to get used to not hearing garbage politically correct speak speech you need to hear hard harsh language when it comes to evil when it comes to deliberately choosing wrong just because you think you can get away with it that's all these people's mentality is and that's what a socially darwinistic mentality is there is no such thing as right or wrong good or evil it's what you can get away with that's what moral relativism and social darwinism is at its core when we look at the words right and wrong just the words again so much of what i do on here is get down to the actual meaning of the words okay i consider myself a wordsmith and if we really want to understand what's going on in the world we need to look at words words are actually imbued with energy they are sound energy that leave our mouths that we generate and therefore there is a magical quality to words and you could scoff at that laugh at that all you want this universe is created by sound energy and when we speak we are creating in that sense we are like the creator of the universe having been given that gift of speech because we can speak a world into existence that we extraordinarily benefit as a result of or we can speak a world into existence in which we live as slaves the choice is up is up to us because what we are what we speak and what we listen to that becomes who we are as a people and unfortunately what we've been listening to and what most of us have been speaking is pure garbage and it doesn't take into account natural law principles and it doesn't take into account other people's rights right and wrong as words just think of the words right when you say the word right depending on the context that you're using it in it can mean either correct or moral two plus two equals what's your answer for you are correct that is the right answer it's a based in objective truth he did the right thing meaning he did the moral thing what he did did not result in harm to others meaning he chose right correctness means based in truth and we use the same word for correct and moral moral means based in natural law principles not resulting in harm to others that's what moral is yet the same word right we use in different contexts to represent both of these things and there's a reason that we use the same word in english to represent both of those concepts because those concepts are equivalents there isn't any difference between those things if something is based in truth it is based in principle principles are always based in truth and when we make a decision to act in accordance with true principles not ones we think exist which are really based in natural law we have done the right thing we have taken the right action therefore we're specifically using this word right in both of these contextual situations not by accident because it's telling us that the correct thing and the right thing are the same thing the correct thing in the moral thing are always identical to each other therefore the more we know about truth the more accurate our understanding is when it comes to what is true the more moral our behavior will become and again if you don't think there is any such thing as truth and you're a solipsist turn the show off because this show can do no good for you if that's what you think and you're committed to staying at that position if you go back to show number one is what i would say and understand the danger of solipsism meaning the belief that truth can't really be known it's all just a matter of opinion and everybody has differing opinions so you can't really ever really know the truth that's called solipsism and it's the most dangerous ideology out there it is the antithesis of philosophy it is not a philosophy people who call it a philosophy don't understand the meaning of the word philosophy solipsism is not a philosophy it is not based on the love of sophia the the love of wisdom the love of the goddess at all it is an erroneous ideology that is based in ego so on the other side of the break we'll start looking at what the word wrong represents okay because we need definitive delineations definitive definitions to understand the differences between these two polarities and why choosing one will get you one thing and choosing the other will get you something completely different don't go anywhere we'll be right back we're back folks this is what on earth is happening at the top of the second hour this is a short segment so in this segment i'm just going to concentrate on continuing to explain the difference between right and wrong and it's sad that this is what needs to be done at this point in history you know i i sometimes think it's even sadder that the task falls to someone like me because i'm not perfect by any stretch of the imagination ladies and gentlemen i never claimed to be i just said i had a high level of consciousness or awareness of what's really going on both within me and around me and in a wider global sense but don't ever make the statement that i ever claimed that i'm any in any way some kind of a perfected being because i am not and you know when i think the look at the task i'm attempting to try to explain to people of the earth the difference between right and wrong i don't always you know follow moral guidelines 100 percent perfectly i attempt to do that but no one is perfect you know we all fall into different forms of temptation or into doing different forms of wrong now and again some of us in greater degrees much greater degrees than others but you know i don't think anyone lives a perfect existence and that's not what i'm saying anybody needs to do we need to start choosing the right much more frequently than we choose the wrong so when we look at the word wrong we looked at the word right before the break before the top of the hour now let's look at the word wrong it means both incorrect as in two times three equals seven incorrect you gave the incorrect answer wrong you're wrong not correct not based on truth not based on actual point of fact reality okay and it also simultaneously means immoral when we use it in a different context well that man raped that woman last week he did something that is incredibly morally wrong we'll talk about the transgressions of natural law which is actually a much once we have a solid understanding of those transgressions we'll have a much better understanding of what our rights actually are and what they are not so it's actually very important to look at what wrong is moral wrong we're going to do that today moral wrong is always actions that are not based in natural law that are a violation or a transgression in some form of natural law so we use the same word wrong to mean incorrect and to mean immoral not based in natural law because if our actions are based on things that are incorrect that we believe in that are not based in truth then they will be immoral they will create chaos they will result in harm to other beings that which is true and right is always going to be moral the actions that are taken in that state will always be in harmony with natural law and they will not result in harm to other living beings conversely when we are wrong in our information when we have not taken enough information to make an accurate decision based upon its veracity or its level of truth then we will act in an immoral state the actions that we take in that state of consciousness will always result in harm to others and therefore they will always create chaos in the world this is intricately interwoven into natural law and its expressions to study one is to study the other we'll pick this up on the other side of the break you're listening to what on earth is happening on the oracle broadcasting network we're back ladies and gentlemen you're listening to what on earth is happening i'm your host mark pascio today as we have been for the past many weeks we are talking about natural law not the law of man but the laws of nature and how adherence to these natural principles are either going to result in order or chaos in our lives and that they're not up to us because we didn't put them in place the only decision that is up to us that we have free will over is how we will either live in harmony with those natural guiding principles or we will completely ignore them living in harmony with them will result in freedom and order and everything that we call good choosing to ignore them and continue to think that we just may do whatever we feel like doing based on likes or preferences or dislikes is only ever going to get us more and more chaos or what we call evil in our lives suffering in other words and that's just how it works it's nothing to get upset about it's you know nothing to rage against it's how it works these are just laws that are put into it into effect by creation but see the ego wants to think it's the highest thing in creation it doesn't want to accept that there's any higher power or force in the universe it wants to be all powerful and it wants to say no you can continue to do whatever you feel like doing even if it's in violation of another's rights that's not going to create more and more harm and more and more chaos and more and more evil in the world even though that's exactly what it does and then the ego wants to say you could just point a finger and say that person made you do it or you didn't know claim pure ignorance as if that will somehow absolve you of that wrongdoing so what it all ultimately comes down to we just took at the look at the words right and wrong what it all ultimately comes down to is knowledge and here's another place where i'll tell you new age proponents and you know this the new age movement teachers will tell you it doesn't knowledge doesn't matter that much once again pure bunk and anybody trying to sell you that there that there's a way to freedom without going through knowledge is a liar a liar that's why the path of knowledge the suffer the the hidden sephiroth the one that is not actually a sephiroth on the tree of life okay one of the sephirot on the tree of life is called and it is the sphere of knowledge and it's occulted knowledge see it's not quite on the tree it's actually behind it it is occulted and that's on the middle pillar i'm referring here of course to kabbalah and you can go back into the uh podcasts on the website to look at the shows listen to the shows that we did on kabbalah to understand how this is a powerful tradition to understand the self and natural law principles at work in the world you're not going to get to the top of that tree that make that climb out of base consciousness to higher consciousness without learning without understanding the difference between truth and fantasy understanding the difference between right and wrong understanding the difference between love and fear that's what we're here to do and there are no shortcuts new agers want to tell you that there's magical shortcuts there aren't any it's hard work it's not so overly complicated that you can't learn it or it can't be done because it's not ultra complex there are simplicities to it don't over simplify them take them for what they are and build upon them but simple and easy are two different things as i've said many many times the corner that we've painted ourselves into makes the job difficult and often dangerous at the point that we're at but we let it get there it doesn't mean that it's overly complex truth is basically simple it's building blocks and you assemble those and from that assembly you gain more and more understanding so what is this knowledge that we need of course it is the knowledge of how natural law operates which i've already said many times is the most occulted knowledge and again i said the second part of this would be people will come out of the woodwork to attack this point because this is the ultimate solution again we're not talking about the problem anymore really this is the solution to the problem coming to the the awareness of this information about natural law is the solution to humanity's problems which is why the words natural law will never be talked about in mainstream media this is what is the most deeply occulted knowledge and that's also why you'll see people come out and attack anybody trying to put this knowledge into the consciousness of humanity they will be those individuals who are the messengers of these laws will be attacked ad hominem attacks will be launched upon them because this is what they do not want anybody to look at all of the distractions of life every forms that that these distractions take entertainment mindless uh inane trivia of all kinds okay are all put in place to get you to not ever take a look at this information because what they don't want truly developing in humanity is the the all-important concept that i have listed on slide number eight which is conscience because if conscience is truly born in human beings the new world order falls flat on its face the dark new world order no dictator no dictatorship can ever work with beings that truly have conscience born in them that truly know the difference between right and wrong consciously actively willfully and are going to make conscious active willful decisions to choose the right and not choose the wrong that is what conscience is it comes from the latin language khan is a prefix in latin meaning together or with and then the second part of the word which is obviously the word science which is where we get the word science from the verb schierre in latin schioskiyere which means to know or to understand which means you're not going to get to the truth you're not going to get to freedom without truly knowing or understanding and not just individually but together because conscience means to come to a place of knowing together true knowing knowledge understanding it is common sense that's what conscience means knowing together common sense and that's why they want to hide the basic principles of natural law its expressions its effects in our lives from us they don't want anybody looking at that the most occultic knowledge there is because they don't want common sense developing we'll be right back don't go anywhere folks you're listening to the water casting radio network welcome back everyone this is what on earth is happening i'm your host mark cassio we've been talking about natural law morality how these things all are inextricably connected to the dynamics of human freedom and unless we understand that we're navigating blind and we're going to be condemned to eternally be slaves here on this planet if we do not understand these principles so we looked at conscience and what it really is and conscience has everything to do with knowledge because in order to make the right moral decision you need accurate information you need to be able to choose the factually correct information in order to make the morally correct decisions it's axioms okay fundamental principles that we then apply so if you believe that two plus two equals five and you accept that as a fundamental axiom a given truth and then you start doing all arithmetic operations based on that axiom when you then get to multiplication division etcetera and higher forms of math your answers will be completely completely in orders of magnitude wrong you'll never be even close to getting the accurate answer and then if you make your decisions based on those answers more and more chaos will emerge so it's not a matter of simply reforming the system we already have we need to go back to the fundamental axioms upon which our worldview is based and one of the first solutions that i say that we need to enact in my list of solutions anyway is a worldview healing and we can't do that until we completely re-evaluate the fundamental axioms upon which our worldview is based and i'm telling you folks the worldview of most of the people out there is based on the fundamental axioms of moral relativism and that's why until that is completely abandoned we're not creating anything here except chaos the end for all time i mean you're free to believe otherwise but that's never going to make it true and you're never going to be able to create chaos that way i create order that way it will never ever happen for as long as anyone lives you will only ever create chaos so conscience is what they don't want people to arrive at as we saw in slide number eight they don't want common sense they don't want the people knowing together knowing what knowing the truth about what's being talked about right here on this program they don't want anyone knowing about how natural law operates the occult controllers they like the chaos that we create for ourselves it makes us easier to control more chaos breeds more fear and the cycle starts all over again these are fundamental laws of creation ladies and gentlemen and we need to wise up and understand how they work the main thing that comes from developing conscience is to know your rights to know not only what your rights are but even more importantly to know what your rights are not and we have entire segments of the population who think that they have rights that they don't have whole groups of people actually believe they possess rights that other people do not possess and then may base their actions on these non-existent rights think that they can do the actions that they're doing with impunity in slide number nine i explain the best way to go about understanding one's rights and it's quite simple actually okay when we talk about rights and what they are there we have so many rights we couldn't possibly list them all there's so many things we can choose to do it's almost of infinite possibilities that would not infringe on the rights of other people it would not cause harm to other living beings so those things are all fall into the category of our rights if you can do it and it doesn't result in harm to another being you're allowed to do it that's one of your rights you are within your right to take that action because you have caused no wrong you have engaged in no wrong or an action which results in harm it is better to understand our rights in what is called the apophatic sense and this is very very critical and i'm going to go into explaining what a hypothesis is okay and this is a critical term we're going to look at it in the next slide i actually want to look at it very soon right after i take this first point on slide number nine rights are best to be understood in the apophatic sense and this generally means the negative sense okay to know which actions are not rights because they cause harm there are fewer actions that we do not have the right to take because we can define what harm of another living being is and then we could say the actions that fall into the category that cause this harm to other living beings are not rights and then therefore everything else is a right this is done through the negative pathway to truth a form of logical reasoning that involves negation affirmation through negation called apophysis okay so let's hold that slide there and let's jump ahead to 10 and then we'll come back to nine okay and let's look at what hypothesis is this is slide number 10 now on the radio show page at what on earth is happening calm or with the podcast okay apophysis is also known as apophatic inquiry okay and it comes from the greek language the word apophysis in greek comes from the greek word apophani means to say no or to say by not saying is another way of looking at it okay to affirm something by negating something else so in other words i think 911 is a great example of where apophysis has already been used we can't tell you the exact events that occurred and how things exactly went down because so much of that knowledge is occulted but we can rule out what the official story claims happened we can negate that and in doing so come closer to the truth about the actual events of that day or the truth okay so apophis it's a method of logical reasoning employed when given a limited set of possibilities as in what actions are right what actions are wrong in order to arrive at knowledge knowledge by way of the exclusion of known negatives it's a process of elimination in other words it is describing what something is by explaining what it is not we'll pick this up on the other side of the break don't go anywhere you're listening to what on earth is happening we'll be right back when he looks at it with his eyes it's what we see when he looks at it with sunglasses he's seeing the same things all the way through the subliminal symbolically you couldn't see obey no independence that's exactly what they want you to do obey and not think for yourself as masterfully expressed there by the teacher david ike as he's describing the scientific uh allegory the science fiction allegory called they live there in that uh break music but going back to the concept that we were talking about before the break uh which is apophysis or the negative pathway to the truth in other words okay when you have a certain uh set of possibilities that you are you are exploring and trying to get the truth or to arrive at knowledge okay you can do this by the exclusion of no negatives or in other words to describe what something is by describing that which it most certainly is not this was mostly practiced in the early church history and there are two schools of theology one is known as the apophatic theology which attempts to describe the qualities of the creator by explaining that which what that which the creator most certainly is not or qualities which would not be embodied by the divine okay so that's the apophatic um describing something in the apophatic sense okay as i've said it's affirmation through negation is an easy way to look at it the opposite of that would be the cataphatic pathway to truth which is attempting to directly describe what something is as in cataphatic theology okay so apophatic inquiry arthur conan doyle in his science fiction expressed this beautifully he said made the famous statement that once you eliminate the impossible whatever remains no matter how improbable must be the truth and again 911 comes to mind and is an excellent example of an apophatic inquiry okay we may not have 100 of the um data that we need but we have enough to show that what is proposed in this ridiculous narrative called the official story is not true therefore another explanation is most certainly much more logical and definitely warrants a new investigation we can say what it is not and what it it was not is the official story okay the same thing can be applied to knowing what our rights are and what they are not we need to take a look at what our rights are not in order to understand how we should behave in the world and to know what our rights actually are okay so i want to go back a slide now to back to slide number nine to get back to the pathway for knowing our rights okay the first thing is it's good to understand our rights in the apophatic sense to know which actions are not within the scope of our rights because they cause harm to others the second part of knowing our rights is to understand that natural law and morality hold true meaning they are in effect regardless of how many people are in the world okay and this is one that people have a real hard time with because of ego ego gets in the way of understanding this one folks big time okay because people will say oh well given a small group of people that's fine but when you have a whole bunch of people doing that that's going to create chaos and the people who always talk against natural law and for the laws of man will always invoke the creation of chaos when in fact they're the ones who are creating the chaos through the advocation of their position they don't understand that what man's law is doing can only create more chaos in the world yet they'll say natural law allowing natural law to exist and just be in place would create chaos see this is how man wants to be god man wants to unmake what creation has made and then remake creation in his image this is what the ego is that's the force of the ego ladies and gentlemen that's it you want to know what ego really is that's what it is it's the force that will never say i'm wrong about anything it's the force that will never admit when they that that being has actually committed a wrong and say it was my fault i did the wrong thing i don't want to blame it on anybody else i want to accept responsibility the ego will never do that okay and it will always try to invoke chaos if natural law gets to rule the day okay you're crazy you can never allow that there would be chaos fear is always invoked instead of actually understanding the dynamic that causes order versus the dynamic that causes chaos and then choosing the one that causes order they're always trying to fear monger and promote the idea to other people who clearly have no understanding of natural law that going in the direction of natural law is what's going to cause chaos when in fact it's the other way around so the the population issue here's how i tell people to look at it okay when in doubt as to whether an action is in harmony or disharmony with natural law you want to visualize a scenario in which there are only two people visualize a scenario in which there is only two people and no external external events actually getting involved and interfering with the interaction between these two people and then look at the action if that person has a right to take that action in a situation where there's only two people then they have a right to take that action in a situation where there's seven billion or seven hundred quadrillion people okay if they do not have the right to take that action when there's only two people they do not have the right to take that action when there's two billion two trillion or two google people in the world it wouldn't matter how many people ever exist if a right does not exist in a one-on-one encounter okay meaning that person is not imbued with that right they do not have the right is not actually inherent and was not actually granted by the cr by creation itself no one can just suddenly claim that right and pull it out of thin air nor could they ever grant it to anyone else rights cannot be granted wrongs cannot be granted no one ever can say you are now allowed to do this and that's pro that's one of the big failings of this country we created a system that advocates personal responsibility and tried to give a subset of individuals calling themselves government rights that other individuals don't have for example taxation a perfect example in which the fr the framers of the constitution went completely against natural law principles and clearly did not ultimately know what right and wrong is ultimately and they chose wrong over right because in a one-on-one situation one person cannot say to another person i'm taking what you have and i'm going to take a certain percentage of what you have whether you feel that you can afford to give that to me or not in a one-on-one situation that would always be wrong yet government people who set up government thinks that they're allowed to create a subset of people because there's a whole bunch of people in the world and we're going to give a subset of people this right that doesn't exist for any individual because it's theft period and very quite simply it's theft anybody that is is so under mind control that they can't understand the taxation is theft go ahead and continue to believe that it's not you're delusional and you're fooling yourself of course it's taking from one person that you don't have a right to take from it's always has been that since the dawn of time and always will be that the ego needs to take a step aside to understand a lot of this information folks many people will be angry at this and the tagline is get as angry as you want get as offended as you want go put it on a t-shirt okay get as offended as you like by this information natural law doesn't care about how much you're offended by it it's what is and you're creating as a result of your adherence to what is or your ignorance of what is so we need to look at what rights are definitively not in order to understand what's really going on in the world there are four basic transgressions of natural law and ultimately when you boil it all down there's one transgression against natural law and i'll explain that the four major transgressions against natural law or in other words against another living being's rights are as follows murder rape theft and trespass murder rape theft and trespass are the four major natural law transgressions and i'm going to come back and explain what these things are and how ultimately they're one thing on the other side in the meantime don't go anywhere you're listening to what on earth welcome back folks this is the last segment of what on earth is happening for this week i'll be back live on oracle in two weeks time next week again i'm taking the day off to support my partner barb as she has a presentation next sunday so before the break we were talking about natural law transgressions or in other words actions that are not within our natural law rights to take because they result in harm to other living beings there are four major natural law transgressions okay and they are murder rape theft and trespass okay murder the taking of another's life when one has no warrant to do so okay rape is the violation under coercion of another person's sexuality which one does not have a right to do under any circumstances okay theft is the taking which of goods that one does not have the right to take from other people of the the actual just stealing of resources okay and trespass is basically taking security away from someone in their own lair that is obviously where they live and work and thrive and sleep etcetera so it's the ingress into another person's lair without their consent in a place that they've clearly set up as theirs so someone's home you don't have a right to go in unless you're invited in you don't have a right to take things from their home which would be theft you don't have a right to uh sexually engage in any sexual relations with someone unless it's consensual that would be rape and you don't have a right to attempt to take the life of another person or actually do so that's murder every one of these boils down to one basic overarching fundamental transgression and that is theft if you think about it every one of these things is taking something that you do not have the right to take murder is the taking of life that you do not have a right to take rape is the taking of someone's sexual um energies and sexual uh um boundaries that you do not have a right to take theft is the taking of someone else's goods or property and trespasses the taking of someone else's security in their own space okay so ultimately all natural law just like sovereignty is based upon ownership it's all based upon ownership and all transgression of it are based upon taking something that you do not own you don't own someone else's rights you don't own someone else's life you don't own someone else's sexuality you don't own someone else's goods you don't own someone else's space that they are using and happen to be in it's all theft ultimately every wrong that we commit in some way shape or form is a theft if you sit down and truly philosophically think about it this is common sense and it's quite simple it's not complex it's not unknowable these are what our rights are not if our rights do not fall into these things we have a right to engage in that activity and no one has a right to stop us from engaging that inactive in that activity so again trying to stop someone from engaging in things that don't fall under these categories of theft in different forms one does not have a right to take that would be taking someone's rights so stopping someone from speaking is taking their rights stopping free assembly is taking someone's rights away trying to take someone's freedom away and turn them into slaves through corporate personhood and other mind control measures is not someone's right to do so they're in the wrong by engaging in that activity protecting criminals from engaging in their criminal behavior is not within our rights because other people are engaging in theft and murder and then they're being protected by other people you don't have a right to do that you don't have a right to help people to continue these natural law transgressions and then try to stop other people from bringing them to justice that's not a right and this is what police and military do every day and then attempt to set up situations and circumstances where they block us from engaging in our rights of assembly and speech etc no one has a right to do that nor can anyone be granted that right see that's another part of natural law you can never grant things that are not right to anyone else if you don't have something you can't give it to someone else i want to read this next quote and i'm going to wrap this up when i come back in two weeks i'm going to explore in depth this gentleman's essay and some quotes uh some um responses written about that essay by some other individuals okay uh his name is aquinas this is not the philosopher thomas aquinas this is simply an internet handle by a person who was posting on some forums and i happened to find this essay which i thought was one of the most brilliant concise explanations of natural law i've ever ever seen or read i'd love to have him on the show if anybody knows knows who it was they could put him in touch with me and i'd bring him on as a guest but he made this statement about why we're losing why freedom is dying and here it is i call this the fall of the republic okay because choice is subsequent to a judgment upon the truth of the matter presented it is an immutably true principle i have a slight typo there i should say it is an immutably true principle that human liberty depends entirely upon judgments which conform to natural law if a judgment which does not conform to natural law which is therefore objectively false and immoral is acted upon by the will then it becomes a source of grave disorder in society exponentially multiply these numbers of individual immoral acts and you have a republic that collapses from moral decay in a short period of time that is why we are going into bondage as a people because too many people are choosing the wrong over the right thinking they have some magical right to do so and then teaching these values to their young who then go out and multiply these numbers of individual immoral choices and acts and therefore a quantum effect is created chaos always results as a result of that disorder and chaos as aquinas so eloquently put it and therefore we are going deeper and deeper and deeper into chaos and enslavement because we have a society that is based on moral relativism aquinas concludes his essay by saying true liberty is an essential property of objective truth and morality therefore there can be no true liberty in a civilization that enshrines moral relativity and in two weeks we'll be exploring that essay in depth right here on this show for probably the entire show i apologize that i'd not get a chance to take any calls today on the show but i think the information that is presented here really needs to be distilled broken down as much as possible and then gone over again by everyone who listens to this show get it out there to people this is the most occulted knowledge that they're the occultists the dark occultists who own this place currently want to keep hidden and we need to get it out there to people i'll be back in two weeks folks i want to thank everyone for listening to this edition of what on earth is happening we'll be analyzing aquinas's essay on natural law and human liberty and two weeks here on what on earth is happening until then i'm mark pascio you've been listening to what on earth is happening here on the oracle broadcasting network stick around chris everhart is up next machine that burns in your hands

What On Earth Is Happening Show #079

Topics: *Natural Law, Morality, Apophasis, Occupy Wall Street Protests, Aquinas On Liberty Essay*

freedom man that's what it's all about [Music] you've got to groove on freedom like the good book says [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host mark pascio welcome one and all you're listening to what on earth is happening here on the oracle broadcasting radio network i'm your host mark pacio the show is live every sunday from five to seven pm eastern that's four to six central today is sunday october 22nd 2011. we have a great show lined up for you here today going to be continuing our ongoing discussion about natural law its principles what our rights are and what they are not and today we're going to be taking an in-depth look into a brilliant essay on natural law called aquinas on liberty that's coming up on what on earth is happening my website is what on earth is happening dot com the network's website of course oracle broadcasting.com i'm going to give the call-in numbers today at the top of the show feel free to call in at any time the call-in number is 866-841-1065 that's 866-841-1065 i have one event announcement uh for for those who know i wasn't on the air live uh last week it was the first week i took off uh since i've been doing this show and podcast in 78 weeks so um my partner barb had a presentation of her own to make uh at a survival group here in philadelphia called survive and thrive hosted by our friend fernando saguero and she gave a great presentation on emergency first aid uh wound care uh trauma care and cpr and it was great it went really well was very successful i want to thank fernando for hosting it and everyone who came out and made uh that day a success so with that in mind i do have one event announcement uh there is a big east coast ufo conference coming up here in philadelphia it's the mufon pa east coast conference october 15th and 16th that's in only a couple of weeks from uh from this weekend at the four points sheraton philadelphia northeast the four points sheraton here in philadelphia that's at 9461 roosevelt boulevard and there's just a great lineup of speakers the the speakers on saturday october 15th include joseph mara linda moulton howe bill weber bill burns john and john ventry and then the sunday speakers include robert o dean george filer dr lynn cathay jerry jonas and chris augustine so saturday the schedule of events goes from 8 30 to 5 p.m and then sunday october 16th the uh conference will be from 9 to 4 p.m 9 a.m to 4 p.m uh admission on saturday is only 35 sunday only 30 dollars for more information on this great conference you can go to mainelinemufon.com or you can visit the pennsylvania mufon at mufon pa.com we'll be right back after these messages where we'll begin to delve into natural law stay with us [Music] i was born a shotgun in my hands [Music] welcome back folks this is what on earth is happening i'm your host mark pacio i'd like to direct everyone's attention to my website what on earth is happening dot com on the radio show page you will find a series of links listed underneath the player on the radio show page where it says images for today's show there are 10 links there that will bring up images related to the topics that we are going to talk about on the show here today [Music] so we've been talking about natural law for many weeks and will continue to do so for a while because this is the most critical and important information to understand in the quest for truth and in the quest for true freedom natural law is the ultimate occulted knowledge that the dominators of this planet do not want anyone to understand and live by because if that is done it is game over and the control that these dark occultists have put in place to control the masses to control the minds of the masses of humanity will slip away in record time but that's an easier uh it is easier said than done to perform that task because it takes a whole lot of intelligence it takes a whole lot of care and it takes a whole lot of courage and willpower to accomplish that deep understanding and living according to natural law so we talked about what natural law was the basic definition that's what you can find on slide number two there on the website slide one is simply uh an image with a poster for that conference that i mentioned in the first segment the definition of natural law means it is inherent existing conditions which are binding and immutable an inherent simply means that man did not create it it is here by nature itself creation man did not create the laws of nature the creator created the laws of nature man doesn't have a decision as to whether be bound to be bound by the laws of nature or not he simply is bound by them period it's the way things are it's a condition that is simply in effect and is not going to be changed by man it's immutable it's up to us to discover these laws and the principles by which they operate and then live in harmony with them so we do not create self-imposed suffering which is exactly what we've been doing for tens of thousands of years on this planet that needs to change before we destroy ourselves effectively okay so that was the basic working definition given for what natural law is and there is no way to make anyone accept that it simply is it's like trying to get someone to accept that gravity is okay or that the earth rotates or that it is essentially a spheroid this is just the way things are accept it understand it live in harmony with it or suffer the general principles of natural law were then discussed weeks back and we looked at the principles of mentalism correspondence vibration polarity rhythm cause and effect and gender what i described as the general principles of natural law and we looked at those in depth and we read from some hermetic texts uh an analysis into these general principles of how the laws of nature operate in our world then we looked at the expressions of natural law and this was the show that i repeated last week when i had that weekend off because what i talked about in that show i feel is the most important thing for people to understand that's why i repeated it last week this is the most occulted information it's the the only way to look at this this is what the occultists of the world don't want people to understand or know about it all this is what all the distractions in life are there to prevent people from understanding all the sporting events and the tv shows and you know all the mindless distractions out there are so you do not understand that information that's that's basically listed there in slide number four on the website the expressions of natural law or in other words what i termed the real law of attraction this is how we create what we experience in life there is two basic generative forces or polarities one is love one is fear and again love being the expansive force of consciousness fear being the force that shuts consciousness down by making choices and then conducting behaviors in alignment with one or the other of these polarities it then is a basic cascade effect to create other expressions and those expressions basically govern what happens in our world and what we must experience as a result of our choices and it is always a unidirectional flow as you can see here on this chart if you're looking at the chart on image number four on the radio show page of what on earth is happening or the images listed with this podcast you choose the polarity of love that helps you to inwardly seek knowledge of self ultimately all knowledge really truly worth having is knowledge about how we work and how natural law functions then there is an internal expression okay which is termed sovereignty once you have enough knowledge of self you understand you are a sovereign being there is no authority over you there is no authority anywhere in the universe except natural law which the creator put there man is not an authority no groups of people are authorities this is all illusion to get people to give up control over their own life and make them dependent sovereignty is the expression of higher consciousness that is born within an individual once they have obtained enough knowledge of self and then if a society recognize sovereignty which is essentially self-ownership and non-contradiction in the three aspects of consciousness thought emotion and action then we can have a society that is based in true freedom which is the absence of externalized rulership over others true spiritual anarchy no the state of no rulers no masters over one when we do that that's when we're truly creating good or order in the world we'll pick this up on the other side of this break you're listening to what on earth is happening we'll be discussing natural law don't go anywhere folks [Music] welcome back everyone this is what on earth is happening i'm your host mark pascio taking a look at image number four from the what on earth is happening radio show page at one on earth is happening.com there's the chart of natural law expressions that i went over a few weeks back and we were looking at the positive expressions or in other words how to create what we call order in the world and that's choosing the polarity of higher consciousness which is called love it's choosing to seek truth specifically the truth about who we really are understanding our own sovereignty bringing our thoughts emotions and actions into alignment with each other into a state of oneness or unison and then truly setting our actions into motion to create the optimum amount of freedom in the world that's what's going to create order conversely if we choose the path of fear it's a one-way direction to chaos it's a one-way path to chaos it doesn't work any other way that polarity always makes us choose ignorance or refuse to accept truth fear does and then we become internally confused not only about what's going on in our lives but over who we actually are and we become identified with the lower self the false self the the base ego the materially identified self and that's a state of internal anarchy that's not having any real self-control or self-respect for that matter then in that confused condition we'll lash out and attempt to externally control others in a vain attempt at creating some sort of order which it never is when that happens the only thing that we could ever create in that state of confusion ignorance and fear is chaos and indeed that is how this natural law propagation works as it passes from the generative force through the initiative expression the internal expression and the external expression finally to create the manifested result in our world if we choose love we get order if we choose fear we get chaos every time that's how it works so continuing on and this is basically a review before we get to the new material in the following weeks we then proceeded to take a look at how closely morality is tied together and interwoven with the concepts of natural law and the principles of natural law and in effect you cannot separate the two they are essentially one in the same natural law is the laws of morality that's what it is therefore we have to choose the right over the wrong in order to create that order choosing the right is choosing love choosing the wrong is choosing fear and there is a difference between right wrong and i talked about a few weeks ago anybody any spiritual teachers that are telling you that there's no such thing as right and wrong and there's no difference between the two and that the difference isn't the most important thing that you could ever deeply understand within your own mind is a deceiver and they are doing the work of satanists satanists put forward the doctrine of moral relativism and that there is no difference between right and wrong that's why we have the society that we have ladies and gentlemen we have a satanic society the society we have today is based on the satanic principles of moral relativism and i shouldn't even call them principles that's not the correct term the satanic ideology of mortal moral relativism because principles are ultimately based in truth and can do no harm when they are applied moral relativism continuously does harm therefore it's not based in principles it's based in an erroneous ideology and ego is what it's based in so we took a look at in-depth the true differences between right and wrong right always being based in moral or natural law because it does no harm to others and that's a very important thing to keep in mind it is based in a negative right and our rights are actually based in the negative this is something that is very confusing to a lot of people okay you basically know what your rights are and know what is right by knowing what your rights are not or in other words knowing what wrong is you can define easily what wrong is because whenever you take an action that is wrong it results in harm that you did not have the right to create that is a violation of someone else's rights to be free of harm we looked at the transgressions against natural law the four basic transgressions murder rape theft and trespass and yes you could derive other harms from those basic four but we looked at the basic one underlying transgression being theft or taking something which you do not have the right to take from someone else every one of those results in a state of harm so you did not have the right to take that being's well-being from them it was an act of theft of claiming something that does not belong to you okay so we talked about how to know our rights and the very critical principle that it is better to understand rights in the apophatic sense through apophatic inquiry which i'm going to talk about in a moment and i'm going to spend a little bit of time before we get into the essay that i'm going to break down what apophysis is again because it's another critical term that we need to understand and apply in the world it's probably one of the most powerful things that we need to apply in the world if we're ever going to claim our sovereignty and create a world that's based in freedom and it's a word that most people have never even heard of let let alone know what it is or what it means so to know one's rights it is better to understand rights in the epiphanic sense or in other words to know which actions are not our rights that we do not have a right to take because they do cause harm we need to define rights in the negative sense what may we not do to others and this this is a big problem in our world because there's so many people out there walking around thinking that they have rights that they do not possess that they do not have thinking that they magically acquired these rights because someone took a piece of paper and a pen and wrote something down and said now you have the right to do this and no one who in themselves as an individual does not possess specific rights because the action that that we're talking about actually results in harm no one who doesn't already have s a certain right can grant a right to others as a matter of fact no rights can be granted to others they are inherent because they are based in natural law and natural law is inherent we did not create natural law mankind didn't create natural law nor did we create our rights we don't get to make up what our rights are we don't get to make up what rights are or are not they exist in nature they exist in nature it's our job to discover what they are and to know what they are not and there's too many people out there who think they have rights which are non-existent and they're exercising those non-existing rights and causing a whole lot of harm and it needs to stop [Music] welcome back everyone this is what on earth is happening i'm your host mark pacio before the last break we were talking about understanding our rights in the apathetic sense or through apophatic inquiry and if we look at slide number eight on the images section for today's show this slide deals with the term apophysis and uh i talked about this a couple of weeks ago and i want to spend a little bit more time uh with this term it's spelled a-p-o-p-h-a-s-i-s apophysis and it is from the greek word apophenide which means to say no okay and that's critically important to say no what in the the sense that they're referring to saying no means to mention by not mentioning okay or to affirm something by negating something else to say this is what something is by defining this is most certainly what it is not so this is the the way that we come to really deeply understand what our rights are you have an infinite amount of rights of things that you may do within the guides of natural law but there are certain things which you do not have a right to do that's what we need to come to understand those negatives and this is something the new age movement and a lot of the spiritualist movement out there tries to steer people away from they don't want anybody looking into what hypothesis is about they say oh just focus on the positive okay don't talk about the negative don't try to warn anybody about all the evil that's taking place in the world just get them focused on the positive and all that falls away and that's not true ladies and gentlemen that's not the truth that is a new age movement deception we need to understand what our rights are not and then get other people to understand what their rights are not and again too many people out there are taking action thinking that they perfectly have the right to do the actions that they're that they're doing and they have no such rights never did don't now and never will have those rights and they're completely arrogant in their ignorance thinking that maybe because they wear a uniform or they have a badge or something you know or somebody uh dressed them up in some costume and handed them uh you know a clipboard or an electronic device or whatever that they have certain rights that other people don't have no rights that conflict with someone else's natural law rights exist there is no such thing that's called a wrong it's not a right when you're causing harm to another person in some way and you did not have the right to do that action you're doing wrong it doesn't matter whether somebody else told you you're allowed to do it whether they wrote it down whether they gave you a costume whether they put a gun in your hand or put a badge pinned a badge on you it doesn't make a difference you still don't have those rights the word apophysis okay helps us to understand through negating what in fact something actually is okay it's saying no it's embracing the negative it's saying this is not right that's the problem is that there's too many people out there who won't say no who won't say this is not right this is wrong and if you want to know one thing that you should remember about natural law ladies and gentlemen if you take nothing else away from anything i've said about natural law remember this not to say no is to say yes let that sink in that's how the universe works you need to fall in love with the word no you need to embrace saying no you need to embrace apophysis the negative pathway to truth because i'm going to get a little bit into the esoteric aspect of this and where this term really comes from yes it comes from the greek verb apophenide which means to say by not saying or to say no but there's a deeper etymology of this word and for people who are studied in the ancient past they might recognize it immediately but think about what i just said there to not say no is to say yes that's how the occult rulers of this world operate as long as you won't say no to them and you agree to be bound by their authority you have agreed with them and said yes you're our rulers go ahead and continue to do this to us we're not stopping you we're not stopping your minions who serve you we're saying yes we'll go and participate in your financial system we'll go and participate in your court system we'll go and participate in your legal system will go and buy into all your erroneous religions they're all based in astro theology people are holding on to all of these falsehoods holding on with a tight grip because they're identified with these things all of these things need to go if there's going to be a world based in truth and freedom all of them because they're all deceptions and none of them are founded in truth and real principles and real morals and i really don't care how preachy that sounds to people out there think about it however you want to think about it that's how it is [Music] the laws of nature are immutable they work a certain way always a hundred percent of the time infallibly and you're bound by them eternally as long as you're in this universe and i've said many times let me know how to get out of this universe and into one where these kinds of laws don't apply and i'd be happy to follow your methodology on how to get there but until you know that and you're living in this universe live with your feet on the ground not your head in the clouds where the new age movement wants to keep them so no real change can be affected in the real world in which we live so let's talk about the esoteric aspect of the word hypothesis this method of logic of reason okay employed to arrive at knowledge by way of exclusion of known negatives that's what hypothesis means we know this is not what it is and we're going to continue to explore what it is not until we come to a firm understanding of what really is the word apophis is a combination of two names of deities in the ancient commission world that's egypt in the modern way of saying it kamet is what egypt used to be called thousands of years ago and the the name apophysis is actually derived from two of its deities or gods which represented concepts we're not talking about actual entities you're free to believe in them as such if you want to but they represented ideas they represented concepts that are very real and it work in our lives and the first was a pep a-p-e-p and again vowels are completely interchangeable in the commission language essentially a pep was the god of darkness and chaos evil in other words personified he was the devourer of souls in the afterlife when the soul would travel to the duat and the heart of the soul would be weighed against one of the feathers of another deity mod the ancient goddess of order goodness truth and love we'll continue with this on the other side of the break [Music] and i'll analyze a little bit more the esoteric aspect of this word hypothesis stay with us folks this is what on earth is happening [Music] [Music] welcome back everyone this is what on earth is happening here on oracle broadcasting network i'm your host mark cassio my website is what on earth is happening dot com [Music] talking about natural law once again here on the show today and we were discussing the concept known as hypothesis or apophatic inquiry a method of logical reasoning employed to arrive at knowledge by way of the exclusion of negatives whereas the writer arthur conan doyle put it once you eliminate the impossible whatever remains no matter how improbable must be the truth the removal of that which something is not to reveal that which something actually is this is the best way to really understand our rights by knowing which actions cause harm and understanding that they are not our rights everything else is one of our rights it's it is that simple unfortunately the ego and its extraordinary calcification gets in the way of that process because we don't want to admit that that we were wrong and that we were doing things that were not in our rights to do so hypothesis i was talking about the esoteric derivation of this word it is actually two deities two ancient egyptian deities a pep and isis being joined together so again a pep was the destroyer he was the god of chaos he was the devourer i should say the devourer of souls okay he was like a snake god another representation of the serpent in its negative aspect he represented darkness and chaos and evil the devourer of the heart the devourer of true care so apep was the opponent of moth moth represented order justice harmony truth one of her analogues later on in later egyptian dynasties was isis the goddess of love the goddess of order and truth isis is that force that we need to pattern ourselves after in order to seek truth and to seek the right it's the sacred feminine within all of us whether we are male or female it has been called the holy grail it has been been called the divine mother okay it has been been called the dove of peace tons of symbols have been used and names throughout history but it is the sacred feminine energy and it represents true care to seek the truth in other words it's the force or the polarity of love that's what isis represents so we put these two terms together okay ap isis to create this term apophysis we have the god of chaos and the goddess of order what it represents is seeking truth through the negative or understanding through the negative what the truth actually is what our rights are and what they are not what the truth is and what it is not who we are and who we are not it represents seeking of the higher self and relinquishing identification with the lower self and with base ego and basin instincts in other words it represents creating order where there was once chaos coming through the situation of ignorance generated by fear coming out of confusion which creates control and chaos and then coming into a state of higher consciousness so that we can understand our own internal sovereignty who in what we really are seek the truth and ultimately create a world based in freedom and true order that's what hypothesis this process it is a process that we need to go through hypothesis think of it more of a process than just a method it requires time it requires study it requires understanding there are requirements to create the kind of world we really want to see based in freedom and order if we're not willing to do that work it's not going to just magically happen will must be applied so that's what the term really esoterically represents it represents order out of chaos in the true positive sense of that term it represents light out of darkness because isis is the bearer of the sons of the lights of the world from the dark god a pep freeing us from the darkness and bearing us into the light that's what this term actually means so i can't stress how important it is i'm going to let that go there and i'm going to move on to the main thing that i want to talk about and break down today which is a phenomenal essay on natural law and i've read it here before on the show but i'm going to do this a little bit different differently this time and i'm going to bring up a a blog site of a person who listened to the former show that i read this essay on and then basically made comments on it and i'm going to read the essay with his comments in there and then i'll interject some um the blogger his name is david lenf l-e-n-e-f not sure if i'm pronouncing that correctly but uh david lenev uh is the um author of the website called lucid streams lucidstreams.com and in his blog post on march 14th 2011 dave lynette basically broke down the aquinas on liberty essay now this essay was originally uh i originally spotted this on an infowars.com post i can't remember what the topic was or what the page posted on that site was about but i was checking out that site a while back and i saw this in one of the forums in one of the responses to a piece that was posted on infowars so this individual wrote so eloquently and was such a wordsmith and said so much with so few words that i just you know i had to repost this essay and make people aware of it and i've said before if anyone knows who this is i'd love to have him on the show to talk about natural law i'm going to try to have one or two guests coming on the show in coming weeks to talk about natural law specifically people who i feel have a very firm handle on it so that hopefully will be coming up as if i can get the people i have in mind confirmed to come on the show but for now i want to get into the aquinas on liberty essay and again this is posted at lucidstreams.com and it is the march 14 2011 post by dave lynette true liberty is an essential property of truth and morality therefore there can be no true liberty in a civilization that enshrines moral relativity that's the conclusion of aquinas's essay on natural law called aquinas on liberty i'm going to be breaking this down over the next hour you won't want to miss it stay with us everyone this is what on earth is happening be right back [Music] [Music] we're back everyone this is what on earth is happening i'm your host mark pacio my website what on earth is happening dot com today on the show we're talking about natural law we're going to be getting into the aquinas on liberty essay in a moment two things i want to do in this short segment uh i want to make a slight correction to something that i said earlier uh correct myself uh before this goes completely out on the record uh i said that um a pep the god of darkness in the uh ancient egyptian tradition was the devourer of the heart when the soul went to the uh dua that isn't correct the devourer in that realm the duat uh where the the heart was weighed against the feather of ma was actually amit so i apologize for that but i would say that the um the heart would need to have been polluted and darkened and blackened by the works of a pep uh before it basically outweighed um math's feather and then was subsequently fed to ahmet so um uh i'll issue that correction there on the air i'll correct make that correction of uh myself my former statement earlier in this show uh but with that in mind let's go to the phones we do have a caller on the line and let's see here we go caller you're live on what on earth is happening caller are you there okay looks like i lost them i'm sorry about that i uh i thought i was bringing you up but um if you want to call back in you'll be straight at the top of the list i apologize for that so let's jump right back into the essay on uh morality and natural law by aquinas and the subsequent comments i'll let you know when a comment by dave lenef is being interjected we started looking at this uh in the last segment and the quote that dave lineup starts at the top of this breakdown of this essay is how the essay actually concludes and it's true liberty is an essential property of objective truth and morality therefore there can be no true liberty in a civilization that enshrines moral relativity so concludes the short essay that follows below written by an individual with the handle aquinas this document document elegantly builds the case that liberty is the result of choosing right that is the morally right choice and that morality derives from natural law principles which are objective truths not something subject to opinion morality is very simple you can feel it your body chemically guides you to know in your bones what is right and what is wrong the wrongs have been said many ways do no harm don't steal another's property or injure another's body don't initiate force or coerce with threat another against their will and the rights as well have been said love one another do unto others what you would have done unto you and so on we know what this stuff is nobody can bestow liberty on you it is a state of being that comes from understanding and acting without contradiction with that which the creative universe intends when humans feel think and act consistently within this natural law the result will be liberty until then we are simply handed privileges disguised as freedoms by our masters i include my own comments interleaved after the applicable paragraphs the uncommented version is available in pdf form and then dave lynette on his blog site here gives the link to the aquinas on liberty essay in pdf format uh posted uh right here on what on earth is happening so he says finally please take the time to read this very carefully if you value liberty and life and that is lynette's intro to the aquinas on liberty essay we'll be getting into the essay right on the other side of this break this is what on earth is happening we'll be right back [Music] we're back everyone we have a couple of callers on the line so i'm going to try to go back to the phones we had a little bit of a tactical difficulty before let's see if this is working now here we go [Music] holler you're live on what on earth is happening what do you have for us here today hello mark it's kevin how are you kevin how are you great to hear from you i was kind of curious as to what your take was on all this uh occupy wall street stuff that's going on well i'm certainly um there with them as far as uh these banking institutions are one of the main evils of the world i would ask how many of these individuals have withdrawn all of their money from banks that's one of the questions i would have because that's in understanding hypothesis you realize you have to be truly saying no are you truly exercising your independence from these institutions or do you are you giving them power by keeping money in banks so that would be one of my questions to uh these crowds instead of just you know gathering in the streets and demanding that change takes place uh be that change you know actually withdraw your support collectively and help to try to get other people to see that they need to withdraw their support from these unethical systems that are basically turning us into slaves so i'm i'm there with them ideologically as far as the methodology of what they're doing i don't know how effective that's ultimately going to be in the long run i went up there on thursday and took them up like a trunk full of food from uh the zeitgeist movement philadelphia in order to uh show a bit of uh solidarity to them and and when i got up there i i was really um touched to see the the people that are involved they they really are very passionate and caring and they seem truly like the um under employed and over educated right let me ask you a question kevin can i ask you a question you seem to be a little bit more in touch with not that i'm not following it at all but i i'm aware of what's going on of course but um uh you might have a better pulse on this from having actually been there um do you think that these are largely people who do have a deep grasp on what's really going on in the world and have and understand the deeper issues regarding consciousness or do you think it's people who are just just now beginning to wake up that something is wrong and that this is like a knee-jerk reaction that something must be done or do you think it's it's it is indeed people who really have been have done extraordinary study and really understand the dynamics of consciousness and natural law i think all the people on the ground there really understand a lot more than anyone in the news is giving them credit for the people i spoke with i was truly impressed by and like i i if it wasn't for the fact that my wife had demanded before i go up there that i come home with my son that day i probably would have stayed because it was truly that beautiful of an experience these people like spoke to me in in in harmony and in understanding and with with full grasp of their consciousness and their the the only the the only like the the quote unquote i would say like worst thing i heard from the most conscious of them all was that he was expecting um the the uh quote unquote aliens to come back and take care of us and and destroy all these people and i was just like don't you think it would be more impressive that we actually just fixed these problems on our own and took care of ourselves show up right and took true care of ourselves for ourselves and that was just one person who had done i would go so far as to say maybe too much research into some of the areas that don't need as much research as others because as as you go through at least for me as i went through the process of going through this like rabbit hole or or long dark tunnel of the soul i i learned that um the light at the end of the tunnel is not an illusion it's the tunnel that's the illusion and there there are truly so many people that are up there that grasp great way of putting this of the situation it's a great matter really impressive how how how full they truly understand everything like they they were coming up to me and and asking me like like is when when occupied if occupy philly starts are they going to do it near the federal reserve building and i was just like wow you people are speaking my language thank you you know they really had a full grasp of what was going on and like i said it was only that one guy who was also understood about the federal reserve and who also understood about how money is pretty much mind control like this guy also understood those things the only thing i would literally fault him on was the idea that he wasn't taking it far enough to stand up on his own and it was just like he he expected the level of consciousness that was working there at that moment to be such a beacon that it would draw the said aliens to help us and that was that was kind of what he was suggesting is that these people understood so well that he thought that there would be literally almost like a a beacon of light from these people and from this situation if we truly if we truly wake up on higher powers if we truly wake up in mass to higher consciousness no no external savior is necessary because we will have become our saviors and get ourselves out of this mess that's what point i made to him that was precisely the point i made to him like these people understand that it's not a it's not a financial crisis that we're going through it's a scam right flat out like that was one of the signs that someone made that was laying on the ground where they have an entire row of all these different slogans that are more than just bumper stickers they're like truly the but describing what is wrong with our society and then what becomes the solution what becomes the solution withdrawing from the scan they were having difficulty they were having difficulty coming to consensus on the solution right because there are so many solutions being presented but the the solution is is within each individual to simply make the decision to withdraw from the scam and not participate in it you know that that is the solution unfortunately again that's easier said than done because everybody you know has this idea well i'll just be doing this and it won't have much effect and it'll just hurt me because everybody else will keep doing the same thing which is why timing is a big part of it people need to withdraw their support simultaneously from this system and let it collapse let it collapse in on itself and then go do something else as a matter of fact start doing the other thing before it completely collapses in on itself start getting ready now [Music] i i have to agree completely that's the reason why i've been studying about earth ships and and rep raps and and even like you and i have talked a lot even about tesla technology in the past and these are the types of things that are uh actually at this point almost open source so that you can take this information and create it for yourself sure but one last thing i actually want to throw out there for for people that i want them to consider because i i don't want to go so far as to say that i know everything but like you said i do have a bit of a my finger on the pulse of this situation because i've been studying it almost since day one and it even had created like a little documentary of all these different videos i found off the internet and like i found like over two hours of footage and it was all discussing this and realistically i wanted to say that for as big of a problem as the police are when it comes to the situation itself i want to actually acknowledge that surprisingly the boys in blue were not necessarily the actual problems there but much more so the white shirt individually kevin hold it right there we'll be right back after this break okay folks we're back this is what on earth is happening i'm your host mark pacio before the break we were talking with kevin from philadelphia kevin uh bringing you back up are you still with us yeah thank you great so uh i want to let you finish your point about the uh police uh who were being cooperative with the protests and those who were uh creating problems uh after that i have one more call on the line and then i want to get back into the essay by aquinas so go ahead and wrap up your point there well realistically from going through all the footage what i saw the most was that all the boys in blue were realistically just trying to do their job to quote unquote keep the peace but specifically all of the major incidents of police brutality and initiate initiation of force against the protesters was specifically done by the white shirt like lieutenants and captains it was a white shirted tony bologna that uh had sprayed the ladies inside the barricade with with mace it was a white-shirted guy who had knocked another dude to the ground who is literally waving a flag saying is this what you're for is this what you're about like asking the cops is this what you're really about taking away other peaceful protesters hanging like like making that showing the flag it's well known that the more underground he put on his throat it's it's well known that the more psychopathic tendencies are shown the faster uh this system will move up those uh psychopaths or psychopaths and training if you will up through their ranks yeah and my wife actually pointed out that since they're actually at the obviously they have the higher pay grade they are more closely related to the actual kleptocracy and of wall street and government that's combined whereas the boys in blue where as much mind control as they are under by those other guys in the white shirts they at least still identify with the poor and the public they all know that there are only a couple of paychecks away from there they're only a couple of paychecks away from not eating just like many other people are you know it's they're in the same situation no matter how much they want to think that they're separate exactly they actually were helping in a lot of ways like like at one point apparently there was a uh they were try one restaurant was trying to kick them out for using the restroom and the they one of the managers came out and talked to one of the boys in blue and they they were like listen um i i understand you don't really want them in here but they're not actually doing anything wrong they're just using your toilet i'm sorry i'm not actually going to stop them right so i it was kind of cool that like something as simple as sanitation the boys in blue were actually paying attention enough and they're actually well it'll be some of her some of them are closer related to us than you think and that's all i really want to mention sure it's just nice to see that it's not really it's obviously the people of the higher pay grade that are the problem well thanks for that analysis kevin and uh uh you know it's cool to see that you went up there and showed some solidarity i appreciate you calling in and giving us a report on that i'm gonna let you go we have another caller on the line but uh it'll be interesting to see how that uh dynamic holds up as this situation uh progresses that's what i'm kind of interested in in seeing uh you know as this uh occupation goes on for a longer period of time what kind of crackdown might be attempted on that personally i think you know in the street protests aren't as effective as complete and total withdrawal of all power that we do have within ourselves from the system that is attempting to control us it is about saying no you know freedom you're not going to demand freedom from somebody that you perceive as is keeping you down you need to simply take it by refusing to cooperate with their agenda that's the best way to make freedom really come about is just simply take the freedom back by taking your power back the power to say no is the most important thing that we can ever really truly understand no is the most powerful word in the universe and to all the new age movement followers listening out there that that think that there's something wrong with that you're completely delusional that is the 100 truth about how this world operates and how natural law functions because to not say no is to say yes and the sooner we understand that the sooner we'll experience anything resembling true freedom let's go to the call the next caller power you're live on what on earth is happening welcome good day mark welcome to you i appreciate your calls i appreciate everything you've been doing for us here and i took your advice and i read the kybolium and that was just the most amazing document that i've ever written read and i don't know i guess i'm ready for the next step here what how do we balance these laws balance the higher against the lower well we're going to be talking about specific techniques for arriving at balance within oneself that that's going to be one of the solutions sections that we get into i think um one of the most important thing to understand is how natural law functions which is why i opened up the solutions section with natural law one of the next things we'll be moving into that i think will really address your question is really how to get it truth you know people who have made the recognition yes there is such a thing as truth and then there is deception in the world opposing our attempts to get at that truth how do we really understand truly what is the truth and what is not what is is there a methodology for doing that so in other words we need to understand that methodology so we understand what it is that we should pursue and what what the next step is to take so we're going to look at methodologies for uncovering the truth next that's going to be one of the next solutions that i talk about and then we're going to get into actual real uh hardcore applicable grassroots solutions one at a time i have an entire list of them but we're gonna take a look at the fundamental axioms that need to be understood first so that's what we're doing with the natural law section and then we'll be looking at actual methodologies to uncover truth will be next and you know again then we'll be looking probably into brain balancing techniques techniques to arrive at an internal state of balance within oneself so that we're not skewed to one side or the other so that we're not attempting to really control anyone else through coercion and also so we're not just laying down and doing nothing you know a proper balance between the masculine force and the feminine force does in fact need to be maintained if we're really going to uh move forward in our pursuit of truth and freedom so indeed i feel we're all poised on the edge you know ready to make that next step here more and more in everyday situations there's people that are waking up and becoming aware and realizing that they have to take their own personal ethics they have to make a personal stand to do this right that's right it's all about personal responsibility there is no one outside of the self it's a one to one thing you have to work with your higher self in order to understand those principles and then you have to work with your own will in order to put them into practice and no one can do that for you it has to be done by you for you and for the truth ultimately that's that's who this work needs to be done what this work needs to be done in the name of so that's actually a very profound point there that you brought up uh uh thanks for the call and um yeah i mean that's what it's all about folks it's about uh doing this on a on a one-to-one basis it's between us and our higher selves or us and the divine force us and natural law that's what it's ultimately all about forget looking outside the cell the solutions aren't to be found externally they're to be found within most certainly great calls uh great segment there we're going to get back into the essay on natural law by aquinas called aquinas on liberty on the other side of this break don't go anywhere folks this is what on earth has happened we'll be right back [Music] midnight we're back everyone this is what on earth is happening i'm your host mark pascio my website what on earth is happening.com let's jump right back into the aquinas on liberty essay and i will be uh letting you know when uh david lenev is chiming in on this essay um again this is posted on a blog post from march 14th by david lenev on his blog called lucid streams you could find that at lucidstreams.com so aquinas on liberty as long as we abide in partial darkness we will continue to be conquered if we looked very closely at the idea of liberty we would discover that there is a radical distinction between true human liberty and liberty falsely so called indeed liberty falsely so-called is that same liberty which the new world order qualifies as the quote bait of an idea to attract the masses of the people to one's party for the purpose of crushing another who is in authority end quote and as an idea of freedom which is really an infection and as a quote slackening of the reins of government end quote so here's lenip's comment on this first part false liberty as opposed to true liberty refers to merely an idea of liberty that sets one group against another as in the two-party political system or even in a manipulated there may be an appearance of more freedom but ultimately the reigns remain this is not a state of true liberty it still restricts free action returning to the essay on liberty where does the false idea of liberty come from what is false liberty what is true liberty knowledge of the correct answers to these questions is still lacking in the bulk of the patriot movement and to the degree that it is lacking so is integral unity and true power to overcome the menace until the patriot movement unifies itself under true philosophical principles it will win only apparent victories while the satanic new world order continues its long march to total global domination reply to that section most of the freedom movements patriot tea party etc are ignorant of what comprises true liberty the fight for liberty must be based on philosophical underpinnings of universal principles of nature or the fight will fail and as the fight fails so it leaves the path open to tyranny and global governance examples of incomplete or false ideas of liberty include those in the sovereign movement who traverse complicated complicated legal machinations filing paperwork in order to be classified as a different class of person by the state or tea baggers who really rail against certain segments of the population going back to aquinas on liberty true liberty is the highest of natural endowments it is the portion only of intellectual or rational natures and it confers on man this dignity that he is in the hand of his counsel and has power over his actions but the manner in which such dignity is exercised is of the greatest moment in as much as on the use that is made of liberty the highest good and the greatest evil alike depend man indeed is free to obey his reason to seek moral good and to strive unswervingly after his last end yet he is free also to turn aside to all other things and in pursuing the empty semblance of good to disturb rightful order and to fall headlong into into the destruction which he has voluntarily chosen worse still are those who promote a false and absurd notion of liberty by perverting the idea of freedom or extending it to things in respect of which man cannot rightly be regarded as free lenev's comment on this the creator has given humans the ability to reason and choose reason aligned with truth will lead inevitably to liberty but humans can also choose to ignore reason and choose less wisely which will inevitably lead to confusion and chaos a brilliant synopsis their brilliant analysis by lenev now i'd like to comment briefly on the the very last uh thing that aquinas said in that section were still those who promote a false idea an absurd notion of liberty that's what we have today in the united states people who believe that they're free and yet there's a police state all around us and the police that actually do these actions and think that they're within their rights to do them and that that is somehow indicative of a free state by perverting the idea of freedom or extending it to things in respect of which man cannot rightly be regarded as free in other words trying to say that you have rights that you don't have which police and military do every day thinking that they have rights that aren't extended to to other people that these people don't have these rights but i have the right to do this wrong you don't you never did and you never will rights can't be granted to people can't suddenly have a right that you didn't have yesterday or last month or yet last year or ten thousand years ago and you're not going to have any rights ten thousand years from now that don't exist now there's nobody in the population that can grant you a right that you don't have to step on the freedoms of other people and to do things that are in direct contravention to their natural law rights there's no such thing those rights don't exist it doesn't matter who told you you're allowed to do it or what they wrote down on a piece of paper in a law book someplace so going back to aquinas's essay the declaration of independence states as follows we hold these truths to be self-evident that all men are created equal that they are endowed by their creator with certain unalienable rights that among these are life liberty and the pursuit of happiness sad to say this is a very ambiguous and therefore dangerous proposition as it is subject to any number of conflicting interpretations indeed the proof of its weakness is the young age of the total collapse of the american republic obviously that clause has not been interpreted properly if it had been we would not have devolved into barbarity in less than 250 years it can be argued that the american republic was built on free masonic sand and thus if we are going to rebuild it we might want to recodify our foundational principles in order for america to throw off its internationalist oppressors a proper understanding of natural human liberty in the minds and the hearts of the american people is indispensably necessary for we the people have been brought low and have been rendered soft and vulnerable as the direct result of having imbibed and believed a false notion of liberty and the pursuit of happiness lenev responds to this section by saying ever since i realized that the phrase quote life liberty and the pursuit of happiness was inspired by john locke's quote life liberty and property i have considered that happiness is far too ambiguous while property is clear and specific this small linguistic departure by the founding fathers may have set the stage for the devolution from our country's original ideals and ladies and gentlemen i could not agree more with that statement because property implies ownership and what this is ultimately about is the ownership of an individual that we as an individual own ourselves self-ownership is what this is about and that is conveyed much more effectively in the word property than in the word happiness which is subjective okay i my body my thoughts my emotions and my actions belong to me while my spirit is inhabiting this physical vehicle and you could say well you don't ever actually really own anything because you're going to die and that may be the case well then i am currently in possession of this body and stewardship of it if you will no one else owns this vehicle nor do they own the thoughts the emotions and the actions of this vehicle i own those things okay lenov concludes this part by saying happiness is a shallow feeling that does not predicate freedom sometimes we must feel pain when we do the right thing think about that and we'll be right back folks [Music] we're back everyone last segment on this edition of what on earth is happening here today i want to jump right back into the essay on liberty by aquinas but uh actually i'd like to just mention uh that quote uh by leneff before we went to this last break he said sometimes we must feel pain when we do the right thing boy isn't that the truth that this juncture in human history see the problem is most people their actions are governed purely on the self interest of not experiencing pain and therefore they don't want to do the right thing but you know at a time of extreme darkness like we're in right now sometimes the thing that we have to do above all else is rush headlong into the most painful path it's a shame that only a very very small minority are willing to do that or these problems would probably be overcome very quickly instead they're probably going to be very long lasting and the pain is probably going to be maximized but jumping back into the essay aquinas says as a natural endowment given to human nature by god the omnipotent creator of the universe liberty must exist for an end or ultimate purpose and this end must be identical to the essential determination and composition of human nature which is rational i.e intellectual and volitional the end or object both of the rational will and of its liberty is that good only which is in conformity with reason liberty belongs only to those who have the gift of reason or intelligence animals do not possess liberty considered as to its nature it is the faculty of choosing means fitted for the end proposed for he is master of his actions who can choose one thing out of many i'm going to take a brief pause here and say think about what he's saying if you want to get here you have to choose the means for getting to that end so if you want order you have to understand the natural laws which bring about order if you want freedom you have to understand the natural laws with which bring about freedom and then act to those ends okay back to the essay freedom of choice is therefore the essential property of the human will but the will cannot proceed to act until it is enlightened by intellectual knowledge for the proper object of the will is the good if will cannot proceed to act until it is enlightened the will cannot proceed to act until it is enlightened by the intellect nothing can be desired by the will unless it is judged by the intellect to be a good thus in all voluntary acts choice is subsequent to an intellectual judgment that something is good or desirable lenev responds by saying our gift of reason is a means to a specific end if we use our intellect in harmony with natural law that is free of contradiction from truth we become more free and progress toward our ultimate end i don't pretend to know what that end is but our nature rewards acting out of love and moves us closer to unity our gift of will is tied to rational thought we use reason to judge the options before us and when we ch and then we choose resulting in action every voluntary act is an expression of our ability to choose rightly but we always choose based on our evaluation of what we will result in the most good our thought processes can fail to deliver the good we may believe instead of reason holding close those institutions of security that contradict fundamental moral truths or we might think we know based on false information we are not perfect but striving to discover and understand that which is true will always keep us pointed in the right direction wanting to know the truth is what lenev is saying here the desire to know and that is a function of love not fear when we are in fear we are kept in ignorance and we refuse to want to know so many people are trapped in that state returning to aquinas he says the will is referred to as the repetitive power of the soul or the rational appetite like the intellect the will is a spiritual faculty it is that power through which an individual seeks to execute an action or attain to an object proposed to it by the intellect the object of the will is always the good and even in the election of evil it must be proposed to the will under the appearance of good or in other words obfuscation okay going back to aquinas he says anything chosen as a means is therefore viewed under some aspect of goodness people who are claiming that they're doing the right thing that they're doing the right thing even though you know they have been basically uh conditioned into accepting that as the right is what he's saying here in other words the road to hell is often paved by good intentions people who think they're doing the right thing going back to the essay therefore because in all voluntary acts choice is subsequent to a judgment upon the truth of the good presented declaring to which good preference should be given it is an immutably true principle that human liberty depends entirely on intellectual judgments that conform to reason and the natural law if a judgment which does not conform to natural law or to reason and which is therefore objectively false and immoral is acted upon by the will then it is a source of grave disorder in society exponentially multiply this number of individual immoral acts and you have a republic that collapses from moral decay in a short period of time lenev responds by saying humans base all choice of action on intellectual evaluation and those choices are based on what we judge is quote best for us at given moments if a choice is based on fallacious reasoning instead of truth and logic we are in contradiction with nature and the result grave disorder it is the exponential accumulation of all the false choices leading to immoral actions that have led to the state of confusion and the increasing lack of liberty we find ourselves in aquinas says hedonism i.e the tyranny of the passions has no place in the well-ordered man or the well-ordered civilization unfortunately our elitist overlords have long been at dumbing us down to the level of beasts that cannot employ their natural rational endowments but only their carnal lusts we allowed this to happen to us because we mistakenly believed the lie that they told us namely that true liberty is the quote right to do whatever we want whenever we want as long as it is not illegal or discoverable true liberty is an essential property of objective truth and morality true liberty is an essential property of objective truth and morality therefore there can be no true liberty in a civilization that enshrines moral relativity and that is how aquinas's essay concludes lenev responds to that conclusion by saying what is moral is what is true truth is truth it is what has happened there can be no shadings of truth no relative orderings of less or more truth it simply is to the degree that truth can be known knowing what is moral action becomes completely unambiguous we have been educated to believe in a lie that morality can be determined and handed down in the laws of man this has led to an idea that what is good is simply what feels good that is hedonism this way of thinking excludes reason and therefore prevents us from connecting with what is true this is an artifact of the domination culture and the extent of our acceptance of that is the extent that we subjugate ourselves and move further away from liberty and closer to slavery i would ask everyone to check out this essay read it multiple times i'll post the link with this podcast it is critical for everyone to understand what is being said here that's all the time we have for this edition folks we'll see you here next week stick around chris everard is up next to your own oracle

What On Earth Is Happening Show #080

Topics: *Natural Law, Morality, Aquinas On Liberty Essay, Law Of Cause & Effect, Force vs. Violence*

freedom man that's what it's all about [Music] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe [Music] welcome one and all you're listening to what on earth is happening right here on the Oracle broadcasting radio network I'm your host mark passio my website what on earth is happening dot-com the network's website Oracle broadcasting dot-com today is Sunday October 9th 2011 and we have an information packed show for you here today we're going to be continuing our ongoing discussion and revelation of natural law on the show here today we will be wrapping up our analysis on the Aquinas on Liberty essay which I broke down a bit last week at the end of the show and also on David Lin f's commentary on it from the Lucid streams blog so that's coming up and then in the later part of the show I will be breaking down the very crucial distinction between force and violence an incredibly important topic when it comes to the understanding of natural law and its principles and its effects in our world so that's coming up on this edition of what on earth is happening let me give the calling number at the beginning of the show if you want to call in feel free to call me at any time never any taboo topics here but I would ask that the scope of discussion or questions be limited to some form of talking about natural law as we have been doing over the past several weeks and will continue to do until we pretty much cover all of the topics that are really essential to have a firm grasp upon to understand the precarious situation regarding true freedom in this country and in indeed throughout the world as it hinges upon an understanding of natural law so the topic for discussion today is natural law and if you want to call in and talk about that the call-in number is eight six six eight four one one zero six five again the call-in number eight six six eight four one one zero six five very quickly I'd like to just reenact onference that's coming up here in Philadelphia next weekend and I'll be attending and I don't think that I will be off air next week you know how to run a rerun I'm pretty certain I'll be back here in time to do the show live but I am going to attend both days of this conference and probably leave a little bit early on Sunday this is the mufon PA East Coast Conference the mutual UFO network October 15th and 16th that's next Saturday and Sunday October 15th and 16th at the Four Points Sheraton Philadelphia Northeast that's at 94 6100 veldt Boulevard here in Philadelphia the Saturday speakers Joseph Mara Linda Moulton Howe ville Webber bill burns and John Ventre on Sunday the speakers will be major Robert OD George filer dr. Lynn khatai Jerry Jonas and crisp Augustine a great lineup of speakers for both days only $35 admission on Saturday and 30 on Sunday the conference goes from 8:30 to 5:00 p.m. on Saturday and 9:00 to 4:00
